5) Monitoring

a. EOY (Effectiveness) Camp Creek pasture met end of year standards, Trail Creek pasture bottoms were right at standards two weeks earlier then off date. In both pasture the permittee was asked to move early. In respect to Camp Creek this was due to use around the only available water sources in this smaller pasture. This move took place approximately two weeks ahead of schedule, placing all the cows in Trail Creek two weeks in advance. Permittee's asked if they could place their cows in Sulphur Creek pasture for the last two weeks instead of coming off, request was granted. Sulphur Creek met standards at end of year.
