

**SOUTH HAYDEN C&H & LITTLE SAWMILL (BLM) ALLOTMENTS
ANNUAL OPERATING INSTRUCTIONS**

These are the annual operating instructions for the 2008 grazing season for the South Hayden C&H & Little Sawmill allotments and will be considered part of the terms and conditions of the F.S. and BLM grazing permits.

I. Permitted / Authorized Use

Beyeler LLC							
Carl Snyder (Merrill Beyeler)							
Term Grazing Permit				Authorized use			
No.	On Date	Off Date	H.M.s	No.	On Date	Off Date	H.M.s
222	5/1	9/30	896	200	5/10	8/20	671
300	5/1	9/30	1530	250	5/10	8/20	838
			2640	450	11/1	12/1	459

You are authorized grazing of dry cows after November 1 on the BLM pastures not to exceed an overall BLM/FS allotments total of 2640 HMs of grazing.

II. 2007 Grazing Schedule and Monitoring Utilization Standards

Actual Grazing Schedule*				** Allowable Standards	
Unit Name	Cattle #’s	On Date	Off Date	Riparian	Uplands
Berg-Green	250 cc	5/10	6/5	4” Stubble	50% use
Berg-Green	100 cc	5/15	6/5	4” Stubble	50% use
Antone Pasture	350cc	6/6	7/2	4” Stubble	50% use
Antone Pasture	100 yrl	6/6	7/2	4” Stubble	50% use
Meadow Mtn	450 C	7/3	8/1	5” Stubble	45% use
Mill Cr. USFS	450 C	8/2	8/20	5” Stubble	45% use
Mill Cr. Flat	450 C	11/1	12/1	N/A	50% use
Indian Caves	450 C	11/1	12/1	4” Stubble	50% use
Straggle Gulch***	w/above	11/1	12/1	4” Stubble	50% use
Zeph Cr USFS	REST			4” Stubble	50% use

*- These dates are tentative.

**- Do not wait for the forest officer to tell you it is time to move! It is the permittee's responsibility to insure cattle are moved before utilization levels are exceeded.

*** Grazing capacity of Straggle Gulch will be affected by private land fencing.

Stubble and or utilization will be measured at the end of the growing season.

Riparian area use on Carex and other hydric species:

50% use is equal to about a 4 inch stubble height

45% use equals about 5 inches of stubble

40% use equals about 5-6 inches of stubble

35% use equals about 6-7 inches of stubble

Long-Term Rotation Plan

Unit	Est. HMs	Yr-05	YR-06	Yr-07	Yr-08	actual rotation	days
Berggreen Pasture	317	Fall	Fall	1	2		
Indian Caves	400	2	1	Fall	Fall		
Straggle Gulch	320	1	2	Fall	Fall		
Mill Cr. Flat	373	3	Fall	Fall	5		
Antone Pasture	300	Fall	3	2	1		
Mill Creek (FS)	329	4	Rest	5	4		
Zeph Creek (FS)	351	5	5	4	Rest		
Meadow Mtn.(FS)	426	Rest	4	3	3		

III. PERMITTEE MANAGEMENT RESPONSIBILITIES

Distribution of livestock is important for proper forage utilization. Proper distribution can be attained by:

- Ensuring critical water developments are functioning properly before cattle enter any of the grazing units
- Salt will be placed 1/4 mile away from all heavily used trails, roads, water, and all natural concentration areas.
- Riding should be done to herd cattle into unused areas
- Monitoring herd use will prevent overutilization of stream bottoms and other key riparian areas

Use of motorized vehicles will be allowed prior to July 16, to distribute salt or do maintenance in closed areas, if a valid permit is in possession.

When cattle leave a grazing unit, the water pipelines in that unit are to be drained.

The permittees shall make every effort to remove all cattle from a grazing unit when the grazing period has ended in that unit, 5 days for timbered units, 3 days for non-timbered units.

To meet the State of Idaho's provision for trichomoniasis testing, all bulls must be tested at least 45 days prior to the turnout date.

Cattle that die from a contagious disease, or that die at a location where they may contaminate water or be a public nuisance, must be properly disposed of.

WHERE A STATE CLOSURE ORDER EXISTS - Any hay or straw used in association with this permit, will be certified and/or tagged as noxious weed, or noxious weed seed free as directed by the order (#04-00-057, 4/96, according to 36CFR 261.58 (t)) and state law (Idaho Code sec 22 according to IDAPA 02.06.31.001, 7/99).

Please mail your actual use booklet in at the end of the grazing season.

IV. IMPROVEMENT MAINTENANCE/CONSTRUCTION

Improvements on the South Hayden/Little Sawmill C&H Allotment will be maintained to Forest Service standards prior to livestock entry on the allotment or into the first unit.

If verification of maintenance is not received from the permittee, an inspection will be made. If we find that maintenance has not been completed and livestock are grazing an area unscheduled for use at the time, they will be considered unauthorized. The responsible permittee may be billed for excess use and or permit action will be taken.

Individual maintenance is assigned as follows for these structures:

<u>No.</u>	<u>Name</u>	<u>Description</u>	<u>Size</u>	<u>Responsibility</u>
4130	Meadow Cr.	T17N. R23E. Sec 36	1 wd	Beyeler LLC

Projects Proposals

<u>Name</u>	<u>Description</u>	<u>Size</u>	<u>Responsibility</u>
Ridgeline Fences	Will Check for Effectiveness		FS

V. ACTION SUMMARY

Anticipated problem	Probable solution
Stragglers left after herd leaves the pasture.	Permittees agree to have unit cleaned of all livestock within 3 to five days, & to check back to keep unit cleaned. Permittee will notify when off FS in September.
Maintenance of structural improvements, fences and water troughs.	Maintain as per part III of the term grazing permit before livestock entry onto the unit. All Permittees need to go maintenance responsibilities to ensure all improvements will be maintained.
Gates left open between FS, BLM and private land during the hunting season.	Permittees may have to check daily so unit/pasture integrity can be maintained.

VI. BILLING INFORMATION

BLM to bill after-the-fact, First after Spring/ Summer use, and second after late Fall use.

Grazing fees for the 2008 grazing season are \$1.35 per Head Month. The Forest Service will be billing \$.10 per Head Month for the Idaho Rangeland Resource Commission (IRRC). This will be done separately from your grazing fees for the Forest Service.

I have reviewed and accepted these Annual Operating Instructions for the 2008 grazing season. Any changes must be approved by the District Ranger.
