

Vaccines Included in the VFC Program

VACCINES FOR CHILDREN PROGRAM

The purpose of this resolution is to update VFC resolution 2/06-1 pertaining to the vaccines included in the VFC program. This resolution does not make any substantive change to the previous resolution except the following:

1. Add Human Papillomavirus vaccines.

VFC resolution 2/06-1 is repealed and replaced by the following:

The ACIP proposes that vaccines to prevent the following diseases be included in the Vaccines for Children (VFC) program:

**Diphtheria
Haemophilus influenzae type b
Hepatitis A
Hepatitis B
Human Papillomavirus
Influenza
Measles
Meningococcal
Mumps
Pertussis (whooping cough)
Pneumococcal
Poliomyelitis
Rotavirus
Rubella
Tetanus
Varicella**

The ACIP includes in the Vaccines for Children program vaccines which are used to prevent the 16 diseases listed above; to be administered as provided in other VFC resolutions.

Adopted and Effective: June 29, 2006
