The boundaries of the regular blocks are 4,800 international meters on a side and contain 2,304 hectares. The regular boundaries are defined in terms of X and Y coordinates of the Universal Transverse Mercator Grid System based on the Geodetic Reference System (GRS) 1980 Ellipsoid.

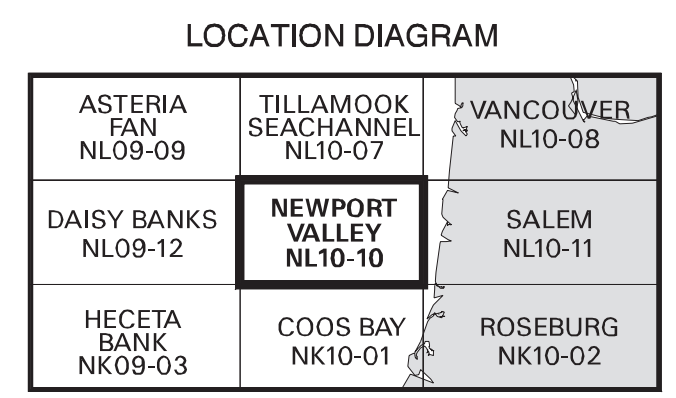

The coordinate values appearing on this document were derived using NAD 83/WGS 84.

Legend: — State Seaward Boundary
— Limit of "8(g) Zone"

The State Seaward Boundary and Limit of "8(g) Zone" lines depicted hereon reflect the official federal position for Submerged Lands Act and OCS Lands Act purposes. The areas of the fractional blocks abutting these lines have been determined and are as depicted on the Supplemental Official OCS Block Diagrams (SOBD's). Consult the SOBD's for official descriptions and approval dates.

The grid distance of the irregular blocks along the zone boundary are defined in the Minerals Management Service Technical Information Management System.

Copies of these diagrams and other information may be obtained at the appropriate MMS OCS Region, Office of Program Services.

This diagram is prepared in accordance with 30 CFR 256.8
