Discovery Expedition: Bitterroot Corps

Canoe Camp Area: 1805 Military Encampment

In 1805, through what is now the Lolo and Clearwater National Forests, Lewis and Clark followed the Lolo Trail through the mountains of Idaho and Montana. This rugged path had been carved over the centuries by indigenous peoples traveling to hunting areas and to trade with neighboring tribes. Known locally as the "Lolo Motorway," the Lolo Trail National Historic Landmark is still traveled by adventurous explorers and is still sacred to the Ni Mii Puu (Nez Perce Indians).
