

Physician Post-Resident HSR&D Fellowship Program Announcement

Purpose

Rehabilitation Outcomes Research Center of Excellence - Gainesville, Florida

The Rehabilitation Outcomes Research Center is recruiting a Physician Post-Resident Fellow in Health Services Research for a 2-year fellowship program. The fellow will have an opportunity to work with an experienced interdisciplinary research team.

The goals of the fellowship program are to (1) enhance Health Services Research knowledge and skills of physicians; and (2) increase recruitment and retention of HSR&D researchers within the VHA.

Funding Support

Salary stipend is based on years of previously completed ACGME accredited physician residency training and VA stipend rates based on the local hospital. Appointments will be made under 38 U.S.C 7406 for 2 years.

An additional \$7,000 per year will be allotted for the physician fellow in support of their research activities.

Eligible Physicians

- U.S. citizen
- Completed an ACGME – or ECCOPT – accredited physician residency program
- An active, full, and unrestricted license to practice in the U.S.
- ABMS or ECCOPT recognized BC/BE with demonstration of active pursuit of BC (board certification)
- ECFMG documentation, if international medical graduate

Application Details

All interested candidates should submit Curriculum Vitae electronically and/or call for more information.
