VISN 7 – CAVHCS, Montgomery Division – Healthcare Delivery Study and General Capital Plan

Secretary's CARES Decision

- VA will proceed with a study of the feasibility of converting the Montgomery CAVHS to an outpatient-only facility as part of the CARES implementation process.
- The study will examine the impact of mission change on access to and quality of care as well as the cost-effectiveness of potential realignment. VA will consider comments from stakeholders as it conducts the study. A Capital Plan for the Montgomery campus will be developed.

Specific Considerations/Requirements

Using forecasted health services utilization data and patient origin data the study would determine the feasibility of converting the Montgomery campus to an outpatient-only campus to meet future demand. The study will include at least three options for providing the health care and converting the campus. Each option will include a general Capital Plan for the Montgomery campus if appropriate.
