Docket No 030604145-3145-01
RIN 0648-AR16

Attention: David Kaiser, Coastal Program Division, 1305 East West Highway Silver Spring MD

I am totally opposed to any conclusions that Vice President Cheney and his National Energy committee has come up with. I believe the regulations should stay as they have been for 30 years. it is my opinion that the people in the oil/gas business are biased in favor of putting oil/gas wells in inappropriate places so that they can profit from the money and that these same people have absolutely no regard for the environment.

I want these decisions to favor the environment. I want oil/gas use to be diminished through solar power use. The impact of the oil/gas industry on national policy has been abusive.

I do not want any changes the National Energy committee and Cheney's people has proposed to be implemented since I believe they are biased and not truly good for America.
