SVCPCCT	PERCENT OF SERVICE CONNECTED -----	94
VISN	VETS INTEGRATED SERVICE NETWORK -----	96

Introduction

This manual is produced through the Veterans Information Resource Center (VIREC), a national resource center within the Health Services Research and Development Service (HSR&D) of the U.S. Department of Veterans Affairs, on an annual fiscal year basis. It contains frequency tables for selected variables in the fiscal year 2000 Medical SAS Inpatient “Main” dataset, an extract from the Patient Treatment File (PTF), and Medical SAS Outpatient “Visit” dataset, an extract from the National Patient Care Database (NPCD), of the Veterans Health Administration (VHA).

The frequencies are presented in two columns – “*All Workload*” and “*Veterans Only*”. The “*All Workload*” column contains every record in the dataset while the “*Veterans Only*” column is a subset of this which includes only records with a MEANS TEST INDICATOR (MEANS) variable value of “AN”, “AS”, “C” or “CO”. These tables reflect the dataset contents as of July 2001.

Dataset Common Name	Dataset 2-Character Reference	Full Dataset Name	Description
Main	PM	MDPPRD.MDP.SAS.PM00	All demographic, clinical, stay information
Visit	SF	MDPPRD.MDP.SAS.SF00	All encounter stop codes, patient demographics

This manual can be used in conjunction with other related VIREC publications: the *Medical SAS® Inpatient Datasets – FY 2000: A VIREC Resource Guide*, which describes the fiscal year 2000 medical SAS inpatient datasets, and the *Medical SAS® Outpatient Datasets – FY 2000: A VIREC Resource Guide*, which describes the fiscal year 2000 medical SAS outpatient datasets.
