## Introduction

The Veterans Affairs Information Resource Center (VIReC), a national resource center of the Health Services Research and Development Service (HSR&D) of the U.S. Department of Veterans Affairs (VA), produces this research user guide on an annual fiscal year (FY) basis. It contains frequency tables for selected variables in the FY2005 Medical SAS<sup>®1</sup> Inpatient Acute Care “Main” Dataset and Medical SAS Outpatient “Visit” Dataset.

<b>Common Dataset Name</b>	<b>Dataset 2-Character Reference</b>	<b>Full Dataset Name</b>	<b>Description</b>
Main	PM	MDPPRD.MDP.SAS.PM05	All demographic, clinical, stay information
Visit	SF	MDPPRD.MDP.SAS.SF05	All encounter stop codes, patient demographics

This guide presents each variable in two columns: The “*Internal Value*,” which represents the actual value stored in the dataset, and the “*Formatted Value*,” which represents the value that appears in printouts when the standard SAS Library is used to assign a description to the variables’ internal values. The programmer may always establish a different SAS Library with different formatted values. Note that the formatted values may not match with the variable descriptions shown in the data sources depending on the SAS Library used to assign the formatted value to the internal value.
