Date: 14-MAY-08

Build 10 SW Note 43 and NWS NOAANet

For Build 10.0 deployment, transmission of Super Resolution data (NWS WSR-88D sites only) via Archive II LDM should be enabled once the first phase of NOAANet installation is completed for the site. The first phase of NOAANet deployment consists of the conversion of the Regional WAN to NOAANet. The procedures enabling Super Resolution transmission are contained in Attachment 3 of Software Note 43, RPG Software Build 10.0 Load Instructions.
