## HOW TO ORDER NODC PUBLICATIONS

This flier lists the publications currently available from the NOAA National Data Centers' National Oceanographic Data Center (NNDC/NODC). A price list and order form for all publications can be found on the last pages. Please note the shipping/handling charges described at the bottom of the price list, and add these to the total cost accordingly. Please also note that, while NODC can accept credit card orders directly, orders containing checks or money orders must be mailed to the NNDC Fiscal Group address (next column.)

Prepayment is required for non-Federal customers and may be made via:

- Credit card (Visa, Master Card, American Express or Discover)
- Check or money order (in U.S. dollars drawn on a U.S. bank and made **payable to the "NOAA National Data Centers-NODC"**)

### ORDER ONLINE

Most publications and other data products of the NODC, and the other NOAA National Data Centers, can be ordered via the Internet through the NOAA National Data Centers Online Store: <http://www.ndc.noaa.gov>. This secure system allows customers to provide their credit card information to order products online. Prices for products ordered online are the discount prices normally available only to U.S. customers affiliated with government agencies, universities, and other non-profit organizations.

Additional publications and published papers are available as .pdf files via the NODC web page at <http://www.nodc.noaa.gov>

### BY PHONE

Telephone orders should be directed to:  
301-713-3277

### BY E-MAIL

Send your e-mail orders to:  
[NODC.services@noaa.gov](mailto:NODC.services@noaa.gov)

### BY FAX

Orders may be faxed to:  
301-713-3302

### BY FOREIGN WIRE

Foreign wires should be sent directly to Bank One, NA routing transit code 0710-00013, for credit to DDA #11-71542 (NOAA National Data Centers). Please add \$15 to the order to cover the bank's service charge.

## ■ NOAA ATLAS SERIES

The **World Ocean Database 2005**: NODC's latest major upgrade of this popular database contains 7.9 million temperature profiles, and 2.7million salinity profiles, as well as other profile data. It is the largest collection of quality-controlled global ocean profile data available internationally without restriction.

- NA-60 Boyer, T. P., J. I. Antonov, H. Garcia, D. R. Johnson, R. A. Locarnini, A. V. Mishonov, M. T. Pitcher, O. K. Baranova, and I. Smolyar, 2006: **World Ocean Database 2005**, NOAA Atlas NESDIS 60, S. Levitus, Ed. U.S. Government Printing Office, Washington, D.C., 182 pp., DVD.

The **World Ocean Atlas 2005** is a set of objectively analyzed ( $1^{\circ}$  grid) climatological fields of in situ temperature, salinity, dissolved oxygen, Apparent Oxygen Utilization (AOU), percent oxygen saturation, phosphate, silicate, and nitrate at standard depth levels for annual, seasonal, and monthly compositing periods for the World Ocean. It also includes associated statistical fields of observed oceanographic profile data interpolated to standard depth levels on both  $1^{\circ}$  and  $5^{\circ}$  grids.

The **World Ocean Database 2001**: The oceanographic databases described by this atlas series greatly expands on the *World Ocean Database 1998* (WOD98) product. We have expanded these earlier databases to include data from new instrument types such as profiling floats and new variables such as  $pCO_2$  and  $tCO_2$ .

**The World Ocean Atlas 2001:** Oceanographic analyses described by this atlas series expand on earlier works, i.e. the *World Ocean Atlas 1998* (WOA98), *World Ocean Atlas 1994* (WOA94) and *Climatological Atlas of the World Ocean*. Previously published oceanographic objective analyses have proven to be of great utility to the oceanographic, climate research, and operational environmental forecasting communities. Such analyses are used as boundary and/or initial conditions in numerical ocean circulation models and atmosphere-ocean models, for verification of numerical simulations of the ocean, as a form of "sea truth" for satellite measurements such as altimetric observations of sea surface height, for computation of nutrient fluxes by Ekman transport, and for planning oceanographic expeditions.

The **World Ocean Database 1998** publications series display the spatial and temporal distribution of the data in the NODC WOD98 database. The WOD98 expands on WOA94 by including the additional variables nitrite, pH, alkalinity, chlorophyll, and plankton, as well as all available metadata and meteorology. The second part of this extension is the World Ocean Atlas 1998 (WOA98) which presents objectively analyzed fields of many of the variables in WOD98 (see next section). Each WOD98 publication is dedicated to a single parameter in the data set.

The **World Ocean Atlas 1998** publication series presents global, objectively analyzed fields of major ocean parameters on a one-degree latitude-longitude grid for selected standard depth levels from the sea surface to 5500 m depth. These atlases present analyses of temperature, salinity, oxygen, phosphate, nitrate, and silicate data, and expand on the previous 1994 atlas set by including the additional variables nitrite, pH, alkalinity, chlorophyll, and plankton, as well as all available metadata and meteorology. The WOA1998 was produced from the NODC's data holdings as of the first quarter of 1994, as well as some of the data submitted to NODC since 1994. In addition, data gathered as a result of the IOC/IODE GODAR project, the Global Ocean Database project and Global Temperature Salinity Profile Project (GTSPP) project, were included in this study.

**The Atlas of Surface Marine Data 1994 (ASMD94)** is an atlas series depicting the seasonal and yearly variations of the surface marine atmosphere over the global oceans. Quantities include directly observed parameters (e.g., sea surface temperature, air temperature, sea level pressure, humidity, cloudiness, winds), a full set of heat and momentum fluxes (short and long wave radiation, latent and sensible heat flux, wind stress), fresh water fluxes (evaporation, precipitation, buoyancy flux), and a variety of derived quantities (e.g., air density, virtual temperature, stability parameter). All quantities shown in the atlas series are derived from individual ship, buoy, and other marine observations found in the Comprehensive Ocean Atmosphere Data Set (COADS) Release 1 (and an interim release). The seasonal plots depicted in the atlas were computed from monthly mean data. Monthly mean climatologies covering 1945-1989 and monthly mean anomalies were computed on a 1-degree latitude by 1-degree longitude grid and objectively analyzed. The grid and objective analysis are basically identical to that used in the World Ocean Atlas 1994.
