

Performance Measurement System: Coastal Management Programs

NOAA Ocean Coastal Resource Management
Coastal Programs Division
March 2006 Program Managers' Meeting

Strategic Planning Targets

- What role should performance measures play in setting strategic plan targets?
- What should national targets look like?
- Can state/territory strategic plans be used to set targets for a bottom-up approach?

Regional Workshop Summary

- Regional workshops held in the Great Lakes, Northeast-Mid Atlantic, California, Islands, Northwest, and Southeast
- Modified data collection forms and glossaries based on feedback. Send comments on new glossaries by April 30, 2006.

Lessons from Workshops

- Not all program activities can be accounted for in the performance measures
- Few programs were able to integrate with the 309 process due to timing limitations
- Most programs are finding data sources exist at other state agencies or programs

Data Management

- 28 programs have signed up for Coastal Management Portal accounts to submit data
- To date, 10 programs have submitted Phase 1a data
- Only a few programs have begun developing their own indicator data management system

Comments and Questions

- Comments and questions should be sent to Laurie.Rounds@noaa.gov
- Please post questions to the performance measurement system forum which will be available on the Coastal Management Portal.
- Guidance and a list of program contacts will be made available through the portal.
