

We live in a residential area northwest of Centennial Airport, in the vicinity of Orchard Road and Dayton Street. I am writing in support of the Noise Abatement Measures that have been endorsed by the Greenwood Village City Counsel.

We currently are affected by airport noise on an intermittent basis at all hours of the day and night. Planes regularly fly at low elevation over our house. It is not unusual for us to be awakened at 3 AM due to a low flying plane that is landing or taking off. I don't understand why the airport allows take offs and landings over residential areas in the middle of the night. However, if this must continue, I request that the flight path should be modified to the 350 - 010 heading as per the Part 150 Study to avoid residential areas such as ours.
