

I have read and understand the Part 150 Noise Study Recommendations. I am recommending the following:

- 1) Please Ban all Stage 1 aircraft.
- 2) Please Ban all Stage 2 aircraft between the hours of 8 PM and 6 AM.
- 3) Fly a 010-degree departure heading for business jets between the hours of 8 PM and 6 AM.
- 4) Please implement the Flight test a 350-010 degree "fan" departure heading on a 24 hour basis.
- 5) Eliminate the "preferential runway" use procedure, It hasn't abated any noise yet.
- 6) Please implement a policy to fly a 170-degree departure heading for approximately 4 miles before executing a + or - 20-degree turn. Though it does not affect my neighborhood, it duplicates the problems we experience.
- 7) Amend Zoning and Planning documents to accommodate compatible development.
- 8) Please establish a Noise Office—and one easy to access.
- 9) Please fund, acquire and install a radar-linked noise monitoring system. If nothing else, this should be a priority.
- 10) Establish a "Fly Quiet" Program for pilots, and make them accountable.
- 11) Conduct periodic reviews of plans and operational procedures.
- 12) Establish a standing "Roundtable" of stakeholders only if it is meaningful.
