

Dear Ms. Bruce, Only at a recent meeting of the Village East Association did we learn of an outdated study suggesting the flight path of Centennial Airport be changed such that we might expect departing aircraft to fly over my house. We wish to strongly object to such a change in flight path. We have lived in our house for 33 years. We considered schools, and aircraft noise prior to purchasing our house. We had previously rented near the old Stapleton airport. We have had no aircraft noise in our past and do not want it now. Changing the flight path will decrease the value of our home and radically change the noise factor we considered when purchasing our home. As someone who enjoys my barbeque in the summer to entertain friends and neighbors on my extended covered patio, our entire lifestyle would be changed. We bought well prior to airport noise being a problem and do not want it introduced just as we retire. I strongly urge your support to oppose any change in the flight path at this late date. Thank you for your consideration, George and Janelle Podrasky, 1755 S. Oakland St. Aurora, CO 80012. (303) 750-9956
