

Would just like to add personal note to those of you deciding on recommendation 1 (Stage 1 Engine Ban) and recommendation 2 (Stage 2 ban between 10pm and 7am).

Appreciate that we as a community have to work together on issues like these and need to try and understand everyone's perspective. Imagine the owners of stage 1 and 2 aircraft would like to be able to utilize Centennial airport as it best fits their schedule and travel plans. After all this is a fair and free country and we should be able to come and go as we choose.

However, the coming and going, between 10pm and 7am, of a stage 1 or 2 aircraft is a noisy event, that has the impact of waking my 3 and 4 year old. As with most children loud noises that wake them are especially terrifying and send both children into tears. Most of my neighbors experience similar situations in their homes 2-3 times per week. So naturally, I would like to see Recommendation 1 and 2 passed. Of course I realize that I have chosen to live here and also could choose to live someplace else. It seems reasonable and perhaps safer to ban traffic between 10pm and 7am.

Regardless of the decision, I thank you for providing the safest, most efficient aerospace system in the world.

Sincerely, Jason Wyrick
