

I understand that there is a study under way to evaluate flight paths at Centennial airport.

I'm not sure why this is being done, but suspect that people in Greenwood Village are behind it.

Centennial airport has been in existence for the entire 20 years I have lived in Colorado. Changing the flight pattern to accommodate individuals who built homes near Centennial is totally unacceptable. As I understand it 3 options include recommendations that would increase traffic over Aurora. I am strongly opposed to implementation of a 010 degree departure at night or 24 hour flight tracks between 350 and 010 degree headings.very opposed to:

Again, I strong oppose these recommendations and urge the FAA not to approve these flight tracks. Rather, Centennial airport should continue to use the preferential runway more frequently to reduce the number of flights over my neighborhood.

Sincerely,

Jeffery Jenkins
