

Didn't we hear the same complaints from folks who bought homes near Stapleton and then thought they had a right to complain about noise from an airport that had existed there long before they moved in? I personally love airplane noise. I look up every time I hear a plane go over. I kayak at Cherry Creek State Park and love watching the planes go over on their way in and out of Centennial. I live about halfway between Buckley AFB and Centennial and enjoy the traffic from both. Sometimes on the weekends when there are many flights in and out of Buckley I'll sit in my back yard and watch the fighters for hours.
