To Whom It May Concern:

This is to inform you that EDAW, Inc. of Fort Collins and Denver, Colorado, are in the process of doing an environmental survey of Western's Granby Pumping Plant – Windy Gap transmission line and proposed reroute alternative.

If this task involves your property to gain access to these transmission line routes, Western and the contractors will take precautions including, when applicable, the use of existing trails or roads, closing gates and avoiding wet areas.

If you have any questions or concerns, please contact Western's Lands Division at 1-800-472-2306.

Thank you for your cooperation in this matter.

Sincerely,

A handwritten signature in cursive script that reads "Carey Ashton".

Carey Ashton
Realty Officer
