

CONTENTS

Letter to the Reader	v
Members of the U.S. Commission on Ocean Policy	vii
Members of the Science Advisory Panel	viii
Commission Staff	ix
Acknowledgements	x
Executive Summary	xi

Part I

Our Oceans: A National Asset

Chapter 1: Recognizing Ocean Assets and Challenges	1
Evaluating the Vast Wealth of U.S. Oceans and Coasts	1
Economic and Employment Value	1
Marine Transportation and Ports	3
Marine Fisheries	5
Offshore Energy, Minerals, and Emerging Uses	6
Human Health and Biodiversity	6
Tourism and Recreation	7
Coastal Real Estate	8
Nonmarket Values	8
Undermining America's Ocean and Coastal Assets	9
Degraded Waters	10
Compromised Resources	11
Conflicts between Man and Nature	13
Acting Today for Tomorrow's Generations	15
Chapter 2: Understanding the Past to Shape a New National Ocean Policy	19
Ocean Policy from World War II to the Oceans Act of 2000	19
Formative Years	19
From Sputnik to Stratton	20
Years of Activism	22
Contention and Stalemate	23
Search for Coherence	24
Consensus for Change	25
Launching the U.S. Commission on Ocean Policy	26
A Broad Mandate	26
The Commission Members	27
How the Commission Did Its Work	27
The Result	30
Chapter 3: Setting the Nation's Sights	31
Imagining a Brighter Future	31
Building Ocean Policy on Sound Guiding Principles	32
Translating Principles into Policy	33
Ecosystem-based Management	33
Science for Decision-making	37
Effective Ocean Governance	38
Public Education	38

Primer on Ocean Jurisdictions: Drawing Lines in the Water 41

Part II
Blueprint for Change: A New National Ocean Policy Framework

Chapter 4: Enhancing Ocean Leadership and Coordination	45
Making Improvements at the National Level	46
National Ocean Council	48
Assistant to the President	50
Presidential Council of Advisors on Ocean Policy	50
Other Needed Elements	50
Making Improvements at the Regional Level	54
Chapter 5: Advancing a Regional Approach	57
Addressing Issues Crossing Jurisdictional Lines	57
Facilitating Regional Organization	58
A Flexible Process	58
Regional Boundaries	59
Enhancing Regional Research and Information	59
Functions of the Regional Ocean Information Programs	60
Administration of the Regional Ocean Information Programs	61
Chapter 6: Coordinating Management in Federal Waters	63
Meeting Growing Needs	63
Clarifying Offshore Responsibilities	64
Establishing a Coordinated Offshore Management Regime	65
A Fair Return for the Use of Offshore Resources	66
Employing Marine Protected Areas as a Management Tool	66
Federal Efforts	67
The Role of Marine Protected Areas	67
National Interests	68
Regional and Local Stakeholders	69
Chapter 7: Strengthening the Federal Agency Structure	71
Reorganizing to Support an Ecosystem-based Management Approach	71
Reviewing Previous Reorganization Proposals	71
Strengthening NOAA: Phase I	73
Consolidating Ocean and Coastal Programs: Phase II	75
Managing all Natural Resources in an Ecosystem-based Management Approach: Phase III	78

Part III

Ocean Stewardship: The Importance of Education and Public Awareness

Chapter 8: Promoting Lifelong Ocean Education	83
Strengthening the Nation's Ocean Awareness	83
Ocean Stewardship	83
Science Literacy	84
Future Ocean Leaders	84
Crosscutting Themes	84
Building a Collaborative Ocean Education Network	85
Participants in Ocean Education	85
Coordinating Ocean Education	86
Funding and Assessment	88
Linking the Research and Education Communities	89
Incorporating Oceans into K-12 Education	91
Using Ocean-based Examples to Meet Education Standards	92
Bridging the Gap between Scientists and Educators	93
Investing in Higher Education and the Future Ocean Workforce	97
The Leadership Void	97
Drawing Students into the Field	98
Expanding Graduate Educational Opportunities	98
Workforce Needs	100
Specific Federal Responsibilities	100
Strength through Diversity	102
Bringing the Ocean and Coasts to All Americans	102
Multifaceted Approaches	103
Coordinating Messages	104
Broad Outreach	104

Part IV

Living on the Edge: Economic Growth and Conservation along the Coast

Chapter 9: Managing Coasts and their Watersheds	107
Attracting Crowds, Creating Opportunities	107
People, Jobs, and Opportunities	107
Implications of Growth	108
Strengthening Coastal Planning and Management	108
Multi-layered Decision Making	108
Federal Area-based Coastal Programs	109
Other Relevant Federal Programs	113
Linking Coastal and Watershed Management	113
Linking Coastal and Offshore Management	114
Increasing Understanding of Coastal Ecosystems	116
Chapter 10: Guarding People and Property against Natural Hazards	117
Assessing the Growing Cost of Natural Hazards	117
Improving Federal Management of Hazards in Coastal Areas	118
Changing Inappropriate Federal Incentives	119
Improving Understanding	120
The National Flood Insurance Program	121
Hazards Mitigation Planning	123

Chapter 11: Conserving and Restoring Coastal Habitat	125
Assessing the Threats to Coastal Habitat	125
Conserving Coastal Habitat	126
Habitat Conservation Programs	126
Funding for Habitat Conservation	126
Restoring Coastal Habitat	127
Improving Habitat Conservation and Restoration	131
Enhancing Information and Understanding	131
Protecting the Nation’s Wetlands: A Special Case	132
Chapter 12: Managing Sediments and Shorelines	135
Understanding the Dual Nature of Sediment	135
Federal Roles in Sediment Management	136
Altering Sediments through Human Intervention	137
Changing Sediment Quantities	137
Changing Sediment Quality	137
Developing Regional Strategies for Sediment Management	138
Moving toward Regional Sediment Management at USACE	139
Weighing the Costs and Benefits of Dredging	140
Navigational Dredging	140
Beneficial Uses of Dredged Material	140
Techniques of Cost-Benefit Analysis	141
National and Regional Dredging Teams	141
Improving Understanding, Assessment, and Treatment	142
Chapter 13: Supporting Marine Commerce and Transportation	145
Connecting People, Places, and Products	145
Value of the Marine Transportation System	145
Components of the Marine Transportation System	146
Positioning the U.S. Marine Transportation System for the Future	150
Federal Roles	150
Links to the National Transportation Infrastructure	152
Information Needs	153
Emergency Preparedness	153

Part V

Clear Waters Ahead: Coastal and Ocean Water Quality

Chapter 14: Addressing Coastal Water Pollution	155
Stopping the Degradation of Coastal Waters	155
Reducing Point Sources of Pollution	158
Existing Management Tools	158
Major Point Sources	159
Improving the Control of Point Sources	161
Increasing the Focus on Nonpoint Sources of Pollution	162
Existing Management Tools	163
Major Nonpoint Sources	164
Improving the Control of Nonpoint Sources	167
Collaboration at the Watershed Scale	171
International Efforts	171
Addressing Atmospheric Sources of Pollution	172
Improving Control of Atmospheric Sources	172

Chapter 15: Creating a National Water Quality Monitoring Network	175
Recognizing the Value of Water Quality Monitoring	175
Monitoring at the Federal Level	176
Federal Programs	176
Shortcomings in Federal Programs	177
Promoting Interagency Coordination	178
Ensuring Comprehensive, Coordinated Coverage	179
Creating an Effective Monitoring Network	180
System Goals and Objectives	180
System Design	180
Technical Coordination	181
Periodic Review and Modification	181
Making Data Accessible and Useful	181
Chapter 16: Limiting Vessel Pollution and Improving Vessel Safety	183
Assessing the Benefits and Risks of Vessel Activities	183
Strengthening Vessel Safety, Security, and Environmental Compliance	184
A Culture of Compliance and Safety	184
Flag State Oversight and Enforcement	185
Port State Control	186
Reducing Vessel Pollution	187
Waste Stream Discharges	187
Air Emissions	190
Oil Releases	191
Increasing Knowledge to Guide Change	194
Additional Research Needs	194
Improving Awareness of Ocean Activities	195
Chapter 17: Preventing the Spread of Invasive Species	199
Acknowledging the Problem	199
Assessing Existing Approaches	200
Federal Statutes	200
State and Federal Programs	202
Identifying Major Pathways for Introduction of Non-native Species	203
Ballast Water	203
Global Trade in Marine Organisms	204
Making Prevention the First Line of Defense	204
Ballast Water Management	204
Controlling Other Pathways	205
Accelerating Detection and Response	206
Improving the Control of Invasive Species	206
Coordinated Action	207
International Partnerships	208
Research Needs	208
Chapter 18: Reducing Marine Debris	211
Assessing the Sources and Consequences of Marine Debris	211
Addressing Marine Debris Nationally	213
Existing Programs	213
NOAA's Role	214

Interagency Coordination	214
Eliminating Derelict Fishing Gear	216
Ensuring Appropriate Port Reception Facilities	216

Part VI

Ocean Value and Vitality:

Enhancing the Use and Protection of Ocean Resources

Chapter 19: Achieving Sustainable Fisheries	219
Contemplating Thirty Years of Fishery Management	219
Building Sustainable Fisheries Based on Sound Science	221
The Value of Science for Wise Management	221
Separating Scientific and Management Decisions	222
The Need for Independent Review	223
Using Default Measures to Ensure Progress	224
Making Research Relevant	225
Strengthening Fishery Governance	227
Clarifying Fishery Management Authority and Jurisdiction	227
Improving the Regional Fishery Management Councils	230
Ending the Race for Fish	232
Traditional Management Approaches	232
Dedicated Access Privileges	233
Reducing Overcapitalization of Fishing Fleets	235
Improving Fishery Enforcement	236
Fishery Enforcement Mechanisms	237
Enforcement Partnerships	237
Technology for Enforcement	238
Improving Enforceability as Part of the Management Process	240
Moving Toward an Ecosystem-based Management Approach	241
Linking Fisheries Management with other Regional Concerns	241
Essential Fish Habitat	243
Reducing Bycatch	244
Managing International Fisheries	244
The Status of International Fisheries	244
The Law of the Sea Framework	245
Global Fishery Conservation Agreements	245
International Fisheries and Trade	248
Chapter 20: Protecting Marine Mammals and Endangered Marine Species	251
Assessing the Threats to Marine Populations	251
Reviewing Authorities and Responsibilities	252
The Marine Mammal Protection Act	252
The Endangered Species Act	253
Identifying and Overcoming Gaps in Protection	253
Jurisdictional Confusion	254
Unclear Permitting and Review Standards	254
The Meaning of Harassment	255
The Promise of Programmatic Permitting	255
Expanding Research and Education	256

Understanding Behavior and Human Impacts	256
Effects of Noise on Marine Mammals	257
Public Education and Outreach	258
Applying Ecosystem-based Management Principles	258
Domestic Action	258
International Coordination	258
Chapter 21: Preserving Coral Reefs and Other Coral Communities	261
Assessing the Status of Coral Ecosystems	261
The Distribution of Coral Ecosystems	261
The Value of Coral Ecosystems	262
Threats to Coral Ecosystems	262
Managing U.S. Coral Resources	263
Federal Agency Roles and Responsibilities	263
Interagency and Intergovernmental Coral Reef Management Initiatives	264
Improving the Management of U.S. Coral Resources	264
Promoting International Coral Reef Initiatives	265
Creating More Sustainable Harvesting Practices	266
Improving Understanding of Coral Ecosystems	266
Chapter 22: Setting a Course for Sustainable Marine Aquaculture	269
Acknowledging the Growing Significance of Marine Aquaculture	269
Addressing the Environmental Impacts of Aquaculture	269
Dealing with Uncertainties in the Existing Management Structure	270
Federal Involvement	271
Marine Aquaculture in Offshore Areas	271
The Current Regulatory Conundrum	271
Developing a New Marine Aquaculture Management Framework	272
Coordinated Action	272
Implementation	273
Increasing the Knowledge Base	273
Promoting International Improvements and Cooperation	274
Chapter 23: Connecting the Oceans and Human Health	275
Understanding the Links between the Oceans and Human Health	275
Maximizing the Beneficial Uses of Marine-derived Bioproducts	276
Specific Applications	276
Encouraging Interdisciplinary Marine Biomedical Research	279
Managing Marine Bioproduct Discovery and Development	279
Reducing the Negative Impacts of Marine Microorganisms	280
Harmful Algal Blooms	280
Marine Bacteria and Viruses	282
Contaminated Seafood	283
Implications of Global Climate Change	283
Progress through Research and Education	284
Increasing Federal Coordination on Oceans and Human Health	285
Chapter 24: Managing Offshore Energy and Other Mineral Resources	287
Exercising Jurisdiction over Nonliving Resources in Federal Waters	287
Managing Offshore Oil and Gas Resources	287
From a Quiet Beginning to Prohibitions on Leasing	288
The OCS Leasing, Exploration, and Development Process	289

Trends in Domestic Offshore Oil and Gas Production	290
Federal Revenues from Offshore Oil and Gas Production	292
State Involvement in OCS Oil and Gas Decision-making	294
Environmental Issues Related to Offshore Production	294
Opportunities for Sharing Ocean Observation Information and Resources	297
Assessing the Potential of Offshore Methane Hydrates	297
Developing Offshore Renewable Energy Resources	298
Offshore Wind Energy Development	298
Wave Energy Conversion—Current and Tidal	300
Ocean Thermal Energy Conversion	300
Comprehensive Management for Offshore Renewable Energy	300
Managing Other Marine Minerals	301

Part VII

Science-based Decisions: Advancing Our Understanding of the Oceans

Chapter 25: Creating a National Strategy for Increasing Scientific Knowledge	303
Fortifying the Foundations of Ocean Understanding	303
Components of Ocean Science and Technology	303
Federal Leadership in Ocean Science and Technology	304
Establishing a National Strategy	304
Advancing Ocean and Coastal Research	306
Reviving the Federal Investment	307
Coordination and Prioritization	308
The Need for Social and Economic Research	309
Building a National Ocean Exploration Program	312
The Value of Ocean Exploration	313
Growing Calls for a National Program	313
Coordinating and Consolidating Marine Operations	314
Integrated National Maps and Assessments	315
Federal Mapping and Charting Activities	315
Chapter 26: Achieving a Sustained, Integrated Ocean Observing System	319
Making the Case for an Integrated Ocean Observing System	319
Assessing Existing Observing Systems	321
Coastal and Ocean Observing Systems	321
Committing to the Creation of the IOOS	321
Creating a Governance Structure for the IOOS	322
National Planning	322
Ocean.US	323
Regional Structure	323
Reaching Out to the User Community	323
Assembling the Elements of a Successful IOOS	324
Critical Environmental Variables	324
Space-based Mission Priorities	326
Converting Research into Operational Capabilities	327
Consolidating Civilian Satellite Observations	328
Developing Useful End Products Based on IOOS Data	329
Funding the National IOOS	330
System Cost Estimates	330

Strengthening Earth Observations through National and International Partnerships	332
Other U.S. Operational Observing Systems	332
Enhancing Global Cooperation	332
Chapter 27: Enhancing Ocean Infrastructure and Technology Development	335
Advancing Ocean and Coastal Science with Modern Tools	335
Improving Infrastructure and Technology	336
Gaps in Infrastructure	336
Gaps in Technology Development	336
Maximizing Resources through Collaboration	337
A National Strategy	338
Periodic Reviews and Assessments	339
Funding the Modernization of Critically Needed Assets	339
Essential Infrastructure and Technology Components	339
A Federal Modernization Fund	344
Creating Virtual Marine Technology Centers	344
Chapter 28: Modernizing Ocean Data and Information Systems	347
Turning Oceans of Data into Useful Products	347
Reviewing the Data Management Structure	347
Types of Data Centers	348
Ocean and Coastal Data	350
Coping with the Flood of Incoming Data	350
Reinventing Data and Information Management	352
Interagency Planning	352
Access to Data and Information	353
Incorporating Data into the National Data Centers	355
Meeting the Challenges of a New Century	356
<hr/>	
Part VIII	
The Global Ocean: U.S. Participation in International Policy	
Chapter 29: Advancing International Ocean Science and Policy	357
Acting Globally to Save the Oceans	357
Reviewing the Evolution of the International Ocean Regime	358
Developing and Implementing International Policy	358
Guiding Principles	358
The Law of the Sea Convention	359
Other Ocean-related International Agreements	360
Collaboration for International Ocean Policy	361
Emerging International Management Challenges	362
Scientific Input to U.S. Policy Makers	363
Enhancing International Ocean Science	363
International Ocean Science Programs	364
The Global Ocean Observing System	364
U.S. Scientific Activities Abroad	364
Building International Capacity in Ocean Science and Management	365

Part IX

Moving Ahead: Implementing a New National Ocean Policy

Chapter 30: Funding Needs and Possible Sources	373
Investing in Change	373
Acknowledging the Cost of Taking Action	373
The National Ocean Policy Framework	374
Ocean Education	374
The Integrated Ocean Observing System	374
Ocean Science and Exploration	375
Using Revenue from Ocean Sources for Improved Ocean Management	375
The Federal Ocean Family	375
State Partners in Ocean and Coastal Policy Development and Implementation: Federal Support	376
New Revenues for the Federal Ocean Family and State Government Partners: The Ocean Policy Trust Fund	376
Chapter 31: Summary of Recommendations	379

Part X: Appendices

Printed in the Main Report:

- A. Oceans Act of 2000
- B. Acronyms
- C. Living Near and Making a Living From the Oceans by Charlie S. Colgan
- D. Guide to Ocean-related Laws, Programs, Councils, Commissions, International Treaties and Inter-governmental Bodies *(to be completed for the Final Report)*
- E. Proposed Structure for Coordination of Federal Ocean Activities

Printed as Separate Documents

Available Electronically on CD or at www.oceancommission.gov

1. Testimony Before the U.S. Commission on Ocean Policy
 Synthesis Indexed by Policy Topic
2. Testimony Before the U.S. Commission on Ocean Policy
 Summary Indexed by Presenter
3. National Marine Educators Association Membership Profile
4. U.S. Ocean-related Academic Infrastructure
5. Inventory of U.S. Ocean and Coastal Facilities
6. Governing the Oceans: Legal Review and Analysis *(to be completed for the Final Report)*
7. Governors' Comments *(to be completed for the Final Report)*
