

CONTENTS

Letter to the President	iii
Letter to the Senate Majority Leader	v
Letter to the Speaker of the House	vii
Members of the U.S. Commission on Ocean Policy	ix
Members of the Science Advisory Panel	x
Commission Staff	xi
Acknowledgements	xii

Executive Summary	xxxi
--------------------------	-------------

Part I

Our Oceans: A National Asset

Chapter 1: Recognizing Ocean Assets and Challenges	1
Evaluating the Vast Wealth of U.S. Oceans and Coasts	1
Economic and Employment Value	1
Marine Transportation and Ports	3
Marine Fisheries	5
Offshore Energy, Minerals, and Emerging Uses	6
Human Health and Biodiversity	6
Tourism and Recreation	7
Coastal Real Estate	8
Nonmarket Values	8
Undermining America's Ocean and Coastal Assets	10
Degraded Waters	10
Compromised Resources	11
Conflicts Between Man and Nature	13
Acting Today for Tomorrow's Generations	16
Chapter 2: Understanding the Past to Shape a New National Ocean Policy	19
Ocean Policy from World War II to the Oceans Act of 2000	19
Formative Years	19
From Sputnik to Stratton	20
Years of Activism	22
Contention and Stalemate	23
Search for Coherence	25
Consensus for Change	25
Launching the U.S. Commission on Ocean Policy	26
A Broad Mandate	26
The Commission Members	27
How the Commission Did Its Work	27
The Result	30

Chapter 3: Setting the Nation’s Sights	31
Imagining a Brighter Future	31
Building Ocean Policy on Sound Guiding Principles	32
Translating Principles into Policy	33
Ecosystem-based Management	33
Science for Decision Making	38
Effective Ocean Governance	39
Public Education	39

Primer on Ocean Jurisdictions: Drawing Lines in the Water	41
--	-----------

Part II
Blueprint for Change: A New National Ocean Policy Framework

Chapter 4: Enhancing Ocean Leadership and Coordination	45
Making Improvements at the National Level	46
National Ocean Council	48
Assistant to the President	49
President’s Council of Advisors on Ocean Policy	50
Other Needed Elements	50

Chapter 5: Advancing a Regional Approach	55
Addressing Issues Across Jurisdictional Lines	55
Facilitating Bottom-up Responses	57
National Support and Guidelines	57
Nature and Functions of Regional Ocean Councils	58
Building on Existing Regional Initiatives	59
Enhancing Federal Support for a Regional Approach	60
Federal Agency Coordination	60
Moving Toward Common Regional Boundaries	62
Meeting Regional Research and Information Needs	62
Developing Regional Ecosystem Assessments	64

Chapter 6: Coordinating Management in Federal Waters	65
Meeting Growing Needs	65
Clarifying Offshore Responsibilities	67
Establishing a Coordinated Offshore Management Regime	67
A Fair Return for the Use of Offshore Resources	69
Employing Marine Protected Areas as a Management Tool	70
Federal Efforts	70
The Role of Marine Protected Areas	71
National Interests	71
Regional and Local Stakeholders	72

Chapter 7: Strengthening the Federal Agency Structure	73
Reorganizing to Support an Ecosystem-based Management Approach	73
Reviewing Previous Reorganization Proposals	73

Strengthening NOAA: Phase I	75
Consolidating Ocean and Coastal Programs: Phase II	77
Managing All Natural Resources in an Ecosystem-based Management Approach: Phase III	80

Part III

Ocean Stewardship: The Importance of Education and Public Awareness

Chapter 8: Promoting Lifelong Ocean Education	85
Strengthening the Nation's Ocean Awareness	85
Ocean Stewardship	85
Science Literacy	86
Future Ocean Leaders	86
Crosscutting Themes	86
Building a Collaborative Ocean Education Network	87
Participants in Ocean Education	87
Coordinating Ocean Education	88
Funding and Assessment	91
Linking the Research and Education Communities	92
Incorporating Oceans into K-12 Education	93
Using Ocean-based Examples to Meet Education Standards	94
Bridging the Gap between Scientists and Educators	95
Investing in Higher Education and the Future Ocean Workforce	98
The Leadership Void	99
Drawing Students into the Field	99
Expanding Graduate Educational Opportunities	100
Workforce Needs	101
Specific Federal Responsibilities	101
Strength through Diversity	103
Bringing the Ocean and Coasts to All Americans	104
Multifaceted Approaches	104
Coordinating Messages	105
Broad Outreach	106

Part IV

Living on the Edge: Economic Growth and Resource Conservation along the Coast

Chapter 9: Managing Coasts and their Watersheds	109
Attracting Crowds, Creating Opportunities	109
People, Jobs, and Opportunities	109
Implications of Growth	110
Strengthening Coastal Planning and Management	110
Multi-layered Decision Making	110
Federal Area-based Coastal Programs	111
Other Relevant Federal Programs	115
Linking Coastal and Watershed Management	115
Linking Coastal and Offshore Management	117
Increasing Understanding of Coastal Ecosystems	117

Chapter 10: Guarding People and Property against Natural Hazards	121
Assessing the Growing Cost of Natural Hazards	121
Improving Federal Management of Hazards in Coastal Areas	122
Changing Inappropriate Federal Incentives	122
Improving Understanding	123
The National Flood Insurance Program	125
Hazard Mitigation Planning	127
Chapter 11: Conserving and Restoring Coastal Habitat	129
Assessing the Threats to Coastal Habitat	129
Conserving Coastal Habitat	130
Habitat Conservation Programs	130
Restoring Coastal Habitat	131
Improving Habitat Conservation and Restoration	135
Enhancing Information and Understanding	135
Protecting the Nation’s Wetlands: A Special Case	136
Chapter 12: Managing Sediments and Shorelines	139
Understanding the Dual Nature of Sediment	139
Federal Roles in Sediment Management	140
Altering Sediments through Human Intervention	141
Changing Sediment Quantities	141
Changing Sediment Quality	141
Developing Regional Strategies for Sediment Management	142
Moving Toward Regional Sediment Management at USACE	144
Weighing the Costs and Benefits of Dredging	144
Navigational Dredging	144
Beneficial Uses of Dredged Material	145
Techniques of Cost-Benefit Analysis	146
National and Regional Dredging Teams	146
Improving Understanding, Assessment, and Treatment	147
Coordinated Strategy Needed	147
Contaminated Sediment	148
Chapter 13: Supporting Marine Commerce and Transportation	151
Connecting People, Places, and Products	151
Value of the Marine Transportation System	151
Components of the Marine Transportation System	152
Positioning the U.S. Marine Transportation System for the Future	156
Federal Roles	156
Links to the National Transportation Infrastructure	158
Information Needs	159
Emergency Preparedness	159

Part V

Clear Waters Ahead: Coastal and Ocean Water Quality

Chapter 14: Addressing Coastal Water Pollution	163
Stopping the Degradation of Coastal Waters	163
Reducing Point Sources of Pollution	166
Existing Management Tools	166
Major Point Sources	167
Improving the Control of Point Sources	170
Increasing the Focus on Nonpoint Sources of Pollution	171
Existing Management Tools	171
Major Nonpoint Sources	173
Improving the Control of Nonpoint Sources	176
Collaboration at the Watershed Scale	181
International Efforts	181
Addressing Atmospheric Sources of Pollution	182
Improving Control of Atmospheric Sources	182
Chapter 15: Creating a National Monitoring Network	185
Recognizing the Value of Monitoring	185
Monitoring at the Federal Level	186
Federal Programs	187
Shortcomings in Federal Programs	188
Promoting Interagency Coordination	189
Ensuring Comprehensive, Coordinated Coverage	190
Creating an Effective Monitoring Network	191
System Goals and Objectives	191
System Design	191
Technical Coordination	192
Periodic Review and Modification	192
Design Based on User Input	192
Making Data Accessible and Useful	193
Chapter 16: Limiting Vessel Pollution and Improving Vessel Safety	195
Assessing the Benefits and Risks of Vessel Activities	195
Strengthening Vessel Safety, Security, and Environmental Compliance	196
A Culture of Compliance and Safety	196
Flag State Oversight and Enforcement	197
Port State Control	198
Reducing Vessel Pollution	199
Waste Stream Discharges	199
Air Emissions	202
Oil Releases	204
Increasing Knowledge to Guide Change	208
Improving Awareness of Ocean Activities	208
Chapter 17: Preventing the Spread of Invasive Species	211
Acknowledging the Problem	211
Assessing Existing Approaches	212
Federal Statutes	212
State and Federal Programs	213

Identifying Major Pathways for Introduction of Non-native Species	215
Ballast Water	215
Global Trade in Marine Organisms	215
Making Prevention the First Line of Defense	215
Ballast Water Management	215
Controlling Other Pathways	217
Accelerating Detection and Response	217
Improving the Control of Invasive Species	218
Coordinated Action	218
International Partnerships	220
Research Needs	220
Chapter 18: Reducing Marine Debris	223
Assessing the Sources and Consequences of Marine Debris	223
Addressing Marine Debris Nationally	225
Existing Programs	225
NOAA's Role	226
Expanding Marine Debris Efforts	226
Reducing Derelict Fishing Gear	228
Ensuring Adequate Facilities for Disposal of Garbage from Ships	229

Part VI

Ocean Value and Vitality:

Enhancing the Use and Protection of Ocean Resources

Chapter 19: Achieving Sustainable Fisheries	231
Contemplating Thirty Years of Fishery Management	231
Building Sustainable Fisheries Based on Sound Science	233
The Value of Science for Wise Management	233
Separating Scientific and Management Decisions	234
The Need for Independent Review	235
Using Default Measures to Ensure Progress	236
Making Research Relevant	237
Strengthening Fishery Governance	240
Clarifying Fishery Management Authority and Jurisdiction	240
Improving the Regional Fishery Management Councils	242
Ending the Race for Fish	244
Traditional Management Approaches	244
Dedicated Access Privileges	245
Reducing Overcapitalization of Fishing Fleets	247
Improving Fishery Enforcement	248
Fishery Enforcement Mechanisms	249
Enforcement Partnerships	249
Technology for Enforcement	250
Improving Enforceability as Part of the Management Process	252
Moving Toward an Ecosystem-Based Management Approach	252
Linking Fisheries Management with other Regional Concerns	252
Essential Fish Habitat	254
Reducing Bycatch	255

Managing International Fisheries	257
The Status of International Fisheries	257
The Law of the Sea Framework	257
International Fishery Conservation Agreements	257
International Fisheries and Trade	260
Chapter 20: Protecting Marine Mammals and Endangered Marine Species	263
Assessing the Threats to Marine Populations	263
Marine Mammals	263
Endangered Species	264
Reviewing Authorities and Responsibilities	265
The Marine Mammal Protection Act	265
The Endangered Species Act	266
Identifying and Overcoming Gaps in Protection	267
Clarifying Jurisdiction and Authority	267
Cooperation with States	267
Unclear Permitting and Review Standards	268
The Meaning of Harassment in the MMPA	268
The Promise of Programmatic Permitting For Marine Mammals	269
Expanding Research and Education	270
Understanding Behavior and Human Impacts	270
Effects of Noise on Marine Mammals	271
Public Education and Outreach	272
Applying Ecosystem-based Management Principles	272
Domestic Action	272
International Coordination	273
Chapter 21: Preserving Coral Reefs and Other Coral Communities	277
Assessing the Status of Coral Ecosystems	277
The Distribution of Coral Ecosystems	277
The Value of Coral Ecosystems	278
Threats to Coral Ecosystems	279
Managing U.S. Coral Resources	280
Federal Agency Roles and Responsibilities	280
Interagency and Intergovernmental Coral Reef Management Initiatives	280
Improving the Management of U.S. Coral Resources	281
Promoting International Coral Reef Initiatives	282
Creating More Sustainable Harvesting Practices	283
Improving Understanding of Coral Ecosystems	283
Chapter 22: Setting a Course for Sustainable Marine Aquaculture	285
Acknowledging the Growing Significance of Marine Aquaculture	285
Addressing Environmental Impacts of Aquaculture	285
Dealing with Uncertainties in the Existing Management Structure	287
Marine Aquaculture in Offshore Areas	287
The Current Regulatory Conundrum	287
Developing a New Marine Aquaculture Management Framework	288
Coordinated Action	288
Implementation	288
Increasing the Knowledge Base	289
Promoting International Improvements and Cooperation	290

Chapter 23: Connecting the Oceans and Human Health	291
Understanding the Links between the Oceans and Human Health	291
Maximizing the Beneficial Uses of Marine-derived Bioproducts	292
Specific Applications	293
Encouraging Interdisciplinary Marine Biomedical Research	294
Managing Marine Bioproduct Discovery and Development	296
Reducing the Negative Health Impacts of Marine Microorganisms	296
Harmful Algal Blooms	296
Marine Bacteria and Viruses	298
Contaminated Seafood	299
Implications of Global Climate Change	299
Progress through Research and Technology Development	300
Increasing Federal Coordination on Oceans and Human Health	300
Implementing Human Health Protections	301
Seafood Safety	301
Coastal Water Quality	302
Public Education and Outreach	303
Regional Dimensions	303
Chapter 24: Managing Offshore Energy and Other Mineral Resources	305
Exercising Jurisdiction over Nonliving Resources in Federal Waters	305
Managing Offshore Oil and Gas Resources	305
From a Quiet Beginning to Prohibitions on Leasing	306
The OCS Leasing, Exploration, and Development Process	307
Trends in Domestic Offshore Oil and Gas Production	309
Federal Revenues from Offshore Oil and Gas Leasing and Production	311
State Involvement in OCS Oil and Gas Decision-making	313
Environmental Issues Related to Offshore Oil and Gas Production	314
Opportunities for Sharing Ocean Observation Information and Resources	316
Assessing the Potential of Offshore Methane Hydrates	317
Developing Offshore Renewable Energy Resources	317
Offshore Wind Energy Development	318
Wave Energy Conversion—Current and Tidal	319
Ocean Thermal Energy Conversion	319
Comprehensive Management for Offshore Renewable Energy	320
Managing Other Marine Minerals	320

Part VII

Science-based Decisions: Advancing Our Understanding of the Oceans

Chapter 25: Creating a National Strategy for Increasing Scientific Knowledge	323
Fortifying the Foundations of Ocean Understanding	323
Components of Ocean Science and Technology	323
Federal Leadership in Ocean Science and Technology	324
Reviving the Federal Investment	324
Creating a National Strategy	326
Advancing Ocean and Coastal Research	327
Climate Change	329

Marine Biodiversity	329
Regional Ecosystem Dynamics	329
Social and Economic Research	330
The National Sea Grant College Program	333
Agency Strategies and Funding Mechanisms	334
Building a National Ocean Exploration Program	335
The Value of Ocean Exploration	335
Growing Calls for a National Program	336
Coordinating and Consolidating Marine Operations	337
Integrated National Maps and Assessments	337
Federal Mapping and Charting Activities	338
Providing Useful Information to Congress	339
Chapter 26: Achieving a Sustained, Integrated Ocean Observing System	341
Making the Case for an Integrated Ocean Observing System	341
Assessing Existing Observing Systems	342
Coastal and Ocean Observing Systems	342
Committing to Creation of the IOOS	343
Creating a Governance Structure for the IOOS	344
National Planning	344
Ocean.US	344
Regional Structure	345
Reaching Out to the User Community	346
Assembling the Elements of a Successful IOOS	346
Critical Environmental Variables	346
Converting Research into Operational Capabilities	348
Coordinating Civilian Satellite Observations	349
Developing Useful End Products Based on IOOS Data	351
Funding the National IOOS	353
System Cost Estimates	353
Strengthening Earth Observations through National and International Partnerships	355
Other U.S. Operational Observing Systems	355
Enhancing Global Cooperation	355
Chapter 27: Enhancing Ocean Infrastructure and Technology Development	357
Supporting Ocean and Coastal Activities with Modern Tools	357
Improving Infrastructure and Technology	358
Gaps in Infrastructure	358
Gaps in Technology Development	358
Maximizing Resources through Collaboration	358
A National Strategy	359
Periodic Reviews and Assessments	360
Funding the Modernization of Critically Needed Assets	361
Essential Science Infrastructure and Technology Components	361
Other Essential Infrastructure and Technology Components	366
Creating Virtual Marine Technology Centers	370
Chapter 28: Modernizing Ocean Data and Information Systems	373
Turning Oceans of Data into Useful Products	373
Reviewing the Data Management Structure	373
Types of Data Centers	374

Ocean and Coastal Data	376
Coping with the Flood of Incoming Data	376
Reinventing Data and Information Management	378
Interagency Planning	378
Access to Data and Information	379
Incorporating Data into the National Data Centers	381
Meeting the Challenges of a New Century	382

Part VIII

The Global Ocean: U.S. Participation in International Policy

Chapter 29: Advancing International Ocean Science and Policy	383
Acting Globally to Safeguard the Oceans	383
Reviewing the Evolution of the International Ocean Regime	384
Developing and Implementing International Policy	384
Guiding Principles	384
The Law of the Sea Convention	385
Other Ocean-related International Agreements	386
Collaboration for International Ocean Policy	387
Emerging International Management Challenges	390
Scientific Input to U.S. Policy Makers	391
Enhancing International Ocean Science	391
International Ocean Science Programs	391
The Global Ocean Observing System	392
U.S. Scientific Activities Abroad	392
Building International Capacity in Ocean Science and Management	393

Part IX

Moving Ahead: Implementing a New National Ocean Policy

Chapter 30: Funding Needs and Possible Sources	399
Investing in Change	399
Acknowledging the Cost of Taking Action	400
Deferred Costs	403
Costs Beyond the Scope of the Commission's Report	403
Itemizing Major Funding Areas	404
The National Ocean Policy Framework	404
Ocean Education	405
Ocean Science and Exploration	405
Monitoring, Observing, and Mapping	406
Other Ocean and Coastal Management Challenges	406
Recognizing the Important Roles of Nonfederal Authorities	407
Dedicating Revenue from Ocean Uses for Improved Ocean Management	408
Existing and Emerging Uses	408
Revenues for Ocean and Coastal Management: The Ocean Policy Trust Fund	408
Understanding the Changing Ocean and Coastal Budget	410

Chapter 31: Summary of Recommendations	411
Context for the Recommendations	411
Guiding Principles	411
Creating a Strong Role for States	412
The Need for Congressional Leadership	413
Index to the Recommendations	414
Recommendations to Congress	414
Recommendations to the Executive Branch Leadership	414
Recommendations to Federal Government Agencies	415
Recommendations to Regional Bodies	417
Recommendations to States	417
Recommendations Related to International Ocean Science, Policy, and Management	417
Complete List of Recommendations as They Appear in the Report	418

Part X: Appendices

Printed in the Main Report:

- A. Oceans Act of 2000
- B. Acronyms
- C. Living Near and Making a Living From the Oceans by Charles S. Colgan
- D. Glossary of Federal Ocean and Coastal-Related Commissions, Committees, Councils, Laws, and Programs
- E. Proposed Structure for Coordination of Federal Ocean Activities
- F. Congressional Committees And Subcommittees with Jurisdiction over Ocean and Coastal Issues
- G. Detailed Costs Associated with Recommendations of the U.S. Commission on Ocean Policy

Printed as Separate Documents

Available Electronically on CD or at www.oceancommission.gov

Special Addendum: Governors' Comments on the Preliminary Report

- 1. Testimony Before the U.S. Commission on Ocean Policy
 Synthesis Indexed by Policy Topic
- 2. Testimony Before the U.S. Commission on Ocean Policy
 Summary Indexed by Presenter
- 3. National Marine Educators Association Membership Profile
- 4. U.S. Ocean-related Academic Infrastructure
- 5. Inventory of U.S. Ocean and Coastal Facilities
- 6. Governing the Oceans: Three Decades of Evolution of U.S. Ocean and Coastal Law
