

***Portion Substituted for Borrowing Authority  
(Appropriation)  
Scenario***

## **Background**

Borrowing authority is a type of budget authority that permits agencies to incur obligations and make payments to liquidate the obligations out of borrowed moneys. Usually the law authorizing the borrowing specifies that you must borrow from the Treasury, but in a few cases it authorizes borrowing directly from the public. Laws that authorize borrowing for business-like operations require the program to repay the borrowing, with interest, out of business proceeds. In rare instances, usually based on an appropriation or authorizing language, an agency may use an appropriation to liquidate obligations that were initially incurred against authority to borrow when the borrowing was not exercised.

Borrowing authority is composed of two authority types:

- *Definite borrowing authority*, where a specific amount of authority that cannot be exceeded. Authority is recorded at the beginning of the program and carried forward until the authority is rescinded or completely consumed or until the program is terminated, whichever comes first. This is a no-year account and the authority does not expire, but unused authority must be reapportioned each year.
- *Indefinite borrowing authority*, where the amount of authority is not predetermined and authority is available as needed to cover obligations incurred. This is normally accounted for through a no-year account and the authority does not expire, but unused authority must be reapportioned each year.

**Explanation of Illustrated Accounts:**

Based on an appropriation or authorizing language, an agency can receive an appropriation or offsetting collection to liquidate obligations initially incurred against authority to borrow when the borrowing was not exercised. For purposes of this scenario, the borrowing authority is substituted by an appropriation.

As a result of the substitution, the resources have to be adjusted to reflect the substitution of the borrowing authority. If not adjusted then resources will be counted twice and total resources will be overstated. The withdrawn portion of the appropriation used to liquidate obligations initially incurred against the authority to borrow is reported in USSGL account 4140. This amount is also reported on the SF 133, line 6D (Other authority withdrawn) and P&F schedule line 6053 (Portion substituted for borrowing authority). The following account is illustrated in this scenario.

- **4140 Substitution of Borrowing Authority** - the amount of borrowing authority replaced by appropriations or offsetting collections that were initially used to liquidate obligations incurred against authority to borrow.

At the end of the fiscal year, any unobligated balances for indefinite borrowing authority should be zero. USSGL account 4143 is used to record the withdrawal of indefinite borrowing authority that is not needed to cover obligations. The withdrawn amount is reported on the SF 133, line 6D (Other authority withdrawn) and P&F schedule lines 4700 and 6710 and 6716 (Borrowing authority). The following account is illustrated in this scenario.

***Portion Substituted for Borrowing Authority  
(Appropriation)  
Scenario***

- **4143 Reductions of Borrowing Authority** - the amount of indefinite borrowing authority reduced by legislation or administrative action during the fiscal year.

When there are recoveries of prior year obligations that have been obligated against indefinite borrowing authority, the recovered amount is withdrawn and recorded in USSGL account 4144. The withdrawn amount is reported on the SF 133, line 6D (Other authority withdrawn) and P&F schedule line 2270 (Balance of borrowing authority withdrawn). The following account is illustrated in this scenario.

- **4144 Borrowing Authority Withdrawn** - the amount of indefinite borrowing withdrawn due to recoveries of prior-year obligations where the authority to borrow was not borrowed.

### **Scenario Guidelines:**

This scenario includes two years of activity for definite and indefinite borrowing authority. In year one, the agency has borrowing authority and has incurred obligations against borrowing authority. In year two, the agency receives an appropriation to liquidate the obligations initially incurred against authority to borrow, when the borrowing is not exercised.

This scenario does not address credit reform accounting. Credit reform accounting guidance will be included in separate scenarios. The following borrowing authority scenarios are included:

- Scenario A: Definite Borrowing Authority - Portion Substituted for Borrowing Authority (Appropriation)
- Scenario B: Indefinite Borrowing Authority - Portion Substituted for Borrowing Authority (Appropriation)
