NAVAL SUPPLY SYSTEMS COMMAND HEADQUARTERS

Volume: 4 Issue:1

JANUARY 2006

CLEAN YOUR MPCC SCANNER

To prevent illegible images from your MPCC scanner, keep all working surfaces clean and the track area free of foreign material. Steps to clean your MPCC SCANNER:

1. Disconnect all cables.
2. Remove the outer cover by removing the screw from the back of the unit. Push the outer cover towards the back of the unit, about 1/8”(3mm) and lift the cover off.
3. Clean the window area with lens cleaning tissue or a soft lint free cloth.
4. Attach the outer cover by align the tabs on the cover with the mounting holes in the base and push the cover forward into place. Insert the screw.

Please make sure the scanner is placed upright on a level surface at 1.5 feet away from any device capable of producing strong magnetic fields (monitors, radios, machinery, etc.). If you experience problems with faint or otherwise difficult to read images, please contact the Federal Reserve Bank of Cleveland, (877) 418-6824 (DSN 510) Option 6 & 4.

ATTENTION SYSTEM ADMIN!

REBOOTING THE Navy Cash System

When rebooting the Navy Cash Server, remember to check Veritas to see if the server is running its back-ups in the background. When the back-ups have been completed, it is then safe to perform a reboot of the server. If a reboot is performed while the back-ups are running, the Navy Cash system will be disabled on board. A manual intervention, with guidance from shore will be required to restore it to proper operation. See the quick info sheet attached to your Navy Cash Server for more information.

REMINDERS

SERVER TAPES AND CLEANING CARDS

Replacements for both back-up tapes and cleaning cards used for the server and preventative maintenance respectively, can be procured from the Supply System. The NSN for the tapes and cleaning kits are 7035-01-495-5385 and 7035-01-503-2075, respectively. They are both found on the Miscellaneous Allowance Parts List (#00044275). Once the initial supply of these have been depleted, it is the ship's responsibility to replace them.

Split Pay Option (SPO) Dilemma

Having trouble transmitting your first Split Pay Option after Navy Cash implementation? Contact your local DFAS UMIDS (Uniform Micro-Computer Disbursing System) support office. In Norfolk call DFAS FIELD SUPPORT DETACHMENT, (757) 443-2320 (DSN 646) or email DFASFSDN@AOL.COM. In San Diego, call DFAS FIELD SUPPORT DETACHMENT, (619) 556-5188 (DSN 526) or email DFASFSDSD@AOL.COM.

LAN IS DOWN- DON'T POWER DOWN!

Vending will continue to run even though your LAN goes down as long as you DO NOT power down the vending machine. Once powered down, a LAN connection is needed to reset the CAD for operation. The CAD can handle about 750 transactions before it is full.

Installations

As of 31 December 2005, 71 Ships have been installed with the Navy/Marine Cash™ Financial System.

January Installation:

USS DENVER (LPD 9) SAN DIEGO
