

## Follow-Up Public Information Forum

The Colorado River Storage Project (CRSP) Management Center will be hosting a follow-up public information forum on April 10 and a comment forum immediately following. Subjects for discussion will include a proposed stepped-rate increase and the 2010 Work Program Review (WPR) for the Salt Lake City Area Integrated Projects (SLCA/IP) firm power and CRSP transmission and ancillary services rates. Updated and/or new items will be distributed at the meeting.

The comment period will be extended from April 3 to May 5, 2008. The proposal is to have these rate adjustments effective October 1, 2008. A Federal Register Notice will be published in the next few weeks to provide further details.
