### FOR IMMEDIATE RELEASE

August 5, 2002

### FERRIS BECOMES FULLY OPERATIONAL

The Federal Energy Regulatory Commission's FERRIS (Federal Energy Regulatory Records Information System) is now fully operational, with all submittals to and issuances by the Commission updated in real time.

FERRIS includes all historical data in the Records and Information Management System (RIMS), Commission Issuance Posting System (CIPS), and Docket Sheets System.

While historical data in RIMS, CIPS and Docket Sheets will be maintained for a period of time, these systems will no longer be updated.

To access FERRIS, go to the Commission's website at [www.ferc.gov](http://www.ferc.gov).
