Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated
Conduction disorders and cardiac dysrhythmias (I44-I49)

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated
Other disorders of biliary tract and pancreas (K83,K86.2-K86.9)

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year

50-54 years 55-59 years 60-64 years 65-69 years 70-74 years 75-79 years 80-84 years 85-89 years 90-94 years 95-99 years 100 years and over Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated
---	-------------	-------------	-------------	-------------	-------------	-------------	-------------	-------------	-------------	-------------	--------------------	----------------

Accidental poisoning by and exposure to other and unspecified solid or liquids substances (X45-X46,X48-X49)

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated
Poisoning by and exposure to drugs and biological substances, undetermined intent (Y10-Y14)												
White, male

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex, and year	50-54 years	55-59 years	60-64 years	65-69 years	70-74 years	75-79 years	80-84 years	85-89 years	90-94 years	95-99 years	100 years and over	Age not stated

Worktable 292F. Deaths from 358 selected causes by 5-year age groups, race, and sex: United States, 1999-2004

[Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Montana, New York, and Wisconsin in 2003. The multiple-race data for these states were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other states; see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." Data for specified races other than white or black should be interpreted with caution because of inconsistencies between reporting race on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see <http://www.cdc.gov/nchs> and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]
