[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

the United States: Mortality, 2004"]

Page 148

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For

explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for

these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

the United States: Mortality, 2004"]

Worktable 12. Death rates for 358 selected causes, by 10-year age groups, race, and sex: United States, 1999-2004

05JAN07 Page 559

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For

explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004."]

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other

Worktable 12. Death rates for 358 selected causes, by 10-year age groups, race, and sex: United States, 1999-2004

[Rates per 100,000 population in specified group. Rates are based on populations enumerated as of April 1 for 2000 and estimated as of July 1 for all other years. Race categories are consistent with the 1977 Office of Management and Budget standards. Multiple-race data was reported for California, Hawaii, Idaho, Maine, Michigan, Minnesota, Montana, New Hampshire, New Jersey, New York, Oklahoma, South Dakota, Washington, Wisconsin, and Wyoming in 2004, and for California, Hawaii, Idaho, Maine, Montana, New York, and Wisconsin in 2003. The multiple-race data for these States were bridged to the single-race categories of the 1977 Office of Management and Budget standards for comparability with other States; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004." For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2004"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, 1992), race, sex and year	All ages 1/	Under 1 year 2/	1-4 years	5-14 years	15-24 years	25-34 years	35-44 years	45-54 years	55-64 years	65-74 years	75-84 years	85 years and over

Source: CDC/NCHS, National Vital Statistics System, Mortality.

^{0.0} Quantity more than zero but less than 0.05.

^{...} Category not applicable.

^{1/} Figures for age not stated included in "All ages" but not distributed among age groups.

^{2/} Death rates for "Under 1 year" (based on population estimates) differ from infant mortality rates (based on live births).

^{3/} Includes races other than white and black.

^{4/} Figures include September 11, 2001 related deaths for which death certificates were filed as of 10/24/02; see http://www.cdc.gov/nchs and refer to "Technical Appendix from Vital Statistics of the United States: Mortality, 2001."
