This document is a final management plan for the Monterey Bay National Marine Sanctuary. This management plan is the result of a community-based management plan review undertaken by the Monterey Bay National Marine Sanctuary Advisory Council, community stakeholders and volunteers. This plan was developed in coordination with the Cordell Bank and Gulf of the Farallones National Marine Sanctuaries in the Joint Management Plan Review. This document will serve as the guiding management document for the MBNMS for the next five years.

NOAA's National Marine Sanctuary Program seeks to increase public awareness of America's ocean and Great Lakes treasures by conducting scientific research, monitoring, exploration and educational programs. Today, the Program manages 13 national marine sanctuaries and one coral reef ecosystem reserve that together encompass more than 150,000 square miles of America's ocean and Great Lakes natural and cultural resources.

The NOAA Ocean Service manages the Sanctuary Program and is dedicated to exploring, understanding, conserving and restoring the nation's coasts and oceans and works to balance environmental protection with economic prosperity in its mission promoting safe navigation, supporting coastal communities, sustaining coastal habitats and mitigating coastal hazards.

The National Oceanic and Atmospheric Administration, an agency of the U.S. Commerce Department, is dedicated to enhancing economic security and national safety through the prediction and research of weather and climate-related events and providing environmental stewardship of our nation's coastal and marine resources.
