

SUBJECT: CR HSA0018 COBRA BASOPS Manpower Question for DLA

It is difficult to accurately determine the BOS personnel requirement because a portion of the BOS personnel correlate with the number of people working at an installation. Another portion correlates with the size of the installation and the number of facilities to be maintained. For this response, we determined the requirement by calculating the total DSCC population in question 1505 to the tenant population in 1506 of the capacity data call. The total BOS personnel at Columbus is 248 (from the military value data call). This was divided by the total population to provide the ratio of 2.9%. This was then multiplied by the additional people to be relocated to DSCC which is 1,340 people. The BOS requirement at Columbus will be an additional 39 people.
