

# Partnership Returns, 1996

by Alan Zempel

Partnership returns for 1996 continue to show growth in the number of partnerships, number of partners, total assets, total receipts, and total net income (less deficit). Growth in the number of partnerships continues a pattern started in 1994. Prior to that, the number of partnerships had been declining since 1989. Also, as it had in the past, the finance, insurance, and real estate industrial division dominated the number of partnerships, number of partners, total net income, total receipts, and total assets. Within that industrial division, the real estate operators and lessors of buildings industry had the largest number of partnerships and partners, as in the past. This industry also had positive total net income (less deficit) for the third year in a row and only the third time since 1967. Also, within the finance, insurance, and real estate industrial division, the security and commodity brokers industry and the holding and investment companies industry reported the largest amounts of total net income (less deficit) and total receipts.

Partnerships operating in the services industrial division accounted for the second largest number of partnerships and number of partners, total net income (less deficit), total receipts, and total assets for 1996. Within this industrial division, legal services and medical and health services dominated.

The number of partnerships increased in all industrial divisions except mining, while the number of partners increased in all industrial divisions except agriculture, forestry and fishing, mining, transportation and public utilities, and finance, insurance, and real estate. Total net income (less deficit), total receipts, and total assets increased in every industrial division.

## Partnership Activity in 1996

Partnerships for 1996 again reported increases in the number of partnerships, number of partners, total assets, total receipts, and total net income (less deficit). For 1996, the number of partnerships increased 4.6 percent to 1,654,256. Although the

number of partners increased only slightly to 15,662,298 from 15,605,686 for 1995, there was a large increase in the number of partners in the services industrial division, which was largely offset by decreases in the mining and the finance, insurance, and real estate divisions. The number of partners in services increased 158,128 to 2,454,595, led by business services, which increased by 122,945. The number of partners in the mining industrial division declined by 81,573, led by the oil and gas extraction industry, which declined by 79,123. The number of partners in the finance, insurance, and real estate industry declined by 54,221. In this industrial division, the number of partners in the real estate operators and lessors of buildings industry declined by 438,636. However, this was offset by an increase of 390,011 in the number of partners for the holding and investment company industry.

Total assets increased by 23.9 percent, from \$2.7 trillion for 1995 to \$3.4 trillion for 1996. Total receipts increased by over 23.4 percent, from \$993.8 billion for 1995 to \$1.2 trillion for 1996. For 1996, total net income (less deficit) rose 35.9 percent to \$145.2 billion, the largest increase in the history of this statistical series [1,2]. This continued the trend of large percentage increases in total net income (less deficit) first seen for 1990. Almost fifty percent of the total net income (less deficit) was in the finance, insurance, and real estate industrial division. Total net income (less deficit) in this division rose by 56.6 percent, from \$44.5 billion for 1995 to \$69.7 billion for 1996. Within the finance, insurance, and real estate industrial division, both security and commodity brokers and holding and investment companies had large increases in total net income (less deficit). Total net income (less deficit) for security and commodity brokers increased from \$8.9 billion for 1995 to \$16.1 billion for 1996. Holding and investment company total net income (less deficit) went from \$25.0 billion for 1995 to \$37.8 billion for 1996. Real estate operators and lessors of buildings reported a more modest increase than the 272.2 percent increase for 1995. Total net income (less deficit) for this industry rose 29.0 percent (\$2.8 billion) to \$12.2 billion for 1996. This was the third year in a row, and only the third time since 1967, that this industry reported positive total net income (less deficit).

1996.....	4.6	0.4	23.9	23.4	35.9

<sup>1</sup> Less than 0.05 percent.

Partnerships again, as for 1995, had positive rental real estate income (less deficit). For 1996, this amount was \$7.6 billion, up from \$4.4 billion for 1995. Real estate operators and lessors of buildings also reported positive rental real estate net income (less deficit) of \$7.7 billion for 1996. This was only the second time since 1960 that this industry reported positive rental real estate net income (less deficit). The first time was for 1995.

Although the 4.6 percent increase in the number of partnerships was more modest than the 5.8 percent increase for 1995, it continues the trend of increasing number of partnerships started in 1994. Previously, the number of partnerships had been declining since 1989 (Figure A). Over half of the increase in the number of partnerships occurred in the finance, insurance, and real estate industrial division. Almost one-fifth of the increase occurred in the services industrial division (Figure B).

NOTE: Detail may not add to totals because of rounding.

## Partnership Returns, 1996

For 1996, partnership returns reported the largest increase (\$38.4 billion) in total net income (less deficit) in the history of this statistical series. All components of total net income (less deficit), except net income (less deficit) from other rental activity, increased. However, over three-quarters of the total increase was accounted for by the nearly \$29.0 billion increase in net income (less deficit) from a trade or business (Figure C). The increase in total net income (less deficit) was across all industrial divisions (Figure D). Almost two-thirds of the increase in total net income (less deficit) was reported by partnerships in the finance, insurance, and real estate industrial division. Total net income (less deficit) for this division increased from \$44.5 billion for 1995 to \$69.7 billion for 1996. This was the fourth consecutive year this division reported a gain — the only years for which a gain was reported by this division since 1979. Within this division, the largest amounts of total net income (less deficit) were reported by holding and investment companies (\$37.8 billion), securities and commodities brokers (\$16.1 billion), and real estate operators and lessors of buildings (\$12.2 billion). The services industrial division accounted for 16.9 percent of the increase in total net income (less deficit) for all partnerships. Total net income (less deficit) in the services industrial division increased from \$37.4 billion for 1995 to \$43.9 billion for 1996 (Figure D).

Partnership statistics for 1996 show the continuing domination of the finance, insurance, and real estate and the services industrial divisions (Figures B and D). Together, these two divisions accounted for three-quarters of total net income and three-fifths of the deficit for all partnerships. The finance, insurance, and real estate division accounted for 53.9 percent of all partnerships, 49.4 percent of total net income, and 51.9 percent of total deficit. While only 17.9 percent of all partnerships were in the services division, these partnerships reported 24.8 percent of the total net income and 15.4 percent of the total deficit for all partnerships. Almost 80 percent of the total net income (less deficit) for this division was attributable to partnerships in the following industries: legal services (\$21.2 billion); medical and health services (\$7.8 billion); and accounting, auditing, and bookkeeping services (\$5.4 billion). Total net income (less deficit) increased for each of these industries for 1996.

Total net income for general partnerships, limited partnerships, and limited liability companies all increased for 1996. General partnership total net income increased from \$98.4 billion for 1995 to \$102.1 billion for 1996. The amount for limited partnerships increased from \$70.2 billion for 1995 to \$97.7 billion for 1996. Total net income for limited liability companies increased from \$10.0 billion for 1995 to \$24.4 billion for 1996 (Figure E). Deficits

<sup>1</sup> Includes "Nature of business not allocable," which is not shown separately.

NOTE: Detail may not add to totals because of rounding.

increased for both limited partnerships and limited liability companies and declined for general partnerships.

Figure F shows the number of partnerships, number of partners, and total net income (less deficit) by type of partnership and for limited liability companies for selected industries. For 1996, total net income (less deficit) increased substantially for limited partnerships and limited liability companies. General partnerships reported only a modest increase. Limited partnerships accounted for \$22.9 billion of the \$38.4 billion increase for all partnerships. Total net income (less deficit) for this group rose from \$32.5 billion for 1995 to \$55.5 billion for 1996. This was the largest increase in history for this group. Three-fourths of this increase was in the finance, insurance, and real estate industrial division. Limited partnerships in the real estate industry con-

tinued to show losses for 1996. However, the losses declined from \$2.5 billion for 1995 to \$1.2 billion for 1996. This continues a decline in losses for this industry for recent years.

For 1996, the number of limited liability companies continued to increase dramatically, rising 86.8 percent to 221,498 (Figure F). Over 70 percent of all limited liability companies were classified in the finance, insurance, and real estate and services industrial divisions. The total net income (less deficit) for all limited liability companies more than doubled, from \$4.9 billion for 1995 to \$12.3 billion for 1996. Over two-thirds of this income was concentrated in the finance, insurance, and real estate industrial division. Most of the remaining income was in the services industrial division. Limited liability companies are discussed further in the Explanation of Selected Terms section.

n.a.—Data not available.

NOTES: Detail may not add to totals because of rounding. Also, for 1996, detail may not add because companies which checked the "other" box (Form 1065, Schedule B, Line 1, Type of Entity) are excluded from columns (2) through (7) since they cannot be categorized. The gain for these "other" companies was \$4.0 billion, and the deficit was \$0.1 billion. Limited liability companies are discussed in the Explanation of Selected Terms section.

Although the number of both gain and loss partnerships increased for 1996, the increase in the number of gain partnerships was almost three times the increase in the number of loss partnerships (Figure G). The number of gain partnerships increased by about 50,000, while the number of loss partnerships increased by only about 17,000 (Figure G).

For 1996, the number of partners in limited liability companies increased, while the number of partners in both general and limited partnerships decreased (Figure H). This decline was caused by fewer partners in limited loss partnerships, reflecting a slight decrease in the number of limited loss partnerships (Figure G). The number of partners in limited loss partnerships had declined 35.9 percent since 1989. It declined in all seven of those years except 1992.

#### Real Estate Operators and Lessors of Buildings

Partnerships in the real estate operators and lessors of buildings industry continue to dominate partnership statistics, as they have since they were popular as tax

shelters prior to the Tax Reform Act of 1986. This industry has until recently reported large deficits. For 1996, it reported positive total net income (less deficit) for the third consecutive year (Table 6). This industry has shown a profit only three times since 1967. Total net income (less deficit) rose from \$9.5 billion for 1995 to \$12.2 billion for 1996. The 565,091 real estate operators and lessors of buildings partnerships reported total assets of \$835.5 billion (24.8 percent of the total reported for all partnerships), an increase from the \$789.2 billion reported by this industry for 1995 [1]. Overall, this industry accounted for 34.2 percent of both all partnerships and partners (Table 1). Data in Table 6 show how dramatically total net income (less deficit) has increased since 1989. Real estate operators and lessors of buildings reported a \$30.1 billion loss for 1989 compared to a \$12.2 billion gain for 1996.

#### Rental Real Estate Income (Less Deficit)

Table 4 presents data from Form 8825, *Rental Real Estate Income and Expenses of a Partnership or an S Corporation*. Rental real estate income (less deficit) for all partnerships increased \$3.2 billion, from \$4.4 billion for 1995 to \$7.6 billion for 1996 (Figure I). This was less than half the increase reported for 1995. This was only the second year that partnerships reported positive rental real estate net income (less deficit) since 1980. Ninety percent of the increase in rental real estate net income (less deficit) was attributable to real estate operators and lessors of buildings. For only the second time since 1960, this industry reported positive rental real estate income (less deficit). Rental real estate income (less deficit) for this industry rose from \$4.7 billion for 1995 to \$7.7 billion for 1996.

Gross rental real estate income increased from \$174.3 billion for 1995 to \$181.7 billion for 1996. Total rental expenses rose \$5.0 billion from \$167.6 billion for 1995 to \$172.6 billion for 1996 (Table 4). Partnerships reported \$36.2 billion in net rental income for 1996, up from \$32.1 billion for 1995. Rental deficit also increased for 1996. However, the increase was less than \$1.0 billion, from \$27.7 billion for 1995 to \$28.5 billion for 1996.

#### Total Receipts and Total Assets

Total receipts for all partnerships increased \$232.8 billion to \$1.2 trillion for 1996 (Figure D). This

NOTES: Detail may not add to totals because of rounding. Also, for 1996, detail may not add because companies which checked the "other" box (Form 1065, Schedule B, Line 1, Type of Entity) are excluded from columns (2) through (7) since they cannot be categorized. There are 3,673 "other" partnerships reporting net income and 1,468 "other" partnerships reporting deficit. Limited liability companies are discussed in the Explanation of Selected Terms section.

increase was 55.8 percent more than the \$149.4 billion increase for 1995, consistent with an improving economy [1]. Over two-thirds of this increase was attributable to an increase in business receipts, which went from \$760.6 billion for 1995 to \$915.8 billion for 1996. All allocable industrial divisions showed increases in total receipts for 1996. The finance, insurance, and real estate industrial division increased by 29.2 percent to \$365.0 billion. The services industrial division increased by 15.2 percent to \$276.4 billion. Total receipts in the wholesale and retail trade industrial division increased by 24.0 percent to \$217.1 billion. More than fifty percent of the \$1.2 trillion in total receipts reported for 1996 for all partnerships was concentrated in the finance, insurance, and real estate and services industrial divisions (Figures K and L) — approximately the same percentage as in prior years. (See the Explanation of Selected Terms section for the definition of total receipts.)

Approximately 32 percent of all partnerships — generally partnerships with total assets less than

\$600,000 and total receipts less than \$250,000 — were not required to file balance sheets for 1996. Table 3 presents balance sheet data, by industrial group and by profit status, for the remaining 68 percent of partnerships that filed balance sheets with their returns. Total assets grew by almost 24 percent,

# Partnership Returns, 1996

Figure J

## Real Estate Rental Income (Less Deficit), Tax Years 1988-1996

from \$2.7 trillion for 1995 to \$3.4 trillion for 1996. This continues the large growth in total assets (for example, the 18 percent increase from 1994 to 1995) seen in recent years.

For 1996, partnership returns in finance, insurance, and real estate accounted for 76.8 percent of the total assets for all partnerships – virtually the same percentage as for 1995. Partnerships in this division had reported more than 50 percent of the total assets for all partnerships for more than 20 years. The finance, insurance, and real estate industrial division accounted for \$513.1 billion, or almost 80 percent, of the total increase of \$649.5 billion in total assets.

### Distributions to Partners

Partnerships are not taxed; instead, their income, credits, and deductions flow through to the partners who are liable for any tax. Partners may be individuals, corporations, other partnerships, tax-exempt organizations, nominees, or other legal entities. Table 5 presents data on the distributions or alloca-

tions of partnership income (or losses) to limited and general partners by industrial division. These data were obtained from Schedule K, *Partners' Shares of Income, Credits, Deductions, etc.*, of the partnership return. This schedule reports the partners' shares of each component of the partnership's distributive income, deductions, and tax credits, as totals and by type of partner.

Total income (less loss) available for distribution — without regard to separately-allocable deductions — increased 36.8 percent, from \$207.5 billion for 1995 to \$283.8 billion for 1996 [1]. This was slightly more than the 32.5 percent (\$50.9 billion) increase for 1995. All industrial divisions showed increases in the income available for distribution for 1996, except agriculture, forestry, and fishing and manufacturing, both of which declined modestly. The largest distributions were reported by finance, insurance, and real estate (\$181.4 billion), services (\$58.1 billion), and manufacturing (\$10.8 billion). For 1996, separately allocable deductions for all partnerships increased 29.9 percent to \$46.5 billion, a

# Partnership Returns, 1996

Figure L

**Total Assets by Industrial Groups, Tax Year 1996**

**Total Receipts by Industrial Groups, Tax Year 1996**

rise over the 20.7 percent increase for 1995. Most of the increase in deductions was shown by partnerships in finance, insurance, and real estate.

The difference between the income (less loss) and deductions resulted in \$237.2 billion available for distribution or allocation to partners. This was a \$65.6 billion increase over the \$171.7 billion available for 1995. Of the amount available for distribution or allocation for 1996, \$213.2 billion was identified by type of partner. The difference was due to partnerships that failed to report allocations or distributions by type of partner.

Individual general partners received the largest amount of income for which distributions by type of partner were reported for 1996. This category of partner also received the largest amount of distributions for 1995. For 1996, individual general partners received 29.7 percent, or \$63.4 billion, of total distributions of \$213.2 billion. This was slightly less than twice the amount of distributions received by corporate general partners, who received the second largest distribution for 1996, \$33.6 billion. Individual limited partners had the third largest distribution for 1996, \$30.6 billion. Corporate limited partnerships had a distribution of \$24.2 billion for 1996, the fourth largest distribution. Together, these four types of partners received 71.2 percent of the total income distributed to partners.

Individual general partners were the principal category of income recipients for all industrial divisions except mining, manufacturing, transportation and public utilities, and finance, insurance, and real estate. Corporate general partners received the largest distribution of income or loss for these divisions, except finance, insurance, and real estate where the largest distribution went to individual limited partners and mining where the largest recipients of distributions were partnership general partners. Individual general partners in the services division continued to dominate the statistics, receiving 15.7 percent (\$33.4 billion) of distributions reported for all partnerships. This was a decrease from the 20.3 percent share reported for this group for 1995. Distributions to this group increased by only 3.2 percent for 1996, rising from \$32.4 billion for 1995.

Distributions to partners in real estate partnerships continued to be positive for the fourth consecutive year, increasing 28.6 percent to \$41.8 billion.

## Partnership Returns, 1996

Most of this increase was reported by real estate operators and lessors of buildings, which rose from \$28.8 billion for 1995 to \$36.3 billion for 1996. Distributions to individual limited partners in real estate, a group which has historically received net losses, continued to be positive for the fourth year, rising 58.8 percent to \$9.2 billion. Individual general partners, which had the largest distribution in both the real estate industrial group and in the real estate operators and lessors industry, declined slightly for 1996. Distributions to individual general partners in the real estate industrial group declined from \$15.4 billion for 1995 to \$14.1 billion for 1996. The real estate operators and lessors of buildings industry's distributions to individual general partners declined from \$13.0 billion for 1995 to \$12.0 billion for 1996.

In addition, distributions to both corporate general and limited partners in real estate (another group which had historically received net losses) were positive for 1996. Corporate general partners received a \$3.4 billion distribution for 1996, up from \$2.8 billion for 1995. This was the third consecutive year of positive distributions for this group. Corporate limited partners received \$1.3 billion for 1996, up from a \$225.6 million loss for 1995.

### Summary

For only the second time since 1988, partnerships reported increases in the same year for the number of partnerships, the number of partners, total assets, total receipts, and net income (less deficit) in 1996. Total net income (less deficit) rose almost 36 percent to \$145.2 billion. This increase continued the recent trend of increasing partnership profits, reflecting improvement in the economy. Over half of this increase was reported by partnerships classified as holding and investment companies and as real estate operators and lessors of buildings. Limited partnerships accounted for over one-half of the increase in total net income (less deficit) for all partnerships. Corporate limited partners in real estate received their first positive distributions since data first became available for this item for 1989. Partnerships again showed positive rental real estate income (less deficit). This was only the second time since 1980 that partnerships reported positive net rental real estate income, the first time being 1995. Real estate operators and lessors of buildings again reported positive rental real estate income (less loss), as they

did for 1995. Although limited partnerships showed a gain for the fourth consecutive year, limited partnerships in real estate continued to show a deficit. Activity by individual general partners in the services industrial division continued to dominate the statistics for partnership income (less loss) distributed to partners, accounting for \$33.4 billion of the \$213.2 billion reported by all partnerships.

### Sample Selection

Tax Year 1996 statistics are estimates based on a stratified probability sample of almost 40,000 returns selected from a population of approximately 1.8 million partnerships. Tax Year 1996 covers returns processed by the Internal Revenue Service during Calendar Year 1997. All partnerships engaged in business in, or having income from sources within, the United States were required to file a Form 1065, *U.S. Partnership Return of Income*, to report income or loss, deductions, tax credits, and other tax-related items generated by the partnership. The statistics are only for active partnerships, which are defined as those that reported any items of income or deduction derived from a trade or business, or from rental or portfolio income.

The population was stratified into classes based on size of total assets, receipts, net income (or deficit), and industry. Returns were selected from these classes at various probabilities ranging from 0.18 percent to 100 percent, and were weighted to represent the total population. Approximately 3 percent of the returns selected for the sample were not included in the tabulations because they represented inactive partnerships or multiple returns with identical accounting periods filed by the same partnership.

Because the data presented in this article are based on a sample of returns, they are subject to sampling error. To properly use the data, the magnitude of the potential sampling error needs to be known. Coefficients of variation (CVs), the ratio of an estimate's standard error to the estimate, are used to measure this magnitude. Figure M presents the coefficients of variation for certain money amounts for selected industrial groups. The smaller the coefficient of variation, the more reliable the estimate is judged to be [3].

### Explanation of Selected Terms

was required to be provided, in general, only if the partnership had total receipts of \$250,000 or more and total assets of \$600,000 or more. No attempt was made to estimate the assets and liabilities of partnerships that did not provide this information. Efforts were made to overcome the effects of nonuniform reporting, such as when partnerships used balance sheets of their own design instead of that provided on the return form.

**Limited Liability Companies.**— Limited liability companies (LLCs) were required to file Form 1065, *U.S. Partnership Return of Income*, and were identified by a question on Schedule B, *Other Information*.

There were 221,498 such companies in the 1996 population, a dramatic increase over the 118,559 shown for 1995. LLCs are hybrid business entities that combine the corporate characteristics of limited liability for all owners (members) with the pass-through tax treatment of a partnership. LLCs offer more organizational flexibility than do S Corporations. For example, unlike S Corporations, LLCs are not limited in the number of owners and can have corporate or foreign members. Also, unlike partners in limited partnerships, all members of LLCs benefit from limited liability protection, even if they actively participate in the management of the business.

**Partners.**— Partners can be individuals, corporations, other partnerships, or any other legal entity. Partners are classified as either general or limited. General partners are those who assume liability for the partnership's debts and losses. Limited partners are those whose liability in the partnership does not exceed their investment. By definition, a partnership must have at least two partners, at least one of which must be a general partner. A general partnership is composed entirely of general partners. A limited partnership has at least one general partner and one or more limited partners.

**Partnerships.**— A partnership is a relationship between two or more entities or persons who join to carry on a trade or business, with each partner contributing money, property, labor, or skill and each expecting to share in the profits and losses. Every partnership that engages in a trade or business or has income from sources in the United States must file an annual information return, Form 1065, *U.S. Partnership Return of Income*, with the Internal Revenue Service, showing the partnership's taxable income or loss for the year. A partnership must file this return even if its principal place of business is outside the United States or if all its members are nonresident aliens.

**Total Net Income (Less Deficit).**— Through Tax Year 1986, partnership total net income (less deficit) represents "ordinary income" (loss). Beginning with Tax Year 1987, because of tax law changes and revisions to Form 1065, a similar total net income (less deficit) figure has been computed for Statistics of Income studies as the sum of: ordinary income or loss from trade or business; portfolio income distributed directly to partners (excluding net short-term and long-term capital gains and losses, and prior to

## Partnership Returns, 1996

1994, other portfolio income was also excluded); net income or loss from rental real estate activities; and net income or loss from other rental activities. The sum of these components is a comprehensive measure of overall partnership profits or losses, which enables comparisons to be made with amounts of net income (less deficit) reported for years prior to 1987. The profit status of partnerships is determined as the sum of the gains or losses from the four activities listed above. Partnerships with a breakeven between gains and losses are included with loss partnerships.

*Total Receipts.*— Through Tax Year 1986, partnership total receipts represents “ordinary income.” Beginning with Tax Year 1987, because of tax law changes and tax form revisions, a similar total receipt figure has been computed for Statistics of Income studies as the sum of positive income (negative amounts or losses are not included) received by partnerships for the specific items listed below. Total receipts of partnerships consist of: gross receipts or sales less returns and allowances (i.e., “business receipts” in the statistics); ordinary income from other partnerships and fiduciaries; farm net profit; net ordinary gain from sales of business property; other income from a trade or business; net income from rental real estate activities; net income from other rental activities; portfolio interest income; portfolio dividend income; portfolio royalty income; net short-term capital gain; net long-term capital gain; other portfolio income; net gain from sales or exchanges of property used in a trade or business (Internal Revenue Code section 1231); and other income distributed to partners. Therefore, total receipts differs from the total receipts presented in Table 11 in the *Selected Historical and Other Data* section of this issue of the *Statistics of Income Bulletin*

*tin* in that certain income and deduction items distributed or allocated directly to partners (such as net short-term and long-term capital gains, net gain under Internal Revenue Code section 1231, other portfolio income, and other income) are excluded in the latter.

\* Estimate should be used with caution because of the small number of sample returns on which it is based.

<sup>1</sup> Total net income (less deficit) is the sum of net income (less deficit) from trade or business, portfolio income distributed directly to partners (excluding net short-term capital gain and net long-term capital gain), net income (less deficit) from rental real estate, and net income (less deficit) from other rental activity.

<sup>2</sup> Less than \$500.

NOTE: Detail may not add to totals because of rounding.

\* Estimate should be used with caution because of the small number of sample returns on which it is based.

<sup>1</sup> Total net income is the sum of net income (less deficit) from trade or business, portfolio income distributed directly to partners (excluding net short-term capital gain and net long-term capital gain), net income (less deficit) from rental real estate, and net income (less deficit) from other rental activity.

<sup>2</sup> Less than \$500.

NOTE: Detail may not add to totals because of rounding.

\* Estimate should be used with caution because of the small number of sample returns on which it is based.

<sup>1</sup> The difference between "number of partnerships" and "number of partnerships reporting balance sheet data" is because of partnerships exempt from filing balance sheets. Since these partnerships are generally small--total assets less than \$600,000 and total receipts less than \$250,000--balance sheet data for partnerships are slightly understated.

<sup>2</sup> Less than \$500.

NOTE: Detail may not add to totals because of rounding.

# Partnership Returns, 1996
