

PUBLIC SERVICE ANNOUNCEMENT

Emergency Wound Care After a Disaster

This podcast is presented by the Centers for Disease Control and Prevention. CDC – safer, healthier people.

This is an important message from the U.S. Department of Health and Human Services.

Apply first aid to treat cuts and scrapes and prevent infection. To care for a bleeding cut, put pressure on it until the bleeding has stopped. Clean the wound by gently pouring clean tap or bottled water over it. Next, apply a clean, dry bandage. If you think the cut is infected, get medical help as soon as possible. To learn more, call CDC at 800-CDC-INFO.
