ATTN: Docket # 2002-17

I represent the many wonderful people who live and work in the Evanston community. It is a wonderful Cincinnati community. I believe that a community grows as its people feel connected to it. That happens when people own their own homes. The people in my community are not as rich as in other Cincinnati communities but they still deserve the same opportunities. Home ownership has been up since the parity act helped more and more people afford their own homes.

I want to see my neighborhood grow and I want to see increases in home ownership. Please do not make changes to the alternative mortgage parity act that would make it harder for people just like the ones in my neighborhood to get the credit they need to buy a home. This act helps my neighborhood and certainly many, many others across America.

Thank you,

  
Sharon Muyaya  
President
