**Subject:** Banknotes in Circulation

Dear ladies and gentlemen,

I'm a student of the university of applied science in Augsburg, Germany. Right now I'm writting my dissertation concerning the CIT market in the United States. To get a better overview about theses markets I'm really interested in facts and figures concerning the banknotes in circulation per state of the United States.

Is there any change to get informations like this from you?

Furthermore I'm interested in the number of ATM's per state in the United States. Do you have these kind of information?

One other point is that I'm also interested in facts and figures concerning Cash Centers and money processing in the United States.

Please let me now if and how I can recieve these informations.

Thank you very much in advance.
