

We would like to tell you how grateful we are with UHP. UHP helped us become homeowners. We came to this country from Mexico and we had rented for many years. We didn't know anything about the process of buying a house. We heard about UHP and decided to attend one of their meetings. UHP helped us with the entire process and at no charge. They educate people on buying a home. UHP helped get assistance which without we would not been able to get the house. Everyone works together in UHP from donating time, supplies and food for program events. We all have donated our time to help others get into new homes by attending meeting and fighting for what's right. Ever since we own our home we feel that the American dream is possible.
