

7-28-90

We are the Castillo family we
are four altogether. I have 2 boys: (107)
when we were living in an apartment
we didn't have any privacy. Our
children would always be fighting
with other kid. Their parents would be
knocking at our door and we would
get into it. Our poor kids had to
stay inside. You would see a lot of
drugs going around. Some women
making out around the corner. It
was terrible. Some times the air
conditioners didn't work until a certain
month of the year. In summer
we couldn't open our windows cause
we didn't have any screens. There
were roaches, some people were clean

if there would be 3 or 4 family
living in one apartment.

Thanks to this program UHP
and other program that are involved
we have a house of our own. The
kids love there own rooms. They get
to go outside and play they
enjoy it. This program don't ask
for anything back. So we volunteer
we go to meeting this help other
people get help from this programs
we are all happy for receiving
assistance that we thank everybody
thank you again
