ps.

A New Home is like being the "BOSS" to all mine and I work when I want to, for it, to it, around and in it (it = House). I gain time to the Community and the Accouplish things for my children and I was getting out of an apartment. I've been living in an apartment over 10 yrs. There was no gain, just living and begging for repairs on the air or heat to be turned on/off. I saw a way to get out and pursued bigger and better living for what I pay now for me and my kids living is great. There was only an change in the environment, the loc. area I choose where I would want to live and raise my 2 sons. Being a single Black female with 2 young boys, was a task while living in a apartment facing a busy street. There was really no place my kids could play safely. There was also times parking was unsafe or not close enough. Especially when

I'm a Quality Control Clerk, when I come home is different than coming to an Apartment. Wandering if I'll be comfortable or what's not work. I just taking some time with my kids while they play out in front of the apartment because some area of the apartment were unsafe. Now with being in a home, there front and backyard. My littlest son could play out back fenced in and play without being told to get off the premise. My household chores I can do at home while I cook, or clean. A lot of my away from home doing has changed for the better I really love everything about owning a home for me and my children. Getting the assistance and giving my time to United Housing to make it all better in exchange to give to the community has not delayed or interrupted at all. Instead, things are better I can really see what I pay for. Mortgage not here there were not charges hidden or unexpected monies to be given at being or end while I worked my way with UHP. Their services were free I gave some community time. e

Besides, I live in a community. My children need to experience the growth and reality while growing up in a great community. The movies given by the several different programs; made me aware of my time served to the community. I will continue this, not only for my family and I; But to let other families low income, single parent etc 's see that this can be done and it's real. The assistance was very helpful I was grateful in the giving it made a big difference in me getting a home. I received several types of assistance programs funding. UHP did a wonderful job, I didn't stress, over work myself or 'struggled at all. I pray and help UHP and they help getting over 10 thousand from one program 2,000 from another and more from others like Enterprise UCap, Ucap and a few others. Without the time of UHP workers and getting the support of the programs getting the assistance may have been difficult by myself. I've enjoyed the beginning to end in my family and getting in a home and we can enjoy and live
