The social and economic strength of rural areas is critical, to the biosecurity of the U.S., during this period of possible bioterrorist attack. Your proposal is to give CRA credit, to thrift institutions, without benefit to poor rural populations. By so weakening rural America, you will be acting to support al-Qaeda and other terrorist organizations. Such actions are in violation of U.S. Criminal Codes. Please advise if and when your proposal is approved so I can proceed with an appropriate civil complaint via the courts. Thank you.
