

Partnership Returns, 2000

by Bill Pratt

The growth in the number of partnership returns for 2000 continued the trend established in recent years. For 2000, the number of partnerships, total assets, and total net income (less deficit) all increased over the amounts reported for 1999. The number of partners decreased for the third consecutive year. The number of partnerships has been growing since 1994, after several years of decline. The number of partnerships increased for 2000 in every industrial sector except raw materials and energy production; and goods production. Total assets increased in every industrial sector. Total net income (less deficit) also increased in every sector except leisure, accommodation, and food services; and "other services" [1].

Partnerships classified in the finance, insurance, real estate, and rental and leasing sector continued a long established trend of dominating the statistics for number of partnerships, and number of partners, as well as the financial data. The professional and business services sector had the second largest number of partnerships, while raw materials and energy production had the second largest number of partners.

Partnership Activity

Partnerships again reported increases in the number of partnerships, total assets, and total net income (less deficit) (Figure A). Partnerships for 2000 reported a decrease in number of partners for the third year in a row. For 2000, the number of partnerships increased 6.2 percent to 2,057,500. The finance, insurance, real estate, and rental and leasing sector accounted for the largest increase in number of partnerships for 2000, as it has traditionally. For 2000, there were 1,157,453 partnerships classified in this sector. This was an increase of 80,154, or 7.4 percent, over 1999 [2]. The professional and business services sector showed the second largest increase in partnerships, from 167,942 for 1999 to 190,337 for 2000, or 13.3 percent.

The number of partners decreased by 11.0 percent to 13,659,967 for 2000 from 15,353,154 for 1999 (Figures A and B). Partnerships classified in the

finance, insurance, real estate, and rental and leasing sector showed the largest decrease in number of partners of 1.6 million, or 15.2 percent. This sector accounted for 67.2 percent of the total number of partners. Raw materials and energy production; and information also showed a decrease of 21.6 percent (264,705) and 8.5 percent (29,157), respectively, while all other sectors showed an increase in number of partners. The largest increase in partners was in the distribution and transportation of goods sector. The number of partners in this sector increased from 721,768 for 1999 to 818,387 for 2000, or 13.4 percent.

Total assets increased by 11.6 percent, from \$6.0 trillion for 1999 to \$6.7 trillion for 2000. The finance, insurance, real estate, and rental and leasing sector reported the largest amount, \$4.8 trillion, which is 71.5 percent of the total for all partnerships. No other sector represented as much as 7 percent of the total.

Continuing the trend of large percentage increases, which began with 1990, total net income (less deficit) reported by partnerships increased by 17.8 percent for 2000 to \$269.0 billion (Figures A and C). The only industrial sectors in which total net income (less deficit) did not increase were leisure, accommodation, and food services; and "other services." The decreases in the leisure, accommodation, and food services; and "other services" were 51.9 percent and 6.7 percent, respectively. The net deficit reported by partnerships classified in the

Bill Pratt is an economist with the Corporation Special Projects Section. This article was prepared under the direction of Glenn Hentz, Acting Chief.

information sector decreased by almost 50 percent, from \$6.9 billion for 1999 to \$3.5 billion for 2000 (Figure D). The information sector was the only sector to report a deficit for 2000. (Total net income (less deficit) is defined and explained in the "Explanation of Selected Terms" section.)

The finance, insurance, real estate, and rental and leasing sector continued to dominate the statistics for 2000 (Figures B and D). Partnerships classified

in this sector accounted for 56.3 percent of all partnerships, 67.2 percent of all partners, and 71.5 percent of total assets. Partnerships classified in this sector again accounted for more than 55 percent of total net income (less deficit). Total net income (less deficit) for this sector rose by 13.5 percent, from \$133.3 billion to \$151.3 billion for 2000 (Figure D).

Partnerships again reported positive rental real estate net income (less deficit), although it decreased

¹ Total net income (less deficit) is discussed in the "Explanation of Selected Terms" section.

NOTE: Detail may not add to total because of rounding.

slightly from 1999. For 2000, this amount declined 3.8 percent to \$35.0 billion, from \$36.4 billion for 1999. The five industries included in the real estate industry group accounted for \$33.4 billion, or 95.3 percent, of this total. This continues the trend for the sixth year of partnerships primarily engaged in rental activities reporting positive rental real estate net income. Prior to 1995, the real estate operators and lessors of buildings industry had not reported positive rental real estate net income since 1960.

Total net income for both general and limited partnerships, as well as for limited liability companies (LLC's) and limited liability partnerships (LLP's) increased for 2000 (Figures E and F). Total net income of general partnerships increased from \$95.7 billion for 1999 to \$98.8 billion. For limited partnerships, it increased from \$135.9 billion to \$146.4 billion. For limited liability companies, it increased from \$82.7 billion to \$112.0 billion. Deficits for general partnerships decreased slightly from \$21.2 billion for 1999, to \$20.5 billion for 2000. For limited partnerships, deficits rose from \$48.4 billion to \$49.5 billion. Limited liability company deficits rose from \$48.0 billion to \$64.3 billion.

The number of limited liability companies with "positive" net income increased for 2000 by about 65,000 to 383,000, while the number of general and limited partnerships with net income both decreased (Figure G). General partnerships with net income decreased by about 31,000 to 589,000, and limited partnerships with net income decreased by about 9,000 to 215,000. The combined total of these three

entity types with a net deficit increased by about 73,000 to 752,000. This increase was primarily due to an increase of 64,000 for LLC's with a net deficit. For 2000, the number of partners for both limited liability companies and general partnerships increased, while the number of partners for limited partnerships decreased (Figure H) [3].

Beginning with 2000, a new choice for entity type, 'foreign partnership,' was added to the partnership return. Previously, foreign partnerships were classified with domestic partnerships as general, limited, or limited liability partnerships or limited liability companies. There were 2,974 foreign partnerships for 2000.

Real Estate and Rental and Leasing

Historically, partnerships classified in the real estate industry group have dominated the statistics for the number of partnerships and partners, as well as the financial data. These partnerships have reported positive total net income for 7 consecutive years, after reporting total net deficits every year until 1994. Table 1, which contains financial data classified by industries, shows that the real estate and rental and leasing subsector reported total net income (less deficit) from all sources of \$51.6 billion for 2000, which was 19.2 percent of the total for all industries. The 905,796 partnerships classified in this industry subsector reported total assets of \$1.8 trillion, 27.6 percent of the total reported for all partnerships. Overall, this industry subsector accounted for 44.0 percent of partnerships and 42.5 percent of partners.

n.a.--Data not available. Thus, data for these types of partnerships are not included in the totals for all partnerships (column 1).

¹ Foreign partnerships was a new category included on the 2000 Form 1065, Schedule B, Line 1, Type of Entity. For years prior to 2000, the total net income or deficit for foreign partnerships was included in the other categories, that is, Columns (1) through (9), (12) and (13).

² Other partnerships are those which checked the "Other" box, Form 1065, Schedule B, Line 1, Type of Entity.

NOTES: Detail may not add to totals because of rounding. Limited liability companies, limited liability partnerships, and foreign partnerships are discussed in the Explanation of Selected Terms section. Breakeven returns are included in the "deficit" columns.

\$232.5 billion. This was only the sixth time that partnerships reported a positive amount for rental real estate net income (less deficit) since 1980. For 2000, the finance, insurance, real estate, and rental and leasing sector accounted for 97.3 percent of rental real estate net income (less deficit). For 1999, about 97.4 percent of real estate rental income was from this sector. Within the real estate industry group, data from Forms 8825 for 2000 show that 71.4 percent of rental real estate net income (less deficit) was reported by partnerships that were lessors of nonresidential buildings (except miniwarehouses). Additionally, within that sector, 17.0 percent of the rental real estate income (less deficit) reported for the real estate subsector came from lessors of residential buildings and dwellings. Partnerships reported \$66.2 billion in net rental income for 2000, up from \$63.0 billion for 1999. Rental deficit increased to \$31.2 billion for 2000, after remaining about the same for both 1998 and 1999 at \$26.6 billion.

Total Receipts and Total Assets

Total receipts for all partnerships increased \$574.2 billion (26.8 percent) to \$2.7 trillion for 2000. (See the "Explanation of Selected Terms" section for the

definition of total receipts.) Almost 78 percent of this increase was due to the rise in business receipts, which grew from \$1.6 trillion for 1999 to \$2.1 trillion for 2000. (See the "Explanation of Selected Terms" section for the definition of business receipts.) Figure J shows the composition of total receipts by industrial sector.

Almost 27 percent of all partnerships--generally those with total assets of less than \$600,000 and total receipts of less than \$250,000--were not required to file a balance sheet with their returns. Table 3 presents balance sheet data, by industry and profit status, for the more than 73 percent of partnerships that filed balance sheets. The total assets reported by these returns grew by 11.6 percent from \$6.0 trillion for 1999 to \$6.7 trillion for 2000 (Figure D).

For 2000, partnership returns classified in the finance, insurance, real estate, and rental and leasing sector accounted for 71.5 percent of total assets. This is less than the percentage of total assets reported by partnerships in this sector for 1999, about 74.6 percent. Despite this slight decline in share of total assets, partnerships classified in finance and real estate continue to report more than 50 percent of total assets for all partnerships, as they have for more than 20 years.

NOTE: The sum of the number of partnerships for all three categories does not sum to the total number of partnerships in other figures because companies classified as limited liability partnerships (LLP), foreign partnerships, or "other" were not included in this table due to the small number of returns. For 2000, there were 2,974 partnerships classified as foreign and 53,259 partnerships classified as LLP's. There were also 61,546 partnerships classified as "other."

Allocations to Partners

Partnerships are not taxed; instead, their income, credits, and deductions flow through to the partners for inclusion on the partners' own tax returns. Partners may be individuals, corporations, other partnerships, tax-exempt organizations, nominees, or other legal entities. Table 5 presents data on the allocations of partnership income (or losses) for selected industry groups. These data were obtained from Schedule K, *Partners' Shares of Income, Credits, Deductions, etc.*, of the partnership return, which reports each component in total and by type of partner.

Total income (less deficit) available for allocation, before deductions, increased by more than 20 percent for the second consecutive year. For 2000, the increase was 21.1 percent, from \$458.8 billion for 1999 to \$555.5 billion. For 1999, this increase was 22.2 percent. Separately-stated deductions (such as charitable contributions and investment interest expense) for all partnerships increased by 32.2 percent from \$69.4 billion for 1999 to \$91.7 billion. For 1999, deductions showed a decrease of 1.2 percent.

The difference between total income (less deficit) and total deductions resulted in \$463.8 billion of

income (less loss) available for allocation to partners. This was a \$74.4-billion increase over the \$389.4 billion available for 1999. Of the amount available for allocation, after deductions, for 2000, almost \$445.2 billion were identified by type of partner. The difference was due to some partnerships failing to report allocations by type of partner.

Partners classified as individuals received 36.5 percent of all allocated income, while partners classified as corporations received 29.3 percent of income allocated. Individuals who were general partners were again the principal category of income recipients for 2000, receiving 18.8 percent of all income allocated.

Individuals who were limited partners in the finance, insurance, real estate, and rental and leasing sector received the largest allocation (\$57.3 billion), almost 13 percent of reported net allocations for all partnerships. For 1999, individuals who were limited partners in this industry received \$49.0 billion in allocations, or 13.3 percent of allocations reported by all partnerships.

Overall, allocations in the real estate industry group were again positive for 2000. Allocations for this industry decreased by less than 1 percent to \$95.5 billion, from \$96.3 billion for 1999. Continuing a recent trend, allocations to individuals who were limited partners in real estate were positive for the eighth consecutive year. Historically, partners in this industry group had received net losses. In addition,

allocations to both corporate general and corporate limited partners in real estate, another group that traditionally received net losses, were positive for 2000.

Limited Liability Companies

Limited liability company (LLC) data are included in partnership statistics because most LLC's filed the partnership reporting form for Federal tax reporting purposes. The number of LLC's has been increasing rapidly. Beginning with 1997, they exceeded the number of limited partnerships each year. The number of LLC's increased from 589,403 for 1999, to 718,704 for 2000 (Figures F and G). This represents the first time that the number of LLC's was more than double the number of limited partnerships (348,973). As a percentage of all partnership returns, the number of LLC's has been steadily increasing. For 2000, LLC's accounted for 34.9 percent of all partnership returns, compared to 30.4 percent for 1999.

As with all partnership entity types, most LLC's were classified in the finance, insurance, real estate, and rental and leasing sector (Table 6). The finance, insurance, real estate, and rental and leasing sector accounted for 51.5 percent of all LLC's. Within that sector, most LLC's were classified in the real estate and rental and leasing subsector. Almost one-quarter of all LLC's were classified in the services sectors (professional and business services; educational, health, and social services; leisure, accommodation,

NOTE: Detail may not add to totals because of rounding.

and food services; and "other services"). The professional and business services sector alone accounted for almost 12 percent of all LLC's.

The \$2.2 trillion of total assets reported by LLC's represent a 31.3-percent increase from the \$1.7

trillion in total assets reported for 1999. Total assets for LLC's were 32.5 percent of total assets reported by all partnerships for 2000, up from 27.6 percent for 1999. The largest amount of total assets was reported by LLC's classified in the finance, insurance,

Partnership Returns, 2000

real estate, and rental and leasing sector, \$1.4 trillion. Within this sector, LLC's classified in the security, commodity contracts, and other financial investments industry group reported the largest amount of total assets, \$677.4 billion.

Total net income (less deficit) for LLC's increased by 37.3 percent from \$34.7 billion for 1999 to \$47.7 billion for 2000. For 2000, total net income (less deficit) for LLC's was 17.7 percent of total net income (less deficit) reported by all partnerships, up from 15.2 percent for 1999. (See the "Explanation of Selected Terms" section for more information on limited liability companies.)

Electing Large Partnerships

Form 1065-B, *U.S. Return of Income for Electing Large Partnerships*, was introduced for Tax Year 1998. This form can be filed by partnerships that had 100 or more partners in the preceding year. Unlike a regular partnership that reports the partner's allocated share of income, gain, loss, deductions, or credits to each partner, an electing large partnership combines most items at the partnership level and passes through net amounts to partners. Data for electing large partnerships were included with regular partnership data in the figures and tables for 2000. There were 97 partnerships that filed Form 1065-B for 2000, which is a slight decrease from the 100 partnership returns filed for 1999. The 81,520 partners reported for 2000 are an increase from the 31,004 partners reported for 1999. Total assets increased from \$8.6 billion for 1999, to \$10.8 billion for 2000. Total net income (less deficit) decreased to \$258.7 million, from \$649.1 million for 1999. Almost 50 percent of the electing large partnerships were classified in the raw materials and energy production sector, while just over 35 percent of these partnerships were classified in the finance, insurance, real estate, and rental and leasing sector.

Electronically-Filed (ELF) Partnerships

Although the IRS has offered the voluntary filing of Form 1065 through Electronic/Magnetic Media since 1986, beginning in Tax Year 2000, partnerships with more than 100 partners were required to file their returns electronically. In some instances, partnerships were excluded from filing electronically if the software was unavailable for one or more of the required forms. Additionally, partnerships that met

the following conditions were excluded from the electronic filing mandate:

- ◆ Form 1065-B Returns (Electing Large Partnerships)
- ◆ Form 1065 with a foreign address
- ◆ Amended Returns
- ◆ Returns filed under Sections 6020(b), 501(d)(3), or 761(a) of the Internal Revenue Code
- ◆ Fiscal Year Partnership Returns
- ◆ Fiscal Year Short Period Returns
- ◆ Fiscal Year Final Returns

Data for electronically-filed partnerships were included with regular partnership data in the figures and tables for 2000. There were 7,165 partnerships that filed electronically for 2000, representing 3.0 million partners.

Summary

- For 2000, the number of partnerships, total assets, and total net income (less deficit) all increased, while number of partners decreased. The number of partnerships grew 6.2 percent over 1999. Total assets increased 11.6 percent. Total net income (less deficit) increased by 17.8 percent. The number of partners decreased by 11.0 percent.
- The information sector was the only major sector to report a net deficit for 2000, almost \$3.5 billion. This was a 49.5-percent decrease in the net deficit reported by partnerships classified in this sector for 1999, over \$6.9 billion.
- For the sixth consecutive year, partnerships reported positive rental real estate income (less deficit). The amount of rental real estate income (less deficit) reported by partnerships classified in the real estate industrial group decreased by 4.2 percent from \$34.9 billion for 1999, to \$33.4 billion for 2000.
- All industrial sectors, except information, reported positive income (less deficit) allocated to partners. The largest amounts of income were allocated to general and limited partners who were individuals, \$83.7 billion and \$78.7 billion, respectively.

Partnership Returns, 2000

Sample Selection

Tax Year 2000 statistics are estimates based on a stratified probability sample of almost 36,000 returns selected from a population of almost 2.2 million partnerships. Tax Year 2000 covers returns processed by the Internal Revenue Service during Calendar Year 2001. All partnerships engaged in business in, or having income from sources within, the United States were required to file either Form 1065, *U.S. Partnership Return of Income*, or Form 1065-B, *U.S. Return of Income for Electing Large Partnerships*, to report income or loss, deductions, tax credits, and other tax-related items generated by the partnership. The statistics are only for active partnerships, which are defined as those that reported any items of income or deduction derived from a trade or business, or from rental or portfolio income.

The population was stratified into classes based on industry, form type, size of total assets, and size of certain receipt or income amounts from both ordinary income (loss) from trade or business and portfolio income (loss). Returns were selected from these classes at various probabilities ranging from 0.09 percent to 100 percent, and were weighted to represent the total population. About 2 percent of the returns selected for the sample were not included in the tabulations because they represented inactive partnerships or were multiple returns with identical accounting periods filed by the same partnership.

In reaction to the September 11, 2001, Terrorist Attack (the Terrorist Attack), the Service allowed affected partnerships an extension to file their returns. This is similar to the treatment of natural disasters like floods or earthquakes. These returns were not filed until after the partnership sample selection period ended, and are not included in the 2000 sample or population, but will be included in Tax Year 2001 statistics to be released next year. Historically, adjustments have not been made to the sample data to include returns filed after the deadline based on other tragedies or natural disasters. Currently, no data are available as to the number of returns affected by the Terrorist Attack.

Because the data presented in this article are based on a sample of returns, they are subject to sampling error. To properly use the data, the magnitude of the potential sampling error needs to be known. Coefficients of variation (CVs), the ratio of an estimate's standard error to the estimate, are used

to measure this magnitude. Figure K presents the coefficients of variation for certain money amounts, for selected industrial groups. The smaller the coefficient of variation, the more reliable the estimate is judged to be.

Figure K

Explanation of Selected Terms

Assets and Liabilities.--A partnership was required to provide balance sheet information, in general, only if it had total receipts of \$250,000 or more and total assets of \$600,000 or more. No attempt was made to estimate the assets and liabilities of partnerships that did not provide this information. However, in the event that a partnership provided balance sheet data in a format of its own, instead of that provided on the return form, an effort was made during data collection to associate the amounts provided with the items on the partnership balance sheet schedule.

Business Receipts.--The amounts shown for "business receipts" in tables 1 and 2 are the difference between gross receipts or sales and returns and

Partnership Returns, 2000

allowances. Thus, these strictly represent amounts received from trade or business activities. For partnerships classified in industries, such as real estate, where the largest amount of gross receipts was from rental real estate activity and was not reported on Form 1065 or Form 1065-B, no adjustment is made to business receipts to include these amounts.

Electing Large Partnerships.--Partnerships that had 100 or more partners in the preceding year may elect to file Form 1065-B, *U.S. Return of Income for Electing Large Partnerships*. Unlike a regular partnership that reports the partner's allocated share of income, gain, loss, deductions, or credits to each partner, an electing large partnership combines most items at the partnership level and passes through net amounts to partners.

Electronically-Filed (ELF) Partnerships.--Certain partnerships were required to file their returns electronically. Section 1224 of the Taxpayer Relief Act of 1997 requires partnerships with more than 100 partners to file their return electronically for taxable years ending on or after December 31, 2000, unless certain conditions are met.

Foreign Partnerships.--A foreign partnership is a partnership that is not created or organized in the United States or under the law of the United States or of any State. If a foreign partnership has gross income from trade or business within the United States or has gross income derived from sources within the United States, it must file a partnership return.

Limited Liability Companies.--Limited liability companies (LLC's) that choose to be taxed as partnerships file Form 1065, *U.S. Partnership Return of Income*. They were identified by a question on Schedule B, *Other Information*. Limited liability companies combine the corporate characteristics of limited liability for all members with the passthrough tax treatment of a partnership. (The owners of an LLC are called members, not partners.) These businesses offer more organizational flexibility than S corporations. For example, unlike S corporations, LLC's are not limited in the number and type of owners. Also, unlike partners in limited partnerships, all members of LLC's are afforded limited liability protection, even if they actively participate in the management of the business. In a few cases, LLC data were reported on sole proprietorship or on corporation income tax returns. LLC data reported on these returns were not included in the partnership data.

Limited Liability Partnerships.--Limited liability partnerships (LLP's) file Form 1065 *U.S. Partnership Return of Income*. They were identified by their responses to a question on Schedule B of Form 1065. LLP's are available in some States for professional partnerships, such as law firms or accounting firms. A partner in an LLP receives liability protection from the actions of other partners, but is liable for partnership debts, as well as for the consequences of his or her own actions.

North American Industry Classification System.--Starting with the 1998 partnership study, data were classified using the North American Industry Classification System (NAICS). NAICS replaced the Standard Industry Classification system (SIC) in use since the late 1930's. Like SIC, NAICS is a hierarchical system that classifies businesses, including partnerships, into "sectors," "subsectors," "industry groups," and "industries." SIC used the terms "industrial division," "major group," and "industry." Although the complete NAICS uses twenty sectors, for presentation purposes, the partnership data in this article have been grouped into the following industrial sectors:

- raw materials and energy production, which includes:
 - agriculture, forestry, fishing, and hunting,
 - mining, and
 - utilities;
- goods production, which includes:
 - construction, and
 - manufacturing;
- distribution and transportation of goods, which includes:
 - wholesale trade,
 - retail trade, and
 - transportation and warehousing;
- information
- finance, insurance, real estate, and rental and leasing, which includes:
 - finance and insurance, and
 - real estate and rental and leasing;
- professional and business services, which includes:
 - professional, scientific, and technical services,
 - management of companies, and
 - administrative and support and waste management and remediation services;

Partnership Returns, 2000

- education, health and social services, which includes:
 - educational services, and
 - health care and social assistance;
- leisure, accommodation, and food services, which includes:
 - arts, entertainment, and recreation, and
 - accommodation and food services;
- “other services”; and
- nature of business not allocable.

This aggregation structure is a combination of the sectors, except public administration, included in the complete NAICS. No attempt was made to aggregate portions of sectors to create alternate groupings to simulate the SIC groupings used prior to 1998. Thus, data in these tables cannot be easily compared to partnership data for years prior to 1998.

The broadest industry classification of data in these tables is called the “industrial sector.” Within the industrial sectors, data are classified into “industrial subsectors.” Data within industrial subsectors are classified into “industry groups.” The most detailed classification in these tabulations is the “industry” [4].

Partnership industries were determined from which activity the business derived the largest percentage of its “total receipts.” Total receipts was defined as the sum of: gross receipts, or sales; ordinary income from other partnerships, estates, and trusts; net farm profit; net gain from Form 4797; other income; gross income from other rental activities; portfolio interest income; portfolio dividends; portfolio royalty income; net short-term capital gains; net long-term capital gains; other portfolio income; gross rents from rental real estate; net gain from the disposition of property from rental real estate activities; and net income from rental real estate activities from partnerships, estates, and trusts in which the partnership is a partner or beneficiary. Total receipts for partnership industry coding purposes differs from total receipts used elsewhere in this article and defined under *Total Receipts* in this section.

Partner.--Partners can be individuals, corporations, other partnerships, or any other legal entity. Partners are classified as either general or limited. General partners are those who assume liability for the partnership’s debts and losses. Limited partners are those whose liability in the partnership is limited to their investments. By definition, a partnership

must have at least two partners, at least one of which must be a general partner. A general partnership is composed entirely of general partners. A limited partnership has at least one general partner and one or more limited partners.

Partnerships.--A partnership is a relationship between two or more entities or persons who join to carry on a trade or business, with each partner contributing money, property, labor, or skill, and each expecting to share in the profits and losses. Every partnership that engages in a trade or business or has income from sources in the United States must file an annual information return, Form 1065, *U.S. Partnership Return of Income*, or Form 1065-B, *U.S. Return of Income for Electing Large Partnerships*, with the Internal Revenue Service, showing the partnership’s taxable income or loss for the year. A partnership must file this return even if its principal place of business is outside the United States and even if all of its members are nonresident aliens.

Total Net Income (less deficit).--Through Tax Year 1986, total net income (less deficit) was reported on Form 1065 as “ordinary income (loss).” As a result of tax law changes and tax form revisions, beginning in 1987, Statistics of Income studies began computing a similar net income (less deficit) figure as the sum of:

- ordinary income or loss from trade or business;
- portfolio income allocated directly to partners (excluding net short-term and long-term capital gains and losses, and prior to 1994, other portfolio income);
- net income or loss from rental real estate activities; and
- net income or loss from other rental activities.

The sum of these components is a comprehensive measure of overall partnership profits or losses, which enables comparisons with net income (less deficit) reported for years before 1987. The profit status of a partnership is determined, based on the sum of these four amounts. Partnerships where the sum of these four amounts equals zero are included with loss partnerships.

Total Receipts.--Total receipts provides a measure of income changes over a period of time. It is created to reflect similar computations published by other Statistics of Income (SOI) studies. Total receipts computed for SOI is the sum of positive in-

Partnership Returns, 2000

come received by partnerships for the specific items listed below: (Negative amounts or losses are included in the statistics as deduction items.)

- gross receipts or sales less returns and allowances (i.e., “business receipts” in the statistics);
- ordinary income from other partnerships and fiduciaries;
- farm net profit;
- net ordinary gain from sales of business property;
- other income from a trade or business;
- net income from rental real estate activities;
- net income from other rental activities;
- portfolio interest income;
- portfolio dividend income;
- portfolio royalty net income;
- net short-term capital gain;
- net long-term capital gain;
- other portfolio income;
- net gain from sales or exchanges of property used in a trade or business (Internal Revenue Code section 1231); and
- other income allocated to partners.

Therefore, total receipts in *Bulletin* Table 1 differs from total receipts presented in Table 11 in the *Selected Historical and Other Data* section of this issue of the *Statistics of Income Bulletin*, in that certain income and deduction items allocated directly to partners (such as net short-term and long-term capital gains, net gain under Internal Revenue Code section 1231, other portfolio income, and other income) are excluded from Table 11.

Notes and References

- [1] The industry sector “other services” included returns classified as: repair and maintenance services; personal and laundry services; and religious, grantmaking, civic, professional, and similar organizations.
- [2] Throughout the text, references are made to Tax Year 1999 data. For further information concerning Tax Year 1999 data, see Zempel, Alan, and Wheeler, Timothy, “Partnership Returns, 1999,” *Statistics of Income Bulletin*, Fall 2001, Volume 21, Number 2. Partnership data have been published annually by the Statistics of Income Division since 1957. Prior to that, financial data were published for 1939, 1946, 1947, and 1953 only. The individual income tax statistics show the number of returns with income or loss from partnerships and the corresponding amounts, starting with 1917. Counts of the number of partnerships since 1917 are available from the Statistics of Income Division.
- [3] Owners of a limited liability company are referred to as “members” instead of partners.
- [4] For further information about the North American Industry Classification System, including background, format, and detailed descriptions of the activities included in each classification, see *North American Industry Classification System, United States*, Executive Office of the President, Office of Management and Budget, <http://www.ntis.gov/naics>.

Deficit.....	323,281	229,306	93,975	406,723	*1,797	*23,255

* Estimate should be used with caution because of the small number of sample returns on which it is based.

¹ Total net income (less deficit) is the sum of net income (less deficit) from trade or business, portfolio income (less deficit) distributed directly to partners (excluding net short-term capital gain and net long-term capital gain), net income (less deficit) from rental real estate, and net income (less deficit) from other rental activity.

² Less than \$500.

NOTE: Detail may not add to totals because of rounding.

Total net income ¹.....	814,966	576,069	238,897	714,584	*26,683	*18,979

* Estimate should be used with caution because of the small number of sample returns on which it is based.

¹ Total net income is the sum of net income (less deficit) from trade or business, portfolio income (less deficit) distributed directly to partners (excluding net short-term capital gain and net long-term capital gain), net income (less deficit) from rental real estate, and net income (less deficit) from other rental activity.

² Less than \$500.

NOTE: Detail may not add to totals because of rounding.

Partnership Returns, 2000

* Estimate should be used with caution because of the small number of sample returns on which it is based.

¹ The difference between "number of partnerships" and the "number of partnerships reporting balance sheet data" is due to partnerships exempt from filing balance sheets. Since these partnerships are generally small--total assets less than \$600,000 and total receipts less than \$250,000--balance sheet data for partnerships are slightly understated.

² Less than \$500.

NOTE: Detail may not add to totals because of rounding.

Partnership Returns, 2000

* Estimate should be used with caution because of the small number of sample returns on which it is based.

¹ "Nature of business not allocable" is not shown in this table because no partnership returns classified in this industrial group reported real estate rental income.

NOTE: Detail may not add to totals because of rounding.
