Schedule P (Form 1120-FSC) 1998 Page 2

## **General Instructions**

Section references are to the Internal Revenue Code unless otherwise noted.

## **Purpose of Schedule**

Use Schedule P to figure the transfer price to charge the FSC or the commission to pay to the FSC under the administrative pricing rules discussed below. The transfer price or commission is used to allocate foreign trading gross receipts from the sale of export property or certain services between the FSC and its related supplier.

**Related supplier.** Under Regulations section 1.482-1(a), a related supplier is an entity that is owned or controlled directly or indirectly by the same interests as the FSC.

#### Filing the Schedule

File the schedule for a FSC that has foreign trading gross receipts during the tax year from either of the following sources.

- The resale of export property or certain services.
- The disposition of export property or services in which the FSC served as commission agent for a related supplier.

#### When Not To File

**Do not** complete Schedule P in the following situations.

- The section 482 method of transfer pricing is used. If the 23% and 1.83% methods do not apply to a sale or if the related supplier does not use the methods, the transfer price for a sale by the related supplier to the FSC is figured on the basis of the sales price actually charged but is subject to section 482 and its regulations and to Temporary Regulations section 1.925(a)-1T(a)(3)(ii).
- The arm's-length pricing method is used. If the transaction is with an unrelated supplier, the FSC bases its profit on the arm's-length price.
- Transactions are incomplete at year's end. If export property bought by the FSC from the related supplier during the tax year is unsold by the end of the FSC's tax year or the related supplier's tax year in which the property was transferred, the 23% and 1.83% methods (discussed below) cannot be used. Instead, the transfer price of the property bought by the FSC is the supplier's cost of goods sold for the property. See Temporary Regulations section 1.925(a)-1T(c)(5)(i)(C) for rules regarding the transfer price of property resold during the subsequent tax year.

# Specific Instructions A—Product or product line

Enter the product or product line that meets one of the two standards below.

- 1. The major group or groups (or any classification or combination within a major group or groups) of the Standard Industrial Classification (SIC) codes (see page 16 of the Instructions for Form 1120-FSC for the list of codes and related product or product line), or
  - 2. A recognized industry or trade use.

#### B—Type of transaction

Check the applicable box to indicate the sale, lease, or commission transaction that applies to the FSC.

1. Transaction-by-transaction. Check box 1 if the FSC makes pricing determinations based on **each** transaction. File a Schedule P for each transaction.

2. Group of transactions. By checking box 2, the FSC's related supplier elects to group transactions that consist of products or product lines. If the group basis is elected, it applies to all transactions for that product or product line completed during the tax year. If the election is not made, the supplier checks box 1. Do not group sales and lease transactions.

Election to group transactions. For tax years beginning after December 31, 1997, see Temporary Regulations section 1.925(a)-1T(c)(8) regarding the election to group transactions and the transition rule applicable to tax years beginning before January 1, 1998.

## C—Principal business activity codes

See page 16 of the Instructions for Form 1120-FSC for the list of "Schedule P (Form 1120-FSC) Codes for Principal Business Activity" that are to be used to group activities. Enter the code number that relates to the product or product line reported on line A.

#### Part I

## Section A—Combined Taxable Income

Under the administrative pricing rules, the methods discussed below may be used in the same tax year of the FSC for separate transactions (or separate groups of transactions).

#### **Full Costing**

Foreign trading gross receipts are the gross receipts of a FSC (other than a small FSC) that has met the foreign management and foreign economic process rules. The receipts are included on lines 1 and 4 and must be from the sale, lease, or rental of export property for use outside the United States or for engineering or architectural services for a construction project located outside the United States. For details, see the Instructions for Form 1120-FSC beginning on page 2 and section 924.

Under the full costing rules in which the FSC is the principal in the sale of export property, the combined taxable income of the FSC and its related supplier is the excess of the FSC's foreign trading gross receipts from the sale over the total costs of the FSC and related supplier. These costs include the supplier's cost of goods sold, and the supplier's and the FSC's noninventoriable costs that relate to the foreign trading gross receipts. See Regulations section 1.471-11(c)(2)(ii). Also see Temporary Regulations section 1.925(a)-1T(c)(6)(iii) for special rules regarding gross receipts and total costs.

Line 2b. Enter an apportionment of deductions that are not definitely allocable, such as interest expense and stewardship expenses. See Temporary Regulations sections 1.861-11T(f) and 1.861-14T(f) for details on the apportionment.

#### Marginal Costing

The related supplier may elect to use the marginal costing rules to figure its and the FSC's combined taxable income provided the FSC is treated as seeking to establish or maintain a foreign market for sales of export property and the sales produce foreign trading gross receipts. See Temporary Regulations sections 1.925(b)-1T(c)(1) and 1.927(a)-1T for information that defines a "foreign market" and "export property."

Under the marginal costing rules, the combined taxable income of the FSC and its related supplier is figured by subtracting from foreign trading gross receipts the direct material and direct labor costs of producing a particular item, product, or product line. See Regulations section 1.471-11(b)(2)(ii). The combined taxable income also may be limited to the overall profit percentage (line 10) multiplied by the foreign trading gross receipts of the FSC (line 4).

See Temporary Regulations section 1.925(b)-1T for more information on the marginal costing rules. Also see section 1.925(a)-1T for information on the transfer pricing rules.

#### Section B—23% of Combined Taxable Income

Under this method, the related supplier figures an allowable transfer price to charge the FSC (or an allowable commission to pay to the FSC) so that the FSC will profit on the sale

The profit is limited to 23% of the FSC's and the supplier's combined taxable income attributable to the foreign trading gross receipts from the sale. Also see incomplete transactions under **When Not To File**.

### Section C—1.83% of Foreign Trading Gross Receipts

Under this method, the related supplier figures an allowable transfer price to charge the FSC (or an allowable commission to pay to the FSC) so that the FSC will profit on the sale

The profit is limited to 1.83% of the FSC's foreign trading gross receipts. It is further limited to twice the profit determined under either (a) the 23% of combined taxable income or (b) the marginal costing rules (described above). Also see incomplete transactions under When Not To File.

#### Limit on FSC Income (No-loss Rules)

If there is a loss on line 3 or line 12, the FSC may not earn a profit under either the 23% method or the 1.83% method. Under the 1.83% method, the FSC's profit on line 17 may not exceed the full costing combined taxable income reported on line 3. The related supplier may, however, set a transfer price or rental payment or pay a commission in an amount that will enable the FSC to recover its costs, if any, even if the result is a loss for the related supplier.

If the FSC recognizes income while the related supplier recognizes a loss on a sale under the section 482 method, neither the 23% method nor the 1.83% method may be used by the FSC and the related supplier (or by a FSC in the same controlled group and the related supplier) for any other sale, or group of sales, during the tax year that falls within the same SIC codes as the subject sale.

#### Part II

Line 20. If the transfer price from the related supplier to the FSC is entered on more than one line on Form 1120-FSC, attach an explanation indicating the portion of line 20 that applies to each line.

#### Part III

Line 23. If the FSC commission from the related supplier is entered on more than one line on Form 1120-FSC, attach an explanation indicating the portion of line 23 that applies to each line.
