## Company Profile

**Industry Sector:** Assistive devices for persons with disabilities

**Company Overview:** InvoTek, Inc. designs and develops new ways for persons with severe disability to control computers. We are presently developing several access methods that enable people to control a computer using head movement, eye movement, and dysarthric speech.

**Target Market(s):** Rehabilitation hospitals and organizations that assist people with disabilities to live more independently.

## Key Value Drivers

**Technology:** The Safe-laser System is an eye-safe, laser-controlled access method for accessing computers, speech generating devices, and environmental control systems.

**Competitive Advantage:** People who find present assistive devices to be too demanding are often successful at using laser-pointing. The Safe-laser System enables laser use in environments where eye safety is important.

**Plan & Strategy:** Seeking strategic partners

\*Technology funded by the *NICHD* and being commercialized under the NIH-CAP

## Management

### Leadership:

Thomas Jakobs, President and COO

Diane Jakobs, Ph.D., CFO

J. Barret Ewing, Engineering

Tonya Jackson, Marketing

Allen Baker, Customer Care

## Development Pipeline

- Phase 2 SBIR prototype completed 2<sup>nd</sup> Qtr. 2009
- Clinical evaluation completed 2<sup>nd</sup> Qtr. 2010
- Product ready for market 2<sup>nd</sup> Qtr. 2010
