

DEPARTMENT OF THE TREASURY  
WASHINGTON, D.C. 20220

**Acquisition Bulletin**  
**(AB) No. 05-08**  
September 1, 2005

**MEMORANDUM FOR BUREAU CHIEF PROCUREMENT OFFICERS**

**FROM:**

Thomas A. Sharpe, Jr.   
Senior Procurement Executive  
Office of the Procurement Executive

**SUBJECT:**

**Procurement of Products and Services for Authentication and/or Identification**

**Purpose:** The purpose of this Acquisition Bulletin (AB) is to communicate procedures for ordering goods and services in compliance with HSPD-12.

**Effective Date:** This AB is effective immediately.

**Expiration Date:** This AB will expire when cancelled or superseded.

**Background:** HSPD-12, "Policy for a Common Identification Standard for Federal Employees and Contractors," requires agencies to only use information technology products and services that meet the standard. OMB subsequently designated GSA as the Executive Agent for government-wide acquisitions. GSA memorandum, "Acquisitions of Products and Services for implementation of HSPD-12," attached, provides guidance for ordering products and services that are in compliance with HSPD-12.

**GSA guidance highlights:**

1. Federal agencies are required to purchase only approved products and services. GSA will make Federally approved products and services available that are compliant with the standard (FIPS 201 and associated specifications).
2. Agencies can purchase compliant products and services off of the Smartcard GWAC. GSA is currently in the process of adding the full set of FIPS 201 requirement to the GWAC. GSA will be reviewing new and current GWAC Task Orders (TOs) to confirm the TO includes required compliance language or can be modified to include the language.
3. The Smartcard GWAC will be allowed to expire on May 17, 2006, without the exercise of options. The GWAC will be replaced with a BPA under a recently established Special Item Number (SIN) 132-60 within IT Schedule 70. This BPA will be the

replacement vehicle for acquisition of approved, FIPS 201 compliant products and services.

The Treasury Integrated Product Team for HSPD-12 envisions several enterprise-wide procurements as well as several bureau unique procurements. Each Bureau Chief Procurement Officer has been asked, via separate correspondence, to identify an 1102 Contract Specialist or Contracting Officer to participate on a committee to provide acquisition planning advice, with regard to any HSPD-12 related procurement actions that respective bureaus will be asked to execute.

**Action:** Ensure HSPD-12 related products and services are procured through the Smartcard GWAC or GSA BPA which will be issued to replace the GWAC before the GWAC expires in May, 2006.

Questions about this AB may be directed to Richard Kahn at [richard.kahn@do.treas.gov](mailto:richard.kahn@do.treas.gov) or (202) 622-2092.

MEMORANDUM FOR CHIEF FINANCIAL OFFICERS  
CHIEF INFORMATION OFFICERS  
CHIEF ACQUISITION OFFICERS

FROM: BARBARA L. SHELTON  
ACTING COMMISSIONER  
FEDERAL ACQUISITION SERVICE

A handwritten signature in black ink that reads "Barbara L. Shelton".

SUBJECT: Acquisitions of Products and Services for Implementation  
of HSPD-12

Homeland Security Presidential Directive-12 (HSPD-12), "Policy for a Common Identification Standard for Federal Employees and Contractors" requires agencies to use only information technology products and services that meet this standard. The Office of Management and Budget (OMB) has designated the General Services Administration (GSA) as the Executive Agent for government-wide acquisitions in a July 5, 2005, letter from Joshua Bolton. This memorandum specifies the procedures for ordering goods and services in compliance with the directive.

**Background**

HSPD-12 establishes the requirement for a mandatory Governmentwide standard for *secure* and reliable forms of identification issued by the Federal Government to its employees and contractors. OMB has directed Federal agencies to purchase only products and services that are compliant with the Federal policy, standards and numerous supporting technical specifications, including:

- Federal Information Processing Standard 201, *Personal Identity Verification of Federal Employees and Contractors*;
- National Institute of Standards and Technology (NIST) Special Publications (SP) 800-73, *Interfaces for Personal Identity Verification*, 800-78 *Cryptographic Algorithms and Key Sizes for Personal Identity Verification*, and 800-79, *Guidelines for the Certification and Accreditation of PIV Card Issuing Organizations*; and

- Special Publication 800-76, *Biometric Data Specification for Personal Identity Verification* (Pending).

To ensure standard compliant products and services are available, NIST will issue **test suites** in SP 800-85 - PIV Middleware and PIV Card Application Conformance Test Guidelines (SP800-73 Compliance), and will publish National Voluntary Laboratory Accreditation Program (NVLAP) accredited validation services for demonstrating conformance for products. Providers of products and services that are determined to conform to the standard will be eligible to offer approved products and services on a new GSA procurement vehicle established to align all agency acquisitions with policy.

The Smart Access Common ID Governmentwide Acquisition Contract (GWAC) has been the primary acquisition vehicle for smart cards, smart card readers, associated card management systems, related products and services. This GWAC currently requires smart card products and services to conform to the Government Smart Card Interoperability Specification (GSC-IS), as updated (i.e., GSC-IS v.2.1). While the full set of FIPS 201 requirements are in the process of being added to this GWAC, it will be allowed to expire on May 17, 2006, without the exercise of options. Only those established task orders that adhere to the guidance below will be allowed to continue beyond the expiration date.

GSA will replace GWAC with a Blanket Purchase Agreement (BPA) for smart card systems and related products and services under a recently established Special Item Number (SIN) 132-60 within IT Schedule 70. This BPA will be in place before the expiration of GWAC and will serve as the replacement vehicle for acquisition of approved, FIPS 201 compliant products and services for Federal agencies.

### **Guidance for Procurements**

Federal agencies are required to purchase only approved products and services. GSA will make Federally approved products and services available that are compliant with FIPS 201 and associated specifications to agencies.

1. Agencies that have not begun deployment of smart (i.e., integrated circuit) cards as identity badges for employees and contractors should not begin or make procurements until *End Point* products, as defined in NIST Special Publication 800-73, are available. End Point products employ a unified card edge interface that is technology-independent and compliant with current international standards. Full technical specifications for these products can be found in SP 800-73.

2. Agencies that have initiated a large scale deployment of smart cards as identity badges prior to July 2005 may acquire *Transitional* products and services, also defined in NIST Special Publication 800-73, as part of a migration strategy. In so doing, these agencies should weigh benefits and costs of such a strategy over moving directly to an End Point smart card.
3. All new GWAC Task Orders (T.O.) on the existing GWAC will be reviewed and approved by the GSA, Office of Governmentwide Policy (OGP) to determine and ensure that each includes language that ensures compliance with FIPS 201. In addition, GSA will review each T.O. document to ensure it has a clear migration path; this information should also be reflected in an update to the requesting agency's implementation plan.
4. All current GWAC T.O.s will be reviewed by GSA. The Office of Governmentwide Policy (OGP) designated a Deputy Associate Administrator to ensure these T.O.s are compliant or can be modified to ensure compliance with FIPS 201. If not, the T.O. will be allowed to expire without renewal. GSA requires that all T.O.s in effect beyond December 31, 2005 be modified by March 2006 to include language that ensures compliance with FIPS 201 and is in accordance with Federal Acquisition Regulation.

Effective the date of this memorandum, GSA procedures will ensure Federal policy and standards are met whenever acquisitions through the Smartcard GWAC or replacement BPA are used. As the designated authority for FIPS 201 compliant procurements, GSA will report to OMB on agency acquisitions pertaining to the standard. All FIPS 201 related acquisitions are subject to OMB review.

GSA will release additional information on the time-frame for BPA availability on the following website: <http://www.smart.gov/>. Please direct acquisition questions to Michael R. Brooks, Director, Center for Smart Card Solutions, Federal Acquisition Service, phone 202 501-2765, Fax 202 208-3133, or e-mail [mike.brooks@gsa.gov](mailto:mike.brooks@gsa.gov).
