Profile of the Economy

[Source: Office of Macroeconomic Analysis]

Real gross domestic product (GDP)

The current economic expansion is now in its ninth year, one of the longest on record. Unlike past expansions, it has picked up momentum as it has matured. Growth in real GDP accelerated to 4.3 percent over the four quarters of 1998, up from rates just below 4 percent over the prior 2 years. The advance estimate for the first quarter of 1999 shows that real GDP increased at a 4.5 percent annual rate.

The household sector has accounted for much of the strength, supported by rising real wages, low unemployment and increases in net worth due to gains in the stock market. Consumer spending on goods and services rose by more than 5 percent in 1998 and speeded up to a 6.7 percent pace in the first quarter of 1999. Housing purchases have also surged, leading to double-digit gains in residential investment. Business investment in equipment made a substantial contribution to the increase in GDP as well.

Strength in domestic sectors more than offset deterioration in the foreign trade balance. A widening trade deficit subtracted more than 1 percentage point from real GDP growth in 1998, and almost 2-1/2 points in the first quarter of 1999.

The national accounts measures of inflation are very moderate. The GDP price index increased by a 1.4 percent annual rate in the first quarter and rose by 0.9 percent in 1998. The domestic purchases index, which reflects prices paid by U.S. residents, grew at a 1.0 percent pace in the first quarter and just 0.4 percent over all of last year.

Inflation

The rate of inflation edged up a notch during the early part of this year from the modest pace of the last 2 years. This resulted primarily from a turnaround in the energy area, where prices have recently jumped for petroleum-based energy products.

Consumer Prices*

(Percent change from a year earlier)

Growth of Real GDP

(Percent change, fourth quarter to fourth quarter)

Further back in the production chain, however, there are still no signs of building price pressures. Additionally, there appears to be little pressure from wages.

During the first 4 months of the year, the Consumer Price Index (CPI) rose at 3.3 percent annual rate. This was roughly twice the pace of the previous 2 years. Prices for petroleum-based energy products were responsible for the turnaround. These prices rose by more than 60 percent at an annual rate this year, following declines of about 7 percent and 15 percent in 1997 and 1998, respectively. Food prices increased at a 1.5 percent annual rate, down from a 2.3 percent advance in

Producer Prices - Finished Goods*

(Percent change from a year earlier)

*Year ticks correspond with June data.

1998 and the same as in 1997. The annual rate of increase in the core CPI (excluding food and energy) slowed to 1.9 percent from 2.2 percent in 1997 (the smallest yearly increase since 1965) and 2.4 percent in 1998. (Methodological changes over the last several years, designed to improve the accuracy of the CPI, have been a factor in lowering the rate of increase in the index.)

Producer prices for finished goods are up at a 2.1 percent annual rate this year, following no change in 1998 and a decline of 1.2 percent in 1997. Energy prices jumped by almost 22 percent at an annual rate, offsetting declines in the food and core indexes. Energy prices dropped by close to 12 percent in 1998 and by 6-1/2 percent in 1997. Core prices for crude and intermediate goods are down so far this year, indicating no imminent price pressures further back in the production chain.

Hourly compensation in the nonfarm business sector increased at a 4.3 percent annual rate in the first quarter of 1999. This was about the same as during 1998. The increase in hourly compensation barely outpaced a 4.0 percent rise in productivity, resulting in a fractional 0.3 percent rise in unit labor costs. This was down from an increase of 1.5 percent during 1998. The employment cost index for total compensation rose by only 3.0 percent for the 12 months ending in March, a marked deceleration from as much as 3.7 percent just 6 months ago.

Employment and unemployment

Labor markets remained very tight at the beginning of the year. Nonfarm payrolls continued to expand during the first 4 months of 1999, although at a more moderate pace than late last year. Nevertheless, the unemployment rate remained at a level not seen in nearly three decades.

The average monthly increase in nonfarm payroll employment was pulled down from 252,000 in the fourth quarter of 1998 to 186,000 in the first quarter of 1999, as severe winter weather depressed hiring in some weather-sensitive industries

in March. Strong employment growth resumed once again in April, however, and nonfarm payrolls increased by 234,000. This was in line with the average monthly gain over the past year. Demand for labor remained high in the private service-producing sector. In contrast, the manufacturing sector continued to shed jobs. After adjusting for the effects of a

strike in the shipbuilding industry, job losses since March 1998, when employment in this sector peaked, totaled 402,000.

The industries hardest hit over the past year include industrial machinery, apparel, and electrical and electronic equipment. Mining employment also softened noticeably in recent months reflecting large cutbacks in the oil and gas extraction industry.

The unemployment rate ticked up to 4.3 percent in April after dipping to a 29-year low of 4.2 percent in March. The latest result extended the string of readings at or below 4.5 percent to 1 year.

The share of the working-age population employed has declined slightly since hitting a record-breaking 64.5 percent in January. However at 64.2 percent, it still remains quite high. These indicators show that the economy continues to operate at a very high level of labor utilization.

Wages continued to rise, but at a slower pace compared to gains of just a few months ago. Average hourly earnings of production and other nonsupervisory workers increased to \$13.11 in April. Over the past 12 months, these earnings rose by 3.2 percent, significantly slower than the 4.4 percent pace recorded in the same period last year.

Growth of earnings in real terms also moderated recently to 1.0 percent over the 12 months ended in April, from 2.2 percent over the 12 months of 1998.

Real disposable personal income and consumer spending

Real disposable (after-tax) personal income rose at a 4.6 percent annual rate in the first quarter, following increases of 3.5

Civilian Unemployment Rate

Establishment Employment

(Monthly change in thousands)

percent during 1998 and 2.9 percent during 1997. Wage and salary payments continue to be particularly strong, growing at a 6.0 percent annual rate in real terms in the first quarter. (Slower growth of such items as interest, dividends, proprietors' income and rental income contributed to the smaller gain for total disposable income.)

Real consumer spending surged by 6.7 percent in the first quarter, following an already strong 5.3 percent gain last year. Spending on discretionary items such as furniture and appliances, apparel, jewelry, and sporting equipment was particularly strong in the first quarter. Personal business services, including securities brokerages and investment counseling, also continued to rise rapidly.

The greater increase in spending than in disposable income in the first quarter pulled the personal saving rate down further. The personal savings rate fell to a negative 0.5 percent from zero in the fourth quarter and a narrow 0.5 percent for all of 1998. The latest quarter represented the only quarter of dissaving by households in post-World War II history. Higher spending than income can be financed out of past saving, debt or the realization of capital gains, which are not counted as part of disposable personal income. The wealth associated with the recent booming stock market has been an important factor in the willingness of consumers to spend more than supported by current income.

Industrial production and capacity utilization

Industrial production in manufacturing, mining and utilities grew by a solid 0.6 percent in April, after a similarly robust 0.5 percent rise in March. Recent output gains, the largest back-to-back increases since late 1997, have boosted production so far this year by 3.7 percent at an annual rate. While considerably slower than the 6.5 and 5.6 percent increases posted during 1997 and 1996, respectively, this represents a significant improvement over last year's anemic 1.6-percent gain.

The pickup in industrial activity mainly reflects a rebounding manufacturing sector, which accounts for nearly 89 percent of total industrial production. Factory output surged at a 5.7 percent annual rate over the 3 months ended in April, after nearly a year of sluggishness that held the growth of production to just 2.3 percent over the 12 months of 1998. Some of the increase reflects heightened activity in the high-tech sector, although a number of other industries also have started to show signs of improvement.

Recent production advances boosted the industrial capacity utilization rate to 80.6 percent in April. This rate fell steadily from 83.4 percent in December 1997 to a 6-1/2 year low of 80.2 percent in February. This was due not only to weak output growth, but also to rapid expansion of capacity. Despite the nascent turnaround, capacity utilization still remains well below the expansion high of 84.7 percent reached in early 1995 and also below its long-term average of 82.1 percent.

Nonfarm productivity and unit labor costs

Nonfarm business productivity (real output per hour worked) rose at a 4.0 percent annual rate in the first quarter of 1999. This followed a strong 4.3 percent increase in the fourth quarter of 1998. Productivity growth has accelerated over the

past few years after little change in the mid-1990s. The average annual increase posted since 1996 was 2.1 percent, well above long-term trend productivity growth, currently estimated to be 1.3 percent. Very rapid output growth during the same period seems to have played an important role in lifting productivity above the trend.

Hourly compensation costs in the nonfarm business sector increased by 4.3 percent at an annual rate during the first 3 months of 1999. This was up from the 4.0 percent increase recorded in the fourth quarter of 1998, but comparable to the 4.2 percent rise over all four quarters of 1998. Virtually all of the first-quarter increase in hourly compensation was offset by strong productivity growth. This held the rise in labor costs per unit of output to just 0.3 percent at an annual rate. Growth of these costs averaged a moderate 1.3 percent over the past four quarters and helped keep inflation subdued.

Productivity growth in the manufacturing sector picked up again after a slowdown in 1998 that reflected a marked reduction in factory output. During the first quarter, output per hour in this sector rose by 5.8 percent at an annual rate. This was comparable to the 5.3 percent pace registered in the fourth quarter, but considerably faster than the 3.9 percent increase posted over all of last year. Hourly compensation costs in manufacturing were up by 4.9 percent at an annual rate in the January-to-March period, while unit labor costs declined by 0.9 percent.

Current account balance

The current account is a summary of U.S. international transactions, measuring trade in goods and services as well as the net flow of investment income and unilateral transfers. The current account has been in deficit almost continuously since the early 1980's. In recent years, the current account deficit has widened substantially from a recent low of \$6 billion in 1991 to an all-time high of \$233 billion in 1998. However, the 1998 figure represents a much smaller 2.7 percent share of GDP than the 3.6 percent share in 1987, when the previous record was set.

Over the past several years, U.S. economic growth has outpaced that of the major U.S. trading partners, causing imports to grow much more rapidly than exports. The sharp appreciation of the dollar in more recent years has widened the trade gap further. In addition, what had been a positive balance on investment income shifted to a negative balance in 1997 as the inflow of capital into the United States boosted payments of earnings and interest to foreigners. Deterioration in the current account in 1998 primarily reflected a deepening of the deficit on trade in goods due to the strength of the dollar as well as weaker demand for U.S. goods exports in Asia. The deficit on investment income also widened sharply.

The current account deficit is matched by offsetting transactions in the capital account. In 1998, recorded capital inflows for foreign assets in the United States exceeded capital outflows for U.S. assets abroad by \$237 billion at an annual rate. The slight difference between the \$237 billion reported capital inflow and the \$233 billion current account deficit (the statistical discrepancy) is usually taken to consist largely of unrecorded capital flows.

Exchange rate of the dollar

The exchange rate of the dollar against a broad index of currencies of important U.S. trading partners has appreciated so far this year after declining from August through December of last year. Prior to August, the dollar had consistently appreciated since early 1995.

The reversal of the dollar over the August through December period, particularly against the yen, was partly related to unwinding of highly leveraged positions of investment firms in the wake of global financial uncertainty last summer. Many investors with yen-based loans sought to deleverage by buying yen in order to repay those loans. Other factors contributed to the dollar's depreciation, including continued pressures from the large U.S. current account deficit, trade exposure to countries considered susceptible to Asian contagion and a relatively more rapid decline in interest rates in the United States compared with other industrial nations. The dollar stabilized toward the end of last year as the deleveraging process wound down, and has improved against most major currencies since then.

The Federal Reserve Board's broad trade-weighted index of the dollar against the currencies of 36 important U.S. trading partners fell by about 4-1/2 percent from August through December after rising by one-third from its trough in May 1995. Since December, it has appreciated by about 2-1/4 percent. The swing against the yen last year was even sharper. The dollar rose by more than 70 percent from its 1995 trough through August 1998, then fell by more than 20 percent from August to January. So far this year it has risen by about 5-1/2 percent (through April). Against the deutschemark, now part of the newly introduced euro, the dollar fell by 6-1/2 percent from August through December compared with a rise of 29 percent from April 1995. Since December, it has recovered by almost 10 percent against the deutschemark and is near the levels of early 1998.

Interest rates

Since November, the Federal Reserve Board's monetary policy has been on hold. Last fall, the Federal Reserve Board made several easing moves in order to stem a rapid process of deleveraging and a rush to liquidity, which occurred as a result of global fears of default. Since then, the discount rate (the rate the Federal Reserve Board charges banks for short-term funds) has been held at 4.5 percent and the Federal funds target (the

rate that banks charge one another for overnight borrowing) remains at 4.75 percent. The market interest rate for the 3-month Treasury bill, which had plunged to as low as 3.8 percent in late October, moved back up to about 4.5 percent by mid-November. Since then, it has fluctuated near that level.

Credit markets stabilized after the period of uncertainty in the financial markets last fall. Long-term interest rates increased roughly half a percentage point early this year as the sense of crisis in international financial conditions faded and U.S. economic growth expanded rapidly. The interest rate on the 30-year Treasury bond increased from an October low of just under 4.9 percent to about 5-1/2 percent in March. Yields on the 10-year note followed a similar pattern, rising to about 5-1/4 percent. Long-term rates edged higher in April but were still very moderate by historical norms.

Mortgage rates are also very favorable, helping to support a high level of housing market activity. The rate on a conventional 30-year fixed rate loan has been at or below 7 percent for almost a year, the best performance in a generation.

Housing

Housing continues to be one of the strongest sectors of the economy. Growth has been fueled by exceptionally low mortgage interest rates, sound economic fundamentals such as growing employment and income, and by the wealth effects of rising stock prices. The homeownership rate increased to 66.3 percent in 1998, an all-time annual high. It was 66.7 percent in the first quarter of this year.

Short-term Interest Rates

Long-term Interest Rates

Sales of new single-family homes totaled 888,000 last year, the largest annual total since the series began in 1963. Sales receded from their peak monthly rate reached last November, but held at an exceptionally high 900,000-unit pace through the first quarter of this year. Resales of existing homes also posted a record year in 1998, reaching 4.8 million. Resales have continued to increase to over a 5 million-unit annual rate through the first 3 months of 1999.

The extremely high level of new home sales has spurred equally rapid gains in new construction. Starts of new homes surged to their highest rate in more than 10 years in the first quarter, rising to just a shade under 1.8 million units at an annual rate. In 1998, housing starts were 1.6 million, up 10 percent from the previous year's total. The real value of residential construction expenditures grew by more than 12 percent during 1998 and increased at a 15.6 percent annual rate in the first quarter of 1999.

Federal budget

The Federal budget posted a surplus of \$69 billion in fiscal 1998, the first surplus since 1969 and only the ninth since World War II. The surplus represented 0.8 percent of GDP, the

highest such ratio since 1956, and resulted in a reduction in the Federal debt level for the first time in 29 years. Strong economic growth and passage of deficit reduction programs placed the deficit on a downward course after it reached an all-time high of \$290 billion in 1992.

The Administration's "Fiscal Year 2000 Budget" projects another surplus in the current fiscal year and growing surpluses through the year 2009. This is similar to estimates from the Congressional Budget Office. After reserving much of the surplus for Social Security and Medicare funding, the amount of debt held by the public is projected to be cut by one-third between fiscal 2000 and 2009, dropping as a percentage of GDP from over 40 percent currently to 18 percent by fiscal 2009.

Thus far through fiscal 1999, the budget is on track to show a somewhat larger surplus than the \$79 billion that was projected in February. Receipts have been growing at about a 6-percent rate, while growth in outlays has been held to less than 4 percent. These results follow the pattern set over the past few years. Growth in receipts has been very strong, boosted by expansion in jobs and income, rising corporate profits and stock market gains, while Federal outlays have been contained. In fiscal 1998, receipts rose by 9 percent and outlays grew by just 3.2 percent.

Net National Saving

(Saving as a percent of net national product)

Net national saving and investment

Net national saving averaged 7.4 percent of net national product (NNP) in 1998. Over the past 6 years, the national saving rate has more than doubled from a post-World War II low of 3.4 percent in 1992. Most of the improvement is attributable to a swing in the Federal budget into surplus after nearly three decades in deficit. As a result, the combined account of Federal, State and local governments has moved from dissaving equivalent to 4.7 percent of NNP in 1992 to saving of 2.0 percent of NNP in 1998. Despite the progress, net saving (which excludes depreciation to replace worn-out or obsolete equipment and structures used in production) still remains well below the 12.1 percent of NNP averaged in the 1950's and 1960's.

Private saving (of households and businesses) has declined since 1992 as plunging households' saving has more than offset a gain in corporate saving. Increased wealth generated by a surging stock market appears to have reduced households' desire to save, and last year personal saving fell to only 0.4 percent of NNP. Strong growth of corporate profits, on the other hand, lifted net corporate saving from 2.5 percent of NNP in 1992 to about 4.0 percent in the past 2 years. These are the highest readings since the mid-1960s.

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2)

intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts which include foreign cash contributions.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2** and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting

receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current quarter and the current fiscal year to date.

- Table **FFO-5** summarizes internal revenue collections by States and other areas and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (i.e., payments with delinquent returns or on delinquent accounts).

It is important to note that these data do not necessarily reflect the Federal tax burden of individual States. Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one State and work in another.

Budget Results and Financing of the U.S. Government and First-Quarter Receipts by Source

First-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the first quarter of fiscal 1999 supplements fiscal data reported in the March issue of the “Treasury Bulletin.” At the time of that issue’s release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts, net of refunds, were \$187.6 billion for the first quarter of fiscal 1999. This is an increase of \$11.3 billion over the comparable prior year quarter. Withheld receipts increased by \$9.0 billion and non-withheld receipts increased by \$2.8 billion during this period. Refunds increased by \$0.5 billion over the comparable fiscal 1998 quarter. There was a decrease of \$0.1 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 1998.

Corporate income taxes—Net corporate income tax receipts were \$47.6 billion for the first quarter of fiscal 1999. This is a decrease of \$3.6 billion compared to the prior year first quarter. The \$3.6 billion change is comprised of an increase of

\$0.2 billion in estimated and final payments, and an increase of \$3.9 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the first quarter of 1999 were \$130.5 billion, an increase of \$9.6 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by \$6.1 billion, \$1.0 billion, and \$2.4 billion respectively. There was a \$2.1 billion accounting adjustment for prior years employment tax liabilities made in the first quarter of fiscal 1999, while there was a \$2.0 billion adjustment in the first quarter of fiscal 1998.

Unemployment insurance—Unemployment insurance receipts for the first quarter of fiscal 1999 were \$4.1 billion, a decrease of \$0.3 billion over the comparable quarter of fiscal 1998. State taxes deposited in the U.S. Treasury decreased by \$0.3 billion to \$3.2. Federal Unemployment Tax Act receipts did not change significantly from \$0.9 billion.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.2 billion for the first quarter of 1999. There was a negligible increase

over receipts from the comparable quarter of fiscal 1998. The growth in contributions will remain flat over the next few years as the number of employees covered by the Federal Employees' Retirement System grows slowly relative to those covered under the Civil Service Retirement System.

Excise taxes—Net excise tax receipts for the first quarter of fiscal 1999 were \$21.1 billion, an increase of \$5.6 billion over the comparable prior year quarter. The majority of this difference is attributable to a change in deposit rules. Total excise tax refunds for the quarter were \$0.1 billion, not a significant change over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$6.5 billion for the first quarter of fiscal 1999. These receipts represent an increase of \$1.3 billion over the same quarter in fiscal 1998.

Customs duties—Customs receipts net of refunds were \$4.6 billion for the first quarter of fiscal 1999. This is an increase of \$0.1 billion over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the first quarter of fiscal 1999 were \$9.5 billion, an increase of \$2.3 billion over the comparable prior year quarter. The majority of this increase is due to deposits of earnings by Federal Reserve Banks (FRBs) increasing by \$1.2 billion.

Second-Quarter Receipts by Source

[Source: Office of Tax Analysis, Office of Tax Policy]

Second-Quarter Receipts

Individual income taxes—Individual income tax receipts, net of refunds, were \$193.1 billion for the second quarter of fiscal 1999. This is an increase of \$15.4 billion over the comparable prior year quarter. Withheld receipts increased by \$21.0 billion and non-withheld receipts increased by \$2.2 billion during this period. Refunds increased by \$7.8 billion over the comparable fiscal 1998 quarter. There was an increase of \$1.0 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal 1998.

Corporate income taxes—Net corporate income tax receipts were \$24.9 billion for the second quarter of fiscal 1999. This is an increase of \$0.1 billion compared to the prior year second quarter. The \$0.1 billion change is comprised of an increase of \$0.3 billion in estimated and final payments, and an increase of \$0.2 billion in corporate refunds.

Employment taxes and contributions—Employment taxes and contributions receipts for the second quarter of 1999 were \$146.1 billion, an increase of \$6.4 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance and Federal Hospital Insurance trust funds changed by \$4.0 billion, \$0.6 billion, and \$1.9 billion respectively. There was a \$0.3 billion accounting adjustment for prior years employment tax liabilities made in the second quarter of fiscal 1999, while there was a \$1.3 billion adjustment in the second quarter of fiscal 1998.

Unemployment insurance—Unemployment insurance receipts for the second quarter of fiscal 1999 were \$3.7 billion, a decrease of \$0.2 billion over the comparable quarter of

fiscal 1998. State taxes deposited in the U.S. Treasury decreased by \$0.2 billion to \$2.7 billion. Federal Unemployment Tax Act receipts did not change significantly from \$1.1 billion.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.0 billion for the second quarter of 1999. There was a negligible increase over receipts from the comparable quarter of fiscal 1998. The growth in contributions will remain flat over the next few years as the number of employees covered by the Federal Employees' Retirement System grows slowly relative to those covered under the Civil Service Retirement System.

Excise taxes—Net excise tax receipts for the second quarter of fiscal 1999 were \$14.6 billion, an increase of \$0.6 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.5 billion, an increase of \$0.1 billion over the comparable prior year quarter.

Estate and gift taxes—Net estate and gift tax receipts were \$6.0 billion for the second quarter of fiscal 1999. These receipts represent an increase of \$0.8 billion over the same quarter in fiscal 1998.

Customs duties—Customs receipts net of refunds were \$4.2 billion for the second quarter of fiscal 1999. This is not a significant change over the comparable prior year quarter.

Miscellaneous receipts—Net miscellaneous receipts for the second quarter of fiscal 1999 were \$7.8 billion, a decrease of \$0.3 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by FRBs decreasing by \$0.1 billion.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of Treasury's (Treasury) operating cash is maintained in accounts with the Federal Reserve Banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include the Daily Balance Wire received from the FRBs and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147, Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositaries maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depositary financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax and loan accounts in inter-

est-bearing obligations participate under the Note Option. The program permits Treasury to collect funds through financial institutions and to leave the funds in Note Option depositaries and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury's account at FRBs do so under the Remittance Option.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments, which the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series and taxes.

² Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970 and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the “Treasury Bulletin” reflect the total. Further detailed information is published in the “Monthly Statement of the Public Debt of the United States.” Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities—that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”)

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

The average length hit a low of 2 years, 5 months in December 1975. The length then gradually increased until it reached a high of 6 years, 4 months in May 1991. Since then, the average length has decreased. For example, during most of 1996 the average length was at 5 years, 3 months.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

TABLE FD-1.—Summary of Federal Debt

Mar.	5,950,000	5,565,670	5,565,591	79	5,558,174	79	7,417

¹ Beginning September 1976, the maturity distribution and average length were calculated on the interest-bearing marketable debt privately held. Inflation-indexed notes (first offered in

1997) are excluded from the average length calculation. Published data was changed for the end of the fiscal years back through 1967.

² Consists of guaranteed debt issued by the Federal Housing Administration.

CHARTS FD-A.—Average Length of Privately Held Marketable Debt

(Charts are plotted from figures provided by the Office of Market Finance. See Table FD-5.)

INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of the Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities, current bills, notes and bonds.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable public debt securities other than regular weekly and 52-week bills. All unmaturing Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve Banks (FRBs), so that the "all other investors" category includes all private holdings.

- Table **PDO-2** presents the results of weekly auctions of 13- and 26-week bills, as well as auctions of 52-week bills, which are held every 4 weeks. Treasury bills mature each

Thursday. New issues of 13-week bills are *reopenings* of 26-week bills. The 26-week bill issued every fourth week to mature on the same Thursday as an existing 52-week bill is a reopening of the existing 52-week bill. New issues of *cash management bills* are also presented. High, low and average yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both a competitive and noncompetitive basis.

Treasury accepts noncompetitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities to encourage participation of individuals and smaller institutions.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Included are: notes and bonds from table PDO-1, 52-week bills from table PDO-2, and data for cash management bills.

- Table **PDO-4** indicates the total amount of marketable securities allotted to each class of investor. The FRBs tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 13- and 26-week bills.

TREASURY FINANCING: JANUARY-MARCH

[Source: Bureau of the Public Debt, Office of Financing]

JANUARY

Auction of 10-Year Inflation-Indexed Notes

December 30, 1998, Treasury announced it would auction \$8,000 million of 10-year inflation-indexed notes to raise cash. The 10-year 3-7/8 percent inflation-indexed notes of Series A-2009 were dated January 15, 1999, issued January 15, 1999, and due January 15, 2009. Interest is payable July 15 and January 15 until maturity.

Tenders for the notes were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on January 6. They totaled \$24,951 million, of which \$8,006 million was accepted. All competitive tenders at yields lower than 3.898 percent were accepted in full. Tenders at 3.898 percent were allotted 100 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.898 percent with an equivalent adjusted price of 99.811.

The median yield was 3.885 percent and the low yield was 3.850 percent. Noncompetitive tenders totaled \$57 million. Competitive tenders accepted from private investors totaled \$7,949 million.

In addition to the \$8,006 million of tenders accepted in the auction process, \$125 million was accepted from FRBs (FRBs) as agents for foreign and international monetary authorities. Another \$400 million was accepted from FRBs for their own account. The minimum par amount required for STRIPS of notes of Series A-2009 is \$1.6 million.

Auction of 2-Year Notes

January 20 Treasury announced it would auction \$15,000 million of 2-year notes of Series U-2001 to refund \$29,604 million of securities maturing January 31 and to pay down about \$14,604 million.

The notes of Series U-2001 were dated January 31, 1999, and due January 31, 2001. Interest is payable on July 31 and January 31 until maturity. An interest rate of 4-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on January 27. They totaled \$31,872 million, of which \$15,007 million was accepted. All competitive tenders at yields lower than 4.575 percent were accepted in full. Tenders at 4.575 percent were allotted 42 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.575 percent with an equivalent price of 99.858. The median yield was 4.540 percent and the low yield was 4.450 percent. Noncompetitive tenders totaled \$1,219 million. Competitive tenders accepted from private investors totaled \$13,788 million.

In addition to the \$15,007 million of tenders accepted in the auction process, \$2,000 million was accepted from FRBs as agents for foreign and international monetary authorities. Another \$2,765 million was accepted from FRBs for their own account. The minimum par amount required for STRIPS of notes of Series U-2001 is \$400,000.

TREASURY FINANCING: JANUARY-MARCH, con.

52-Week Bills

December 30, 1998, tenders were invited for approximately \$10,000 million of 364-day Treasury bills to be dated January 7, 1999, and to mature January 6, 2000. The issue was to refund \$28,163 million of all maturing bills and to raise about \$3,163 million of new cash. The bills were auctioned on January 5. Tenders totaled \$28,425 million, of which \$10,009 million was accepted. This included \$881 million of noncompetitive tenders from the public and \$900 million issued to FRBs as agents for foreign and international monetary authorities. An additional \$853 million was issued to FRBs as agents for foreign and international monetary authorities for new cash. Another \$4,980 million of the bills were issued to FRBs for their own account. The high bank discount rate was 4.335 percent.

FEBRUARY

February Quarterly Financing

February 3 Treasury announced it would auction \$15,000 million of 5-year notes of Series E-2004, \$10,000 million of 9-3/4-year notes of Series D-2008 and \$10,000 million of 30-year bonds of February 2029. These were auctioned to refund \$27,024 million of Treasury securities maturing February 15 and to raise about \$7,976 million of new cash.

The notes of Series E-2004 were dated February 15, 1999, issued February 16, 1999, and due February 15, 2004. Interest is payable on August 15 and February 15 until maturity. An interest rate of 4-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$0.13122 per \$1,000 (covering the period from February 15, 1999, to February 16, 1999) was payable with each accepted tender.

Tenders for the notes were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on February 9. They totaled \$27,431 million, of which \$15,003 million was accepted. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.767 percent with an equivalent price of 99.925. The median yield was 4.745 percent and the low yield was 4.700 percent. Tenders at the high yield were allotted 14 percent. Noncompetitive tenders totaled \$378 million. Competitive tenders accepted from private investors totaled \$14,625 million.

In addition to the \$15,003 million of tenders accepted in the auction process, \$800 million was accepted from FRBs as agents for foreign and international monetary authorities. Another \$2,013 million was accepted from FRBs for their own account. The minimum par amount required for STRIPS of notes of Series E-2004 is \$800,000.

The 9-3/4-year 4-3/4 percent notes of Series D-2008 were dated November 15, 1998, issued February 16, 1999, and due November 15, 2008. Interest is payable on May 15 and November 15 until maturity. Accrued interest of \$12.20304 per \$1,000 (covering the period from November 15, 1998, to February 16, 1999) was payable with each accepted tender.

Tenders for the notes were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on February 10. They totaled \$20,454 million, of which \$10,003 million was accepted. All noncompetitive and successful competitive bidders were allotted securities at

the high yield of 4.913 percent with an equivalent price of 98.735. The median yield was 4.884 percent and the low yield was 4.830 percent. Tenders at the high yield were allotted 11 percent. Noncompetitive tenders totaled \$62 million. Competitive tenders accepted from private investors totaled \$9,941 million.

In addition to the \$10,003 million of tenders accepted in the auction process, \$250 million was accepted from FRBs as agents for foreign and international monetary authorities. Another \$1,340 million was accepted from FRBs for their own account. The minimum par amount required for STRIPS of notes of Series D-2008 is \$800,000.

The bonds of February 2029 were dated February 15, 1999, issued February 16, 1999, and due February 15, 2029. Interest is payable August 15 and February 15 until maturity. An interest rate of 5-1/4 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$0.14503 per \$1,000 (covering the period from February 15 to February 16, 1999) was payable with each accepted tender.

Tenders for the notes were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on February 11. They totaled \$20,504 million, of which \$10,009 million was accepted at the high yield of 5.298 percent with an equivalent price of 99.282. The median yield was 5.279 percent and the low yield was 5.220 percent. Tenders at the high yield were allotted 32 percent. Noncompetitive tenders totaled \$61 million. Competitive tenders accepted from private investors totaled \$9,948 million.

In addition to the \$10,009 million of tenders accepted in the auction process, \$1,340 million was accepted from FRBs for their own account. The minimum par amount required for STRIPS of bonds of February 2029 is \$800,000.

Auction of 2-Year Notes

February 17 Treasury announced it would auction \$15,000 million of 2-year notes of Series V-2001 to refund \$29,259 million of securities maturing February 28 and to pay down about \$14,259 million.

The notes of Series V-2001 were dated February 28, 1999, issued March 1, 1999, and due February 28, 2001. Interest is payable on the last day of August and February until maturity. An interest rate of 5 percent was set after the determination as to which tenders were accepted on a yield auction basis. Accrued interest of \$0.13587 per \$1,000 (covering the period from February 28, 1999, to March 1, 1999) was payable with each accepted tender.

Tenders for the notes were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on February 24. They totaled \$27,390 million, of which \$15,005 million was accepted. All competitive tenders at yields lower than 5.009 percent were accepted in full. Tenders at 5.009 percent were allotted 54 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 5.009 percent with an equivalent price of 99.983. The median yield was 4.988 percent and the low yield was 4.929 percent. Noncompetitive tenders totaled \$1,164 million. Competitive tenders accepted from private investors totaled \$13,841 million.

In addition to \$15,005 million of tenders accepted in the auction process, \$2,000 million was accepted from FRBs as

TREASURY FINANCING: JANUARY-MARCH, con.

agents for foreign and international monetary authorities. Another \$2,571 million was accepted from FRBs for their own account. The minimum par amount required for STRIPS of notes of Series V-2001 is \$40,000.

52-Week Bills

January 28 tenders were invited for approximately \$10,000 million of 364-day Treasury bills to be dated February 4, 1999, and to mature February 3, 2000. The issue was to refund \$28,540 million of all maturing bills and to pay down about \$3,540 million. The bills were auctioned on February 2. Tenders totaled \$27,845 million, of which \$10,011 million was accepted. That included \$1,061 million of noncompetitive tenders from the public and \$1,483 million issued to FRBs as agents for foreign and international monetary authorities. In addition, \$5,390 million was awarded to FRBs for their own accounts. The high bank discount rate was 4.370 percent.

Cash Management Bills

February 9 tenders were invited for approximately \$8,000 million of 65-day bills to be issued February 16, 1999, maturing April 22, 1999. The issue was to raise new cash. Tenders were opened on February 11. They totaled \$29,945 million, of which \$8,028 million was accepted. The high bank discount rate was 4.48 percent.

February 23 tenders were invited for approximately \$42,000 million of 52-day bills to be issued March 1, 1999, maturing April 22, 1999. The issue was to raise new cash. Tenders were opened on February 25. They totaled \$77,425 million, of which \$42,000 million was accepted. The high bank discount rate was 4.74 percent.

MARCH

Auction of 2-Year Notes

March 17 Treasury announced it would auction \$15,000 million of 2-year notes of Series W-2001 to refund \$29,193 million of securities maturing March 31 and to pay down about \$14,193 million.

The notes of Series W-2001 were dated March 31, 1999, and due March 31, 2001. Interest is payable on September 30 and March 31 until maturity. An interest rate of 4-7/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the notes were received prior to 12 noon e.s.t. for noncompetitive tenders and prior to 1 p.m. e.s.t. for competitive tenders on March 24. They totaled \$33,079 million, of which \$15,003 million was accepted. All competitive tenders at yields lower than 4.995 percent were accepted in full. Tenders at 4.995 percent were allotted 20 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.995 percent with an equivalent price of 99.774. The median yield was 4.968 percent and the low yield was 4.901 percent. Noncompetitive tenders totaled \$1,417 million. Competitive tenders accepted from private investors totaled \$13,586 million.

In addition to the \$15,003 million of tenders accepted in the auction process, \$3,200 million was accepted from FRBs as agents for foreign and international monetary authorities. Another \$3,385 million was accepted from FRBs for their own account. The minimum par amount required for STRIPS of notes of Series W-2001 is \$1.6 million.

52-Week Bills

February 25 tenders were invited for approximately \$10,000 million of 364-day Treasury bills to be dated March 4, 1999, and to mature March 2, 2000. The issue was to refund \$27,548 million of all maturing bills and to pay down about \$2,548 million. The bills were auctioned on March 2. Tenders totaled \$30,605 million, of which \$10,007 million was accepted. They included \$1,021 million of noncompetitive tenders from the public and \$1,440 million issued to FRBs as agents for foreign and international monetary authorities. An additional \$172 million was issued to FRBs as agents for foreign and international monetary authorities for new cash. Another \$5,165 million was issued to FRBs for their own accounts. The high bank discount rate was 4.665 percent.

March 25 tenders were invited for approximately \$10,000 million of 364-day Treasury bills to be dated April 1, 1999, and to mature March 30, 2000. The issue was to refund \$26,829 million of all maturing bills and to pay down about \$2,829 million. The bills were auctioned on March 30. Tenders totaled \$26,668 million, of which \$10,010 million was accepted. That included \$1,079 million of noncompetitive tenders from the public and \$1,440 million issued to FRBs as agents for foreign and international monetary authorities. An additional \$734 million was issued to FRBs as agents for foreign and international monetary authorities for new cash. In addition, \$5,140 million was issued to FRBs for their own accounts. The high bank discount rate was 4.495 percent.

Cash Management Bills

February 25 tenders were invited for approximately \$19,000 million of 12-day bills to be issued March 3, 1999, and maturing March 15, 1999. The issue was to raise new cash. Tenders were opened on March 2. They totaled \$46,945 million, of which \$19,041 million was accepted. The high bank discount rate was 4.79 percent.

March 25 tenders were invited for approximately \$20,000 million of 19-day bills to be issued March 31, 1999, maturing April 19, 1999. The issue was to raise new cash. Tenders were opened on March 30. They totaled \$43,115 million, of which \$20,025 million was accepted. The high bank discount rate was 4.83 percent.

March 30 tenders were invited for approximately \$26,000 million of 14-day bills to be issued April 1, 1999, and maturing April 15, 1999. The issue was to raise new cash. Tenders were opened on March 31. They totaled \$42,824 million, of which \$26,024 million was accepted. The high bank discount rate was 4.85 percent.

¹ All 13-week bills represent additional issue of bills with an original maturity of 26 weeks or 52 weeks. Certain 26-week bills represent additional issues of bills with an original maturity of 52 weeks.

² Includes amounts exchanged on noncompetitive basis by Government accounts and Federal

Reserve Banks.

³ Tenders for \$1 million or less from any one bidder are accepted in full at the high price of accepted competitive bids. All Treasury marketable auctions are conducted in a single-price format as of November 2, 1998.

⁴ Equivalent coupon-issue yield.

TABLE PDO-3.—Public Offerings of Marketable Securities Other than Regular Weekly Treasury Bills, con.

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate up to November 1, 1998. Beginning on November 2, 1998, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

² From date of additional issue in case of a reopening.

³ In reopenings, the amount accepted is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve Banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

⁵ All notes and bonds are eligible for STRIPS.

⁶ Interest began to accrue before the issue date (settlement date) of this loan.

⁷ Accepted yields ranged up to 3.650% (adjusted price 98.307) in this single-price auction of an inflation-indexed note.

⁸ Accepted yields ranged up to 6.460% (price 99.843) in this single-price auction.

⁹ Accepted yields ranged up to 6.745% (price 99.498) in this single-price auction.

¹⁰ Yields accepted ranged from 6.430% (price 99.852) up to 6.449% (price 99.801) with the average at 6.438% (price 99.831).

¹¹ Yields accepted ranged from 6.716% (price 99.345) up to 6.759% (price 99.037) with the average at 6.740% (price 99.173).

¹² Accepted yields ranged up to 6.328% (price 99.856) in this single-price auction.

¹³ Accepted yields ranged up to 6.616% (price 99.513) in this single-price auction.

¹⁴ Accepted yields ranged up to 6.027% (price 99.950) in this single-price auction.

¹⁵ Accepted yields ranged up to 6.298% (price 99.797) in this single-price auction.

¹⁶ Accepted yields ranged up to 3.744% (adjusted price 99.462) in this single-price auction of an inflation-indexed note.

¹⁷ Accepted yields ranged up to 5.930% (price 99.898) in this single-price auction.

¹⁸ Accepted yields ranged up to 6.024% (price 99.898) in this single-price auction.

¹⁹ Yields accepted ranged from 6.034% (price 99.908) up to 6.047% (price 99.873) with the average at 6.041% (price 99.889).

²⁰ Yields accepted ranged from 6.195% (price 99.484) up to 6.218% (price 99.315) with the average at 6.205% (price 99.411).

²¹ Yields accepted ranged from 6.435% (price 99.207) up to 6.452% (price 98.984) with the average at 6.445% (price 99.076).

²² Accepted yields ranged up to 5.998% (price 99.772) in this single-price auction.

²³ Accepted yields ranged up to 6.253% (price 99.987) in this single-price auction.

²⁴ Accepted yields ranged up to 5.794% (price 99.918) in this single-price auction.

²⁵ Accepted yields ranged up to 5.960% (price 99.637) in this single-price auction.

²⁶ Accepted yields ranged up to 3.600% (adjusted price 100.400) in this single-price auction of an inflation-indexed note.

²⁷ Accepted yields ranged up to 5.720% (price 99.823) in this single-price auction.

²⁸ Accepted yields ranged up to 5.830% (price 99.657) in this single-price auction.

²⁹ Yields accepted ranged from 5.755% (price 99.986) up to 5.768% (price 99.950) with the average at 5.762% (price 99.967).

³⁰ Yields accepted ranged from 5.941% (price 101.324) up to 5.967% (price 101.133) with the average at 5.955% (price 101.221).

³¹ Yields accepted ranged from 6.198% (price 99.010) up to 6.207% (price 98.889) with the average at 6.201% (price 98.970).

³² Accepted yields ranged up to 5.700% (price 99.860) in this single-price auction.

³³ Accepted yields ranged up to 5.769% (price 99.918) in this single-price auction.

³⁴ Accepted yields ranged up to 5.690% (price 99.879) in this single-price auction.

³⁵ Accepted yields ranged up to 5.685% (price 99.742) in this single-price auction.

³⁶ Accepted yields ranged up to 3.730% (adjusted price 99.130) in this single-price auction of an inflation-indexed note.

³⁷ Accepted yields ranged up to 5.440% (price 99.878) in this single-price auction.

³⁸ Accepted yields ranged up to 5.558% (price 99.749) in this single-price auction.

³⁹ Yields accepted ranged from 5.404% (price 99.920) up to 5.420% (price 99.876) with the average at 5.414% (price 99.893).

⁴⁰ Yields accepted ranged from 5.550% (price 99.620) up to 5.564% (price 99.514) with the average at 5.558% (price 99.559).

⁴¹ Yields accepted ranged from 5.800% (price 104.558) up to 5.830% (price 104.122) with the average at 5.822% (price 104.238).

⁴² Accepted yields ranged up to 5.537% (price 99.930) in this single-price auction.

⁴³ Accepted yields ranged up to 5.605% (price 99.547) in this single-price auction.

⁴⁴ Accepted yields ranged up to 5.500% (price 100.000) in this single-price auction.

⁴⁵ Accepted yields ranged up to 5.620% (price 99.483) in this single-price auction.

⁴⁶ Accepted yields ranged up to 3.740% (adjusted price 97.937) in this single-price auction of an inflation-indexed bond.

⁴⁷ Accepted yields ranged up to 5.677% (price 99.903) in this single-price auction.

⁴⁸ Accepted yields ranged up to 5.795% (price 99.807) in this single-price auction.

⁴⁹ Yields accepted ranged from 5.620% (price 100.014) up to 5.639% (price 99.962) with the average at 5.633% (price 99.978).

⁵⁰ Yields accepted ranged from 5.638% (price 99.902) up to 5.653% (price 99.788) with the average at 5.646% (price 99.841).

⁵¹ Accepted yields ranged up to 5.530% (price 99.944) in this single-price auction.

⁵² Accepted yields ranged up to 5.575% (price 99.676) in this single-price auction.

⁵³ Accepted yields ranged up to 5.495% (price 99.776) in this single-price auction.

⁵⁴ Accepted yields ranged up to 5.454% (price 99.658) in this single-price auction.

⁵⁵ Accepted yields ranged up to 3.680% (adjusted price 99.550) in this single-price auction of an inflation-indexed bond.

⁵⁶ Accepted yields ranged up to 5.475% (price 99.813) in this single-price auction.

⁵⁷ Accepted yields ranged up to 5.327% (price 99.665) in this single-price auction.

⁵⁸ Yields accepted ranged from 5.418% (price 101.533) up to 5.436% (price 101.397) with the average at 5.428% (price 101.457).

⁵⁹ Yields accepted ranged from 5.587% (price 98.740) up to 5.598% (price 98.583) with the average at 5.590% (price 98.697).

⁶⁰ Accepted yields ranged up to 5.125% (price 100.000) in this single-price auction.

⁶¹ Accepted yields ranged up to 4.615% (price 99.783) in this single-price auction.

⁶² Accepted yields ranged up to 3.650% (adjusted price 100.869) in this single-price auction of an inflation-indexed note.

⁶³ Accepted yields ranged up to 4.025% (price 99.952) in this single-price auction.

⁶⁴ Accepted yields ranged up to 4.340% (price 99.599) in this single-price auction.

⁶⁵ Accepted yields ranged up to 4.825% (price 99.410) in this single-price auction.

⁶⁶ Accepted yields ranged up to 5.300% (price 99.253) in this single-price auction.

⁶⁷ Accepted yields ranged up to 4.629% (price 99.992) in this single-price auction.

⁶⁸ Accepted yields ranged up to 4.690% (price 99.877) in this single-price auction.

⁶⁹ Accepted yields ranged up to 3.898% (adjusted price 99.811) in this single-price auction of an inflation-indexed note.

⁷⁰ Accepted yields ranged up to 4.575% (price 99.858) in this single-price auction.

⁷¹ Accepted yields ranged up to 4.767% (price 99.925) in this single-price auction.

⁷² Accepted yields ranged up to 4.913% (price 98.735) in this single-price auction.

⁷³ Accepted yields ranged up to 5.298% (price 99.282) in this single-price auction.

⁷⁴ Accepted yields ranged up to 5.009% (price 99.983) in this single-price auction.

⁷⁵ Accepted yields ranged up to 4.995% (price 99.774) in this single-price auction.

Note.—All notes and bonds were sold at auction through competitive and noncompetitive bidding. Starting with the January 5, 1999, auction, amounts listed as tendered and accepted are amounts tendered and awarded on auction day. Before the January 5, 1999, auction, amounts listed as tendered and accepted are amounts tendered and awarded on issue day.

¹ Exclusive of banks and insurance companies.

² Included with "All other" investors are certain Government deposit accounts and Government-sponsored agencies, formerly included with Government accounts.

Note.—For detail of offerings, see table PDO-3.

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since January 1, 1998, and series I bonds, on sale since September 1, 1998, are the savings bonds currently being sold. Series HH bonds are issued in exchange for Series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980,

through October 31, 1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and in the Annual Report of the Secretary of the Treasury for fiscal 1974.

TABLE SBN-1.—Sales and Redemptions by Series, Cumulative through Mar. 31, 1999

[In millions of dollars. Source: "Monthly Statement of the Public Debt of the United States," Bureau of the Public Debt, Office of Public Debt Accounting]

Series	Sales ¹ (1)	Accrued discount (2)	Sales plus accrued discount (3)	Redemptions ¹ (4)	Amount outstanding	
					Interest- bearing debt (5)	Matured non- interest-bearing debt (6)
Savings bonds:						
Series A-D ²	3,949	1,054	5,003	5,002	-	1
Series E, EE, H and HH	353,127	201,420	554,547	365,982	180,287	5,897
Series I	258	-	258	-	257	-
Series F and G	28,396	1,125	29,521	29,517	-	3
Series J and K	3,556	198	3,754	3,753	-	-
Savings notes						
	862	701	1,563	1,203	168	-
Total	390,148	204,498	594,646	405,457	180,712	5,901

¹ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and HH

bonds.

² Details by series on a cumulative basis and by period of series A-D combined can be found in the February 1952 and previous issues of the "Treasury Bulletin."

Note.—Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated amount of public debt securities held by private investors. Information is obtained from sources such as the Federal financial institution regulatory agencies. State, local and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

Federal Reserve holdings exclude Treasury securities held under repurchase agreements.³ Source: Federal Reserve Board of Governors, Flow of Funds Table L.209.⁴ Includes commercial banks, savings institutions and credit unions.⁵ Source: U.S. Treasury Monthly Statement of Public Debt. Current accrual value.⁶ Includes U.S. Treasury securities held by the Federal Employees Retirement System Thrift Savings Plan "G" Fund.⁷ Includes money market mutual funds, mutual funds and closed-end investment companies.⁸ Source: Federal Reserve Board Treasury International Capital Survey. Includes nonmarketable foreign series Treasury securities and Treasury deposit funds. Excludes Treasury securities held under repurchase agreements in custody accounts at the Federal Reserve Bank of New York. Estimates reflect the 1984 benchmark to December 1989, the 1989 benchmark to December 1994 and the 1994 benchmark to date.⁹ Includes individuals, Government-sponsored enterprises, brokers and dealers, bank personal trusts and estates, corporate and non-corporate businesses, and other investors.

Note.—Ownership data have been revised back to March 1989 in order to update ownership categories and to incorporate greater reliance on Flow of Funds data of the Federal Reserve Board.

INTRODUCTION: Market Yields

The tables and charts in this section present yields on Treasury marketable securities, and compare long-term yields on Treasury securities with yields on long-term corporate and municipal securities.

- Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes and bonds. The Treasury yield curve in the accompanying chart is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

The Treasury uses quotations obtained by the FRB of New York to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. Yields on Treasury bills are coupon equivalent yields of bank *discount rates* at which Treasury bills trade in the market. The Board of Governors of the Fed-

eral Reserve System publishes the Treasury constant maturity data series in its weekly H.15 press release.

- Table **MY-2** shows average yields of long-term Treasury, corporate and municipal bonds. The long-term Treasury average yield is the 30-year constant maturity yield. The corporate bond average yield is developed by Treasury by calculating reoffering yields on new long-term securities maturing in at least 20 years and rated Aa by Moody's Investors Service. The municipal bond average yield prior to 1991 was compiled by Treasury. Beginning with January 1991, the average yield is the "Municipal Bond Yield Average," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the footnotes for further explanation.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, various U.S. Mint offices, the Federal Reserve Banks and the Federal Reserve Board.

¹ Issued on or after July 1, 1929.² Excludes coins sold to collectors at premium prices.³ Includes \$481,781,898 in standard silver dollars.⁴ Represents value of certain partial denominations not presented for redemption.⁵ Based on Bureau of the Census estimates of population.

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on the U.S. Government's reserve assets, liabilities to *foreigners* and its international financial position. All monetary figures are in dollars or dollar equivalents.

• Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund*

(*IMF*), holdings of convertible foreign currencies and reserve position in the *IMF*.

• Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

• Table **IFS-3** shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

Apr.....	73,694	11,049	9,634	29,957	23,054

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978,

these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

⁶ Includes an SDR \$361 million loan to the IMF under the General Arrangements to Borrow in July 1998, and an SDR \$619 million loan to the IMF under the New Arrangements to Borrow in December 1998.

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Includes current value of zero-coupon Treasury bond issues to foreign governments as follows: Mexico, beginning March 1988, 20-year maturity issue and beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank and the Asian Development Bank.⁸ Data on the two lines shown for this date reflect different benchmark bases for foreigners' holdings of selected U.S. long-term securities. Figures on the first line are comparable to those for earlier dates; figures on the second line are based in part on a benchmark survey as of end-year 1994 and are comparable to those shown for following dates.

Note.—Table is based on Treasury data and on data reported to the Treasury by banks, other depository institutions and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by international and regional organizations.

¹ Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Face value of the issue is \$6,685 million.

² Includes the current value of the following zero-coupon Treasury bond issues to the government of Mexico: Beginning March 1988, 20-year maturity issue with remaining face value of \$1,508 million that was retired in full in April 1997; and beginning March 1990, 30-year maturity

issue with remaining face value of \$20,412 million.

³ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$4,976 million.

INTRODUCTION: Capital Movements

Treasury collects information about the transference of financial assets and other portfolio capital movements between the United States and foreigners and has since 1935. Commercial banks and other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district FRBs. Beginning in late 1998, the Federal Reserve Board also performs services on behalf of the Treasury in support of this data collection system.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms and nonbanking enterprises. Copies of the reporting forms and instructions may be obtained from the Office of Program Services, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district FRBs.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. However, information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and so may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite "Other Europe."

Banks and other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States must file reports. These enterprises include the branches, agencies, subsidiaries and other affiliates in the United States of foreign banking and nonbanking firms. Those with liabilities, claims or securities transactions below specified exemption levels are exempt from reporting.

Banks and other depository institutions, and some brokers and dealers, file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items attributed to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies. The exemption level applicable to these banking reports is \$15 million.

Banks and other depository institutions, securities brokers and dealers, and other enterprises report monthly their transac-

tions with foreigners in long-term securities. They must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$2 million during the covered month.

Exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions and brokers), and other nonbanking enterprises must file reports quarterly if liabilities to, or claims on, unaffiliated foreigners amount to \$10 million or more at the end of the covered quarter.

Nonbanking enterprises also report each month their aggregate U.S. dollar denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce (Commerce) in its regular reports on the U.S. balance of payments.

- **Section I** presents liabilities to foreigners reported by U.S. banks and other depository institutions, as well as brokers and dealers. Dollar liabilities are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners.

- **Section II** presents claims on foreigners reported by U.S. banks and other depository institutions, brokers and dealers. Data on banks' claims held for their own account are collected monthly. Information on claims held for their domestic customers as well as on foreign currency claims is collected on a quarterly basis only. Maturity data are reported according to time remaining to maturity. Reporting also covers certain items held by brokers and dealers in the United States.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December.

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions and brokers), and other nonbanking enterprises in the United States. Information does not include accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to the Commerce on its direct investment forms. Data

exclude claims on foreigners held through banks in the United States.

• **Section V** contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, brokers and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly issued securities as well as transactions in and redemptions of outstanding issues. However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

The geographical breakdown of the transactions data does not necessarily reflect the domicile of the ultimate owners or the original issuers of the securities. This is because the path of a security is not tracked prior to its being purchased from, or after it is sold to, a foreigner in a reportable transaction. That is, before it enters and after it departs the reporting system, own-

ership of a security may be transferred between foreigners of different countries. Such transfers may occur any number of times and are concealed among the net figures for U.S. transactions opposite individual countries. Hence, the geographical breakdown shows only the country of domicile of the foreign buyers and sellers of securities in a particular round of transactions.

NOTE: Current and historical data on United States transactions with foreigners in long-term securities and on the gross foreign liabilities and claims reported by banks in the United States are available on the Treasury International Capital (TIC) reporting system web site: <http://www.ustreas.gov/tic>. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this web site is a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC web site are updated on the last business day of each month.

¹ These data as of Dec. 31, 1998.

² Excludes negotiable time certificates of deposit, which are included in "Other liabilities."

³ U.S. Treasury bills and certificates held in custody for the account of oil-exporting countries in "Other Asia" and "Other Africa" amount to \$1,449 million.

⁴ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

⁵ Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as

independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

CHART CM-D.—Net Purchases of Long-Term Foreign Securities by U.S. Investors *

(In billions of dollars)

[In millions of dollars. Source: Treasury International Capital Reporting System]

Type	1994	1995	1996	1997	1998	Jan. - Mar. 1999
Foreign bonds	9,224	48,405	51,369	48,171	18,957	495
Foreign stocks	48,071	50,291	59,268	40,942	-8,503	-8,240
Total	57,295	98,696	110,637	89,113	10,454	-7,745

*Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

(Calendar Years)

INTRODUCTION: Foreign Currency Positions

The “Treasury Bulletin” reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of six major foreign currencies (Canadian dollar, German mark, Japanese yen, Swiss franc, pound sterling and Euro) and the U.S. dollar. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold. Exemptions from filing the monthly report are given to banking institutions that file the Federal Financial Institu-

tion Examination Council (FFIEC) 035 report (“Monthly Consolidated Foreign Currency Report”).

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$1 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September or December). Exemptions from filing the quarterly report are given to major nonbank market participants that file weekly and monthly reports and banking institutions that file FFIEC 035 reports.

This information is published in seven sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VII-1 present the currency data reported weekly by major market participants. Tables I-2 through VII-2 present more detailed currency data of major market participants, based on monthly Treasury and FFIEC 035 reports. Tables I-3 through VII-3 present quarterly consolidated currency data reported by large market participants and FFIEC reporters that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also is separately noted on monthly and quarterly reports. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option’s value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

• Table **ESF-1** presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

• Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

Income and expense		
Profit (+) or loss (-) on:		
Foreign exchange	1,699,438	1,699,438
Adjustment for change in valuation of special drawing rights holdings and allocations ¹	91,602	91,602
Interest (+) or net charges (-) on:		
Special drawing rights	33,530	33,530
U.S. Government securities	197,993	197,993
Foreign exchange	60,081	60,081
Income from operations	2,082,644	2,082,644
Net income (+) or loss (-)	2,082,644	2,082,644

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the special drawing rights based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. special drawing rights holdings and allocations are valued on this basis beginning July 1974.

² Excludes foreign exchange transactions for future and spot delivery.

Note.—Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

INTRODUCTION: Financial Report of the United States Government

The following pages are excerpted from the 1998 “Financial Report of the United States Government.” The report and accompanying information, prepared and published annually by the Financial Management Service, are modeled after corporate-type reports and are developed on an accrual basis of accounting.

The excerpts represent some of the most noteworthy information contained in the Financial Report. Data for the Financial Report are compiled from Federal program agency ac-

counting systems governmentwide. Treasury also presents a management discussion and analysis, the customary notes to the financial statements, a section on “Stewardship Information” and supplemental information, in the complete document.

The General Accounting Office (GAO) is required by law to audit the Financial Report. GAO’s report, as well as the complete Financial Report, can be easily accessed through the internet at www.fms.treas.gov/cfs.

Statement of Operations and Changes in Net Position

The statement of operations and changes in net position reports the results of Government operations. This includes revenues generated by the Government’s sovereign power to tax, levy duties, and assess fines and penalties. The statement covers the net cost of Government operations, net of revenue earned from the sale of goods and services to the public. It also includes any adjustments and unreconciled transactions that affect the net position.

Net cost of Government operations

Net cost of Government operations is the cost of operations reported in the statement of net cost, which is gross cost minus earned revenue.

Revenues: financing sources from non-exchange revenue

The main source of revenue for Government operations is non-exchange revenue, which consists of taxes and other revenue the Federal Government generates under its governmental powers or receives by donation.

Miscellaneous earned revenue

Miscellaneous earned revenue consists of exchange revenues from the public with virtually no associated costs. These items include revenues from spectrum auctions, rents and royalties on the Outer Continental Shelf Lands.

Unreconciled transactions

Unreconciled transactions are adjustments made to balance the change in net position.

Net position – beginning of period

This amount is the net position reported on the prior year’s Balance Sheet.

Prior period adjustments

Prior period adjustments are made to revise the beginning net position balance due to accounting principle changes and other adjustments.

Net position – end of period

This is the amount reported as net position on the current year’s Balance Sheet.

Statement of Net Cost

This statement shows the net costs of Government operations for fiscal 1998, which is funded by taxation or through

Federal borrowing. The statement reflects the costs incurred to carry out the national priorities as determined by law.

Cost is divided among major functions, which are the same as in the budget except that the allocation of costs to the functions is based on accounting standards. Thus costs are reported on an accrual basis and allocated differently than in the budget. For example, the costs of pensions and retiree health benefits are allocated among all functions that employ workers rather than a subfunction in the income security function.

A description of all functions and the components of net cost for the activities included in the function is located in the supplemental information section of the “Financial Report of the United States Government” as “Net Cost Detail.”

The statement contains the following three components for each function:

- The gross cost of Government operations;
- The revenues earned from the public for goods and services; and
- The net cost of Government operations, which is the gross cost less the revenue earned.

Gross cost

Gross cost includes the full cost of the functions. These costs may be directly traced, assigned on a cause and effect basis or reasonably allocated to the function.

Earned revenue

These are revenues that the U.S. Government has earned by providing goods and services to the public at a price.

Net cost

The net cost of Government operations is the gross cost less the earned revenues.

Balance Sheet

This statement shows the operating assets of the Government that were acquired under fiscal 1998, and prior year budgets. These assets remain available as resources to supply Government goods and services in the future. The statement also shows the Government’s operating liabilities including debt held by the public.

It includes some liabilities that have not yet been funded by appropriations. The net position shown in the statement reflects operating assets less liabilities.

**United States Government
Statement of Operations and Changes in Net Position
for the Year Ended September 30, 1998**

(In billions of dollars)

Revenue:

Individual income tax and tax withholdings	1,374.2
Corporation income taxes	186.3
Unemployment taxes	26.4
Excise taxes	57.6
Estate and gift taxes	24.0
Customs duties	17.7
Other taxes and receipts	26.6
Miscellaneous earned revenues	7.4
Total revenue	1,720.2

Net Cost of Government Operations:

National defense	321.6
Human resources	1,080.4
Physical resources	100.2
Net interest	243.1
Other functions	108.7
Total net cost of Government operations	1,854.0

Excess of Net Cost Over Revenue -133.8

Unreconciled transactions affecting the change
in net position (Note 16) 23.9

Decrease in net position -109.9

Net position, beginning of period -5,003.0

Prior Period Adjustments (Note 14):

Changes in accounting principles	-681.7
Other adjustments	-339.8

Net position, end of period **-6,134.4**

The accompanying notes in the complete document are an integral part of these financial statements.

**United States Government

Statement of Liabilities and Other Financial Commitments

The statement of liabilities and other financial commitments of the U.S. Government is compiled in accordance with 31 United States Code 331 (b). The report discloses the liabilities, commitments and contingencies as of September 30, 1998, and 1997.

TABLE SLOFC-1—Summary of Liabilities of the United States Government

[In millions of dollars. Source: Financial Management Service]

Section	1998	1997
Liabilities:		
Borrowing from the public:		
Public debt securities issued	5,526,300	5,413,147
Plus premium on public debt securities	16,900	20,200
Less discount on public debt securities	78,900	78,187
Total public debt securities net of premium and discount	5,464,300	5,355,160
Agency securities issued	29,000	32,700
Total Federal securities	5,493,300	5,387,860
Less net Federal securities held as investments of Government accounts	1,775,600	1,619,600
Total borrowing from the public	3,717,700	3,768,260
Accrued interest payable to the public	45,448	46,083
Deposit funds	6,041	6,800
Miscellaneous liability accounts (includes checks outstanding)	3,923	3,938
Accounts payable and accruals of Government agencies	194,760	¹ 196,737
Total liabilities	3,967,872	4,021,818

¹ Figure includes both public and Federal amounts.

(In billions of dollars)

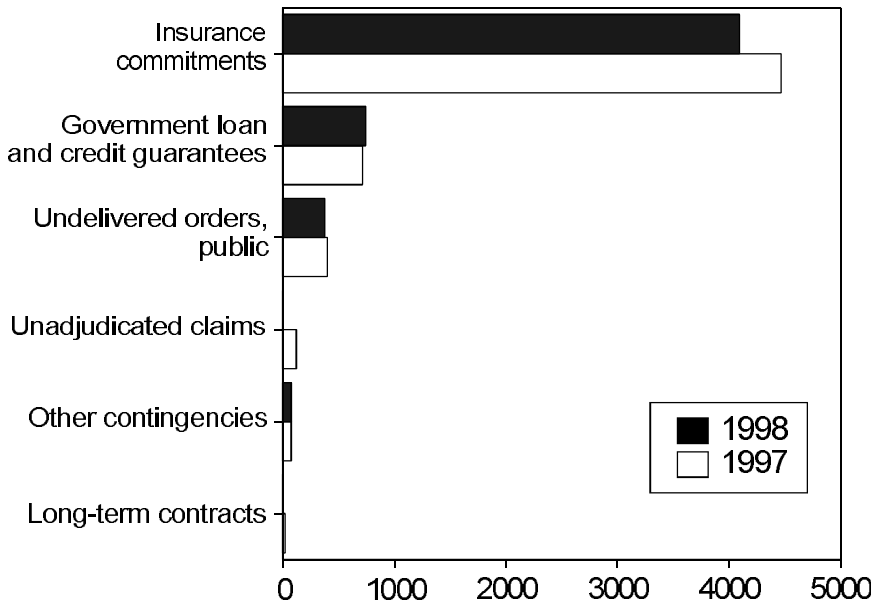

CHART SLOFC-A.— Commitments and Contingencies*

This report contains totals for commitments of the Government that represent the value of goods and services ordered and obligated but not yet received. It also includes other commitments against appropriations, all pursuant to section 1311 of the Supplemental Appropriation Act of 1955 (31 United States Code 200). Contingencies represent conditional commitments that may become liabilities due to events beyond the control of the Government. The amounts are agency projections stated in terms of maximum theoretical risk exposure. The data for commitments and contingencies come from agency notes reports that were submitted to the Financial Management Service (FMS).

*Note.—A copy of the detailed schedules can be obtained from the Financial Reports Branch (202) 874-9910. Amounts presented in Chart SLOFC-A were compiled from reports submitted by the agencies in accordance with vol. I, part 2, chapter 4000 of the "Treasury Financial Manual" (Transmittal Letter No. 580). The information furnished by some reporting agencies was based on estimates. Amounts presented in Table SLOFC-1 were compiled from "Schedule 1-U.S. Summary General Ledger Account Balances, 1998 Annual Report-Appendix" and Treasury internal documents.

TABLE TF-15A.—Highway Trust Fund

The following information is released according to the provisions of the Byrd Amendment to the Intermodal Surface Transportation Efficiency Act of 1991 and represents data concerning the Highway Trust Fund. The figure described as “unfunded authorizations” is the latest estimate received from the Department of Transportation (DOT) for fiscal 1998.

The 24-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury’s Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal 1998.

Highway Account

[In millions of dollars. Source: DOT]

Unfunded authorizations (EOY)	41,277
24-month revenue estimate	61,649

Mass Transit Account

[In millions of dollars. Source: DOT]

Unfunded authorizations (EOY)	-4,922
24-month revenue estimate	9,912

Glossary

With References to Applicable Sections and Tables

Source: Financial Management Service

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, I and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority may also be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes and 1890 Series Treasury notes.

Current income bonds (“U.S. Savings Bonds and Notes”)—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of March 1999, the debt limit was \$5,950,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve Banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States, and international and regional organizations, wherever located. Also, refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all

Glossary

departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, I, J and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967

and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders (“Treasury Financing Operations”)—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)—Treasury has historically offered packages of several “coupon” security issues on the 15th of February, May, August and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in exchange stabilization fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 workdays.

Glossary

State and local government series (FD-2)—(SLUGs) Special nonmarketable certificates, notes and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLUGs are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may

be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), they are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intra-budgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
