## Profile of the Economy

[Source: Office of Macroeconomic Analysis]

### Real gross domestic product (GDP)

The advance estimate of real gross domestic product (GDP) showed annualized growth of 3.4 percent in the second quarter of 2005, down slightly from the 3.8 percent annual pace set in the first quarter. Annual revisions to the GDP data lowered previous estimates of GDP growth measured fourth quarter to fourth quarter from 3.9 percent to 3.8 percent in 2004, from 4.4 percent to 4.0 percent in 2003, and from 2.3 percent to 1.9 percent in 2002.

Personal consumption expenditures continued to expand at a moderate 3.3 percent annual rate in the second quarter following the 3.5 percent pace set in the first quarter. The slight deceleration occurred as real household spending on energy goods fell.

The pace of business fixed investment picked up to a 9.0 percent annual rate in the second quarter after posting 5.7 percent growth in the prior quarter. Investment in equipment and software rose at an 11.0 percent clip in the second quarter, while investment in structures rebounded to post an annualized gain of 3.1 percent after slipping 2.0 percent in the first quarter. Residential investment maintained its recent strong growth in the second quarter, climbing 9.8 percent at an annual rate above the prior quarter. A sell-off in private inventories in the second quarter acted as a drag on the GDP growth rate, subtracting 2.3 percentage points.

Exports posted a solid 12.6 percent annual growth rate in the second quarter after a 7.5 percent increase in the first quarter. Imports contracted at a 2.0 percent rate in the second quarter, the first quarterly decline since early 2003. The strong export growth and lower imports combined to

contribute 1.6 percentage points to overall GDP growth and narrow the trade gap from a record \$645.4 billion (constant 2000 dollars) in the first quarter to \$601.3 billion.

Growth of Government spending held steady at a 2.0 percent annualized rate after increasing 1.9 percent in the first quarter. Although Federal Government spending slowed from a 2.4 percent clip in the first quarter to 1.3 percent in the second, state and local Government spending growth picked up from an annualized rate of 1.6 percent in the first quarter to 2.4 percent in the second quarter.

### Growth of Real GDP

(Percent change, fourth quarter to fourth quarter)

**Inflation**

Inflation has slowed a bit so far this year from last year's pace. The consumer price index rose at a 3.1 percent annual rate during the first half of the year, off slightly from the 3.3 percent increase during all of 2004. This followed a 1.9 percent rise during 2003. Energy prices jumped at a 14.1 percent annual rate through June, while the cost of food has risen by a moderate 2.3 percent. Core consumer prices (excluding food and energy) have continued up at a 2.2 percent pace, the same as during 2004 but still above the exceptionally low 1.1 percent during 2003.

Inflation at the producer level has also eased this year. Overall finished goods prices rose at a 2.4 percent annual rate over the first 6 months of the year, off from an increase of 4.2 percent during 2004. The rise in energy prices has slowed from 13.4 percent last year to an 8.5 percent annual rate this year. Core finished goods inflation was 2.2 percent through June, little changed from last year. Core inflation has been creeping up from a slight decline during 2002. Further back in the production chain, the cost of core intermediate materials has slowed from an 8.3 percent jump

last year to a 2.5 percent increase during the first half of this year. Prices of core crude materials dropped at a 21.8 percent rate so far this year, offsetting a surge of 20.5 percent last year.

Labor cost increases have slowed a little in 2005. Hourly compensation costs as calculated in the national income accounts for the private nonfarm business sector increased at a 5.3 percent annual rate during the first half of the year, off a little from the 5.8 percent gain registered across the four quarters of last year. The 2005 increase was faster than the 2.7 percent annual rate rise in productivity. As a result, unit labor costs have risen at a 2.3 percent rate so far this year. This represents a deceleration from the 3.2 percent increase during 2004 and is consistent with moderate inflation. The employment cost index for total compensation, a fixed-weighted compensation measure, increased by 3.2 percent during the 12-month period ending in June 2005, off from the 3.9 percent increase during the 12 months ending in June 2004. Almost all of the deceleration resulted from a slowing in the rate of increase in benefit costs to 5.1 percent. Wage increases remained subdued at 2.4 percent over the past year.

**Consumer Prices**

(Percent change from a year earlier)

**Producer Prices - Finished Goods**

(Percent change from a year earlier)

### Employment and unemployment

Labor markets appeared strong as of mid-2005. Nonfarm payroll employment increased by 207,000 in July. So far this year, payrolls have expanded by an average of 191,000 per month, up from last year's 183,000 pace. Since payroll employment reached a low point in May 2003, the economy has created nearly 4.0 million jobs.

Job gains were fairly widespread in July. Employment in retail trade rose a strong 50,000, and the professional and business and leisure and hospitality categories each posted gains of more than 30,000. Construction employment was up by 7,000 in July. This sector has added a solid 23,000 jobs per month over the past year. One of the few downsides in the latest report was a 4,000 decline in manufacturing jobs. Over the latest 12 months, factory payrolls have fallen by 65,000.

The unemployment rate remained unchanged at 5.0 percent in July, the lowest level since September 2001. A breakdown of the data also shows that the unemployment

rate among blacks declined to 9.5 percent in July, the lowest level since October 2001. Among Hispanics, the unemployment rate eased to 5.5 percent, the lowest level since October 2000. The labor force participation rate edged up to 66.1 percent in July. That is up from a 17-year low of 65.8 percent earlier this year. In a further sign of a strengthening labor market, the employment-population ratio (the share of the working-age population that is employed) increased to 62.8 percent in July, the highest share since late 2002.

The average workweek held steady at 33.7 hours for the third consecutive month in July. Aggregate production hours edged up 0.2 percent because of the employment increase. Average hourly earnings advanced by 0.4 percent in nominal terms in July, the largest monthly gain in a year, and are up 2.7 percent since July 2004. The year-over-year gain in real hourly earnings turned positive in June as nominal earnings outpaced inflation for the first time in more than a year. (Earnings in real terms are not yet available for July.)

### Unemployment Rate

(Percent)

### Payroll Employment

(Average monthly change in thousands)

## Real disposable personal income and consumer spending

Nominal personal income increased at a 5.8 percent annual rate in the second quarter of this year following a 12.7 percent surge in the fourth quarter of last year and an increase of 2.6 in the first quarter. The divergence in the growth during the previous two quarters largely reflected a one-time dividend payout by Microsoft in December that sharply boosted dividend income in the fourth quarter. Wages and salaries, which account for more than half of personal income, rose at a 5.0 percent annual rate in the second quarter following an increase of 6.2 percent in the first quarter. Growth in personal interest income has continued to pick up, increasing at an 8.3 percent annual rate in the second quarter. Interest income has now risen for three consecutive quarters. Prior to these increases, interest income had been falling on average since 2000. Dividend income rose at a 9.5 percent annual rate in the second quarter and has now grown at a healthy pace for almost 4 years.

Disposable (after-tax) income adjusted for inflation increased at a 1.4 percent annual rate in the second quarter. This was down from the 2.7 percent pace during 2004 and the first quarter of this year. Real consumer spending continued to rise moderately, increasing at a 3.5 percent annual rate in the first quarter and by 3.3 percent in the second quarter. These followed a gain of 3.8 percent during 2004. With spending increasing at a faster rate than income, the personal saving rate fell to a very low 0.2 percent in the second quarter. The saving rate has on average been falling since reaching a quarterly post-World War II high of 12.2 percent in 1981.

## Industrial production and capacity utilization

Output from factories, mines, and utilities increased 2.1 percent at an annual rate in the second quarter of 2005, down from a 3.6 percent annual rate in the first quarter. Over the 12 months ending in June, output increased by a solid 3.9 percent.

Manufacturing production, which accounts for about 82 percent of all industrial output, grew 1.5 percent at an annual rate in the second quarter after a 4.0 percent advance in the first quarter of 2005. Gains averaged about 5.0 percent in the previous four quarters. The deceleration in the second quarter was related to sharp declines in the production of motor vehicles and parts, as well as nonenergy industrial materials. Output of high-technology goods (computers, communications equipment, and semiconductors) rose at a 12.8 percent annual rate increase in the second quarter after a 29.4 percent surge in the first quarter. The deceleration in high-technology production reflected a wide swing in semiconductor and communication equipment. Output of computers and peripheral equipment maintained strong, steady growth during the first half of 2005. Production of motor vehicles and parts declined at a 4.3 percent annual rate

in the second quarter after rising 2.7 percent in the first quarter. Motor vehicle production surged by 16.3 percent at an annual rate in the fourth quarter of 2004. Apart from automobiles, manufacturing output rose at a 2.0 percent annual rate in the second quarter, slowing from the first quarter's 4.1 percent annual rate.

Production at utilities, which accounts for 10 percent of total industrial output, rose at a 6.0 percent annual rate in the second quarter after falling by 3.2 percent in the first quarter, a pattern related to unseasonable weather. Output at mines (the remaining 8 percent of industrial output) increased 4.3 percent in the second quarter, slowing from an 8.4 percent rise in the first quarter (which followed three straight quarterly declines).

The capacity utilization rate for the industrial sector edged up to 79.5 percent in the second quarter of 2005, from 79.3 percent in the first quarter. Although capacity utilization has risen in each of the last eight quarters, it remains 1.5 percentage points below its long-term average of 81.0 percent. Capacity utilization in the manufacturing sector was 78.2 percent in the second quarter, in line with the 78.1 reading in the first quarter but still 1.6 percentage points below its long-term average of 79.8 percent. Utilization in the high-technology industries edged down to 71.7 percent in the second quarter, from 71.8 percent in the first quarter, and was still 6.6 percentage points below its long-term average of 78.3 percent.

## Nonfarm productivity and unit labor costs

Productivity growth slowed somewhat in the middle of 2005, although the trend over a longer period of time still appears strong. Preliminary second quarter data showed that nonfarm business productivity (real output per hour worked) rose at a 2.2 percent annual rate, down from 3.2 percent in the first quarter. (The latest productivity numbers included data revisions back to 2002.)

Over the most recent four quarters, labor productivity was up 2.3 percent, down from the rapid 4.2 percent rate registered in the comparable four-quarter period a year ago. That 2.3 percent pace is also slightly lower than the average rate of productivity growth in the latter half of the 1990s. However, over the past 4-1/2 years, productivity has risen at a 3.3 percent rate, still strong by historical standards.

Hourly compensation costs in the nonfarm business sector rose at a 3.5 percent annual rate in the second quarter, down from 6.9 percent in the first quarter. These costs were up 6.7 percent over the most recent four quarters. Unit labor costs, hourly compensation divided by productivity, increased at a 1.3 percent annual rate in the second quarter, down from 3.6 percent in the first quarter. Unit labor costs were up 4.3 percent over the most recent four quarters, following a decline of 0.4 percent in the year-earlier four-quarter period.

Productivity in the manufacturing sector rose at a 4.1 percent annual rate in the second quarter and was up a solid 4.7 percent over the most recent four quarters. That is a

slower pace, however, than the 5.8 percent rate of growth averaged over the past 4 years.

Hourly compensation costs in manufacturing advanced at a 6.6 percent annual rate in the second quarter and were up 8.6 percent over the most recent four quarters. Factory unit labor costs rose at a 2.3 percent annual rate in the second quarter and were up 3.7 percent over the most recent four quarters.

### International transactions

The current account measures trade in goods and services as well as the flow of investment income and unilateral transfers (including Government grants and pension payments as well as private transfers to and from foreigners). The current account has been in deficit almost continuously since the early 1980s but has fluctuated widely over time. In the first quarter of 2005, the current account deficit widened by \$27 billion to a new high of \$780 billion at an annual rate, equivalent to a record 6.4 percent of GDP. Net outflows for unilateral transfers surged to an all-time high, accounting for nearly three-quarters of the deterioration in the current account. The disbursement of U.S. Government grants to Israel and Egypt was largely responsible. The merchandise trade deficit also reached a record level in the first quarter. Those developments were partly offset by gains in the surpluses on trade in services and investment income. Data on trade in goods and services during the first 2 months of the second quarter suggest some improvement in the current account balance may be on tap for the second quarter.

By definition, the current account is matched by offsetting transactions in the capital and financial accounts with any difference in the recorded flows listed as a statistical discrepancy. Capital account transactions, which consist mainly of debt forgiveness and wealth transfers associated with immigration, jumped to nearly \$18 billion at an annual rate in the first quarter, up sharply from quarterly gains averaging less than \$2 billion over the prior 4 years. The increase resulted from debt forgiveness for Iraq.

The financial account measures transactions that alter the foreign financial assets and liabilities of the United States. Net financial inflows (the difference between net foreign purchases of U.S. assets and U.S. purchases of foreign assets) amounted to nearly \$662 billion at an annual rate in the first quarter, about \$14 billion less than in the fourth quarter. Financial inflows for foreign-owned assets in the United States slowed to \$904 billion in the first quarter from

a record \$1.8 trillion at the end of 2004. Three-quarters of the drop was due to a large swing in U.S. liabilities to foreigners reported by U.S. banks. Private foreign purchases of non-Treasury securities fell from an unprecedented level in the fourth quarter as acquisitions of U.S. equities, corporate bonds, and federally-sponsored agency bonds all slowed. Foreign official assets in the United States also grew at a slower pace in the first quarter, with official purchases of Treasury securities moderating to the smallest amount in 2-1/2 years. Foreign direct investment eased as well. Partly offsetting those developments was a pronounced pickup in foreign private purchases of U.S. Treasuries. On the other side of the financial balance sheet, net U.S. outflows for overseas assets totaled \$243 billion in the first quarter, down from \$1.2 trillion in the fourth quarter.

### Exchange rate of the dollar

The dollar peaked in February 2002 and has since followed a generally depreciating trend with a few periods of temporary strengthening. In the 34-month period between the 2002 peak and December 2004, the nominal exchange value of the dollar relative to a broad index covering the currencies of 26 important U.S. trading partners depreciated by 16 percent. During the subsequent 7 months, through July 2005, the dollar has risen by 3.2 percent. The cumulative decline from the February 2002 peak to July 2005 was 13.4 percent.

The aggregate decline mainly reflected dollar weakness against the seven currencies of the United States' major trading partners, including the euro area countries, Japan, Canada, the United Kingdom, Australia, Sweden, and Switzerland. Between February 2002 and July 2005, the exchange rate of the dollar compared to an index of these currencies fell by 23.4 percent. Dollar depreciation against the yen and the euro, whose combined weights account for roughly 55 percent of the major index, was largely responsible. Over the same period, the dollar/euro exchange rate fell by 28 percent and the dollar/yen exchange rate fell by 16 percent.

With respect to the currencies of many other important trading partners, the dollar is roughly the same as it was in February 2002. It has had several fluctuating periods of appreciation and depreciation since February 2002, but by July 2005, the exchange value of the dollar compared to an index of currencies that includes Mexico, China, Brazil, and seven other Asian countries was virtually the same as in February 2002.

**Interest rates**

At its most recent meeting in August 2005, the Federal Open Market Committee (FOMC)—the Federal Reserve’s policy-making arm—raised the Federal funds target rate by 25 basis points to 3.5 percent, the tenth hike in the current cycle of monetary tightening (begun in late June 2004). Previously, the FOMC had held the Federal funds target (the rate that banks and other financial institutions charge each other for overnight loans) constant at 1 percent for 1 year. Even so, at the relatively low level of 3.5 percent, the Federal Reserve’s monetary stance remains accommodative.

In the Treasury market, the 3-month Treasury bill rate started rising in early May 2004 in anticipation of the latest monetary tightening cycle. Over the past 15 months, the rate has risen by about 240 basis points to 3.4 percent in early August. Although the 10-year Treasury yield initially rose to about 4.8 percent in May 2004 (also in anticipation of faster growth and monetary tightening), it has trended lower over much of the 15 months. After declining to as low as 3.95 percent in early June 2005, the rate has fluctuated in a somewhat higher range, but at 4.35 percent as of early

August, is still about 50 basis points lower than in spring 2004.

Mortgage interest rates generally follow movements of the 10-year Treasury rate and have fluctuated in a fairly narrow band around low level for about 2 years. The low rates have contributed to record home sales as well as mortgage refinancings, helping to free additional cash for consumption. This year the rate has ranged between about 5.5 percent and 6.0 percent, and in early August was near the middle of that range.

Corporate bond yields reflect movements in long-term Treasury yields as well as numerous other factors. Moody’s seasoned Baa yield has traded near the 6.0 percent mark for the past 5 months, reaching a low of 5.85 in June before edging up to an average 5.95 percent in July. The spread between the Baa yield and the 10-year Treasury yield, a measure of investor risk appetite, has narrowed to an average of 1.8 percentage points as of July, down from nearly 4 percentage points in late 2002, suggesting investors have become much more optimistic about business prospects.

**Short-term Interest Rates**

(Percent)

**Long-term Interest Rates**

(Percent)

## Housing

The housing sector continued to perform remarkably well in the second quarter of 2005. Real residential investment accelerated slightly, and sales of single-family homes climbed to a new all-time high. The homeownership rate eased slightly but remained close to the record level recorded in the spring of 2004.

Housing starts declined by 13 percent at an annual rate to a 2.012 million unit annual rate in the second quarter after surging to a 27-year high of 2.083 million in the first quarter. Even so, the pace of real residential investment picked up to a 9.8 percent annual rate from the 9.5 percent pace posted in the first quarter, due to a surge in brokers' commissions stemming from the record pace of home sales.

Sales of new single-family homes jumped by 27 percent at an annual rate in the second quarter to an annualized pace of 1.326 million, a new high for this series which dates back to 1963. Resales of existing single-family homes rose by 22 percent at an annual rate to a pace of 6.290 million—also a record. Despite the unprecedented strength of home sales, the homeownership rate slipped by 0.4 percentage point to 68.8 percent in the second quarter and is down 0.6 point from an all-time high of 69.4 percent a year earlier.

The strong pace of home sales was due in part to falling interest rates. The average rate on a 30-year conventional mortgage declined by nearly 50 basis points over the course of the quarter from 6.04 percent in early April to 5.57 percent in the last week of June. Although mortgage rates rose in July, they still remain very favorable.

Residential construction and home sales will likely remain strong in the near-term, although further large gains are not anticipated. The number of building permits issued in the second quarter rose to a 32-year high, and the backlog of unused permits reached their highest level since 1978. Both indicators bode well for home building. Citing the combination of low mortgage rates and strong job and

income growth, the housing industry is now expecting 2005 to be another record year for home sales.

## Federal budget

The Federal budget deficit was \$250 billion through 9 months of fiscal year 2005, \$77 billion less than in the comparable months of the previous fiscal year. The deficit has been narrowing as receipts of withheld individual income and employment taxes were up 4.5 percent from the same period in fiscal year 2004. Nonwithheld individual income and employment taxes (which are estimated and paid quarterly) jumped 28.6 percent in the first 9 months of the fiscal year compared to last year. In addition, net corporate income tax receipts have soared 41.0 percent as profits strengthened. Total receipts through the fiscal year to June have risen 14.6 percent from the same months last year, or \$204 billion. Outlays were up 7.3 percent so far this fiscal year from last year, or \$127 billion.

Mainly because of the boost to tax payments, the Administration cut its estimate of the fiscal year 2005 deficit to \$333 billion in the Mid-Session Review (MSR) of the Fiscal Year 2006 Budget from the \$412 billion recorded last fiscal year and down from the previous estimate for this fiscal year of \$427 billion. The new \$333 billion deficit figure is about 2.7 percent of GDP, much smaller than the 3.6 percent in 2004. Going forward, the MSR projects the deficit will fall further as a share of GDP in the next few fiscal years. The new estimates project the deficit to dip to 2.6 percent of GDP in fiscal year 2006, decline to 1.7 percent in 2007, and then drop to 1.1 percent of GDP from fiscal years 2008 to 2010. A deficit of 1.1 percent of GDP would be well below the 40-year average of 2.3 percent of GDP. That puts the deficit on track to shrink below the Administration's initial target of cutting the deficit in half by fiscal year 2009.

## Net national saving and investment

Net national saving, a source of funds for new investment, has fallen sharply since 1998 after a brief period of improvement in the mid 1990s. Declines continued in each year thereafter and in 2004 the annual level of net national saving hit 1.3 percent of net national product (NNP), the smallest share since the negative readings of the early 1930s. (Net national saving and NNP exclude depreciation to replace worn-out or obsolete equipment, software, and structures used in production.)

Much of the recent decline in the net national saving rate reflected widening deficits in both state and local and Federal budgets. After 4 years of surplus, Federal finances turned negative from calendar years 2002 through 2004, due in part to the 2001 economic recession as well as increased spending on defense and homeland security. State and local balances also showed declines through those years, though the negative balances have diminished in the past 2 years. Taken together, the public sector deficit rose to a recent high of 4.2 percent of NNP in 2003, easing to 4.0 percent of NNP in 2004 as the economy and Government finances strengthened. Improvement in public finances continued into the first quarter of 2005 as state and local balances turned positive and the Federal deficit narrowed sharply. This led to a decline in the public sector deficit from the 4.0 percent reading in 2004 to 2.7 percent in the first quarter of 2005, contributing to an increase in the total net national saving rate to 1.9 percent of NNP in that quarter.

Private saving dipped to 5.3 percent of NNP in 2004 from an average of 5.4 percent in the 2 prior years but still remains well above the more-than six-decade low of 3.7 percent recorded in 2001. The improvement in private saving over the past 3 years partly reflects strong growth of corporate profits, which helped boost retained earnings of corporations to almost 4 percent of NNP in the last 2 years. That was up from 3.2 percent in 2002 and 2.2 percent in 2001 following a 20-year low of 2.0 percent in 2000. Personal saving, which fell to 1.5 percent of NNP during

2001—the lowest in 50 years—bounced back in 2002 and 2003 before dropping again to the 1.5 percent level in 2004.

Net domestic investment (by Government and private industry in structures, equipment, software, and inventory) increased to 8.4 percent of NNP in 2004, from 7.2 percent in 2003 and 6.9 percent in 2002. While still below the 9.6 percent average posted from 1997 through 2000, the current rate of net investment is considerably higher than readings of 5.8 percent on average in 1991 and 1992. A large portion of domestic investment continues to be financed from abroad, a trend that has persisted for more than two decades. This is reflected in the U.S. current account balance (equivalent to net foreign investment), which has shifted from a small surplus of 0.3 percent of NNP in 1991 to a deficit of 6.3 percent in 2004 and 7.1 percent in the first quarter.

### Net National Saving

(Saving as a percent of NNP)

## INTRODUCTION: Federal Fiscal Operations

*Budget authority* usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash—*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

*Receipts* are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts. Total Government receipts are compared with total outlays in calculating the budget surplus or deficit.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without an appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations. For accounting purposes, earned reimbursements are also known as revenues. These offsetting collections are netted against gross outlays in determining net outlays from such appropriations; and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); offsetting collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into three categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function; (2) intragovernmental transactions, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts; and (3) offsetting governmental receipts that include foreign cash contributions.

*Intrabudgetary transactions* are subdivided into three categories: (1) interfund transactions—payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions—payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions—payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept set forth in the "Report of the President's Commission on Budget Concepts" as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal Old-Age and Survivors Insurance and the Federal Disability Insurance Trust Fund, and the Postal Service.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the Congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 [commonly known as the Gramm-Rudman-Hollings Act as amended by the Budget Enforcement Act of 1990 (2 United States Code 900-922)] included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the FRBs. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** summarizes on- and off-budget receipts by source and outlays by function as reported to each major fund group classification for the current fiscal year to date and prior fiscal year to date.

- Table **FFO-5** summarizes internal revenue receipts by states and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), payments made with tax returns and subsequent payments made after tax returns are due or are filed (that is, payments with delinquent returns or on delinquent accounts).

Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the district where such a corporation reported its taxes from a principal office rather than other districts where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one district and work in another.

- Table **FFO-6** includes customs collection of duties, taxes, and fees by districts and ports.

## Budget Results and Financing of the U.S. Government and Third-Quarter Receipts by Source

[Source: Office of Tax Analysis, Office of Tax Policy]

### Third-Quarter Receipts

**The following capsule analysis of budget receipts, by source, for the third quarter of fiscal year 2005 supplements fiscal data reported in the June issue of the “Treasury Bulletin.” At the time of that issue’s release, not enough data were available to analyze adequately collections for the quarter.**

**Individual income taxes**—Individual income tax receipts, net of refunds, were \$294.9 billion for the third quarter of fiscal year 2005. This is an increase of \$66.1 billion over the comparable prior year quarter. Withheld receipts decreased by \$1.2 billion and non-withheld receipts increased by \$60.0 billion during this period. Refunds decreased by \$7.3 billion over the comparable fiscal year 2004 quarter. There was a decrease of \$11.3 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds over the comparable quarter in fiscal year 2004.

**Corporate income taxes**—Net corporate income tax receipts were \$98.0 billion for the third quarter of fiscal year 2005. This is an increase of \$25.0 billion compared to the prior year third quarter. The \$25.0 billion change is

comprised of an increase of \$21.3 billion in estimated and final payments, and a decrease of \$3.7 billion in corporate refunds.

**Employment taxes and contributions**—Employment taxes and contributions receipts for the third quarter of fiscal year 2005 were \$210.2 billion, an increase of \$20.1 billion over the comparable prior year quarter. Receipts to the Federal Old-Age and Survivors Insurance, Federal Disability Insurance, and Federal Hospital Insurance trust funds changed by \$13.2 billion, \$2.2 billion, and \$4.8 billion respectively. There was a \$6.5 billion accounting adjustment for prior years’ employment tax liabilities made in the third quarter of fiscal year 2005, while there was a -\$4.8 billion adjustment in the third quarter of fiscal year 2004.

**Unemployment insurance**—Unemployment insurance receipts, net of refunds, for the third quarter of fiscal year 2005 were \$22.3 billion, an increase of \$1.8 billion over the comparable quarter of fiscal year 2004. Net State taxes deposited in the U.S. Treasury increased by \$1.8 billion to \$18.6 billion. Net Federal Unemployment Tax Act taxes did not change significantly from \$3.8 billion.

**Budget Results and Financing of the U.S. Government and Third-Quarter Receipts by Source, con.**

**Contributions for other insurance and retirement**— Contributions for other retirement were \$1.0 billion for the third quarter of fiscal year 2005. This was a decrease of \$0.1 billion from the comparable quarter of fiscal year 2004.

**Excise taxes**—Net excise tax receipts for the third quarter of fiscal year 2005 were \$18.4 billion, an increase of \$0.9 billion over the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.3 billion, a decrease of \$0.2 billion over the comparable prior year quarter.

**Estate and gift taxes**—Net estate and gift tax receipts were \$6.6 billion for the third quarter of fiscal year 2005.

These receipts represent an increase of \$0.1 billion over the same quarter in fiscal year 2004.

**Customs duties**—Customs duties net of refunds were \$5.6 billion for the third quarter of fiscal year 2005. This is an increase of \$0.6 billion over the comparable prior year quarter.

**Miscellaneous receipts**—Net miscellaneous receipts for the third quarter of fiscal year 2005 were \$8.1 billion, an increase of \$0.7 billion over the comparable prior year quarter. This change is due in part to deposits of earnings by Federal Reserve banks increasing by \$0.2 billion.

## INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Department of the Treasury's (Treasury's) operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include FRBs, Treasury Regional Financial Centers, Internal Revenue Service Centers, Bureau of the Public Debt, and various electronic systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147 (codified at 31 United States Code 323), Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositories maintaining tax and loan accounts. Under the Treasury tax and loan (TT&L) investment program, depository financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax

and loan accounts in interest-bearing obligations can participate. The program permits Treasury to collect funds through financial institutions and to leave the funds in TT&L depositories and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on TT&L financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury account at FRBs do so as collector depositories.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments that the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

<sup>1</sup> Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

<sup>2</sup> Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

<sup>3</sup> Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories as follows: withheld income taxes beginning March 1948; taxes on employers and employees

under the Federal Insurance Contributions Act beginning January 1950 and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970; and individual estimated income taxes beginning October 1988.

## INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the “Treasury Bulletin” reflect the total. Further detailed information is published in the “Monthly Statement of the Public Debt of the United States.” Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

Effective January 1, 2001, Treasury’s Bureau of the Public Debt revised formats, titles, and column headings in the “Monthly Statement of the Public Debt of the United States,” Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public’s use of terms.

Treasury’s Financial Management Service (FMS) compiles data in the “Treasury Bulletin” tables FD-2 and FD-6 from the “Monthly Statement of the Public Debt of the United States.” Effective June 2001, FMS revised procedures and categories in these tables to agree with the Bureau of the Public Debt’s publication changes.

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount also are listed by total Federal securities, securities held by Government accounts and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type, that is, marketable and nonmarketable, the total public debt securities outstanding that are held by the public.

- Table **FD-2 (Historical)** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities—that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the

funds invest in par value special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”)

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt.

In March 1971, Congress enacted a limited exception to the amount of bonds with rates greater than 4-1/4 percent that could be held by the public. This permitted Treasury to offer securities maturing in more than 7 years at current market interest rates for the first time since 1965. In March 1976, the definition of a bond was changed to include those securities longer than 10 years to maturity. This exception has expanded since 1971, authorizing Treasury to continue to issue long-term securities. The ceiling on Treasury bonds was repealed on November 10, 1988.

The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the FRBs.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling.

- In table **FD-6 (Historical)**, the same debt information is compared as in table FD-6. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

## INTRODUCTION: Public Debt Operations

Chapter 31 of Title 31 of the United States Code allows the Secretary of Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each outstanding marketable security is listed in the “Monthly Statement of the Public Debt of the United States.” The information in this section of the “Treasury Bulletin” pertains only to marketable Treasury securities.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable Treasury notes and bonds. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks (FRBs), so that the “all other investors” category includes all private holdings.

- Table **PDO-2** presents the results of weekly auctions of 4-, 13-, and 26-week bills. Treasury bills mature each Thursday. Issues of 4- and 13-week bills are *reopenings* of

26-week bills. Issues of *cash management* bills also are presented. High yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive bases.

To encourage the participation of individuals and smaller institutions, Treasury accepts noncompetitive tenders of up to \$5 million for bills and \$5 million for notes and bonds in each auction of securities.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years.

**Note:** Additional information, including auction allotments by investor class for marketable Treasury coupon and bill securities, is posted on the 7<sup>th</sup> business day of each month at [http://www.treas.gov/offices/domestic-finance/debt-management/investor\\_class\\_auction.shtml](http://www.treas.gov/offices/domestic-finance/debt-management/investor_class_auction.shtml).

## TREASURY FINANCING: APRIL-JUNE

[Source: Bureau of the Public Debt, Office of Financing]

### APRIL

#### Cash Management Bills

On March 28, 2005, Treasury announced it would auction \$25,000 million of 14-day bills. They were issued April 1 and matured April 15. The issue was to raise new cash. Treasury auctioned the bills on March 30. Tenders totaled \$58,567 million; Treasury accepted \$25,000 million. The high bank discount rate was 2.720 percent.

On April 4, Treasury announced it would auction \$15,000 million of 8-day bills. They were issued April 7 and matured April 15. The issue was to raise new cash. Treasury auctioned the bills on April 6. Tenders totaled \$43,337 million; Treasury accepted \$15,001 million. The high bank discount rate was 2.660 percent.

On April 11, Treasury announced it would auction \$7,000 million of 4-day bills. They were issued April 14 and matured April 18. The issue was to raise new cash. Treasury auctioned the bills on April 13. Tenders totaled \$23,130 million; Treasury accepted \$7,000 million. The high bank discount rate was 2.640 percent.

#### Auction of 5-Year Notes

On April 11, 2005, Treasury announced it would auction \$15,000 million of 5-year notes of Series H-2010. The issue was to raise new cash.

The notes of Series H-2010 were dated and issued April 15. They are due April 15, 2010, with interest payable on October 15 and April 15 until maturity. Treasury set an interest rate of 4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon eastern daylight saving time (e.d.s.t.) for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on April 13. Tenders totaled \$27,853 million; Treasury accepted \$15,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 4.046 percent with an equivalent price of \$99.793649. Treasury accepted in full all competitive tenders at yields lower than 4.046 percent. Tenders at the high yield were allotted 4.94 percent. The median yield was 4.020 percent, and the low yield was 3.950 percent. Noncompetitive tenders totaled \$110 million. Competitive tenders accepted from private investors totaled \$14,890 million. The minimum par amount required for STRIPS of notes of Series H-2010 is \$1,000.

## TREASURY FINANCING: APRIL-JUNE, con.

### Auction of 9-Year 9-Month 1-5/8 Percent Treasury Inflation-Protected Security (TIPS)

On April 11, 2005, Treasury announced it would auction \$9,000 million of 9-year 9-month 1-5/8 percent TIPS to raise new cash.

The 9-year 9-month TIPS of Series A-2015 were dated January 15 and issued April 15. They are due January 15, 2015, with interest payable on July 15 and January 15 until maturity.

Treasury received tenders for the TIPS before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on April 14. Tenders totaled \$17,699 million; Treasury accepted \$9,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 1.750 percent with an equivalent adjusted price of \$99.020489. Treasury accepted in full all competitive tenders at yields lower than 1.750. Tenders at the high yield were allotted 9.01 percent. The median yield was 1.690 percent, and the low yield was 1.590 percent. Noncompetitive tenders totaled \$48 million. Competitive tenders accepted from private investors totaled \$8,902 million. Adjusted accrued interest of \$4.04572 per \$1,000 must be paid for the period from January 15 to April 15. Both the unadjusted price of \$98.882054 and the unadjusted accrued interest of \$4.04006 were adjusted by an index ratio of 1.00140, for the period from January 15 through April 15. The minimum par amount required for STRIPS of TIPS is \$1,000.

### Auction of 5-Year 0-7/8 Percent TIPS

On April 21, 2005, Treasury announced it would auction \$9,000 million of 5-year 0-7/8 percent TIPS to raise new cash.

The 5-year TIPS of Series D-2010 were dated October 15, 2004, and issued April 29. They are due April 15, 2010, with interest payable on October 15 and April 15 until maturity.

Treasury received tenders for the TIPS before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on April 26. Tenders totaled \$16,910 million; Treasury accepted \$9,000 million at the high yield of 1.200 percent with an equivalent adjusted price of \$99.624026. Tenders at the high yield were allotted 66.93 percent. The median yield was 1.149 percent, and the low yield was 1.100 percent. Noncompetitive tenders totaled \$78 million. Competitive tenders accepted from private investors totaled \$8,922 million. Adjusted accrued interest of \$0.33873 per \$1,000 must be paid for the period from April 15 to April 29. Both the unadjusted price of \$98.438823 and the unadjusted accrued interest of \$0.33470 were adjusted by an index ratio of 1.01204, for the period from October 15

through April 29. The minimum par amount required for STRIPS of TIPS is \$1,000.

### Auction of 2-Year Notes

On April 25, 2005, Treasury announced it would auction \$24,000 million of 2-year notes of Series Q-2007. The issue was to refund \$26,301 million of securities maturing April 30 and to pay down approximately \$2,301 million.

The notes of Series Q-2007 were dated April 30 and issued on May 2. They are due April 30, 2007, with interest payable on October 31 and April 30 until maturity. Treasury set an interest rate of 3-5/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on April 27. Tenders totaled \$42,387 million; Treasury accepted \$24,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.650 percent with the equivalent price of \$99.951975. Treasury accepted in full all competitive tenders at yields lower than 3.650 percent. Tenders at the high yield were allotted 12.22 percent. The median yield was 3.614 percent, and the low yield was 3.579 percent. Noncompetitive tenders totaled \$839 million. Competitive tenders accepted from private investors totaled \$23,162 million.

In addition to the \$24,000 million of tenders accepted in the auction process, Treasury accepted \$7,994 million from FRBs for their own accounts. Accrued interest of \$0.19701 per \$1,000 must be paid for the period from April 30 to May 2. The minimum par amount required for STRIPS of notes of Series Q-2007 is \$1,000.

## M A Y

### May Quarterly Financing

On May 4, 2005, Treasury announced it would auction \$22,000 million of 3-year notes of Series N-2008, \$15,000 million of 5-year notes of Series J-2010, and \$14,000 million of 10-year notes of Series C-2015 to refund \$39,625 million of Treasury securities maturing or called on May 15 and to raise new cash of approximately \$11,375 million.

The 3-year notes of Series N-2008 were dated May 15 and issued May 16. They are due May 15, 2008, with interest payable on November 15 and May 15 until maturity. Treasury set an interest rate of 3-3/4 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on May 10. Tenders totaled

**TREASURY FINANCING: APRIL-JUNE, con.**

\$52,417 million; Treasury accepted \$22,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.821 percent with an equivalent price of \$99.800526. Treasury accepted in full all competitive tenders at yields lower than 3.821 percent. Tenders at the high yield were allotted 87.52 percent. The median yield was 3.810 percent, and the low yield was 3.650 percent. Noncompetitive tenders totaled \$494 million. Competitive tenders accepted from private investors totaled \$21,506 million.

In addition to the \$22,000 million of tenders accepted in the auction process, Treasury accepted \$4,707 million from FRBs for their own accounts. Accrued interest of \$0.10190 per \$1,000 must be paid for the period from May 15 to May 16. The minimum par amount required for STRIPS of notes of Series N-2008 is \$1,000.

The 5-year notes of Series J-2010 were dated May 15 and issued May 16. They are due May 15, 2010, with interest payable on November 15 and May 15 until maturity. Treasury set an interest rate of 3-7/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on May 11. Tenders totaled \$37,073 million; Treasury accepted \$15,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.890 percent with an equivalent price of \$99.932269. Treasury accepted in full all competitive tenders at yields lower than 3.890 percent. Tenders at the high yield were allotted 63.42 percent. The median yield was 3.869 percent, and the low yield was 3.800 percent. Noncompetitive tenders totaled \$234 million. Competitive tenders accepted from private investors totaled \$14,666 million.

In addition to the \$15,000 million of tenders accepted in the auction process, Treasury accepted \$3,748 million from FRBs for their own accounts. Accrued interest of \$0.10530 per \$1,000 must be paid for the period from May 15 to May 16. The minimum par amount required for STRIPS of notes of Series J-2010 is \$1,000.

The 10-year notes of Series C-2015 were dated May 15 and issued May 16. They are due May 15, 2015, with interest payable on November 15 and May 15 until maturity. Treasury set an interest rate of 4-1/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on May 12. Tenders totaled \$32,639 million; Treasury accepted \$14,000 million. All noncompetitive and successful competitive bidders were

allotted securities at the high yield of 4.220 percent with an equivalent price of \$99.231425. Treasury accepted in full all competitive tenders at yields lower than 4.220 percent. Tenders at the high yield were allotted 35.09 percent. The median yield was 4.188 percent, and the low yield was 4.100 percent. Noncompetitive tenders totaled \$74 million. Competitive tenders accepted from private investors totaled \$13,826 million.

In addition to the \$14,000 million of tenders accepted in the auction process, Treasury accepted \$2,471 million from FRBs for their own accounts. Accrued interest of \$0.11209 per \$1,000 must be paid for the period from May 15 to May 16. The minimum par amount required for STRIPS of notes of Series C-2015 is \$1,000.

**Auction of 2-Year Notes**

On May 23, 2005, Treasury announced it would auction \$22,000 million of 2-year notes. The issue was to refund \$23,905 million of securities maturing May 31 and to pay down approximately \$1,905 million.

The notes of Series R-2007 were dated and issued May 31. They are due May 31, 2007, with interest payable on November 30 and May 31 until maturity. Treasury set an interest rate of 3-1/2 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on May 25. Tenders totaled \$51,831 million; Treasury accepted \$22,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.615 percent with an equivalent price of \$99.780029. Treasury accepted in full all competitive tenders at yields lower than 3.615 percent. Tenders at the high yield were allotted 12.57 percent. The median yield was 3.598 percent, and the low yield was 3.500 percent. Noncompetitive tenders totaled \$973 million. Competitive tenders accepted from private investors totaled \$21,027 million.

In addition to the \$22,000 million of tenders accepted in the auction process, Treasury accepted \$7,116 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series R-2007 is \$1,000.

**JUNE****Cash Management Bills**

On May 26, 2005, Treasury announced it would auction \$10,000 million of 14-day bills. They were issued June 1 and matured June 15. The issue was to raise new cash. Treasury auctioned the bills on May 31. Tenders totaled

**TREASURY FINANCING: APRIL-JUNE, con.**

\$26,005 million; Treasury accepted \$10,000 million. The high bank discount rate was 2.895 percent.

On May 31, Treasury announced it would auction \$16,000 million of 12-day bills. They were issued June 3 and matured June 15. The issue was to raise new cash. Treasury auctioned the bills on June 2. Tenders totaled \$32,955 million; Treasury accepted \$16,000 million. The high bank discount rate was 2.935 percent.

On June 2, Treasury announced it would auction \$12,000 million of 8-day bills. They were issued June 7 and matured June 15. The issue was to raise new cash. Treasury auctioned the bills on June 6. Tenders totaled \$33,055 million; Treasury accepted \$12,000 million. The high bank discount rate was 2.940 percent.

**Auction of 5-Year Notes**

On June 6, 2005, Treasury announced it would auction \$14,000 million of 5-year notes of Series K-2010. The issue was to raise new cash.

The notes of Series K-2010 were dated and issued June 15. They are due June 15, 2010, with interest payable on December 15 and June 15 until maturity. Treasury set an interest rate of 3-5/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on June 8. Tenders totaled \$36,382 million; Treasury accepted \$14,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.705 percent with an equivalent price of \$99.637908. Treasury accepted in full all competitive tenders at yields lower than 3.705 percent. Tenders at the high yield were allotted 55.78 percent. The median yield was 3.679 percent, and the low yield was 3.600 percent. Noncompetitive tenders totaled \$64 million. Competitive tenders accepted from private investors totaled \$13,836 million. The minimum par amount required for STRIPS of notes of Series K-2010 is \$1,000.

**Auction of 9-Year 11-Month 4-1/8 Percent Notes**

On June 6, 2005, Treasury announced it would auction \$8,000 million of 9-year 11-month 4-1/8 percent notes of Series C-2015. The issue was to raise new cash.

The notes of Series C-2015 were dated May 15 and issued June 15. They are due May 15, 2015, with interest payable on November 15 and May 15 until maturity.

Treasury received tenders for the notes before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on June 9. Tenders totaled \$20,013 million; Treasury accepted \$8,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.990 percent with an equivalent price of \$101.091049. Treasury accepted in full all competitive tenders at yields lower than 3.990 percent. Tenders at the high yield were allotted 27.73 percent. The median yield was 3.969 percent, and the low yield was 3.900 percent. Noncompetitive tenders totaled \$15 million. Competitive tenders accepted from private investors totaled \$7,935 million. Accrued interest of \$3.47486 per \$1,000 must be paid for the period from May 15 to June 15. The minimum par amount required for STRIPS of notes of Series C-2015 is \$1,000.

**Auction of 2-Year Notes**

On June 27, 2005, Treasury announced it would auction \$20,000 million of 2-year notes of Series S-2007. The issue was to refund \$23,730 million of securities maturing June 30 and to pay down approximately \$3,730 million.

The notes of Series S-2007 were dated and issued June 30. They are due June 30, 2007, with interest payable on December 31 and June 30 until maturity. Treasury set an interest rate of 3-5/8 percent after determining which tenders were accepted on a yield auction basis.

Treasury received tenders for the notes before 12:00 noon e.d.s.t. for noncompetitive tenders and before 1:00 p.m. e.d.s.t. for competitive tenders on June 29. Tenders totaled \$44,584 million; Treasury accepted \$20,000 million. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 3.650 percent with an equivalent price of \$99.952201. Treasury accepted in full all competitive tenders at yields lower than 3.650 percent. Tenders at the high yield were allotted 41.16 percent. The median yield was 3.623 percent, and the low yield was 3.580 percent. Noncompetitive tenders totaled \$950 million. Competitive tenders accepted from private investors totaled \$19,050 million.

In addition to the \$20,000 million of tenders accepted in the auction process, Treasury accepted \$6,667 million from FRBs for their own accounts. The minimum par amount required for STRIPS of notes of Series S-2007 is \$1,000.

<sup>1</sup> All 4-week and 13-week bills represent additional issues of bills with an original maturity of 26 weeks or 52 weeks. Certain 26-week bills represent additional issues of bills with an original maturity of 52 weeks.

<sup>2</sup> Includes amount awarded to the Federal Reserve System.

<sup>3</sup> Tenders for \$1 million or less from any one bidder are accepted in full at the high price of accepted competitive bids. However, as of September 21, 2004, the limit was raised to \$5 million. All Treasury marketable auctions are conducted in a single-price format as of November 2, 1998.

<sup>4</sup> Equivalent coupon-issue yield.

<sup>1</sup> Currently, all issues are sold at auction. For bill issues, the rate shown is the high bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2. As of October 1, 1997, all Treasury issues of notes and bonds are eligible for STRIPS.

<sup>2</sup> From date of additional issue in case of a reopening.

<sup>3</sup> In reopenings, the amount accepted is in addition to the amount of original offerings.

<sup>4</sup> Includes securities issued to the Federal Reserve System; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

Note.—Amounts listed as tendered and accepted are amounts tendered and awarded on auction day.

## INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since July 1, 1980, and series I bonds, on sale since September 1, 1998, are the savings bonds currently being sold. As of September 1, 2004, investors are no longer able to reinvest H and HH bonds or exchange E and EE bonds for HH bonds. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980,

through October 31, 1982. Series J and K were sold from May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and in the Annual Report of the Secretary of the Treasury for fiscal year 1974.

## INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, notes, and bonds that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. [See the Federal debt (FD) tables for a more complete description of the Federal debt.]

Effective January 1, 2001, Treasury's Bureau of the Public Debt revised formats, titles, and column headings in the "Monthly Statement of the Public Debt of the United States," Table I: Summary of Treasury Securities Outstanding and Table II: Statutory Debt Limit. These changes should reduce confusion and bring the publication more in line with the public's use of terms.

Treasury's Financial Management Service (FMS) compiles data in the "Treasury Bulletin" table OFS-1 from the "Monthly Statement of the Public Debt of the United States." Effective June 2001, FMS revised procedures and categories in this table to agree with the Bureau of the Public Debt's publication changes.

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the FRBs, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The FRBs acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated ownership of U.S. Treasury securities. Information is primarily obtained from the Federal Reserve Board of Governors Flow of Funds data, Table L209. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

## INTRODUCTION: Market Yields

The table in this section presents yields on Treasury marketable securities for maturities ranging from 1 month to 20 years.

Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes, and bonds. These “constant maturity rates (CMTs)” are interpolated from the Treasury yield curve and published daily at Treasury’s web site, [www.ustreas.gov/offices/domestic-finance/debt-management/interest-rate/yield.shtml](http://www.ustreas.gov/offices/domestic-finance/debt-management/interest-rate/yield.shtml). The yield curve is fitted daily using a hermite cubic spline. For inputs, Treasury primarily uses the bid yields on the on-the-run securities (most recently auctioned Treasury securities in all maturity tranches that Treasury currently auctions) as of approximately 3:30 p.m. each trading day. CMT yields are based on semiannual interest payments and are read at constant maturity points to develop a consistent data series.

The quotations used by Treasury to calculate the bid yields and fit the yield curve are obtained by the Federal

Reserve Bank of New York. The Board of Governors of the Federal Reserve System also publishes the Treasury constant maturity data series in its weekly Statistical Release H.15.

On July 31, 2001, Treasury expanded its constant maturity index to include a 1-month constant maturity yield, and Table MY-1 now includes a 1-month maturity beginning on that date. On February 18, 2002, Treasury discontinued the 30-year constant maturity yield. In lieu of the 30-year yield, Table MY-1 now includes a 20-year maturity. Historical data for the 20-year maturity is available from the Board of Governors’ Statistical Release H.15.

Prior to January 2003, this section also included data on long-term Treasury, corporate and municipal yields (Table MY-2). Effective January 2003, Table MY-2 and Chart MY-B were discontinued because Treasury no longer issues long-term bonds and no longer calculates or estimates long-term corporate rates.

Chart MY-A, which previously was published in this section, has been discontinued.

## INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation. It includes some old and current rare issues that do not circulate or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, U.S. Mint offices, the Federal Reserve banks (FRBs), and the Federal Reserve Board.

## INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on U.S. Government reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund (IMF)*, holdings of convertible foreign currencies and reserve position in the *IMF*.

- Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table **IFS-3** shows nonmarketable bonds and notes that the Treasury issues to official institutions and other residents of foreign countries.

2005 - Jan.....	81,366	11,042	13,342	41,735	15,247
Feb.....	80,168	11,042	11,727	42,063	15,336
Mar.....	78,942	11,041	11,564	41,061	15,276
Apr.....	79,525	11,041	11,610	41,452	15,422
May.....	77,742	11,041	11,385	39,910	15,406
June.....	76,594	11,041	11,243	39,036	15,274
July.....	74,620	11,041	11,206	38,935	13,438

<sup>1</sup> Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF also are valued on this basis beginning July 1974.

<sup>2</sup> Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 United States Code 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

<sup>3</sup> Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

<sup>4</sup> Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

<sup>5</sup> The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

Note.—Detail may not add to total due to rounding.

<sup>1</sup> Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Remaining face value of issue is \$264 million.

<sup>2</sup> Beginning March 1990, indicates current value of zero-coupon, 30-year maturity issue to the government of Mexico. Remaining face value of issue is \$3,821 million. Note: This issue was paid off in full and retired on January 29, 2004.

<sup>3</sup> Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$2,721 million.

## INTRODUCTION: Capital Movements

### Background

Data relating to U.S. international transactions in financial instruments and to other portfolio capital movements between the United States and foreign countries have been collected in some form since 1935. This information is necessary for compiling the U.S. balance of payments accounts, for calculating the U.S. international investment position, and for use in formulating U.S. international financial and monetary policies.

From the beginning, reporting under the Treasury data collection program has been mandatory. Under the current Treasury International Capital (TIC) reporting system, an assortment of monthly, quarterly, and semiannual reports are filed with district Federal Reserve banks by commercial banks, securities dealers, other financial institutions, and nonbanking enterprises in the United States. These data are centrally processed and maintained at the Federal Reserve Bank of New York, which, along with the district banks, acts as fiscal agent for Treasury. Beginning in late 1998, the Federal Reserve Board also undertakes services on behalf of Treasury in support of the TIC data collection system. The TIC reports of individual respondents are treated as confidential, and access to the respondent level data and to some sensitive data aggregates is strictly limited to specific staff of Treasury and the Federal Reserve System.

Data derived from Treasury reports are published in the Capital Movements section of this quarterly *Treasury Bulletin* and are posted monthly on the TIC website, <http://www.ustreas.gov/tic>. (See NOTE at the end of the INTRODUCTION text for additional website information.) TIC data aggregates are also published in the *Federal Reserve Bulletin* and are used in the U.S. international transactions and investment position compilations published by the Department of Commerce in the *Survey of Current Business*.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System and in consultation with representatives of banks, securities firms, and nonbanking enterprises. The most recent revisions to selected reporting forms and instructions were effective February 28, 2003. The major changes are outlined under "Description of statistics" below. Copies of the reporting forms and instructions may be obtained from the Office of Program Services, Office of the Assistant Secretary for International Affairs, Treasury, Washington, D.C. 20220; the International Finance Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551; or district FRBs. Reporting forms and instructions also may be downloaded from the TIC website.

### Basic definitions

The term "foreigner" as used in TIC reporting covers all institutions and individuals resident outside the United

States, including U.S. citizens domiciled abroad; the foreign branches, subsidiaries and offices of U.S. banks and business concerns; the central governments, central banks, and other official institutions of foreign countries, wherever located; and international and regional organizations, wherever located. The term "foreigner" also includes persons in the United States to the extent that they are known by reporting institutions to be acting on behalf of foreigners.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. This information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records and may not be aware of the actual country of domicile of the ultimate beneficiary.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any single country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite "Other Europe." For purposes of publication only, information on the European Central Bank also is included in "Other Europe."

"Short-term" refers to obligations payable on demand or having an original maturity of one year or less. "Long-term" refers to obligations having an original maturity of more than one year and includes securities having no maturity.

### Reporting coverage

TIC reports are required from banks and other depository institutions, bank/financial holding companies (BHCs/FHCs), securities brokers and dealers, and nonbanking concerns in the United States, including the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Institutions with total reportable liabilities, claims, or securities transactions below specified reporting thresholds are exempt from reporting.

Beginning in February 2003, substantial revisions to the coverage and formats of the TIC B-series and C-series forms were introduced. The reasons for the changes were to comply with new and expanded international standards for reporting data on portfolio investment; to reduce reporting burden; to clarify reporting concepts and instructions; and to improve the quality of the series by closing known gaps in the data. Notices of these changes and requests for public comments on them were published in the *Federal Register* last year and some modifications were made in response to the comments received. A detailed outline of the changes affecting each form may be accessed on the TIC website.

Banks, other depository institutions, and securities brokers and dealers file monthly B-series reports covering their dollar liabilities to, and dollar claims on foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items attributed to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies and for claims on foreigners held for respondents' domestic customers. All positions are exclusive of long-term securities. Beginning January 2001, the exemption level applicable to the banking reports was raised from \$15 million to \$50 million. This exemption level is also subject to the provision that reportable amounts for any one country do not exceed \$25 million.

Banks and other depository institutions, securities brokers and dealers, and other entities report their transactions with foreigners by country in long-term securities on monthly Form S. Respondents must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$50 million during the covered month.

Quarterly reports are filed by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and securities firms), and other nonbanking enterprises on their liabilities and claims positions with foreigners. Except as noted below under "Description of statistics," the reportable liabilities and claims positions are with unaffiliated foreigners. Separate reports are filed for financial balances and for commercial balances. Effective for reports filed as of March 31, 2003, the threshold applicable to Form CQ-1 for reporting financial liabilities to, and claims on, foreigners is \$50 million, up from \$10 million. At the same time, the reporting threshold for Form CQ-2, which covers commercial liabilities and claims positions with foreigners, was raised from \$10 million to \$25 million.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. Except as noted in Section IV in "Description of statistics" below, the principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies (own foreign offices) and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the U.S. balance of payments.

### Description of statistics

Data collected on the TIC forms are published in the "Capital Movements" tables in five sections. Each section contains all the data relevant to the same statistical series, with tables showing time series by type and country, and detailed breakdowns of the latest available data.

- **Section I** covers liabilities to foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for all domestic nonbank, non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Dollar-denominated liabilities are reported monthly on Forms BL-1 and BL-2. Liabilities denominated in foreign currencies are reported quarterly on Form BQ-2. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners. Effective with reports filed as of February 28, 2003, coverage was broadened to cover the positions of U.S. broker-dealer respondents with their affiliated foreign offices. (Depository institutions and BHCs/FHCs already reported such positions.) The scope of the reports was also extended to include cross-border brokerage balances as well as offshore sweep accounts and loans to U.S. residents in "managed" foreign offices of U.S. reporting institutions. Additionally, in a new Part 2, Form BQ-2 was expanded to include the foreign currency-denominated liabilities held by respondents for their domestic customers. Further, banks' own positions have been defined to be consistent with regulatory reports such as the FR 2950/2951 to include all amounts in the respondent's "due to/due from" accounts, unless in an instrument that is specifically excluded. Finally, the columns for demand deposits and non-transactions accounts are now combined, as are short-term U.S. agency securities and other negotiable and readily transferable instruments.

- **Section II** presents claims on foreigners reported by banks, other depository institutions, and securities brokers and dealers in the United States. BHCs/FHCs also report for their domestic nonbank and non-securities firm affiliates, other than their insurance affiliates, which report separately on the C-series forms. Data on respondents' own dollar claims are collected monthly on Form BC. Information on claims held for domestic customers as well as on claims denominated in foreign currencies is collected on a quarterly basis only on Forms BQ-1 and BQ-2, respectively. Effective with reports filed as of February 28, 2003, reporting coverage was expanded as outlined in Section I. Additionally, columns were added for separate reporting of negotiable CDs and other short-term negotiable instruments issued by foreigners. Further, the foreigner category, "foreign official institutions," replaced the former, broader category, "foreign public borrowers," for consistency with the liabilities reporting on this sector.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, and securities brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December.

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners of exporters, importers, industrial and commercial concerns, financial institutions (other than

banks, other depository institutions, and securities brokers and dealers), and other nonbanking enterprises in the United States. Data exclude claims on foreigners held by banks in the United States.

Historically, the information does not include any accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to Commerce on its direct investment forms. However, effective with reports filed as of March 31, 2003, a number of changes were introduced in the coverage and reporting formats of nonbanking forms. A major revision is the addition of Section B to Form CQ-1 to capture foreign affiliate positions (including those with affiliates of the respondent's parent) of insurance underwriting subsidiaries and financial intermediaries. Insurance underwriting subsidiaries of BHCs/FHCs now include positions vis-à-vis all foreign-resident affiliates. From end-March 2003 forward, financial intermediaries are to report positions vis-à-vis all foreign-resident affiliated financial intermediaries.

- **Section V** contains information on transactions with foreigners in long-term domestic and foreign securities as reported by banks, securities brokers and dealers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners and transactions executed abroad for the accounts of reporting institutions and their domestic customers. This includes transactions in newly-issued securities as well as transactions in, and redemptions of, outstanding issues.

However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

The geographical allocation of the transactions data indicates the country of location of the foreign buyers and sellers who deal directly with reporting institutions in the United States. The data do not necessarily indicate the country of beneficial owner or issuer, or the currency of denomination of securities. For instance, a U.S. purchaser's order for Japanese securities may be placed directly with an intermediary in London. In this instance, the transaction for Form S reporting purposes would be recorded opposite the United Kingdom and not opposite Japan. Similarly, purchases and sales of U.S. securities for the account of an Italian resident may be placed, for example, in the Swiss market. In that case, the trades would be reported opposite Switzerland and not opposite Italy.

**NOTE:** Current and historical data on United States transactions with foreigners in long-term securities and on the gross foreign liabilities and claims reported by banks in the United States are available on the TIC website: <http://www.ustreas.gov/tic>. These data may be downloaded as separate time series for each country or geographical area regularly shown in the capital movements tables. Also available on this website are other series, including a table on "Major Foreign Holders of Treasury Securities," showing estimated total holdings of U.S. Treasury bills, bonds and notes for current and recent periods. All data series on the TIC website are updated monthly.

## SECTION I.—Liabilities to Foreigners Reported by Banks in the United States

<sup>1</sup> These data as of March 31, 2005.<sup>2</sup> Excludes negotiable time certificates of deposit, which are included in "Other Liabilities."<sup>3</sup> U.S. Treasury bills and certificates held in custody for the account of oil-exporting countries in "Other Asia" and "Other Africa" amount to \$1,972 million.<sup>4</sup> Before January 2001, combined data reported for Belgium-Luxembourg.<sup>5</sup> Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."<sup>6</sup> On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and since June 1994 for the former Yugoslav Republic of Macedonia.<sup>7</sup> Before January 2001, data included in United Kingdom.<sup>8</sup> Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

## CHART CM-A.—U.S. Liabilities to Foreigners Reported by U.S. Banks, Brokers, and Dealers with Respect to Selected Countries

□ United Kingdom	□ All other Europe	■ Caribbean banking centers
□ Japan	□ All other Asia	□ All other countries

U.S. banking liabilities to foreigners, excluding long-term securities, were recorded at just under \$3.0 trillion in June 2005, a slight increase from the \$2.9 trillion recorded for yearend 2004. U.S. banking liabilities increased about \$514 billion in 2004 and about \$316 billion in 2003. Much of the increase in liabilities to foreigners in 2003 reflects changes to the reporting scope of the TIC reporting system effective February 2003. Between March and December of 2003, when data were reported on a consistent basis, banking liabilities increased about \$136 billion.

U.S. banking liabilities are concentrated in international financial centers. The data on this page show that more than half of U.S. banking liabilities is currently recorded against the United Kingdom and banking centers in the Caribbean. These financial centers have recorded most of the growth in banking liabilities in recent years. Foreigners domiciled in the rest of Europe and in Asia account for about one-third of U.S. banking liabilities.

<sup>1</sup> Before January 2001, combined data reported for Belgium-Luxembourg.<sup>2</sup> Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."<sup>3</sup> On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.<sup>4</sup> Before January 2001, data included in United Kingdom.<sup>5</sup> Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."<sup>6</sup> Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

## CHART CM-B.—U.S. Claims on Foreigners

### Reported by U.S. Banks, Brokers, and Dealers with Respect to Selected Countries

In March 2005, U.S. banking claims, excluding long-term securities, amounted to about \$2.1 trillion, a slight decrease from the level recorded at yearend 2004. U.S. banking claims increased \$429 billion in 2004 and \$190 billion in 2003. In large part, the increase in claims in 2003 reflects changes to the reporting scope of the TIC reporting system effective February 2003. Between March and December of 2003, when data were reported on a consistent basis, banking claims increased \$18 billion.

As with U.S. banking liabilities, U.S. banking claims on foreigners are concentrated in international financial centers. About 60 percent of these claims are reported opposite the United Kingdom and banking centers in the Caribbean. The share of claims against foreigners domiciled in Asia has declined over the past several years from about 20 percent at the end of 1996 to less than 10 percent currently.

<sup>1</sup> Before January 2001, combined data reported for Belgium-Luxembourg.

<sup>2</sup> Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."

<sup>3</sup> On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

<sup>4</sup> Before January 2001, data included in United Kingdom.

<sup>5</sup> Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and United Arab Emirates (Trucial States).

<sup>6</sup> Includes Algeria, Gabon, Libya, and Nigeria.

<sup>1</sup> Before January 2001, combined data reported for Belgium-Luxembourg.

<sup>2</sup> Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."

<sup>3</sup> On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

<sup>4</sup> Before January 2001, data included in United Kingdom.

<sup>5</sup> Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."

<sup>6</sup> Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

<sup>1</sup> Before January 2001, combined data reported for Belgium-Luxembourg.

<sup>2</sup> Since December 1992, data for all other republics of the former U.S.S.R. included in "Other Europe."

<sup>3</sup> On February 4, 2003, Yugoslavia changed its name to Serbia and Montenegro. Data for other entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia, and Slovenia; and beginning in June 1994 for the former Yugoslav Republic of Macedonia.

<sup>4</sup> Before January 2001, data included in United Kingdom.

<sup>5</sup> Before January 2001, "Other Latin America" and "Other Caribbean" were reported as combined "Other Latin America and Caribbean."

<sup>6</sup> Beginning January 2001, Cayman Islands replaced British West Indies in the data series.

## CHART CM-C.—Net Purchases of Long-Term Domestic Securities by Foreigners, Selected Countries

□ United Kingdom	□ All other Europe	■ Caribbean banking centers
□ Japan	□ All other Asia	□ All other countries

The data on this page represent foreign investors' purchases and sales of long-term U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported to the TIC reporting system. Foreign investors also acquired U.S. equities through mergers and reincorporations that involve stock swaps. Net foreign acquisitions of U.S. equities through stock swaps have been modest, amounting to about \$7 billion in both 2001 and 2002, \$2 billion in 2003, \$36 billion in 2004, and \$4 billion in the first half of 2005. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps and certain other adjustments are not reported under the TIC reporting system, but are now available on the TIC web site.

Annual net foreign purchases of U.S. securities first surpassed \$100 billion in 1993. In 2004, net acquisitions (including stock swaps) of U.S. securities totaled a record \$953 billion. At \$450 billion, net acquisitions in the first half of 2005 have continued at about the same pace as in 2004.

\* Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the TIC reporting system. However, in the past several years, U.S. investors also have acquired a substantial amount of foreign stocks, mostly European, through mergers that involve stock swaps. In addition, when foreign firms reincorporate in the United States, the associated stock swap reduces U.S. holdings of foreign equity. Net acquisitions through stock swaps amounted to \$80 billion in 2000, \$47 billion in 2001, \$3 billion in 2002, \$17 billion in 2003, -\$12 billion in 2004, and \$2 billion in the first half of 2005. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are now available on the TIC web site.

Including the stock swaps, annual U.S. net purchases of long-term foreign securities averaged about \$100 billion from the mid-1990s through 2000, without much variation from year to year. U.S. investors' acquisitions of foreign securities (including stock swaps) then slowed over the 2001-2003 period before rebounding to \$100 billion in 2004 and another \$63 billion in the first half of 2005.

## INTRODUCTION: Foreign Currency Positions

The “Treasury Bulletin” reports foreign currency holdings of large foreign exchange market participants. These reports provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, Japanese yen, Swiss franc, pound sterling, and euro) and the U.S. dollar. Positions in the U.S. dollar, which have been collected since January 1999, are intended to approximate “all other” currency positions of reporting institutions. U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 United States Code 5315; 31 Code of Federal Regulations 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold.

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$5 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December).

This information is published in six sections corresponding to each of the major currencies covered by the reports. Tables I-1 through VI-1 present the currency data reported weekly by major market participants. Tables I-2 through VI-2 present more detailed currency data of major market participants, based on monthly Treasury reports. Tables I-3 through VI-3 present quarterly consolidated currency data reported by large market participants that do not file weekly reports.

Principal exchanged under cross-currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal also was noted separately on monthly and quarterly reports through December 1998, when this practice was discontinued. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option’s value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

## INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established pursuant to chapter 6, section 10 of the Gold Reserve Act of January 30, 1934 (codified at 31 United States Code 5302), which authorized establishment of a Treasury fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

- Table **ESF-1** presents the assets, liabilities, and capital of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the International Monetary Fund. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

- Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profit (+) or loss (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of SDR holdings and allocations" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

**TABLE ESF-1.—Balances as of Dec. 31, 2004, and Mar. 31, 2005**

[In thousands of dollars. Source: Office of the Assistant Secretary of the Treasury for Management]

**TABLE ESF-2.—Income and Expense**

[In thousands of dollars. Source: Office of the Assistant Secretary of the Treasury for Management]

	Current quarter Jan. 1, 2005, through Mar. 31, 2005	Fiscal year to date Oct. 1, 2004, through Mar. 31, 2005
<b>Income and expense</b>		
Profit (+) or loss (-) on:		
Foreign exchange .....	728,749	-900,913
Adjustment for change in valuation of SDR holdings and allocations <sup>1</sup> .....	168,766	-155,423
Interest (+) or net charges (-) on:		
SDRs.....	61,443	30,130
U.S. Government securities.....	115,612	66,577
Foreign exchange .....	145,654	72,226
Commissions .....	-	-
Income from operations .....	1,220,224	-887,403
Net income (+) or loss (-) .....	1,220,224	-887,403

<sup>1</sup> Beginning July 1974, the International Monetary Fund adopted a technique for valuing the SDRs based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

Note.— Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

## **REPORTS**

**TrustFunds**

**TABLE TF-15A.—Highway Trust Fund**

The following information is released according to the provisions of the Byrd Amendment [codified at 26 United States Code 9503(d)] and represents data concerning the Highway Trust Fund. The figure described as “unfunded authorizations” is the latest estimate received from the DOT for fiscal year 2006.

The 24-month revenue estimates for the highway and mass transit accounts, respectively, include the latest estimates received from Treasury’s Office of Tax Analysis for excise taxes, net of refunds. They represent net highway receipts for those periods beginning at the close of fiscal year 2006.

**Highway Account**

[In billions of dollars. Source: DOT]

Commitments (unobligated balances plus unpaid obligations, fiscal year 2006) .....	77
less:	
Cash balance (fiscal year 2006) .....	11
Unfunded authorizations (fiscal year 2006) .....	66
24-month revenue estimate (fiscal years 2007 and 2008) .....	70.70

**Mass Transit Account**

[In billions of dollars. Source: DOT]

Commitments (unobligated balances plus unpaid obligations, fiscal year 2006) .....	7
less:	
Cash balance (fiscal year 2006) .....	8
Unfunded authorizations (fiscal year 2006) .....	-1
24-month revenue estimate (fiscal years 2007 and 2008) .....	11

Note: At press time, H.R. 3, the “Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users,” had just been passed, and analysis of the bill was being finalized. As a result, the numbers above still reflect the fiscal year 2006 President’s Budget, and do not reflect the recent changes to the Byrd Test. The next quarterly publication will be updated with these changes.

## Glossary

### *With References to Applicable Sections and Tables*

Source: Financial Management Service

**Accrued discount (SBN-1, -2, -3)**—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, I, and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

**Amounts outstanding and in circulation (USCC)**—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

**Average discount rate (PDO-2, -3)**—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

**Budget authority (“Federal Fiscal Operations”)**—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, contract authority, and authority to obligate and expend offsetting receipts and collections. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority also may be classified as current or permanent. Permanent authority requires no current action by Congress.

**Budget deficit**—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

**Cash management bills (PDO-2)**—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

**Competitive tenders (“Treasury Financing Operations”)**—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

**Coupon issue**—The issue of bonds or notes (public debt).

**Currency no longer issued (USCC)**—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

**Current income bonds (“U.S. Savings Bonds and Notes”)**—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

**Debt outstanding subject to limitation (FD-6)**—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of June 2005, the debt limit was \$8,184,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

**Discount**—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

**Discount rate (PDO-2)**—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

**Dollar coins (USCC)**—Include standard silver and nonsilver coins.

**Domestic series (FD-2)**—Nonmarketable, interest- and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 United States Code 1441b).

**Federal intrafund transactions (“Federal Fiscal Operations”)**—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

**Federal Reserve notes (USCC)**—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series

issues. The Federal Reserve note is the only class of currency currently issued.

**Foreign (“Foreign Currency Positions,” IFS-2, -3)**—Locations other than those included under the definition of the United States. (See United States.)

**Foreigner (“Capital Movements,” IFS-2)**—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States; and international and regional organizations, wherever located. Also refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

**Foreign official institutions (“Capital Movements”)**—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

**Foreign public borrower (“Capital Movements”)**—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

**Foreign-targeted issue (PDO-1, -3)**—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

**Fractional coins (USCC)**—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

**Government account series (FD-2)**—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-Age and Survivors Insurance Trust Fund; the civil service retirement and

disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

**Interfund transactions (“Federal Fiscal Operations”)**—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

**International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)**—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

**Intrabudgetary transactions (“Federal Fiscal Operations”)**—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

**Matured non-interest-bearing debt (SBN-1, -2, -3)**—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, I, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

**Noncompetitive tenders (“Treasury Financing Operations”)**—Offers by an investor to purchase Treasury securities at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

**Obligations (“Federal Fiscal Operations”)**—An unpaid commitment to acquire goods or services.

**Off-budget Federal entities (“Federal Fiscal Operations”)**—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

**Outlays (“Federal Fiscal Operations”)**—Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

**Own foreign offices (“Capital Movements”)**—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

**Par value**—The face value of bonds or notes, including interest.

**Quarterly financing (“Treasury Financing Operations”)**—Treasury has historically offered packages of several

“coupon” security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

**Receipts (“Federal Fiscal Operations”)**—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

**Reopening (PDO-3)**—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

**Special drawing rights (“Exchange Stabilization Fund,” IFS-1)**—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in Exchange Stabilization Fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

**Spot (“Foreign Currency Positions”)**—Due for receipt or delivery within 2 workdays.

**State and local government series (FD-2)**—(SLUGs) Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds

from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLUGs are offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

**Statutory debt limit (FD-6)**—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See debt outstanding subject to limitation.)

**STRIPS (PDO-1, -3)**—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount, varying for each issue. The amount is an arithmetic function of the issue’s interest rate.

**Treasury bills**—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), are sold at a discount.

**Trust fund transaction (“Federal Fiscal Operations”)**—An intrabudgetary transaction in which both payments and receipts occur within the same trust fund group.

**United States**—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

**U.S. notes (USCC)**—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
