Profile of the Economy

[Source: Office of Economic Policy, Office of Financial Analysis]

Real gross domestic product

Economic growth slowed in the third quarter, with real gross domestic product (GDP) rising at a 2.2 percent annual rate following an increase of 4.7 percent in the second quarter. Despite the slowdown, growth so far this year is 2.9 percent at an annual rate, better than the performance in 1995 when real GDP rose by just 1.3 percent.

The third quarter was held down by a sharp slowing in consumer spending, which edged up at a 0.4 percent rate after rising at a rapid 3-1/2 percent pace over the first half. Net exports continued to be a drag on growth, and government purchases declined. Total real final sales grew at only a 0.3 percent rate in the third quarter, with large accumulation of inventories accounting for almost all of the gain in total GDP in the quarter.

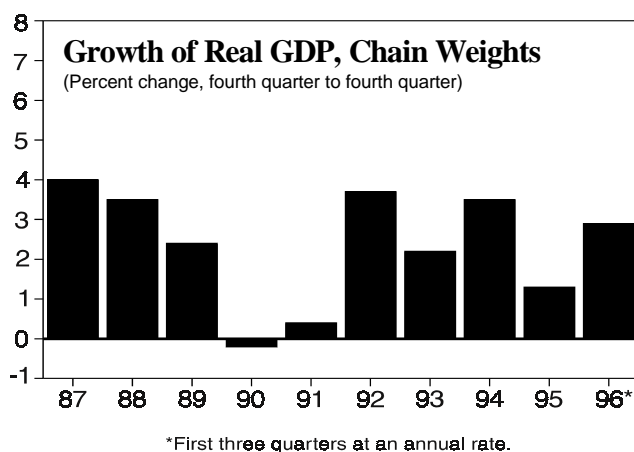

One bright spot in the third quarter was a pickup in non-residential fixed investment, particularly for equipment. Equipment investment rose at almost a 19 percent annual rate, its fastest in 2 years.

Inflation, as measured by the chain-weighted price index for GDP, moderated in the third quarter to 1.9 percent at an annual rate from 2.2 percent in the first half. Prices paid by U.S. residents, excluding exports and including imports, rose at a 1.8 percent rate.

Consumer and producer prices

Inflation has remained moderate through most of 1996 despite some acceleration in energy and food prices early in the year and again in recent months. Underlying inflation, excluding food and energy, has stayed low throughout the year.

The consumer price index (CPI) rose by an annual rate of 3.3 percent through the first 10 months of this year compared with an increase of 2.5 percent in 1995. Most of the pickup was due to higher energy and food prices. Excluding those items, the "core" rate of inflation was just 2.8 percent in the first 10 months, below the rate of increase last year.

The producer price index (PPI) for finished goods has been favorable. The PPI was up at a 2.4 percent annual pace in the first 10 months of this year after rising by 2.3 percent over all of 1995. Excluding food and energy, this year's gain has been just 0.4 percent at an annual rate, well below the 2.6 percent increase last year. Core prices at earlier stages of processing also have been very well behaved so far this year.

The cost of compensating labor has shown little evidence of driving up prices, as more rapid growth in wages and salaries in the first 3 quarters of the year has been partly offset by slower growth in benefit costs. The employment cost index (ECI) rose by 2.8 percent over the 12 months ending in September, a shade above the 2.7 percent gain during 1995.

Real disposable personal income and consumer spending

Real disposable (after-tax) personal income rose at a strong 4.9 percent annual rate in the third quarter. So far this year, growth has averaged a more moderate 2.7 percent annual rate, a little less than the 3.1 percent increase over all of 1995. The composite of growth this year is nonetheless favorable. Real wage and salary income has increased faster this year than last. A smaller rise in interest income with higher tax payments, reflecting in part the last installment of the 1993 tax hike on upper-bracket incomes, accounts for most of the slowdown in total after-tax income.

Real consumer spending has picked up this year, averaging a 2.4 percent rate of growth over the first 3 quarters of 1996, compared to 1.9 percent over all of 1995. Spending rose at a 3-1/2 percent annual rate during the first half of the year but slowed abruptly to only 0.4 percent in the third quarter.

With income growing but spending little changed in the third quarter, the share of after-tax income devoted to personal saving rose to 5.4 percent from 4.3 percent in the second quarter. The personal saving rate has averaged 4.9 percent so far this year, up slightly from 4.7 percent in 1995 and a low 3.8 percent in 1994.

Industrial production and capacity utilization

Industrial production in manufacturing, mining, and utilities has risen at a 3.7 percent annual rate this year compared to only 1.1 percent during all of 1995. Production fell 0.5 percent in October, after increases averaging 0.4 percent in the prior months of the year. Strikes affecting motor vehicle

assemblies at General Motors accounted for most of the drop, but even excluding motor vehicles, output edged down 0.1 percent in October. One area of continued strength is the manufacture of computer equipment.

Expansion of industrial capacity has picked up to a 4 percent annual rate this year, roughly doubling its pace of growth from earlier in the decade. Faster growth of capacity, combined with weak growth of production during 1995, has allowed the industrial capacity utilization rate to retreat from a 15-year high of 85.1 percent reached in January 1995 to 83.4 percent in July through September 1996. Utilization fell further to 82.7 percent of capacity in October, reflecting the drop in industrial production.

Employment and unemployment

Job growth of nonfarm establishment payrolls has accelerated in 1996 to 209,000 a month from 185,000 a month, or a total of 2.2 million jobs, last year. While less than monthly gains averaging 318,000 during 1994, the current pace of advance still amounts to a 2 percent annual rate. That is about

double the growth in the working-age population. Job growth turned slightly negative in September, pulling the average monthly increase for the third quarter down to 160,000. In October, the number of jobs rose by 210,000.

Strength over the past several years has been centered in the private service-producing sector of the economy, which accounted for virtually all of the 2.2 million job growth last year. An additional 1.8 million private service-sector jobs have been added over the first 10 months of 1996. Manufacturing has been weak during the past year and a half, losing more than 320,000 jobs since March 1995.

The unemployment rate fluctuated in a narrow band near 5.5 percent between late 1994 and spring of 1996. Unem-

ployment began to ease further and by August had fallen to 5.1 percent of the civilian labor force, the lowest reading since March 1989. In September, the unemployment rate edged up to 5.2 percent, where it remained in October.

Nonfarm productivity and unit labor costs

Nonfarm productivity, or real output per workhour, edged up at only a 0.2 percent annual rate in the third quarter and by a 0.9 percent pace over the first 3 quarters of 1996. Growth so far this year reflects improvement from increases of just 0.5 percent and 0.3 percent, respectively, during 1994 and 1995, and a small decline during 1993.

Hourly compensation costs in the nonfarm business sector rose at a 3.9 percent annual rate in the third quarter, and are up at a 3.7 percent pace this year compared to 4.1 percent last year. With productivity improving and compensation costs slowing, labor costs per unit of output in the nonfarm sector, a key indicator of potential inflationary pressure, have slowed to a 2.8 percent annual rate of growth so far this year, from 3.8 percent last year. Results for 1996 are influenced by a low result for the first quarter. Growth in the second and third quarter averaged 3.5 percent.

Productivity in manufacturing, included in the nonfarm sector, remains strong. Factory productivity was up at a 4.8 percent annual rate over the first 3 quarters of 1996, contributing to a 1.2 percent annual rate of decline in unit labor costs.

Current account balance

The current account is the broadest measure of U.S. transactions with the rest of the world, covering not only trade in goods and services but income flows as well. The current account deficit widened sharply in recent years as the economic recovery here brought in imports at a faster pace than the rate of expansion in exports.

The deficit grew from a recent low of \$10 billion in 1991 to a high of \$148 billion in both 1994 and 1995. Through the first half of this year, the current account deficit was little changed from the pace of last year.

The merchandise trade component posted a \$173 billion deficit in 1995, the largest on record. In the first half of 1996, the merchandise trade deficit widened even further, to \$179 billion at an annual rate.

International trade in services showed a \$68 billion surplus in 1995, a new record. In the first part of 1996, the surplus in services trade continued to grow, to a \$75 billion annual rate.

The balance on income payments, which includes interest, dividends, and direct investment income, shifted from a surplus of \$10 billion in 1993 to a deficit of \$8 billion in 1995. Much of that deficit reflected Federal Government interest payments to the rest of the world. The deficit on income payments narrowed in the first half of 1996.

Exchange rate of the dollar

The dollar has strengthened since the middle of 1995 after steady deterioration beginning in early 1994. Based on the Federal Reserve Board's trade-weighted index of the dollar against G-10 currencies, the dollar dropped to close at an all-time low in April 1995. Since then, the dollar has risen by 7-1/2 percent. There was some deterioration in July and August, but the dollar improved in September and October.

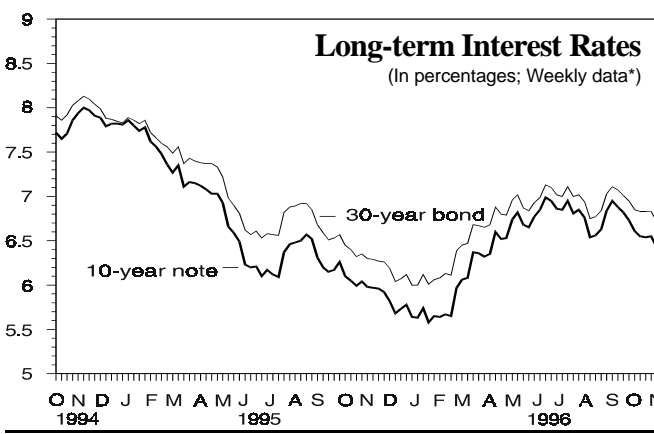

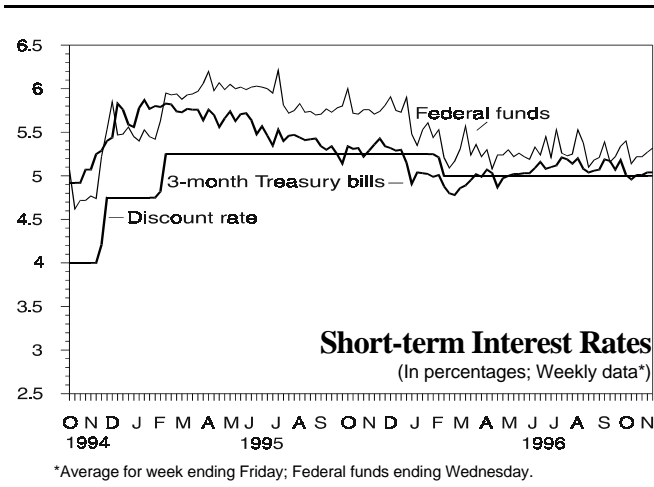

Most of the dollar deterioration in 1994 was against the yen and the deutschemark, and the improvement was also greatest against these currencies. Since April 1995, the dollar has increased by more than 10 percent against the deutschemark and by 34 percent against the yen.

Despite the improvement, the dollar remains about 9 percent below its recent high of January 1994. Many factors determine the level of exchange rates in international currency markets. The large U.S. current account deficit likely played a role in the earlier downward movement of the dollar. Underlying economic fundamentals in the United States remain sound, however.

Interest rates

Long-term interest rates moved higher early in 1996 as the economy expanded and there was some upward pressure on prices, but rates have eased recently with reports of slower economic growth and moderating inflation. The yield on the 30-year Treasury bond dipped from a recent high of 7.1 percent in September to about 6.5 percent currently.

Mortgage interest rates have been favorable. Early this year the rate for a 30-year fixed-rate conventional loan was 7 percent, close to the 25-year lows reached in October 1993. A pickup during the middle of the year apparently had little dampening effect on the housing market, and since the summer, rates have declined to less than 7-3/4 percent. This is quite low by historical standards.

Short-term interest rates have fluctuated around 5 percent through most of the year. The Federal Reserve Board has kept short-term rates stable since January as economic growth reached a moderate pace consistent with low inflation.

Net national saving and investment

In the first half of 1996, net national savings, excluding depreciation to replace worn-out or obsolete equipment and structures used in production, rose to 5.8 percent of net national product (NNP) from 5.1 percent averaged in 1995 and as low as 2-3/4 percent in both 1992 and 1993. Despite the gains, net saving remains less than half as high as the 12 percent of NNP averaged in the 1960's.

Recent improvement is mainly the result of narrowing of the Federal deficit. That has reduced Government dissavings to 1 percent of NNP in the first half of 1996 from 4.8 percent in 1992. Private saving, of households and businesses, was equivalent to 7.3 percent of NNP in the first half, up a little from a historical low of 6.4 percent in 1994. Even so, private saving is still well below the nearly 10 percent of NNP averaged in the 1960's and 1970's.

Net domestic investment equaled 7 percent of NNP in the first half, up from a low of 4.1 percent in 1991. Foreign inflows accounted for 2.1 percent of NNP this year, or nearly one-third of domestic investment. U.S. sources provided investment equivalent to 5 percent of NNP, less than half the share of NNP averaged in the 1960's and 1970's.

Housing

Housing activity remained very strong through most of 1996 despite some upturn in mortgage interest rates in mid-year. Housing starts in the first 10 months averaged 1.47 million units at an annual rate. If growth is maintained through the rest of the year, 1996 would be the best year for home building since 1988.

Sales of new homes eased slightly in September, but remained close to the 10-year high set in August. Over the first 9 months of the year, sales of new single-family homes were nearly 15 percent higher than in the same period last year. The homeownership rate rose to 65.6 percent in the third quarter, the highest in 15 years.

Higher mortgage interest rates were expected to dampen housing activity, but strong growth in employment and consumer confidence and a shift toward lower-cost adjustable rate loans have kept housing demand high. Fixed rates for a 30-year loan rose from levels of about 7 percent in January and February, which were near 25-year lows, to nearly 8-1/2 percent during the summer. Since then mortgage rates have come back down to 7.6 percent, very favorable by historical standards.

Federal budget deficit

The Federal budget deficit fell to \$107.3 billion in fiscal 1996, the lowest in 15 years and about \$57 billion below the level of the previous fiscal year. As a share of gross domestic product (GDP), the deficit is 1.4 percent, the smallest share since 1974.

The deficit has been shrinking since fiscal 1992, when it reached an all-time high of \$290 billion. Since then, the deficit has been cut by almost two-thirds, or a total of \$183 billion. Strong economic growth and passage of the Omnibus Budget Reconciliation Act of 1993 set the deficit on its downward course.

In fiscal 1996, receipts grew by 7.6 percent due to strong growth in jobs and income, corporate profits, and stock market returns. Growth in outlays was held to 3 percent over the fiscal year. Receipts as a share of GDP rose to their highest level since the early 1980's, while the outlay share declined to its lowest since fiscal 1979.

The deficit is projected to fall further in succeeding fiscal years. It will reach balance by 2002 under either Administration or Congressional Budget Office economic and technical assumptions.

INTRODUCTION: Federal Fiscal Operations

Budget authority usually takes the form of appropriations that allow *obligations* to be incurred and payments to be made. Reappropriations are Congressional actions that extend the availability of unobligated amounts that have expired or would otherwise expire. These are counted as new budget authority in the fiscal year of the legislation in which the reappropriation act is included, regardless of when the amounts were originally appropriated or when they would otherwise lapse.

Obligations generally are liquidated by the issuance of checks or the disbursement of cash--*outlays*. Obligations may also be liquidated (and outlays recorded) by the accrual of interest on public issues of Treasury debt securities (including an increase in redemption value of bonds outstanding); or by the issuance of bonds, debentures, notes, monetary credits, or electronic payments.

Refunds of collections generally are treated as reductions of collections, whereas payments for earned-income tax credits in excess of tax liabilities are treated as outlays. Outlays during a fiscal year may be for payment of obligations incurred in prior years or in the same year. Outlays, therefore, flow in part from unexpended balances of prior year budget authority and from budget authority provided for the year in which the money is spent. Total outlays include both budget and off-budget outlays and are stated net of offsetting collections.

Receipts are reported in the tables as either budget receipts or offsetting collections. They are collections from the public, excluding receipts offset against outlays. These, also called governmental receipts, consist mainly of tax receipts (including social insurance taxes), receipts from court fines, certain licenses, and deposits of earnings by the Federal Reserve system. Refunds of receipts are treated as deductions from gross receipts.

Offsetting collections from other Government accounts or the public are of a business-type or market-oriented nature. They are classified as either collections credited to appropriations or fund accounts, or offsetting receipts (i.e., amounts deposited in receipt accounts). The former normally can be used without appropriation act by Congress. These occur in two instances: (1) when authorized by law, amounts collected for materials or services are treated as reimbursements to appropriations, and (2) in the three types of revolving funds (public enterprise, intragovernmental, and trust); collections are netted against spending, and outlays are reported as the net amount.

Offsetting receipts in receipt accounts cannot be used without appropriation. They are subdivided into two categories: (1) proprietary receipts, or collections from the public, offset against outlays by agency and by function, and (2) intra-governmental funds, or payments into receipt accounts from governmental appropriation or fund accounts. They finance operations within and between Government agencies and are credited with collections from other Government accounts.

Intrabudgetary transactions are subdivided into three categories: (1) interfund transactions--payments are from one fund group (either Federal funds or trust funds) to a receipt account in the other fund group; (2) Federal intrafund transactions--payments and receipts both occur within the Federal fund group; and (3) trust intrafund transactions--payments and receipts both occur within the trust fund group.

Offsetting receipts are generally deducted from budget authority and outlays by function, subfunction, or agency. There are four types of receipts, however, that are deducted from budget totals as undistributed offsetting receipts. They are: (1) agencies' payments (including payments by *off-budget Federal entities*) as employers into employees' retirement funds; (2) interest received by trust funds; (3) rents and royalties on the Outer Continental Shelf lands; and (4) other interest (i.e., that collected on Outer Continental Shelf money in deposit funds when such money is transferred into the budget).

The Government has used the unified budget concept as a foundation for its budgetary analysis and presentation since 1969. The concept calls for the budget to include all of the Government's fiscal transactions with the public. Since 1971, however, various laws have been enacted removing several Federal entities from (or creating them outside of) the budget. Other laws have moved certain off-budget Federal entities onto the budget. Under current law, the off-budget Federal entities consist of the two Social Security trust funds, Federal old-age and survivors insurance, and Federal disability insurance.

Although an off-budget Federal entity's receipts, outlays, and surplus or deficit ordinarily are not subject to targets set by the congressional resolution, the Balanced Budget and Emergency Deficit Control Act of 1985 (commonly known as the Gramm-Rudman-Hollings Act) included off-budget surplus or deficit in calculating deficit targets under that act and in calculating excess deficit. Partly for this reason, attention has focused on both on- and off-budget receipts, outlays, and deficit of the Government.

Tables **FFO-1**, **FFO-2**, and **FFO-3** are published quarterly and cover 5 years of data, estimates for 2 years, detail for 13 months, and fiscal year-to-date data. They provide a summary of data relating to Federal fiscal operations reported by Federal entities and disbursing officers, and daily reports from the Federal Reserve banks. They also detail accounting transactions affecting receipts and outlays of the Government and off-budget Federal entities and their related effect on assets and liabilities of the Government. Data are derived from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government."

- Table **FFO-1** summarizes the amount of total receipts, outlays, and surplus or deficit, as well as transactions in Federal securities, monetary assets, and balances in Treasury operating cash.

- Table **FFO-2** includes on- and off-budget receipts by source. Amounts represent income taxes, social insurance taxes, net contributions for other insurance and retirement, excise taxes, estate and gift taxes, customs duties, and net miscellaneous receipts.

- Table **FFO-3** details on- and off-budget outlays by agency.

- Table **FFO-4** (revised from March issue) summarizes internal revenue collections by States and other areas and by type of tax. Amounts reported are collections made in a fiscal year. They span several tax liability years because they consist of prepayments (i.e., estimated tax payments and taxes withheld by employers for individual income and Social Security taxes), of payments made with tax returns, and of subsequent payments made after tax returns are due or are filed (i.e.,

payments with delinquent returns or on delinquent accounts). During the preparation of Table FFO-4, incorrect figures were inadvertently imported into the Unemployment Insurance and Estate and Gift columns. Revisions resulted in a change to the State distribution only.

It is important to note that these data do not necessarily reflect the Federal tax burden of individual States. Amounts are reported based on the primary filing address provided by each taxpayer or reporting entity. For multistate corporations, the address may reflect only the State where such a corporation reported its taxes from a principal office rather than other States where income was earned or where individual income and Social Security taxes were withheld. In addition, an individual may reside in one State and work in another.

Budget Results and Financing of the U.S. Government and Third-Quarter Receipts by Source

(Source: Office of Tax Analysis)

Third-Quarter Receipts

The following capsule analysis of budget receipts, by source, for the third quarter of fiscal 1996 supplements fiscal data reported in the September issue of the "Treasury Bulletin." At the time of that issue's release, not enough data were available to analyze adequately collections for the quarter.

Individual income taxes—Individual income tax receipts were \$198.2 billion for the third quarter of fiscal 1996. This is an increase of \$30.6 billion from the comparable quarter of fiscal 1995. Withheld receipts increased by \$3.5 billion and non-withheld receipts increased by \$26.0 billion during this period. Refunds increased by \$1.1 billion from the comparable fiscal 1995 quarter. There was a decrease of \$7.4 billion in accounting adjustments between individual income tax receipts and the Social Security and Medicare trust funds from the comparable quarter in fiscal 1995.

Corporate income taxes—Net corporate receipts for the third quarter totaled \$64.5 billion. This was \$2.9 billion higher than net receipts for the comparable quarter of fiscal 1995. The \$2.9 billion figure consists of \$2.5 billion in higher estimated and final payments plus \$0.4 billion in lower refunds. The increase in net receipts mainly reflects higher corporate profits.

Employment taxes and contributions—Employment taxes and contributions receipts for the third quarter were \$139.6 billion, an increase of \$11.3 billion more than the comparable prior year quarter. Receipts to the Old-Age Survivors Insurance, Disability Insurance, and Hospital Insurance trust funds increased by \$6.2 billion, \$1.1 billion, and \$4.0 billion, respectively. There was a -\$1.8 billion accounting adjustment for prior years' employment tax liabilities made in the third quarter of fiscal 1995, while there was a \$5.6 billion adjustment made in the third quarter of fiscal 1996.

Contributions for other insurance and retirement—Contributions for other retirement were \$1.1 billion for the third quarter. There was a negligible increase in receipts from the comparable quarter of fiscal 1995. The growth in contributions will remain flat during the next few years as the number of employees covered by the Federal employees' retirement system (FERS) grows slowly relative to those covered under the civil service retirement system (CSRS).

Unemployment insurance—Unemployment insurance receipts for the third quarter were \$14.2 billion, which is \$0.2 billion less than they were for the comparable quarter of fiscal 1995. State taxes deposited in the U.S. Treasury decreased by \$0.01 billion, and Federal Unemployment Tax Act (FUTA) receipts increased by \$0.2 billion. Railroad unemployment

Budget Results and Financing of the U.S. Government and Third-Quarter Receipts by Source, con.

tax receipts were unchanged from the comparable quarter of fiscal 1995.

Excise taxes—Net excise tax receipts for the third quarter were \$13.0 billion, a decrease of \$1.3 billion from the comparable prior year quarter. Total excise tax refunds for the quarter were \$0.4 billion, a decrease of \$0.1 billion from the comparable prior year quarter. The decrease in net receipts mainly reflects the expiration of certain excise taxes.

Estate and gift taxes—Estate and gift tax receipts were \$5.3 billion for the third quarter. These receipts represent an increase of \$1.7 billion from the previous quarter, as well as an increase of \$1.0 billion more than the same quarter in the previous year.

Customs duties—Customs receipts net of refunds were \$4.3 billion for the third quarter. This is approximately \$100 million less than the customs duties received in the Treasury from the comparable prior year quarter. This difference is attributable to recently enacted trade agreements that have decreased the duty rate on merchandise imports.

Miscellaneous receipts—Net miscellaneous receipts for the third quarter were \$5.3 billion, a decrease of \$2.9 billion from the comparable prior year quarter. Deposits of earnings by Federal Reserve banks decreased by \$2.8 billion from the comparable prior year quarter. ◇

Note.--On-budget and off-budget estimates are based on the "Mid-session Review" of the fiscal 1997 budget, released by the Office of Management and Budget on July 16, 1996.

INTRODUCTION: Source and Availability of the Balance in the Account of the U.S. Treasury

The Treasury's operating cash is maintained in accounts with the Federal Reserve banks (FRBs) and branches, as well as in tax and loan accounts in other financial institutions. Major information sources include the Daily Balance Wire received from the FRBs and branches, and electronic transfers through the Letter of Credit Payment, Fedline Payment, and Fedwire Deposit Systems. As the FRB accounts are depleted, funds are called in (withdrawn) from thousands of tax and loan accounts at financial institutions throughout the country.

Under authority of Public Law 95-147, Treasury implemented a program on November 2, 1978, to invest a portion of its operating cash in obligations of depositories maintaining tax and loan accounts. Under the Treasury tax and loan investment program, depository financial institutions select the manner in which they will participate. Financial institutions wishing to retain funds deposited into their tax and loan accounts in interest-bearing obligations participate under the

Note Option. The program permits Treasury to collect funds through financial institutions and to leave the funds in Note Option depositories and in the financial communities in which they arise until Treasury needs the funds for its operations. In this way, Treasury is able to neutralize the effect of its fluctuating operations on Note Option financial institution reserves and on the economy. Likewise, those institutions wishing to remit the funds to the Treasury's account at FRBs do so under the Remittance Option.

Deposits to tax and loan accounts occur as customers of financial institutions deposit tax payments, which the financial institutions use to purchase Government securities. In most cases, this involves a transfer of funds from a customer's account to the tax and loan account in the same financial institution. Also, Treasury can direct the FRBs to invest excess funds in tax and loan accounts directly from the Treasury account at the FRBs.

¹ Represents transfers from tax and loan note accounts, proceeds from sales of securities other than Government account series, and taxes.

² Represents checks paid, wire transfer payments, drawdowns on letters of credit, redemptions of securities other than Government account series, and investment (transfer) of excess funds out of this account to the tax and loan note accounts.

³ Taxes eligible for credit consist of those deposited by taxpayers in the tax and loan depositories

as follows: Withheld income taxes beginning March 1948; taxes on employers and employees under the Federal Insurance Contributions Act beginning January 1950, and under the Railroad Retirement Tax Act beginning July 1951; a number of excise taxes beginning July 1953; estimated corporation income taxes beginning April 1967; all corporation income taxes due on or after March 15, 1968; Federal Unemployment Tax Act taxes beginning April 1970, and individual estimated income taxes beginning October 1988.

INTRODUCTION: Federal Debt

Treasury securities (i.e., public debt securities) comprise most of the Federal debt, with securities issued by other Federal agencies accounting for the rest. Tables in this section of the “Treasury Bulletin” reflect the total. Further detailed information is published in the “Monthly Statement of the Public Debt of the United States.” Likewise, information on agency securities and on investments of Federal Government accounts in Federal securities is published in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”

- Table **FD-1** summarizes the Federal debt by listing public debt and agency securities held by the public, including the Federal Reserve. It also includes debt held by Federal agencies, largely by the Social Security and other Federal retirement trust funds. The net unamortized premium and discount are also listed by total Federal securities, securities held by Government accounts, and securities held by the public. The difference between the outstanding face value of the Federal debt and the net unamortized premium and discount is classified as the accrual amount. (For greater detail on holdings of Federal securities by particular classes of investors, see the ownership tables, OFS-1 and OFS-2.)

- Table **FD-2** categorizes by type interest-bearing marketable and nonmarketable Treasury securities. The difference between interest-bearing and total public debt securities reflects outstanding matured Treasury securities—that is, unredeemed securities that have matured and are no longer accruing interest. Because the Federal Financing Bank is under the supervision of Treasury, its securities are held by a U.S. Government account.

- In table **FD-3**, nonmarketable Treasury securities held by U.S. Government accounts are summarized by issues to particular funds within Government. Many of the funds invest in *par value* special series nonmarketables at interest rates determined by law. Others invest in market-based special Treasury securities whose terms mirror those of marketable securities.

- Table **FD-4** presents interest-bearing securities issued by Government agencies. Federal agency borrowing has declined

in recent years, in part because the Federal Financing Bank has provided financing to other Federal agencies. (Federal agency borrowing from Treasury is presented in the “Monthly Treasury Statement of Receipts and Outlays of the United States Government.”)

- Table **FD-5** illustrates the average length of marketable interest-bearing public debt held by private investors and the maturity distribution of that debt. Average maturity has increased gradually since it hit a low of 2 years, 5 months, in December 1975. In March 1971, Congress enacted a limited exception to the 4-1/4-percent interest rate ceiling on Treasury bonds. This permitted Treasury to offer securities maturing in more than 7 years at current market rates of interest for the first time since 1965. This exception has expanded since 1971 authorizing Treasury to continue to issue long-term securities, and the ceiling on Treasury bonds was repealed on November 10, 1988. The volume of privately held Treasury marketable securities by maturity class reflects the remaining period to maturity of Treasury bills, notes, and bonds. The average length is comprised of an average of remaining periods to maturity, weighted by the amount of each security held by private investors. In other words, computations of average length exclude Government accounts and the Federal Reserve banks.

- In table **FD-6**, the debt ceiling is compared with the outstanding debt subject to limitation by law. The other debt category includes Federal debt Congress has designated as being subject to the debt ceiling. Changes in the non-interest-bearing debt shown in the last column reflect maturities of Treasury securities on nonbusiness days, which can be redeemed on the next business day.

- Table **FD-7** details Treasury holdings of securities issued by Government corporations and other agencies. Certain Federal agencies are authorized to borrow money from the Treasury, largely to finance direct loan programs. In addition, agencies such as the Bonneville Power Administration are authorized to borrow from the Treasury to finance capital projects. Treasury, in turn, finances these loans by selling Treasury securities to the public.

INTRODUCTION: Public Debt Operations

The Second Liberty Bond Act (31 U.S.C. 3101, et seq.) allows the Secretary of the Treasury to borrow money by issuing Treasury securities. The Secretary determines the terms and conditions of issue, conversion, maturity, payment, and interest rate. New issues of Treasury notes mature in 2 to 10 years. Bonds mature in more than 10 years from the issue date. Each marketable security is listed in the "Monthly Statement of the Public Debt of the United States." The information in this section of the "Treasury Bulletin" pertains only to marketable Treasury securities, current bills, notes, and bonds.

- Table **PDO-1** provides a maturity schedule of interest-bearing marketable public debt securities other than regular weekly and 52-week bills. All unmatured Treasury notes and bonds are listed in maturity order, from earliest to latest. A separate breakout is provided for the combined holdings of the Government accounts and Federal Reserve banks, so that the "all other investors" category includes all private holdings.

- Table **PDO-2** presents the results of weekly auctions of 13- and 26-week bills, as well as auctions of 52-week bills, which are held every fourth week. Treasury bills mature each Thursday. New issues of 13-week bills are *reopenings* of 26-week bills. The 26-week bill issued every fourth week to

mature on the same Thursday as an existing 52-week bill is a reopening of the existing 52-week bill. New issues of *cash management bills* are also presented. High, low, and average yields on accepted tenders and the dollar value of total bids are presented, with the dollar value of awards made on both competitive and noncompetitive basis.

Treasury accepts noncompetitive tenders of up to \$1 million for bills and \$5 million for notes and bonds in each auction of securities to encourage participation of individuals and smaller institutions.

- Table **PDO-3** lists the results of auctions of marketable securities, other than weekly bills, in chronological order over the past 2 years. Included are: notes and bonds from table PDO-1; 52-week bills from table PDO-2; and data for cash management bills. The maturities of cash management bills coincide with those of regular issues of Treasury bills.

- Table **PDO-4** indicates the total amount of marketable securities allotted to each class of investor. The Federal Reserve banks tally into investor classes the tenders in each auction of marketable securities other than weekly auctions of 13- and 26-week bills.

TREASURY FINANCING: JULY-SEPTEMBER

JULY

Auction of 10-Year Notes

July 3 Treasury announced it would auction \$10,000 million of 10-year notes to refund \$7,004 million of notes maturing July 15 and to raise about \$3,000 million new cash. The notes offered were Treasury notes of Series C-2006, dated July 15, 1996, due July 15, 2006, with interest payable January 15 and July 15 until maturity. An interest rate of 7 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for noncompetitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on July 9, and totaled \$26,618 million, of which \$10,005 million was accepted at yields ranging from 7.005 percent, price 99.964, up to 7.019 percent, price 99.865. Tenders at the high yield were allotted 86 percent. Noncompetitive tenders were accepted in full at the average yield, 7.016 percent, price 99.886. These totaled \$385 million. Competitive tenders accepted from private investors totaled \$9,620 million.

In addition to the \$10,005 million of tenders accepted in the auction process, \$800 million was awarded to Federal Reserve banks as agents for foreign and international monetary authorities, and \$721 million was accepted from Federal Reserve banks for their own account.

The notes of Series C-2006 may be held in STRIPS form. The minimum par amount required is \$200,000.

Auction of 2-Year and 5-Year Notes

July 17 Treasury announced it would auction \$18,750 million of 2-year notes of Series AH-1998 and \$12,500 million of 5-year notes of Series L-2001 to refund \$27,768 million of securities maturing July 31 and to raise about \$3,475 million new cash.

The notes of Series AH-1998 were dated July 31, 1996, due July 31, 1998, with interest payable January 31 and July 31 until maturity. An interest rate of 6-1/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for noncompetitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on July 23, and totaled \$40,761 million, of which \$18,786 million was accepted. All competitive tenders at yields lower than 6.288 percent were accepted in full. Tenders at 6.288 percent were allotted 68 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.288 percent with an equivalent price of 99.930. The median yield was 6.270 percent; and the low yield was 6.239 percent. Noncompetitive tenders totaled \$1,537 million. Competitive tenders accepted from private investors totaled \$17,249 million.

In addition to the \$18,786 million of tenders accepted in the auction process, \$1,900 million was accepted from Federal Reserve banks as agents for foreign and international monetary

TREASURY FINANCING: JULY-SEPTEMBER, con.

authorities, and \$817 million was accepted from Federal Reserve banks for their own account.

The notes of Series L-2001 were dated July 31, 1996, due July 31, 2001, with interest payable January 31 and July 31 until maturity. An interest rate of 6-5/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for non-competitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on July 24, and totaled \$27,061 million, of which \$12,510 million was accepted. All competitive tenders at yields lower than 6.625 percent were accepted in full. Tenders at 6.625 were allotted 9 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.625 percent with an equivalent price of 100.000. The median yield was 6.572 percent; and the low yield was 6.537 percent. Noncompetitive tenders totaled \$512 million. Competitive tenders accepted from private investors totaled \$11,998 million.

In addition to the \$12,510 million of tenders accepted in the auction process, \$900 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$700 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

July 12 tenders were invited for approximately \$19,250 million of 364-day Treasury bills to be dated July 25, 1996, and to mature July 24, 1997. The issue was to refund \$18,359 million of maturing 52-week bills and to raise about \$900 million new cash. The bills were auctioned on July 18. Tenders totaled \$48,582 million, of which \$19,372 million was accepted, including \$930 million of noncompetitive tenders from the public and \$5,226 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$795 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.49 percent.

AUGUST

August Quarterly Financing

July 31 Treasury announced it would auction \$19,000 million of 3-year notes of Series Y-1999, \$10,000 million of 9-year 11-month 7 percent notes of Series C-2006, and \$10,000 million of 30-year bonds of August 2026 to refund \$17,596 million of Treasury securities maturing August 15 and to raise about \$21,400 million new cash.

The notes of Series Y-1999 were dated August 15, 1996, due August 15, 1999, with interest payable February 15 and August 15 until maturity. An interest rate of 6 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for non-competitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on August 6, and totaled \$43,675 million, of which \$19,007 million was accepted at yields ranging from 6.110 percent, price 99.703, up to 6.124 percent, price 99.665. Tenders at the high yield were allotted 12 percent. Noncompetitive tenders were accepted in full at the average yield, 6.118 percent, price 99.681. These totaled \$621 million. Competitive tenders accepted from private investors totaled \$18,386 million.

In addition to the \$19,007 million of tenders accepted in the auction process, \$1,881 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$1,780 million was accepted from Federal Reserve banks for their own account.

The 7 percent notes of Series C-2006 were an additional issue of notes dated July 15, 1996, due July 15, 2006, with interest payable January 15 and July 15 until maturity. Accrued interest of \$5.89674 per \$1,000, covering the period from July 15, 1996, to August 15, 1996, was payable with each accepted tender.

Tenders were received prior to 12 noon, e.d.t., for non-competitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on August 7, and totaled \$22,192 million, of which \$10,000 million was accepted at yields ranging from 6.514 percent, price 103.494, up to 6.553 percent, price 103.207. Tenders at the high yield were allotted 95 percent. Noncompetitive tenders were accepted in full at the average yield, 6.535 percent, price 103.339. These totaled \$385 million. Competitive tenders accepted from private investors totaled \$9,615 million.

In addition to the \$10,000 million of tenders accepted in the auction process, \$300 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$900 million was accepted from Federal Reserve banks for their own account. The notes of Series C-2006 may be held in STRIPS form. The minimum par amount required is \$200,000.

The bonds of August 2026 were dated August 15, 1996, due August 15, 2026, with interest payable February 15 and August 15 until maturity. An interest rate of 6-3/4 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders for the bonds were received prior to 12 noon, e.d.t., for noncompetitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on August 8, and totaled \$22,615 million, of which \$10,001 million was accepted at yields ranging from 6.764 percent, price 99.821, up to 6.778 percent, price 99.643. Tenders at the high yield were allotted 61 percent. Noncompetitive tenders were accepted in full at the average yield, 6.768 percent, price 99.770. These totaled \$317 million. Competitive tenders accepted from private investors totaled \$9,684 million.

TREASURY FINANCING: JULY-SEPTEMBER, con.

In addition to the \$10,001 million of tenders accepted in the auction process, \$900 million was accepted from Federal Reserve banks for their own account.

The bonds of August 2026 may be held in STRIPS form. The minimum par amount required is \$800,000.

Auction of 2-Year and 5-Year Notes

August 21 Treasury announced it would auction \$18,750 million of 2-year notes of Series AJ-1998 and \$12,500 million of 5-year notes of Series M-2001 to refund \$27,808 million of securities maturing August 31 and to raise about \$3,450 million new cash.

The notes of Series AJ-1998 were dated September 3, 1996, due August 31, 1998, with interest payable the last calendar day of February and August until maturity. An interest rate of 6-1/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for non-competitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on August 27, and totaled \$41,737 million, of which \$18,752 million was accepted. All competitive tenders at yields lower than 6.170 percent were accepted in full. Tenders at 6.170 percent were allotted 21 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.170 percent with an equivalent price of 99.917.

The median yield was 6.150 percent; and the low yield was 6.119 percent. Noncompetitive tenders totaled \$1,517 million. Competitive tenders accepted from private investors totaled \$17,235 million.

In addition to the \$18,752 million of tenders accepted in the auction process, \$2,350 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$784 million was accepted from Federal Reserve banks for their own account.

The notes of Series M-2001 were dated September 3, 1996, due August 31, 2001, with interest payable the last calendar day of February and August until maturity. An interest rate of 6-1/2 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for non-competitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on August 28, and totaled \$26,681 million, of which \$12,502 million was accepted. All competitive tenders at yields lower than 6.568 percent were accepted in full. Tenders at 6.568 percent were allotted 86 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.568 percent with an equivalent price of 99.715.

The median yield was 6.535 percent; and the low yield was 5.530 percent. Noncompetitive tenders totaled \$534 mil-

lion. Competitive tenders accepted from private investors totaled \$11,968 million.

In addition to the \$12,502 million of tenders accepted in the auction process, \$950 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$525 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

August 9 tenders were invited for approximately \$19,250 million of 364-day Treasury bills to be dated August 22, 1996, and to mature August 21, 1997. The issue was to refund \$18,464 million of maturing 52-week bills and to raise about \$775 million new cash. The bills were auctioned on August 15. Tenders totaled \$48,788 million, of which \$19,386 million was accepted, including \$902 million of noncompetitive tenders from the public and \$5,610 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities.

An additional \$1,171 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.36 percent.

Cash Management Bills

August 27 tenders were invited for approximately \$30,000 million of 14-day bills to be dated September 3, 1996, and to mature September 17, 1996. The issue was to raise new cash.

Tenders were opened on August 29. They totaled \$60,065 million, of which \$30,010 million was accepted. The average bank discount rate was 5.24 percent.

SEPTEMBER

Auction of 2-Year and 5-Year Notes

September 18 Treasury announced it would auction \$18,250 million of 2-year notes of Series AK-1998 and \$12,500 million of 5-year notes of Series N-2001 to refund \$28,146 million of securities maturing September 30 and to raise about \$2,600 million new cash.

The notes of Series AK-1998 were dated September 30, 1996, due September 30, 1998, with interest payable March 31 and September 30 until maturity. An interest rate of 6 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for non-competitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on September 25, and totaled \$48,171 million, of which \$18,255 million was accepted. All competitive tenders at yields lower than 6.080 percent were accepted in full. Tenders at 6.080 percent were allotted 17 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.080 percent with an equivalent price of 99.851.

TREASURY FINANCING: JULY-SEPTEMBER, con.

The median yield was 6.060 percent; and the low yield was 6.011 percent. Noncompetitive tenders totaled \$1,452 million. Competitive tenders accepted from private investors totaled \$16,803 million.

In addition to the \$18,255 million of tenders accepted in the auction process, \$2,250 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$931 million was accepted from Federal Reserve banks for their own account.

The notes of Series N-2001 were dated September 30, 1996, due September 30, 2001, with interest payable March 31 and September 30 until maturity. An interest rate of 6-3/8 percent was set after the determination as to which tenders were accepted on a yield auction basis.

Tenders were received prior to 12 noon, e.d.t., for noncompetitive tenders and prior to 1 p.m., e.d.t., for competitive tenders on September 26, and totaled \$32,178 million, of which \$12,502 million was accepted. All competitive tenders at yields lower than 6.409 percent were accepted in full. Tenders at 6.409 percent were allotted 3 percent. All noncompetitive and successful competitive bidders were allotted securities at the high yield of 6.409 percent with an equivalent price of 99.856. The median yield was 6.390 percent; and the low yield was 6.350 percent.

Noncompetitive tenders totaled \$477 million. Competitive tenders accepted from private investors totaled \$12,025 million.

In addition to the \$12,502 million of tenders accepted in the auction process, \$1,350 million was accepted from Federal Reserve banks as agents for foreign and international monetary authorities, and \$650 million was accepted from Federal Reserve banks for their own account.

52-Week Bills

September 6 tenders were invited for approximately \$19,250 million of 364-day Treasury bills to be dated September 19, 1996, and to mature September 18, 1997. The issue was to refund \$19,275 million of maturing 52-week bills and to pay down about \$25 million. The bills were auctioned on September 12.

Tenders totaled \$51,680 million, of which \$19,376 million was accepted, including \$856 million of noncompetitive tenders from the public and \$6,493 million of the bills issued to Federal Reserve banks for themselves and as agents for foreign and international monetary authorities. An additional \$517 million was issued to Federal Reserve banks as agents for foreign and international monetary authorities for new cash. The average bank discount rate was 5.57 percent. ◇

¹ The 13-week bills represent additional issue of bills with an original maturity of 26 weeks or 52 weeks.

² For bills issued on or after May 2, 1974, includes amounts exchanged on noncompetitive basis by Government accounts and Federal Reserve banks.

³ For 13-week, 26-week, and 52-week bills, tenders \$1,000,000 or less from any one bidder are accepted in full at average price or accepted competitive bids; for other issues, the corresponding amount is stipulated in each offering announcement.

⁴ Equivalent coupon-issue yield.

⁵ Except \$1,200,000 at 97.386 percent.

⁶ Except \$100,000 at 98.736 percent.

⁷ Except \$5,100,000 at 98.749 percent.

⁸ Except \$20,000 at 98.698 percent and \$20,000 at 97.346 percent.

⁹ Except \$1,600,000 at 94.762 percent.

See footnotes at end of table.

**TABLE PDO-3.--Public Offerings of Marketable Securities
Other than Regular Weekly Treasury Bills, con.**

¹ Currently, all issues are sold at auction. For bill issues, the rate shown is the average bank discount rate. For note and bond issues, the rate shown is the interest rate. For details of bill offerings, see table PDO-2.

² From date of additional issue in case of a reopening.

³ In reopenings the amount issued is in addition to the amount of original offerings.

⁴ Includes securities issued to U.S. Government accounts and Federal Reserve banks; and to foreign and international monetary authorities, whether in exchange for maturing securities or for new cash.

⁵ Eligible for STRIPS.

⁶ Interest began to accrue before the issue date (settlement date) of this loan.

⁷ Accepted yields ranged up to 6.88% (price 99.991) in this single-price auction.

⁸ Accepted yields ranged up to 7.55% (price 99.795) in this single-price auction.

⁹ Yields accepted ranged from 7.40% (price 99.934) up to 7.42% (price 99.881) with the average at 7.41% (price 99.907).

¹⁰ Yields accepted ranged from 7.95% (price 99.489) up to 7.97% (price 99.354) with the average at 7.96% (price 99.421).

¹¹ Accepted yields ranged up to 7.30% (price 99.908) in this single-price auction

¹² Accepted yields ranged up to 7.81% (price 99.756) in this single-price auction.

¹³ Accepted yields ranged up to 7.57% (price 99.873) in this single-price auction.

¹⁴ Accepted yields ranged up to 7.85% (price 99.593) in this single-price auction.

¹⁵ Accepted yields ranged up to 7.57% (price 99.872) in this single-price auction.

¹⁶ Accepted yields ranged up to 7.79% (price 99.837) in this single-price auction.

¹⁷ Yields accepted ranged from 7.30% (price 99.867) up to 7.34% (price 99.762) with the average at 7.34% (price 99.762).

¹⁸ Yields accepted ranged from 7.54% (price 99.723) up to 7.55% (price 99.653) with the average at 7.54% (price 99.723).

¹⁹ Yields accepted ranged from 7.65% (price 99.708) up to 7.66% (price 99.591) with the average at 7.65% (price 99.708).

²⁰ Accepted yields ranged up to 6.999% (price 99.772) in this single-price auction.

²¹ Accepted yields ranged up to 7.125% (price 100.000) in this single-price auction.

²² Accepted yields ranged up to 6.717% (price 99.830) in this single-price auction.

²³ Accepted yields ranged up to 6.994% (price 99.505) in this single-price auction.

²⁴ Accepted yields ranged up to 6.524% (price 99.956) in this single-price auction.

²⁵ Accepted yields ranged up to 6.815% (price 99.729) in this single-price auction.

²⁶ Yields accepted ranged from 6.140% (price 99.959) up to 6.200% (price 99.798) with the average at 6.165% (price 99.892).

²⁷ Yields accepted ranged from 6.576% (price 99.449) up to 6.680% (price 98.702) with the average at 6.608% (price 99.219).

²⁸ Accepted yields ranged up to 6.170% (price 99.917) in this single-price auction.

²⁹ Accepted yields ranged up to 6.250% (price 100.000) in this single-price auction.

³⁰ Accepted yields ranged up to 5.690% (price 99.879) in this single-price auction.

³¹ Accepted yields ranged up to 5.905% (price 99.872) in this single-price auction.

³² Accepted yields ranged up to 5.955% (price 99.851) in this single-price auction.

³³ Accepted yields ranged up to 6.219% (price 99.601) in this single-price auction.

³⁴ Yields accepted ranged from 5.950% (price 99.797) up to 6.019% (price 99.610) with the average at 5.997% (price 99.670).

³⁵ Yields accepted ranged from 6.498% (price 100.015) up to 6.508% (price 99.942) with the average at 6.501% (price 99.993).

³⁶ Yields accepted ranged from 6.895% (price 99.748) up to 6.909% (price 99.572) with the average at 6.906% (price 99.610).

³⁷ Accepted yields ranged up to 6.090% (price 99.833) in this single-price auction.

³⁸ Accepted yields ranged up to 6.370% (price 99.493) in this single-price auction.

³⁹ Accepted yields ranged up to 5.860% (price 99.796) in this single-price auction.

⁴⁰ Accepted yields ranged up to 6.141% (price 99.932) in this single-price auction.

⁴¹ Accepted yields ranged up to 5.705% (price 99.851) in this single-price auction.

⁴² Accepted yields ranged up to 5.810% (price 99.743) in this single-price auction.

⁴³ Yields accepted ranged from 5.543% (price 99.884) up to 5.550% (price 99.865) with the average at 5.549% (price 99.867).

⁴⁴ Yields accepted ranged from 5.890% (price 99.884) up to 5.910% (price 99.735) with the average at 5.900% (price 99.810).

⁴⁵ Accepted yields ranged up to 5.479% (price 98.806) in this single-price auction.

⁴⁶ Accepted yields ranged up to 5.625% (price 100.000) in this single-price auction.

⁴⁷ Accepted yields ranged up to 5.289% (price 99.927) in this single-price auction.

⁴⁸ Accepted yields ranged up to 5.550% (price 99.784) in this single-price auction.

⁴⁹ Accepted yields ranged up to 5.068% (price 99.872) in this single-price auction.

⁵⁰ Accepted yields ranged up to 5.360% (price 99.523) in this single-price auction.

⁵¹ Yields accepted ranged from 5.037% (price 99.898) up to 5.046% (price 99.873) with the average at 5.043% (price 99.882).

⁵² Yields accepted ranged from 5.639% (price 99.894) up to 5.660% (price 99.736) with the average at 5.649% (price 99.819).

⁵³ Yields accepted ranged from 6.110% (price 98.496) up to 6.130% (price 98.226) with the average at 6.119% (price 98.374).

⁵⁴ Accepted yields ranged up to 5.235% (price 99.794) in this single-price auction.

⁵⁵ Accepted yields ranged up to 5.680% (price 99.763) in this single-price auction.

⁵⁶ Accepted yields ranged up to 6.144% (price 99.965) in this single-price auction.

⁵⁷ Accepted yields ranged up to 6.415% (price 99.832) in this single-price auction.

⁵⁸ Accepted yields ranged up to 5.939% (price 99.881) in this single-price auction.

⁵⁹ Accepted yields ranged up to 6.279% (price 99.877) in this single-price auction.

⁶⁰ Yields accepted ranged from 6.350% (price 100.067) up to 6.400% (price 99.933) with the average at 6.390% (price 99.960).

⁶¹ Yields accepted ranged from 6.890% (price 99.893) up to 6.906% (price 99.779) with the average at 6.902% (price 99.807).

⁶² Accepted yields ranged up to 6.053% (price 99.902) in this single-price auction.

⁶³ Accepted yields ranged up to 6.565% (price 99.727) in this single-price auction.

⁶⁴ Accepted yields ranged up to 6.300% (price 99.908) in this single-price auction.

⁶⁵ Accepted yields ranged up to 6.674% (price 99.795) in this single-price auction.

⁶⁶ Yields accepted ranged from 7.005% (price 99.964) up to 7.019% (price 99.865) with the average at 7.016% (price 99.886).

⁶⁷ Accepted yields ranged up to 6.288% (price 99.930) in this single-price auction.

⁶⁸ Accepted yields ranged up to 6.625% (price 100.000) in this single-price auction.

⁶⁹ Yields accepted ranged from 6.110% (price 99.703) up to 6.124% (price 99.665) with the average at 6.118% (price 99.681).

⁷⁰ Yields accepted ranged from 6.514% (price 103.494) up to 6.553% (price 103.207) with the average at 6.535% (price 103.339).

⁷¹ Yields accepted ranged from 6.764% (price 99.821) up to 6.778% (price 99.643) with the average at 6.768% (price 99.770).

⁷² Accepted yields ranged up to 6.170% (price 99.917) in this single-price auction.

⁷³ Accepted yields ranged up to 6.568% (price 99.715) in this single-price auction.

⁷⁴ Accepted yields ranged up to 6.080% (price 99.851) in this single-price auction.

⁷⁵ Accepted yields ranged up to 6.409% (price 99.856) in this single-price auction.

Note.--All notes and bonds, except for foreign-targeted issues, were sold at auction through competitive and noncompetitive bidding. Foreign-targeted issues were sold at auction through competitive bidding only.

¹ Includes trust funds and accounts that comprise Government accounts under the unified budget concept.² Exclusive of banks and insurance companies.³ Included with "All other" investors are certain Government deposit accounts and Government-sponsored agencies, formerly included with Government accounts.

Note.--For detail of offerings, see table PDO-3.

INTRODUCTION: Savings Bonds and Notes

Series EE bonds, on sale since January 1, 1980, are the only savings bonds currently sold. Series HH bonds are issued in exchange for Series E and EE savings bonds and savings notes. Series A-D were sold from March 1, 1935, through April 30, 1941. Series E was on sale from May 1, 1941, through December 31, 1979 (through June 1980 to payroll savers only). Series F and G were sold from May 1, 1941, through April 30, 1952. Series H was sold from June 1, 1952, through December 31, 1979. Series HH bonds were sold for cash from January 1, 1980, through October 31, 1982. Series J and K were sold from

May 1, 1952, through April 30, 1957. U.S. savings notes were on sale May 1, 1967, through June 30, 1970. The notes were eligible for purchase by individuals with the simultaneous purchase of series E savings bonds.

The principal terms and conditions for purchase and redemption and information on investment yields of savings notes appear in the "Treasury Bulletins" of March 1967 and June 1968; and the Annual Report of the Secretary of the Treasury for fiscal 1974.

TABLE SBN-1.--Sales and Redemptions by Series, Cumulative through Sept. 30, 1996

[In millions of dollars. Source: "Monthly Statement of the Public Debt of the United States"; Bureau of the Public Debt]

Series	Sales ¹ (1)	Accrued discount (2)	Sales plus accrued discount (3)	Redemptions ¹ (4)	Amount outstanding	
					Interest- bearing debt (5)	Matured non-interest- bearing debt (6)
Savings bonds:						
Series A-D	3,949	1,054	5,003	5,002	-	1
Series E, EE, H, and HH	339,854	179,544	519,398	335,184	184,147	2,292
Series F and G	28,396	1,125	29,521	29,517	-	3
Series J and K	3,556	198	3,754	3,753	-	-
Savings notes	862	673	1,535	1,162	341	-
Total	376,617	182,594	559,211	374,618	184,488	2,296

¹ Sales and redemption figures include exchange of minor amounts of (1) matured series E bonds for series G and K bonds from May 1951 through April 1957; (2) series F and J bonds for series H bonds beginning January 1960; and (3) U.S. savings notes for series H bonds beginning January 1972; however, they exclude exchanges of series E bonds for series H and

HH bonds.
² Details by series on a cumulative basis and by period of series A-D combined can be found in the February 1952 and previous issues of the "Treasury Bulletin."

Note.--Series E and EE include U.S. savings notes (Freedom Shares) on sale from May 1, 1967, through June 30, 1970, to E bond buyers.

INTRODUCTION: Ownership of Federal Securities

Federal securities presented in the following tables are public debt securities such as savings bonds, bills, and notes that the Treasury issues. The tables also detail debt issued by other Federal agencies under special financing authorities. (See the Federal debt (FD) tables for a more complete description of the Federal debt.)

- Table **OFS-1** presents Treasury marketable and nonmarketable securities and debt issued by other Federal agencies held by Government accounts, the Federal Reserve banks, and private investors. Social Security and Federal retirement trust fund investments comprise much of the Government account holdings.

The Federal Reserve banks acquire Treasury securities in the market as a means of executing monetary policy.

- Table **OFS-2** presents the estimated amount of public debt securities held by private investors. Information is obtained from sources such as the Federal financial institution regulatory agencies. State, local, and foreign holdings include special issues of nonmarketable securities to municipal entities and foreign official accounts. They also include municipal, foreign official, and private holdings of marketable Treasury securities. (See footnotes to the table for description of investor categories.)

¹ U.S. savings bonds, series A-F and J, are included at current redemption value.² Includes domestically chartered banks, U.S. branches and agencies of foreign banks, New York investment companies majority owned by foreign banks, and Edge Act corporations owned by domestically chartered and foreign banks.³ Includes partnerships and personal trust accounts.⁴ Includes U.S. savings notes. Sales began May 1, 1967, and were discontinued June 30, 1970.⁵ Exclusive of banks and insurance companies.⁶ The State and local governments category has been redefined to include its fully defeased

debt that is backed by nonmarketable Federal securities. Includes State and local pension funds.

⁷ Consists of the investments of foreign and international accounts (both official and private) in United States public debt issues. Estimates reflect 1978 benchmark to December 1984; the 1984 benchmark to December 1989; and the 1989 benchmark to date.⁸ Includes savings and loan associations, credit unions, nonprofit institutions, mutual savings banks, corporate pension trust funds, dealers and brokers, certain Government deposit accounts, and Government-sponsored enterprises.

INTRODUCTION: Market Yields

The tables and charts in this section present yields on Treasury marketable securities, and compare long-term yields on Treasury securities with yields on long-term corporate and municipal securities.

- Table **MY-1** lists Treasury market bid yields at constant maturities for bills, notes, and bonds. The Treasury yield curve in the accompanying chart is based on current market bid quotations on the most actively traded Treasury securities as of 3:30 p.m. on the last business day of the calendar quarter.

The Treasury uses quotations obtained by the Federal Reserve Bank of New York to derive the yield curve, based on semiannual interest payments and read at constant maturity points to develop a consistent data series. Yields on Treasury bills are coupon equivalent yields of bank *discount rates* at

which Treasury bills trade in the market. The Board of Governors of the Federal Reserve System publishes the Treasury constant maturity data series in its weekly H.15 press release.

- Table **MY-2** shows average yields of long-term Treasury, corporate, and municipal bonds. The long-term Treasury average yield is the 30-year constant maturity yield. The corporate bond average yield is developed by Treasury by calculating reoffering yields on new long-term securities maturing in at least 20 years and rated Aa by Moody's Investors Service. The municipal bond average yield prior to 1991 was compiled by Treasury. Beginning with January 1991, the average yield is the "Municipal Bond Yield Average," published by Moody's Investors Service for 20-year reoffering yields on selected Aa-rated general obligations. See the footnotes for further explanation.

INTRODUCTION: U.S. Currency and Coin Outstanding and in Circulation

The U.S. Currency and Coin Outstanding and in Circulation (USCC) statement informs the public of the total face value of currency and coin used as a medium of exchange that is in circulation at the end of a given accounting month. The statement defines the total amount of currency and coin outstanding and the portion deemed to be in circulation, and includes some old and current rare issues that do not circulate, or that may do so to a limited extent. Treasury includes them in the statement because the issues were originally intended for general circulation.

The USCC statement provides a description of the various issues of paper money. It also gives an estimated average of currency and coin held by each individual, using estimates of population from the Bureau of the Census. USCC information has been published by Treasury since 1888, and was published separately until 1983, when it was incorporated into the "Treasury Bulletin." The USCC comes from monthly reports compiled by Treasury offices, various U.S. Mint offices, the Federal Reserve banks, and the Federal Reserve Board.

TABLE USCC-1.--Amounts Outstanding and in Circulation, Sept. 30, 1996

INTRODUCTION: International Financial Statistics

The tables in this section provide statistics on the U.S. Government's reserve assets, liabilities to *foreigners*, and its international financial position. All monetary figures are in dollars or dollar equivalents.

- Table **IFS-1** shows reserve assets of the United States, including its gold stock, *special drawing rights* held in the Special Drawing Account in the *International Monetary Fund (IMF)*, holdings of convertible foreign currencies, and reserve position in the IMF.

- Table **IFS-2** contains statistics on liabilities to *foreign official institutions*, and selected liabilities to all other *foreigners*, which are used in the U.S. balance of payments statistics.

- Table **IFS-3** shows nonmarketable bonds and notes that Treasury issues to official institutions and other residents of foreign countries.

Oct.....	75,557	11,049	10,226	38,765	15,517

¹ Beginning July 1974, the International Monetary Fund (IMF) adopted a technique for valuing the special drawing right (SDR) based on a weighted-average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and reserve position in the IMF are also valued on this basis beginning July 1974.

² Treasury values its gold stock at \$42.2222 per fine troy ounce and pursuant to 31 U.S.C. 5117 (b) issues gold certificates to the Federal Reserve at the same rate against all gold held.

³ Includes allocations of SDRs in the Special Drawing Account in the IMF, plus or minus transactions in SDRs.

⁴ Includes holdings of Treasury and Federal Reserve System; beginning November 1978, these are valued at current market exchange rates or, where appropriate, at such other rates as may be agreed upon by the parties to the transactions.

⁵ The United States has the right to purchase foreign currencies equivalent to its reserve position in the IMF automatically if needed. Under appropriate conditions, the United States could purchase additional amounts related to the U.S. quota.

¹ Includes Bank for International Settlements.² Derived by applying reported transactions to benchmark data.³ Includes current value of zero-coupon Treasury bond issues to foreign governments: Mexico, beginning March 1988, 20-year maturity issue and beginning March 1990, 30-year maturity issue; Venezuela, beginning December 1990, 30-year maturity issue; Argentina, beginning April 1993, 30-year maturity issue. Also, see footnotes to table IFS-3.⁴ Includes debt securities of U.S. Government corporations, federally sponsored agencies, and private corporations.⁵ Includes liabilities payable in dollars to foreign banks and liabilities payable in foreign currencies to foreign banks and to "other foreigners."⁶ Includes marketable U.S. Government bonds and notes held by foreign banks.⁷ Principally the International Bank for Reconstruction and Development, the Inter-American Development Bank, and the Asian Development Bank.

Note.--Table is based on Department of Treasury data and on data reported to the Department of Treasury by banks, other depository institutions, and brokers in the United States. Data correspond generally to statistics following in this section and in the "Capital Movements" section. Table excludes International Monetary Fund "holdings of dollars" and holdings of U.S. Treasury letters of credit and nonnegotiable noninterest-bearing special U.S. notes held by other international and regional organizations.

¹ Beginning April 1993, includes current value (principal and accrued interest) of zero-coupon, 30-year maturity Treasury bond issue to the government of Argentina. Face value of issue is \$6,685 million.

² Includes current value of the following zero-coupon Treasury bond issues to the government of Mexico: Beginning March 1988, 20-year maturity issue with remaining face value of \$1,058 million; and beginning March 1990, 30-year maturity issue with remaining face value of \$21,652

million.

³ Beginning December 1990, indicates current value of zero-coupon, 30-year maturity Treasury bond issue to the Republic of Venezuela. Remaining face value of issue is \$7,162 million.

INTRODUCTION: Capital Movements

Treasury collects information about the transference of financial assets and other portfolio capital movements between the United States and foreigners, and has since 1935. Commercial banks and other depository institutions, bank holding companies, securities brokers and dealers, and nonbanking enterprises in the United States file capital movement reports with district Federal Reserve banks.

Forms and instructions are developed with the cooperation of other Government agencies and the Federal Reserve System, and in consultation with representatives of banks, securities firms, and nonbanking enterprises. Copies of the reporting forms and instructions may be obtained from the Office of International Financial Analysis, Office of the Assistant Secretary for Economic Policy, Department of the Treasury, Washington, D.C., 20220, or from district Federal Reserve banks.

In general, information is reported opposite the country or geographical area where the foreigner is located, as shown on records of reporting institutions. However, information may not always reflect the ultimate ownership of assets. Reporting institutions are not required to go beyond addresses shown on their records, and so may not be aware of the actual country of domicile of the ultimate beneficiary.

United States liabilities arising from the deposits of dollars with foreign banks appear as liabilities to foreign banks, although the liability of the foreign bank receiving the deposit may be to *foreign official institutions* or to residents of another country.

Transactions with branches or agencies of foreign official institutions, wherever located, are reported opposite the country that has sovereignty over the institutions. Transactions with international and regional organizations are not reported opposite any country, but are accounted for in regional groupings of such organizations. The only exception is information pertaining to the Bank for International Settlements, which is reported opposite 'Other Europe.'

Banks and other depository institutions, bank holding companies, International Banking Facilities (IBFs), securities brokers and dealers, and nonbanking enterprises in the United States must file reports. These enterprises include the branches, agencies, subsidiaries, and other affiliates in the United States of foreign banking and nonbanking firms. Those with liabilities, claims, or securities transactions below specified exemption levels are exempt from reporting.

Banks and other depository institutions, and some brokers and dealers, file monthly reports covering their dollar liabilities to, and dollar claims on, foreigners in a number of countries. Twice a year, June 30 and December 31, they also report the same liabilities and claims items to foreigners in countries not shown separately on the monthly reports. Quarterly reports are filed for liabilities and claims denominated in foreign currencies in relation to foreigners. The exemption level applicable to these banking reports is \$15 million.

Banks and other depository institutions, securities brokers and dealers, and other enterprises report monthly their transactions with foreigners in long-term securities. They must report securities transactions with foreigners if their aggregate purchases or their aggregate sales amount to at least \$2 million during the covered month.

Exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository insti-

tutions, and brokers), and other nonbanking enterprises must file reports quarterly if liabilities to, or claims on, unaffiliated foreigners amount to \$10 million or more during the covered quarter.

Nonbanking enterprises also report each month their U.S. dollar denominated deposit and certificates of deposit claims of \$10 million or more on banks abroad.

The data in these tables do not cover all types of reported capital movements between the United States and other countries. The principal exclusions are the intercompany capital transactions of nonbanking business enterprises in the United States with their own branches and subsidiaries abroad (own foreign offices) or with their foreign parent companies, and capital transactions of the U.S. Government. Consolidated data on all types of international capital transactions are published by the Department of Commerce in its regular reports on the United States balance of payments.

- **Section I** presents liabilities to foreigners reported by U.S. banks and other depository institutions, as well as brokers and dealers. Dollar liabilities are reported monthly; those denominated in foreign currencies are reported quarterly. Respondents report certain of their own liabilities and a wide range of their custody liabilities to foreigners.

- **Section II** presents claims on foreigners also reported by U.S. banks and other depository institutions, brokers, and dealers. Data on bank claims held for their own account are collected monthly. Information on claims held for their domestic customers as well as foreign currency claims, is collected on a quarterly basis only. Maturity data are reported according to time remaining to maturity. Reporting also covers certain items held by brokers and dealers in the United States.

- **Section III** contains supplementary data on dollar liabilities to, and dollar claims on, countries not listed separately on the monthly reports submitted by banks, other depository institutions, brokers and dealers in the United States. The supplementary reports are filed semiannually as of the end of June and December. (Note: Beginning with the September 1994 issue of the "Treasury Bulletin," former table CM-III-1, Dollar Claims on Nonbank Foreigners, will no longer appear. Former table CM-III-2, Dollar Liabilities to, and Dollar Claims on, Foreigners in Countries and Areas Not Regularly Reported Separately, has been redesignated as table CM-III-1. This semiannual data series will now appear in each issue of the "Treasury Bulletin.")

- **Section IV** shows the liabilities to, and claims on, unaffiliated foreigners by exporters, importers, industrial and commercial concerns, financial institutions (other than banks, other depository institutions, and brokers), and other nonbanking enterprises in the United States. Information does not include accounts of nonbanking enterprises in the United States with their own branches and subsidiaries abroad or with their foreign parent companies. These are reported by business enterprises to the Department of Commerce on its direct investment forms. Data exclude claims on foreigners held through banks in the United States.

- **Section V** contains information on transactions in all types of long-term domestic and foreign securities with foreigners reported by banks, brokers, and other entities in the United States. The data cover transactions executed in the United States for the accounts of foreigners, and transactions executed abroad for the accounts of reporting institutions and their

domestic customers. This includes transactions in newly issued securities as well as transactions in, and redemptions of, outstanding issues. Also, some transactions classified as direct investments in the balance of payments accounts may be included. However, the data do not include nonmarketable Treasury bonds and notes shown in table IFS-3.

In the case of outstanding securities, the geographical breakdown of the transactions data does not necessarily reflect the ultimate owners of or the original issuers of the securities.

This is because the path of a security is not tracked prior to its being purchased from, or after it is sold to, a foreigner in a TIC reportable transaction. That is, before it enters and after it departs the reporting system, ownership of a security may be transferred between foreigners of different countries. Such transfers may occur any number of times and are concealed among the net figures for U.S. transactions opposite individual countries. Hence, the geographical breakdown shows only the country of domicile of the foreign buyers and sellers of securities in a particular round of transactions.

SECTION I.--Liabilities to Foreigners Reported by Banks in the United States

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates (Trucial States).

⁴ Includes Algeria, Gabon, Libya, and Nigeria.

¹ These data as of June 30, 1996.² Excludes negotiable time certificates of deposit, which are included in "Other liabilities."³ U.S. Treasury bills and certificates held in custody for the account of oil-exporting countries in "Other Asia" and "Other Africa" amount to \$842 million.⁴ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."⁵ Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

CHART CM-A.--U.S. Liabilities to Foreigners Reported by U.S. Banks, Brokers, and Dealers with Respect to Selected Countries

(In billions of dollars)

[In millions of dollars. Source: Office of International Financial Analysis]

Country	1992	1993	1994	1995	Sept. 1996
United Kingdom	125,388	150,912	187,161	161,193	160,040
All other Europe	221,194	273,626	253,586	261,133	258,272
Caribbean banking centers ¹	260,020	292,335	361,659	360,351	344,490
Japan	77,735	79,241	87,304	139,045	137,973
All other Asia	87,870	84,510	93,049	135,263	133,239
Subtotal	772,207	880,624	982,759	1,056,985	1,034,014
All other countries	110,848	124,307	121,625	152,452	168,097
Grand total	883,055	1,004,931	1,104,384	1,209,437	1,202,111

¹ Includes Bahamas, Bermuda, British West Indies, Netherlands Antilles, and Panama.

U.S. banking liabilities to foreigners, excluding liabilities represented by long-term securities, are concentrated in international financial centers. The chart and table show that close to two-thirds of U.S. liabilities are currently reported opposite the United Kingdom, the rest of Europe and, most notably, the offshore banking centers in the Caribbean. Also significant are the U.S. liabilities to foreigners reported against Japan and the rest of Asia.

Total U.S. banking liabilities to foreigners, which expanded \$105.1 billion in 1995, declined by \$7.3 billion through the third quarter of 1996. Liabilities to foreigners in the United Kingdom, other Europe,

Japan, and other Asia fell a combined \$7.1 billion, reflecting very marginal changes from 1995 levels. Liabilities opposite the United Kingdom and other Europe have remained in a narrow range in recent years, whereas the growth in liabilities to Japan and other Asia that occurred in 1995 appears to have slowed. Also, U.S. liabilities to foreigners in the Caribbean banking centers dropped by \$15.9 billion through the third quarter, resulting in the lowest level of liabilities opposite these centers since 1993. Meanwhile, offsetting these declines was an increase of \$15.6 billion in U.S. liabilities to "all other countries."

CHART CM-B.--U.S. Claims on Foreigners Reported by U.S. Banks, Brokers, and Dealers with Respect to Selected Countries

(In billions of dollars)

[In millions of dollars. Source: Office of International Financial Analysis]

Country	1992	1993	1994	1995	June 1996
United Kingdom.....	90,388	86,628	96,829	103,375	111,085
All other Europe.....	90,425	103,814	107,264	125,939	128,166
Caribbean banking centers ¹	192,681	197,024	207,715	229,413	216,269
Japan.....	106,443	90,387	93,196	98,737	84,862
All other Asia.....	63,390	64,328	58,533	67,216	78,541
Subtotal.....	543,327	542,181	563,537	624,680	618,923
All other countries.....	83,399	108,508	107,601	110,998	115,721
Grand total.....	626,726	650,689	671,138	735,678	734,644

¹ Includes Bahamas, Bermuda, British West Indies, Netherlands Antilles, and Panama.

U.S. banking claims on foreigners, excluding claims represented by long-term securities, are highly concentrated in international financial centers. The chart and table show that close to two-thirds of U.S. claims are currently reported opposite the United Kingdom, other Europe and, most notably, the off-shore banking centers in the Caribbean. Also significant are U.S. claims on foreigners reported against Japan and other Asia.

Total U.S. banking claims on foreigners, which expanded \$64.6 billion in 1995, were almost unchanged through the first half of 1996, falling just

\$1.1 billion. This marginal net decline is the result of offsetting changes in claims on different regions. U.S. claims on foreigners in the United Kingdom, other Europe, Asia excluding Japan, and "all other countries" increased \$25.9 billion as of the end of June 1996, with claims on the United Kingdom alone rising \$7.7 billion. Claims on the Caribbean banking centers and Japan fell a total of \$27 billion. The largest change in U.S. claims through the first half of 1996 is the \$13.9 billion, or 14 percent, drop in claims on Japan, the lowest level of U.S. claims on Japan over the period shown.

**SECTION IV.--Liabilities to, and Claims on, Foreigners
Reported by Nonbanking Business Enterprises
in the United States**

All other countries.....	15,360	3,994	16,309	9,621	2,152
Grand total.....	111,130	140,350	231,896	250,097	106,578

¹ Includes Bahamas, Bermuda, British West Indies, Netherlands Antilles, and Panama.

As reported by U.S. banks, brokers, and other persons, foreigners' transactions in long-term U.S. securities (i.e., U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) are conducted largely through international financial centers. The table presents aggregate net purchases on an annual basis for 1993 through 1995, and on a year-to-date and most recent quarter basis for 1996. The figures show that there has been overall a steady increase in foreigners' net purchases, or gross purchases minus gross sales, of U.S. securities.

In the first three quarters of 1996, foreigners' total net purchases of U.S. securities reached a re-

cord high of \$250.1 billion. On an annualized basis, net purchases by foreigners in other Europe, Japan, and other Asia through the third quarter heavily outpaced the rate of net purchases in 1995. And opposite the United Kingdom, foreign net purchases of U.S. securities edged past the 1995 rate, mostly due to the massive \$40.1 billion in net purchases in the third quarter alone. The Caribbean banking centers showed diminished annualized net purchases through the most recent period, but third quarter activity increased. Net purchases by "all other countries" were down substantially.

SECTION V.--Transactions in Long-Term Securities by Foreigners Reported by Banks and Brokers in the United States

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

³ Includes Bahrain, Iran, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates (Trucial States).

⁴ Includes Algeria, Gabon, Libya, and Nigeria.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

¹ Beginning with series for December 1992 forward, data for all other republics of the former U.S.S.R. are reported under "Other Europe."

² Includes data on Serbia and Montenegro, which presently form an entity not formally recognized by the United States. Data for entities of the former Yugoslavia recognized as independent states by the United States are reported under "Other Europe" as follows: Beginning in December 1992 for Bosnia and Herzegovina, Croatia and Slovenia; and beginning in June 1994 for the Former Yugoslav Republic of Macedonia.

CHART CM-D.--Net Purchases of Long-Term Foreign Securities by U.S. Investors *

(In billions of dollars)

[In millions of dollars. Source: Office of International Financial Analysis]

Type	1980-89 [†]	1993	1994	1995	Jan. - Sept. 1996	July - Sept. 1996
Foreign bonds	4,883	80,377	9,224	48,545	27,635	13,042
Foreign stocks	2,834	62,691	48,071	50,291	46,397	6,514
Total	7,717	143,068	57,295	98,836	74,032	19,556

* Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

[†] Annual average.

U.S. net purchases of foreign bonds and stocks in the 1990's stand in marked contrast to the comparatively low levels of average annual activity throughout the 1980's. The robust growth in U.S. net purchases of foreign securities is due largely to a trend toward international diversification among U.S. institutional investors. The table presents aggregate net purchases on an annual average basis for 1980 through 1989, on an annual basis for 1993 through 1995, and on a year-to-date and most recent quarter basis for 1996.

The chart and table show that U.S. net purchases of foreign bonds and stocks continue to be strong in 1996. After slackening last period, net purchases of foreign bonds surged in the third quarter to the highest rate since fourth quarter 1995. However, net purchases through the year remain below 1995 levels. U.S. net purchases of foreign stocks, which accelerated rapidly through the first half of the year, stalled in the third quarter of 1996. On an annualized basis, though, foreign stock purchases remain set to exceed 1995 levels.

INTRODUCTION: Foreign Currency Positions

The “Treasury Bulletin” publishes series on foreign currency holdings of large foreign exchange market participants. The series provide information on positions in derivative instruments, such as foreign exchange futures and options, that are increasingly used in establishing foreign exchange positions but were not covered in the old reports.

The information is based on reports of large foreign exchange market participants on holdings of five major foreign currencies (Canadian dollar, German mark, Japanese yen, Swiss franc, and pound sterling). U.S.-based businesses file a consolidated report for their domestic and foreign subsidiaries, branches, and agencies. U.S. subsidiaries of foreign entities file only for themselves, not for their foreign parents. Filing is required by law (31 U.S.C. 5315; 31 C.F.R. 128, Subpart C).

Weekly and monthly reports must be filed throughout the calendar year by major foreign exchange market participants, which are defined as market participants with more than \$50 billion equivalent in foreign exchange contracts on the last business day of any calendar quarter during the previous year (end March, June, September, or December). Such contracts include the amounts of foreign exchange spot contracts bought and sold, foreign exchange forward contracts bought and sold, foreign exchange futures bought and sold, and one half the notional amount of foreign exchange options bought and sold. Exemptions from filing the monthly report are given to banking institutions that file the Federal Financial Institution Examination Council (FFIEC) 035 report (“Monthly Consolidated Foreign Currency Report”).

A quarterly report must be filed throughout the calendar year by each foreign exchange market participant that had more than \$1 billion equivalent in foreign exchange contracts on the last business day of any quarter the previous year (end March, June, September, or December). Exemptions from filing the quarterly report are given to major nonbank market participants that file weekly and monthly reports, and banking institutions that file FFIEC 035 reports.

This information is published in five sections corresponding to each of the major currencies covered by the reports. Tables I-1 through V-1 present the foreign currency data reported weekly by major market participants. Tables I-2 through V-2 present more detailed currency data of major market participants, based on monthly Treasury and FFIEC 035 reports. Tables I-3 through V-3 present quarterly consolidated foreign currency data reported by large market participants and FFIEC reporters which do not file weekly reports.

Principal exchanged under cross currency interest rate swaps is reported as part of purchases or sales of foreign exchange. Such principal is also separately noted on monthly and quarterly reports. The net options position, or the net delta-equivalent value of an options position, is an estimate of the relationship between an option’s value and an equivalent currency hedge. The delta equivalent value is defined as the product of the first partial derivative of an option valuation formula (with respect to the price of the underlying currency) multiplied by the notional principal of the contract.

INTRODUCTION: Exchange Stabilization Fund

To stabilize the exchange value of the dollar, the Exchange Stabilization Fund (ESF) was established under the Gold Reserve Act of January 30, 1934 (31 U.S.C. 822a), which authorized establishment of a Treasury Department fund to be operated under the exclusive control of the Secretary, with approval of the President.

Subsequent amendment of the Gold Reserve Act modified the original purpose somewhat to reflect termination of the fixed exchange rate system.

Resources of the fund include dollar balances, partially invested in U.S. Government securities, *special drawing rights* (SDRs), and balances of foreign currencies. Principal sources of income (+) or loss (-) for the fund are profits (+) or losses (-) on SDRs and foreign exchange, as well as interest earned on assets.

• Table **ESF-1** presents the assets, liabilities, and *capital* of the fund. The figures are in U.S. dollars or their equivalents based on current exchange rates computed according to the accrual method of accounting. The capital account represents the original capital appropriated to the fund by Congress of \$2 billion, minus a subsequent transfer of \$1.8 billion to pay for the initial U.S. quota subscription to the *IMF*. Gains and losses are reflected in the cumulative net income (+) or loss (-) account.

• Table **ESF-2** shows the results of operations by quarter. Figures are in U.S. dollars or their equivalents computed according to the accrual method. "Profits (+) or losses (-) on foreign exchange" includes realized profits or losses. "Adjustment for change in valuation of *SDR holdings and allocations*" reflects net gain or loss on revaluation of SDR holdings and allocations for the quarter.

TABLE ESF-1.--Balances as of Mar. 31, 1996, and June 30, 1996

[In thousands of dollars. Source: Office of the Secretary of the Treasury]

Assets, liabilities, and capital	Mar. 31, 1996	Mar. 31, 1996, through June 30, 1996	June 30, 1996
Assets

Total capital	24,699,968	-74,485	24,625,483
Total liabilities and capital	42,243,437	-62,287	42,181,150

See footnotes on the following page.

TABLE ESF-2.--Income and Expense

[In thousands of dollars. Source: Office of the Secretary of the Treasury]

	Current quarter Apr. 1, 1996, through June 30, 1996	Fiscal year to date Oct. 1, 1995, through June 30, 1996
Income and expense		
Profits (+) or losses (-) on:		
Foreign exchange	-418,703	-1,415,069
Adjustment for change in valuation of special drawing rights holdings and allocations ¹ . . .	-48,437	-160,980
Interest (+) or net charges (-) on:		
Special drawing rights	37,672	115,290
U.S. Government securities	54,359	137,852
Foreign exchange	300,624	936,257
Income from operations	-74,485	-386,650
Net income (+) or loss (-)	-74,485	-386,650

¹ Beginning July 1974, the International Monetary Fund adopted a technique for valuing the special drawing rights (SDRs) based on a weighted average of exchange rates for the currencies of selected member countries. The U.S. SDR holdings and allocations are valued on this basis beginning July 1974.

² Excludes foreign exchange transactions for future and spot delivery.

Note.--Annual balance sheets for fiscal years 1934 through 1940 appeared in the 1940 "Annual Report of the Secretary of the Treasury" and those for succeeding years appeared in subsequent reports through 1980. Quarterly balance sheets beginning with December 31, 1938, have been published in the "Treasury Bulletin." Data from inception to September 30, 1978, may be found on the statements published in the January 1979 "Treasury Bulletin."

INTRODUCTION: Consolidated Financial Statements

The following pages are excerpted from the “Consolidated Financial Statements of the United States Government,” (CFS) Prototype 1995. The statements and accompanying information, prepared and published annually by the Financial Management Service, are modeled after corporate-type reports and are developed on an accrual basis of accounting. The excerpts represent some of the most noteworthy information contained in the statements.

Data for the CFS are compiled from program agency accounting systems Governmentwide and are captured in the Statement of Financial Position and the Statement of Operations. Customary notes to the financial statements as well as several broad supplementary tables—from accounts and loans receivable due from the public to Federal obligations—complete the publication.

United States Government Consolidated Statement of Financial Position, as of September 30 (Unaudited)

(In billions of dollars)

Expenses in excess of revenues	<u>310.0</u>	<u>129.6</u>

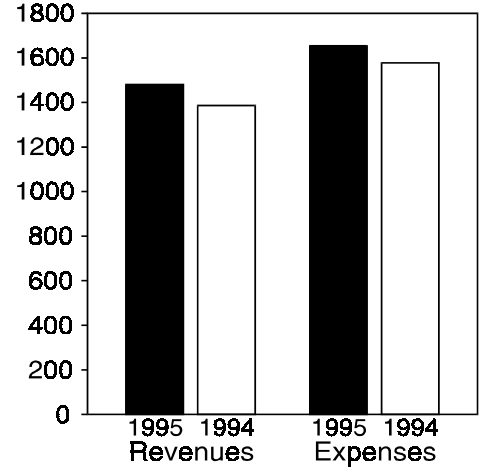

¹ Includes Executive Office of the President.² Fiscal 1994 amount includes Defense audit adjustments.³ Includes EPA, GSA, NASA, OPM, SBA, and other independent agencies.

Revenues and Expenses

The chart at right shows the amounts of the U.S. Federal Government revenues and expenses for fiscal 1995 and 1994.

The charts below show categories of revenues by source, and a breakdown of the Government's expenses by agency.

Charts are in billions of dollars. All revenues levied under the Government's sovereign power are reported on the cash basis. Revenues earned through Government business-type operations and the data supporting the graph of expenses by agency are reported on the accrual basis.

¹ Includes EPA, GSA, NASA, OPM, SBA, and other independent agencies.

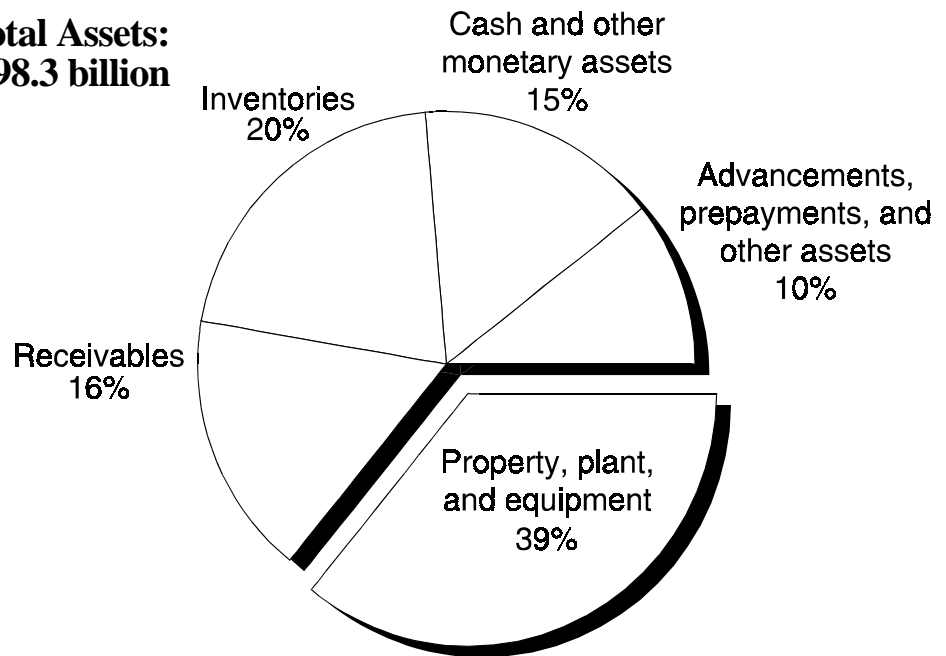

² Does not include interest on investments held by Government agencies.

³ Departmental agencies with expenses less than \$50 billion.

Major Categories of Assets as of September 30, 1995

Assets are resources owned by or owed to the Federal Government that are available to pay liabilities or to provide future public services. The chart below is derived from the Statement of Financial Position. It depicts the major categories of assets as of September 30, 1995, as a percentage of total assets.

**Total Assets:
\$1,298.3 billion**

Assets, Liabilities, and Accumulated Position, as of September 30, 1995 and 1994

The chart at right depicts assets, liabilities, and accumulated position reported in the Statement of Financial Position, as of September 30, 1995 and 1994.

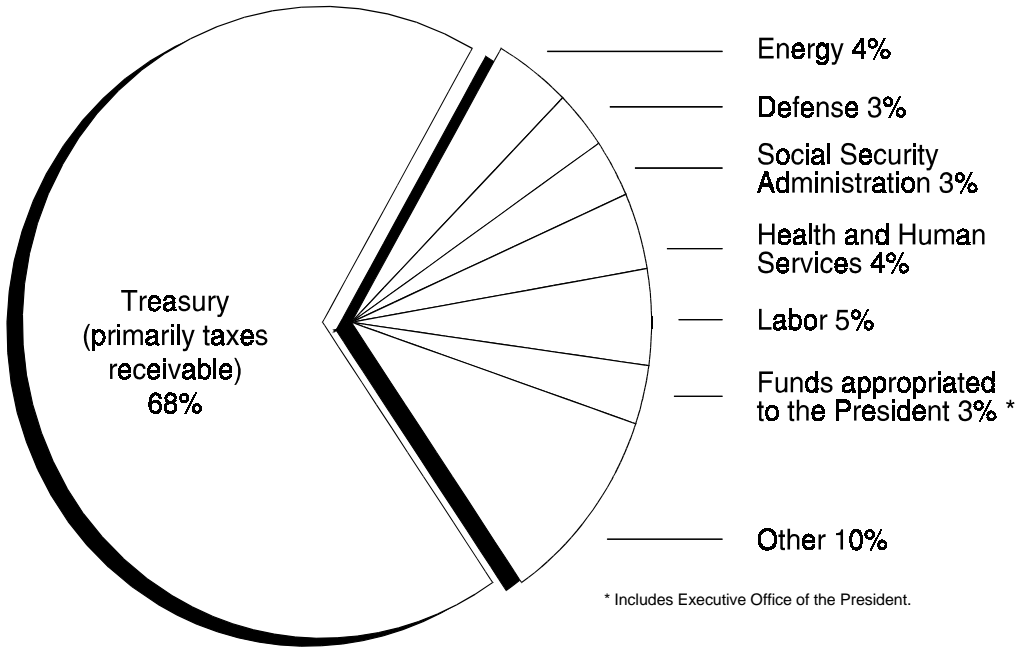

(In billions of dollars)

Gross Accounts and Loans Receivable

The amounts in these graphs were derived from the agencies' adjusted trial balances (ATB) as reported on the Federal Agencies' Centralized Trial-Balance System (FACTS). These gross amounts, less allowances of \$79.4 billion and \$68.8 billion for accounts receivable and loans receivable, respectively, are included in the Statement of Financial Position.

Accounts Receivable Total: \$166.6 billion

Loans Receivable Total: \$189.6 billion

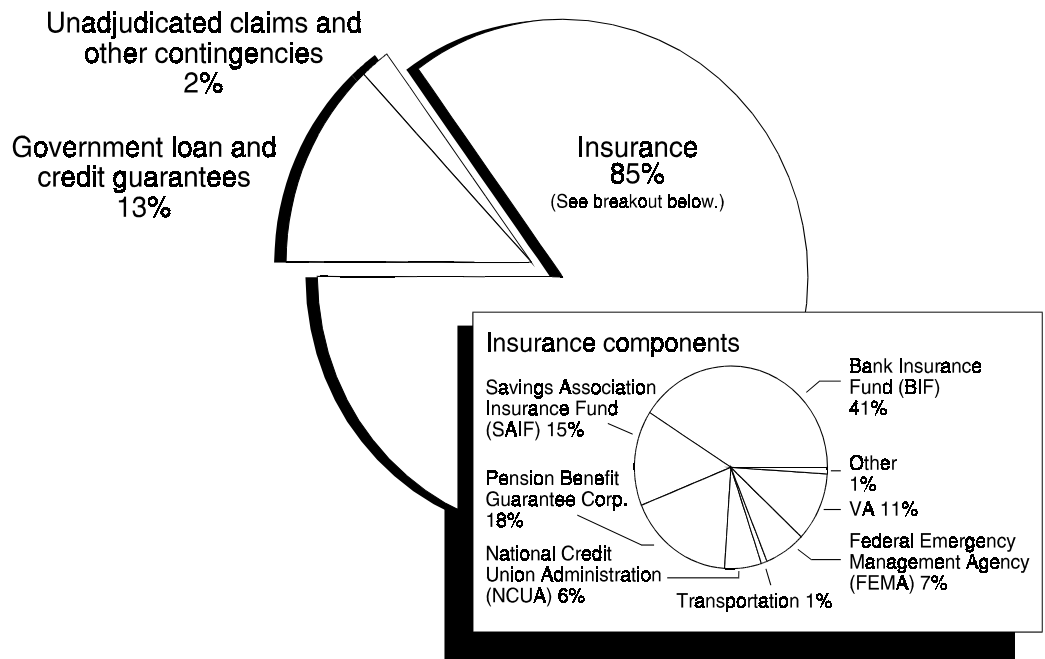

Commitments and Contingencies

Commitments are long-term contracts for which appropriations have not been provided by the Congress and undelivered orders representing obligations. Contingencies are liabilities involving uncertainty as to a possible loss to the Government that will be resolved when one or more future events occur or fail to occur.

Contingencies (at face value)

Total: \$5,419.5 billion

Federal Debt

The following charts represent different facets of the net Federal debt, excluding intragovernment investments.

INTRODUCTION

The tables and charts in this section present the most recent data available on various trust funds administered by the Treasury. Trust funds are moneys held by the Government in accounts established by law or by trust agreement for specific purposes and designated by law as being trust funds.

This report compiles data from many sources and provides information in a consolidated manner.

The Civil Service Retirement and Disability Fund is operated by the Office of Personnel Management. The Federal Hospital Insurance and Federal Supplementary Medical Insurance Trust Funds are under the auspices of the Department of Health and Human Services' Health Care Financing Administration. The Federal Old-age and Survivors Insurance and Federal Disability Insurance Trust Funds are administered by Social Security.

In addition, the Department of Veterans Affairs' Veterans Benefits Administration disburses the National Service Life Insurance Fund. And the Department of Labor, Employment and Training Administration is responsible for the Unemployment Trust Fund.

Data for the Railroad Retirement Trust Fund are also included in this section. That trust fund is administered by the Railroad Retirement Board, an independent agency.

The following tables are published in the December issue of the "Treasury Bulletin" each year. Most of the data for the tables came from the "Monthly Treasury Statement of Receipts and Outlays of the United States Government," in which monthly data are published. Estimated figures are based on the "Budget of the United States Government, Fiscal Year 1997," released March 1996.

TABLE TF-15A.--Highway Trust Fund

The following data on the status of the unfunded authorizations and future revenue estimates for the Highway Account and Mass Transit Account of the Highway Trust Fund is provided in accordance with the provisions of Section 9503 of the Internal Revenue Code of 1986. The "Byrd Amendment" for the Highway Account requires that unfunded authorizations at the end of any year be less than estimated income for the following 2 years (24 months). The "Rostenkowski Amendment" requires that the unfunded authorizations be less than the income for the following year (12 months) for the Mass Transit Account. Unfunded authorizations are defined as commitments (i.e., unobligated balances and unpaid obligations) in excess of the cash balance in the trust fund account at the end of any given year.

The intent of the Byrd and Rostenkowski amendments is to insure that the Highway and Mass Transit Accounts remain solvent. If, for any year, the unfunded authorizations are

greater than the estimated income for the next 1 or 2 years, as appropriate, across-the-board cuts in transit or highway apportionments are required.

The unfunded authorizations for the Highway and Mass Transit Accounts are estimated by the Department of Transportation. The 24- and 12-month estimates of income are derived from the Department of Treasury's Office of Tax Analysis and the Department of Transportation.

As the data shows, both the Highway Account and Mass Transit Account are solvent and meet the applicable requirement for income greater than the unfunded balance. Income to the Highway Account is \$11,040 million above the amount required to cover the unfunded authorization at the end of fiscal 1995. The cash balance in the Mass Transit Account is greater than commitments, resulting in a negative unfunded balance. New annual data appears in the March issue of the "Treasury Bulletin."

Highway Account

[In millions of dollars. Source: Department of Transportation]

Commitments (unobligated balances plus unpaid obligations, end-of-year fiscal 1995)	44,199
Less:	
Cash balance (fiscal 1995)	9,421
Unfunded authorizations (fiscal 1995)	<u>34,777</u>
24-month income estimate (fiscal 1996 and 1997)	45,817

Note.--Income is greater than unfunded authorization, so the requirement is met.

Mass Transit Account

[In millions of dollars. Source: Department of Transportation]

Commitments (unobligated balances plus unpaid obligations, end-of-year fiscal 1995)	5,284
Less:	
Cash balance (fiscal 1995)	9,579
Unfunded authorizations (fiscal 1995)	<u>-4,294</u>
12-month income estimate (fiscal 1996)	3,640

Note.--Income is greater than unfunded authorization, so the requirement is met.

Glossary

With References to Applicable Sections and Tables

Accrued discount (SBN-1, -2, -3)—Interest that accumulates on savings bonds from the date of purchase until the date of redemption or final maturity, whichever comes first. Series A, B, C, D, E, EE, F, and J are discount or accrual type bonds—meaning principal and interest are paid when bonds are redeemed. Series G, H, HH, and K are current-income bonds, and the semiannual interest paid to their holders is not included in accrued discount.

Amounts outstanding and in circulation (USCC)—Includes all issues by the Bureau of the Mint purposely intended as a medium of exchange. Coins sold by the Bureau of the Mint at premium prices are excluded; however, uncirculated coin sets sold at face value plus handling charge are included.

Average discount rate (PDO-2, -3)—In Treasury bill auctions, purchasers tender competitive bids on a discount rate basis. The average discount rate is the weighted, or adjusted, average of all bids accepted in the auction.

Budget authority (“Federal Fiscal Operations”)—Congress passes laws giving budget authority to Government entities, which gives the agencies the power to spend Federal funds. Congress can stipulate various criteria for the spending of these funds. For example, Congress can stipulate that a given agency must spend within a specific year, number of years, or any time in the future.

The basic forms of budget authority are appropriations, authority to borrow, and contract authority. The period of time during which Congress makes funds available may be specified as 1-year, multiple-year, or no-year. The available amount may be classified as either definite or indefinite; a specific amount or an unspecified amount can be made available. Authority may also be classified as current or permanent. Permanent authority requires no current action by Congress.

Budget deficit—The total, cumulative amount by which budget outlays (spending) exceed budget receipts (income).

Cash management bills (PDO-2)—Marketable Treasury bills of irregular maturity lengths, sold periodically to fund short-term cash needs of Treasury. Their sale, having higher minimum and multiple purchase requirements than those of other issues, is generally restricted to competitive bidders.

Competitive tenders (“Treasury Financing Operations”)—A bid to purchase a stated amount of one issue of Treasury securities at a specified yield or discount. The bid is accepted if it is within the range accepted in the auction. (See Noncompetitive tenders.)

Coupon issue—The issue of bonds or notes (public debt).

Currency no longer issued (USCC)—Old and new series gold and silver certificates, Federal Reserve notes, national bank notes, and 1890 Series Treasury notes.

Current income bonds (“U.S. Savings Bonds and Notes”)—Bonds paying semiannual interest to holders. Interest is not included in accrued discount.

Debt outstanding subject to limitation (FD-6)—The debt incurred by the Treasury subject to the statutory limit set by Congress. Until World War I, a specific amount of debt was

authorized to each separate security issue. Beginning with the Second Liberty Loan Act of 1917, the nature of the limitation was modified until, in 1941, it developed into an overall limit on the outstanding Federal debt. As of September 1996, the debt limit was \$5,500,000 million; the limit may change from year to year.

The debt subject to limitation includes most of Treasury’s public debt except securities issued to the Federal Financing Bank, upon which there is a limitation of \$15 billion, and certain categories of older debt (totaling approximately \$595 million as of February 1991).

Discount—The interest deducted in advance when purchasing notes or bonds. (See Accrued discount.)

Discount rate (PDO-2)—The difference between par value and the actual purchase price paid, annualized over a 360-day year. Because this rate is less than the actual yield (coupon-equivalent rate), the yield should be used in any comparison with coupon issue securities.

Dollar coins (USCC)—Include standard silver and nonsilver coins.

Domestic series (FD-2)—Nonmarketable, interest and non-interest-bearing securities issued periodically by Treasury to the Resolution Funding Corporation (RFC) for investment of funds authorized under section 21B of the Federal Home Loan Bank Act (12 U.S.C. 1441b).

Federal intrafund transactions (“Federal Fiscal Operations”)—Intrabudgetary transactions in which payments and receipts both occur within the same Federal fund group (Federal funds or trust funds).

Federal Reserve notes (USCC)—Issues by the U.S. Government to the public through the Federal Reserve banks and their member banks. They represent money owed by the Government to the public. Currently, the item “Federal Reserve notes—amounts outstanding” consists of new series issues. The Federal Reserve note is the only class of currency currently issued.

Foreign (“Foreign Currency Positions,” IFS-2, -3)—(international) Locations other than those included under the definition of the United States. (See United States.)

Foreigner (“Capital Movements,” IFS-2)—All institutions and individuals living outside the United States, including U.S. citizens living abroad, and branches, subsidiaries, and other affiliates abroad of U.S. banks and business concerns; central governments, central banks, and other official institutions of countries other than the United States, and international and regional organizations, wherever located. Also, refers to persons in the United States to the extent that they are known by reporting institutions to be acting for foreigners.

Foreign official institutions (“Capital Movements”)—Includes central governments of foreign countries, including all departments and agencies of national governments; central banks, exchange authorities, and all fiscal agents of foreign national governments that undertake activities similar to those of a treasury, central bank, or stabilization fund; diplomatic

Glossary

and consular establishments of foreign national governments; and any international or regional organization, including subordinate and affiliate agencies, created by treaty or convention between sovereign states.

Foreign public borrower (“Capital Movements”)—Includes foreign official institutions, as defined above, the corporations and agencies of foreign central governments, including development banks and institutions, and other agencies that are majority-owned by the central government or its departments; and state provincial and local governments of foreign countries and their departments and agencies.

Foreign-targeted issue (PDO-1, -3)—Foreign-targeted issues were notes sold between October 1984 and February 1986 to foreign institutions, foreign branches of U.S. institutions, foreign central banks or monetary authorities, or to international organizations in which the United States held membership. Sold as companion issues, they could be converted to domestic (normal) Treasury notes with the same maturity and interest rates. Interest was paid annually.

Fractional coins (USCC)—Coins minted in denominations of 50, 25, and 10 cents, and minor coins (5 cents and 1 cent).

Government account series (FD-2)—Certain trust fund statutes require the Secretary of the Treasury to apply monies held by these funds toward the issuance of nonmarketable special securities. These securities are sold directly by Treasury to a specific Government agency, trust fund, or account. Their rate is based on an average of market yields on outstanding Treasury obligations, and they may be redeemed at the option of the holder. Roughly 80 percent of these are issued to five holders: the Federal Old-age and Survivors Insurance Trust Fund; the civil service retirement and disability fund; the Federal Hospital Insurance Trust Fund; the military retirement fund; and the Unemployment Trust Fund.

Interfund transactions (“Federal Fiscal Operations”)—Transactions in which payments are made from one fund group (either Federal funds or trust funds) to a receipt account in another group.

International Monetary Fund (“Exchange Stabilization Fund,” IFS-1)—(IMF) Established by the United Nations, the IMF promotes international trade, stability of exchange, and monetary cooperation. Members are allowed to draw from the fund.

Intrabudgetary transactions (“Federal Fiscal Operations”)—These occur when payment and receipt both occur within the budget, or when payment is made from off-budget Federal entities whose budget authority and outlays are excluded from the budget totals.

Matured non-interest-bearing debt (SBN-1, -2, -3)—The value of outstanding savings bonds and notes that have reached final maturity and no longer earn interest. Includes all Series A-D, F, G, J, and K bonds. Series E bonds (issued between May 1941 and November 1965), Series EE (issued since January 1980), Series H (issued from June 1952 through December 1979), and savings notes issued between May 1967 and October 1970 have a final maturity of 30 years. Series HH bonds (issued since January 1980) mature after 20 years.

Noncompetitive tenders (“Treasury Financing Operations”)—Offers by an investor to purchase Treasury securities

at the price equivalent to the weighted average discount rate or yield of accepted competitive tenders in a Treasury auction. Noncompetitive tenders are always accepted in full.

Off-budget Federal entities (“Federal Fiscal Operations”)—Federally owned and controlled entities whose transactions are excluded from the budget totals under provisions of law. Their receipts, outlays, and surplus or deficit are not included in budget receipts, outlays, or deficits. Their budget authority is not included in totals of the budget.

Outlays (“Federal Fiscal Operations”)—(expenditures, net disbursements) Payments on obligations in the form of cash, checks, the issuance of bonds or notes, or the maturing of interest coupons.

Own foreign offices (“Capital Movements”)—Refers to U.S. reporting institutions’ parent organizations, branches and/or majority-owned subsidiaries located outside the United States.

Par value—The face value of bonds or notes, including interest.

Quarterly financing (“Treasury Financing Operations”)— Treasury has historically offered packages of several “coupon” security issues on the 15th of February, May, August, and November, or on the next working day. These issues currently consist of a 3-year note, a 10-year note, and a 30-year bond. Treasury sometimes offers additional amounts of outstanding long-term notes or bonds, rather than selling new security issues. (See Reopening.)

Receipts (“Federal Fiscal Operations”)—Funds collected from selling land, capital, or services, as well as collections from the public (budget receipts), such as taxes, fines, duties, and fees.

Reopening (PDO-3, -4)—The offer for sale of additional amounts of outstanding issues, rather than an entirely new issue. A reopened issue will always have the same maturity date, CUSIP-number, and interest rate as the original issue.

Special drawing rights (“Exchange Stabilization Fund,” IFS-1)—International assets created by IMF that serve to increase international liquidity and provide additional international reserves. SDRs may be purchased and sold among eligible holders through IMF. (See IMF.)

SDR allocations are the counterpart to SDRs issued by IMF based on members’ quotas in IMF. Although shown in exchange stabilization fund (ESF) statements as liabilities, they must be redeemed by ESF only in the event of liquidation of, or U.S. withdrawal from, the SDR department of IMF or cancellation of SDRs.

SDR certificates are issued to the Federal Reserve System against SDRs when SDRs are legalized as money. Proceeds of monetization are deposited into an ESF account at the Federal Reserve Bank of New York.

Spot (“Foreign Currency Positions”)—Due for receipt or delivery within 2 workdays.

State and local government series (FD-2)—(SLUGs) Special nonmarketable certificates, notes, and bonds offered to State and local governments as a means to invest proceeds from their own tax-exempt financing. Interest rates and maturities comply with IRS arbitrage provisions. SLUGs are

Glossary

offered in both time deposit and demand deposit forms. Time deposit certificates have maturities of up to 1 year. Notes mature in 1 to 10 years and bonds mature in more than 10 years. Demand deposit securities are 1-day certificates rolled over with a rate adjustment daily.

Statutory debt limit (FD-6)—By Act of Congress there is a limit, either temporary or permanent, on the amount of public debt that may be outstanding. When this limit is reached, Treasury may not sell new debt issues until Congress increases or extends the limit. For a detailed listing of changes in the limit since 1941, see the Budget of the United States Government. (See Debt outstanding subject to limitation.)

STRIPS (PDO-1, -3)—Separate Trading of Registered Interest and Principal Securities. Long-term notes and bonds may be divided into principal and interest-paying components, which may be transferred and sold in amounts as small as \$1,000. STRIPS are sold at auction at a minimum par amount,

varying for each issue. The amount is an arithmetic function of the issue's interest rate.

Treasury bills—The shortest term Federal security (maturity dates normally varying from 3 to 12 months), they are sold at a discount.

Trust fund transaction (“Federal Fiscal Operations”)—An intra-budgetary transaction in which both payments and receipts occur within the same trust fund group.

United States—Includes the 50 States, District of Columbia, Commonwealth of Puerto Rico, American Samoa, Midway Island, Virgin Islands, Wake Island, and all other territories and possessions.

U.S. notes (USCC)—Legal tender notes of five different issues: 1862 (\$5-\$1,000 notes); 1862 (\$1-\$2 notes); 1863 (\$5-\$1,000 notes); 1863 (\$1-\$10,000 notes); and 1901 (\$10 notes).
