National Center for Immunization and Respiratory Diseases

ACIP Tdap Recommendations

2005

- Adolescents aged 11 through 18 should receive a single dose of Tdap instead of Td for booster immunization against tetanus, diphtheria, and pertussis if they have completed the recommended childhood DTP/DTaP vaccination series.

2006

- Adults aged 19 through 64 years old and have not previously received a dose of Tdap, a single dose of Tdap should replace a single dose of Td for booster.
