¹ Information provided with permission from ARUP laboratories or TM Biosciences

² All variants comprising the haplotype have not been determined. Allelic haplotypes are inferred by signature mutations.

³ Tag-It = TM Bioscience P450-2C9 Mutation Detection Product

⁴ nmd = no mutation detected

⁵ Genotype nomenclature listed by genomic position ("A" of the translational start codon based on AL359672) with cDNA

⁶ *1 allele lacks polymorphic sites characteristic of CYP2C9 *2, *3, *4, *5, *8 and *11.
