IAFC & FFFIPP

- Consistent reference for safety initiatives.
- Trusted broker for fire fighter fatality reports.

Recommendations

- Department culture and human error are two significant factors that contribute to fire fighter fatalities. They currently are not included in reports.
- IAFC recommends an element be added to the investigation process that evaluates the role fire department culture and human behavior play in the incident.

Recommendations

- Add a directed element the FFFIPP.
 - Cite applicable, relevant NFPA or other best practices that, if used, could have changed the outcome.
 - Report on actions taken by department to prevent further occurrence.
 - Develop discussion questions for each report that firefighters can use to focus on lessons learned.
