

## **Grand Mesa, Uncompahgre and Gunnison National Forest-PPOW**

Along with other national forests around the state and country, the Grand Mesa, Uncompahgre and Gunnison National Forests (GMUG) have finished inventorying and making recommendations for the proposed future management of a variety of developed recreation sites across the Forest. These sites include trailheads, picnic sites, scenic pull-outs and campgrounds.

The document below is 21 pages in length and contains the entire Preliminary Program of Work (PPOW) for the GMUG. It is a document that is standardized across the Forest Service and that each national forest must complete. It is a lengthy document that details the information required for the Recreation Facility Analysis (RFA) for those who want more extensive and detailed information about the RFA.

***It is important to remember that no decisions have been made in the RFA! This is a preliminary outline of work out for public review and comment.***

On page 13 of the PPOW you will find the table of tasks which corresponds to the simplified spreadsheet that is available on the GMUG website. There may be some differences between this table and the website spreadsheet. The website spreadsheet is the more current, as errors have been corrected, we have tried to provide greater clarity in the actions recommended, and we have recommended different actions in a few cases.

General questions about the Recreation Facility Assessment can be directed to Lee Ann Loupe at 970.874.6717 or Chiara Palazzolo at 970.874.6671. Questions involving site-specific information should be directed to the following person(s):

- **Grand Valley Ranger District:** Connie Clementson 970.263.5804 or Loren Paulson 70.263.5812
- **Gunnison Ranger District:** Bill Jackson, 970.641.0471
- **Norwood and Ouray Ranger Districts:** Kathy Peckham, 970.240.5418 or 970.327.4261
- **Paonia Ranger District:** Levi Broyles, 970.527.4131

## 1. INTRODUCTION

This document is a living, working road map to guide the Forest in providing a quality, sustainable recreation sites program. It describes the vision for the overall Forest recreation program and outlines proposals specific to individual developed recreation sites.

The proposals and guidance contained in this document were developed through, and are the end result of, the national Recreation Facility Analysis (RFA) process. Existing and projected visitor demands, recreation program niche, resource conditions, links to the community, program costs, and revenue were all considered in developing proposals.

This document will serve as a framework from which the Forest will prioritize investments, and pursue changes in operations or maintenance of recreation sites. Proposals are wholly consistent with the Rocky Mountain Region's "Recreation Strategy", and the Grand Mesa, Uncompahgre & Gunnison Forest Land and Resource Management Plan.

The Forest recognizes that site-specific analysis and public involvement may be necessary prior to implementing some of the proposals contained in this document. As implementation of site-specific proposals are considered, they will be evaluated to determine if they are subject to the National Environmental Policy Act (NEPA) and all required procedures shall be executed.

The Forest also recognizes that proposals relating to fees will require consistency with criteria outlined in the Recreation Enhancement Act (REA) and coordination with the appropriate Recreation Resource Advisory Committee (RRAC).

## 2. SUMMARY - Programmatic Results of Implementation

### A. BRIEF DESCRIPTION OF PROCESS

The purpose of the Recreation Facility Analysis process is to display the tasks needed over the next 5 years to bring the Forest's recreation infrastructure into alignment with the resources available to operate and maintain it to standard. Many of our facilities were built 30-50 years ago and have reached the end of their useful life without significant deferred maintenance investment. Other facilities receive no or little use, and no longer serve the demand that existed 30-50 years ago. The fundamental premise of the program of work is to create an inventory which is sufficiently sustainable and flexible to be adapted annually to any changes in available resources. The program of work has been developed to meet the following objectives:

- Operate and maintain sites to standard within available revenue stream.
- Reduce deferred maintenance by 20% over the 5 year life of the program of work.
- Focus available resources on sites which conform most closely to the Forest Recreation Program Niche.
- Maintain and enhance customer satisfaction with available sites.

The RFA process defines the proposed actions for management of forest recreation sites in order to meet the desired future condition that aligns with the Forest Plan. For purposes of the analysis and planning for future proposed actions, four categories (A-D) of proposed management are used. These categories are:

- 1) Category A: sites that are under some type of operational or contractual agreement whose terms are longer than the 5-year period of the RFA.
- 2) Category B: sites that meet the unit niche; are environmentally sustainable within the capability and capacity of the natural resources; are supported by and provide support to local communities; and have a sustainable management cost-benefit ratio.
- 3) Category C: sites that do not meet all of the above criteria, but with a combination of mitigation, additional resources, or other type of action could be made to qualify for Category B status.
- 4) Category D: sites that do not meet all of the (Category B) criteria; or fall sufficiently short in one or more of the criterion so as to render the capability of meeting it unsustainable. These sites may be managed for dispersed recreation opportunities.

Sites were evaluated and ranked based on conformance to the forest niche and amount of recreation use (35%), financial efficiency (35%), and environmental and community sustainability (30%).

Some sites were identified as non-discretionary based primarily on existing agreements such as concession permits.

B. FOREST RECREATION NICHE

November 9, 2005 Niche Statement (for coming decade)

**It's the Geography – Plateaus to Peaks**

**Scenery and an abundance of opportunities for access draw you in and trails lead the way to the rugged canyons, big mountains, wildlife, and history of the Grand Mesa, Uncompahgre, and Gunnison National Forests. Over three thousand miles of trails and routes provide access to areas of rugged beauty and solitude. Many were carved by indigenous peoples, early explorers, and miners, and offer an experience that connects users to the land and to the prehistoric and historic past. The topography allows the forest to provide trails—beginner to extreme—all year. The mountains, plateau, and mesa that make up the forest will always provide a scenic backdrop and thus a component of the quality of life in the area.**

**Settings, Special Places, and Values:** Driving into the area where the Rocky Mountains begin their dramatic ascent, the Grand Mesa, the Uncompahgre Plateau, and the San Juans come into view and entice you to experience them up close. Their ruggedness and solitude grip even the seasoned traveler. This is the closest you will come to a wilderness experience in a passenger car. Historic uses, such as mining, logging, and ranching are evident along corridors and in the backcountry. Agriculture has always been part of the landscape, working to further develop natural water resources that make up some of the 300+ lakes and reservoirs on the Mesa. Providing respite from the valley heat, the Forest is also a destination for those seeking out the nationally known 14,000 foot peaks.

Concentrated Dispersed – Corridors with a few isolated areas that are large enough to include more than one road.

Undeveloped – Vast areas of undeveloped open space, which includes 10 designated Wilderness Areas, and numerous backcountry areas outside Wilderness. The ecology ranges from high elevation mixed conifers to low elevation sagebrush and pinion pine. Rolling foothills and mountain slopes, high desert to mountain tundra.

Scenic Corridors – World class National Scenic Byways and driving corridors, high elevation mountain passes with expansive vistas and the largest aspen stand in the world.

General Dispersed – These areas are characterized by numerous roads and trails that offer access to year round forest-based activities.

Winter – Areas with enough snow during the winter to support winter recreation. They overlap other settings during non-winter months.

**Activities/Opportunities/Experiences:** A myriad of summer trail opportunities invite you to step up to the Forest on foot, on bicycle, in your car or 4-wheel drive, or on your ATV. The GMUG offers opportunities similar to other Rocky Mountain Forests, and also offers extreme terrain for winter uses (heliskiing, ice climbing, black diamond skiing), trail uses (high elevation ATV, jeeping, mountain biking, mountaineering), and large expanses of backcountry outside designated Wilderness areas. A managed ATV trail and road system provides premier riding experiences, while protecting the environment. Recreation on the GMUG is influential in providing commercial opportunities in the area. Small communities benefit from tourism, while resort areas and communities offer high-amenity services, along with a variety of recreation special uses. Resorts and outfitter guides offer enhanced experiences and are a way to convey interpretive and educational messages.

Concentrated Dispersed – ([working toward] Designated???) Managed dispersed camping serving families and groups, hunting and fishing, often with more concentrated use.

Undeveloped – Backcountry hiking, backpacking, climbing, hunting, horse packing all on a variety of terrain from easy access plateau for day use to rugged and remote multi-day trips that provide challenge and solitude.

Scenic Corridors – Driving for pleasure, viewing scenery, developed campgrounds as needed to protect the resource. Developed recreation on a few roads is on the low end of the development scale to compliment the setting. The Grand Mesa Visitor Center provides an opportunity to share the forest with large numbers of visitors.

General Dispersed – Designated routes and trails for ATV riding, bicycling, hiking, driving for pleasure and scenery, and for horseback riding, Hunting and fishing occur Forest wide.

Winter – Snowmobile riding on and off groomed trails, cross country skiing, snowshoeing, downhill skiing, heliskiing, nordic skiing, and ice climbing.

**Primary Visitors**

Local	Visitors within 1.5 hours, frequent users of the entire forest
Long Weekenders	Visitors from more than 1.5 to 5 hours away, use the undeveloped areas and scenic corridors in summer and fall, and during the winter, they use the whole forest for snowmobile riding, snowshoeing, and skiing.
National/International	Resort and destination visitors use the forest, year-round, including the resorts and resort communities in the winter.

<b>Setting Management</b> How will the setting be managed to support the niche emphasis?	Dispersed areas serving families and groups.			Maintain rugged, remote, quiet, solitude experience			Highly developed access (to and through) the Forest and backcountry. Maintain vistas/views			Provide trails and access to solitude and scenic beauty.			Provide road and trail access to dispersed activities.		
<b>Setting Appropriateness</b> To what degree is the setting appropriate for developed sites?	Moderate			Low			High			Moderate			Moderate		
<b>Site Function</b> How should sites function to help meet the niche emphasis?	Protect the water resource and move toward designating dispersed camping spots.			Protect the 14,000 peaks (trail armoring and management); define & limit ATV uses.			Provide a destination or take-off point to backcountry, and safe driving routes.			Provide primarily non-motorized access into areas for solitude & dispersed activities			Provide routes and access points for winter activities		
<b>Key Activities</b> in support of the niche emphasis for the coming decade	Dispersed camping, hunting, fishing, motorized and non-motorized activities			Hiking, backpacking, climbing, mountaineering, hunting, horse packing, fishing			Rustic developed camping, driving, viewing, river & lake fishing, rafting,			Historic, scenic, non-motorized and motorized trails, hunting, dispersed camping			Snowmobile riding, X-country skiing, snow shoeing, winter camping, ice climbing, sledding.

Apply for additional trail maintenance dollars with local users as partners in management.</p>														

**\*\* . Development Scale** The classification of the scale of development of recreation sites. Scale ranges from 0, “No Site Modification” to 5, “Extensive Site Modification”. Development scales are defined by levels of site modifications, type of construction materials used, management controls, design style, development density, and services.

(See APPENDIX A).

C. CRITICAL MONETARY FACTORS

This matrix displays asset and expense information for the Forest Recreation Sites program before and after 5-year Program of Work development.

\*-Deferred Maintenance included for all sites except CATEGORY D

**Deferred Maintenance.** "Maintenance that was not performed when it should have been or when it was scheduled and which, therefore, was put off or delayed for a future period."

When allowed to accumulate without limits or consideration of useful life, deferred maintenance leads to deterioration of performance, increased costs to repair, and decrease in asset value.

D. INVENTORY

The Inventory Matrix displays the recreation site inventory characteristics before and after 5-year Program of Work development. It displays by site type and display other recreation site program characteristics including capacity, number of sites with drinking water and waste water systems, and the annual maintenance cost for drinking and waste water systems and buildings.

Annual O&M Cost per visit and per PAOT day are averages derived from a summation of ALL the 138 analyzed recreation facilities on the Forest; the cost per visit and per PAOT for each site and site type will vary.

PAOT - An acronym for Persons-At-One-Time; a measure of facility or site designed recreation carrying capacity, particularly for developed sites. National conventions include 5 persons per family picnic/camp unit, 3.5 persons per parking lot stall at a trailhead or visitor center, 1.5 persons per motorcycle parking stall and 40 persons per tour bus parking stall.

O&M - Operations and maintenance; includes the activities and resources required to annually operate and maintain recreation sites at a level of quality which meets their management objectives and customer satisfaction. Costs associated with O&M are generally recurrent, as opposed to capital investment costs that are generally one-time and non-recurrent.
