# **Multiparty Monitoring and Assessment Guidelines for Community Based Forest Restoration in Southwestern Ponderosa Pine Forests**

**February 4, 2003**

# Table of Contents

<b>Chapter One: Introduction and Overview .....</b>	<b>1</b>
<b>Chapter Two: The Multiparty Monitoring Process .....</b>	<b>11</b>
Developing a multiparty process .....	11
Examples of multiparty monitoring processes .....	15
Skills and tools .....	16
Outreach and communication .....	17
Credibility of the monitoring process and results .....	19
<b>Chapter Three: Ecological Goals and Indicators .....</b>	<b>21</b>
Choosing ecological monitoring and goals .....	21
Goals and indicators .....	22
<b>Chapter Four: Socioeconomic Goals, Indicators, and Measures .....</b>	<b>27</b>
Choosing socioeconomic goals, indicators, and measures .....	27
Goals, indicators and measures .....	28
<b>Chapter Five: Ecological Monitoring Tools and Methods .....</b>	<b>45</b>
General features of an ecological sampling design .....	45
Control sites .....	47
Creating a sampling design .....	47
Sampling .....	47
Collecting ecological data: How often and how long .....	53
Analyzing collected data .....	53
Managing ecological data .....	54
Data storage and archiving .....	54
Resources .....	54
<b>Chapter Six: Socioeconomic Monitoring Tools and Methods.....</b>	<b>57</b>
Surveys and interviews.....	57
Direct (or participant) observation .....	62
Focus groups.....	63
Using data collected by others.....	63
Resources.....	67
<b>Appendix I: Glossary.....</b>	<b>69</b>
<b>Appendix II: Recommended measures, data sources, and methods for select socioeconomic monitoring indicators.....</b>	<b>73</b>
<b>Appendix III: References .....</b>	<b>85</b>
<b>Appendix IV: Sample Data Sheets for Ecological Monitoring.....</b>	<b>87</b>
<b>Appendix V: Participant List for Monitoring Guidelines .....</b>	<b>91</b>
<b>List of Figures</b>	
Figure 1. Adaptive management model.....	7
Figure 2. The multiparty monitoring process .....	19
<b>List of Tables</b>	
Table 1. Sample goals and indicators for monitoring ponderosa pine forest restoration.....	9
Table 2. Summary of Indicators and Sampling Requirements.....	46
Table 3. Sample Indicator: Business Retention and Growth.....	73

## Table of Contents

Table 4. Sample Indicator: Community Sustainability.....	73
Table 5. Sample Indicator: Financial Capital.....	74
Table 6. Sample Indicator: Local Infrastructure.....	74
Table 7. Sample Indicator: Workforce Capacity.....	76
Table 8. Sample Indicator: Value-added Forest Products Industry.....	76
Table 9. Sample Indicator: Market for Local Restoration Products.....	77
Table 10. Sample Indicator: Supply of and Access to Forest Resources.....	77
Table 11. Sample Indicator: Distribution of Work (both contracts and employment) Within the Community.....	78
Table 12. Sample Indicator: Distribution of Projects across Communities.....	78
Table 13. Sample Indicator: Traditional Forest Users' Values Related to Forests, Forest Products, and Resource Use and Utilization of Their Knowledge and Practices in Restoration Projects.....	78
Table 14. Sample Indicator: Employment Conditions in Restoration-related Industries for local and mobile workforce.....	79
Table 15. Sample Indicator: Community Access to Forest Resources.....	79
Table 16. Sample Indicator: Risk of Catastrophic Wildfire.....	79
Table 17. Sample Indicator: Community Understanding of Forest Health Issues.....	80
Table 18. Sample Indicator: Educational and Training Opportunities in the Forest Restoration.....	80
Table 19. Sample Indicator: Level of Community Participation in Forest Restoration..	80
Table 20. Sample Indicator: Quality and Timeliness of USDA Forest Service Communication.....	82
Table 21. Sample Indicator: Commitment to Monitoring.....	83
Table 22. Sample Indicator: Technical Assistance in Forest Ecology, Fire Behavior, Monitoring Methods etc.....	83
